LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Acme White Lead and Color Works, Detroit, Mich. Prepared paints, varnishes, lacquers, etc. Serial No. 362,339; May 7. Class 16.

Adams, Wilbur Henry, & Associates, Cleveland, Ohio. Lumber, glass tile, finished building stone, etc. Serial No. 361,492; May 7. Class 12.

Alkadent Company. (See Rabinow, Harry L.)

Alto Products Company, Philadelphia, Pa. Coffee, salt, olives, etc. Serial No. 362,206; May 7. Class 46.

American Memorial Company, Atlanta, Ga. Tombstones and monuments. Serial No. 356,752; May 7. Class 50.

American Safety Razor Corporation, Brooklyn, N. Y. Shaving brushes. Serial No. 362,936; May 7. Class 29.

Anodex Laboratories. (See VonDellen, Arthur W.)

Asturr Trading Company, Inc., New York, N. Y. Gin, whiskey, and brandy. Serial No. 362,208; May 7. Class 49.

Atkins & Durbrow, Inc., New York, N. Y. Fertilizer and soil builder. Serial No. 362,864; May 7. Class 10.

Asa Mfg. Co., Chicago, Ill. Dancing shoe plates. Serial No. 349,357; May 7. Class 13.

Bacon Bottling Company, Hartford, Conn. Whiskey, gin, rum, etc. Serial No. 362,008; May 7. Class 49.

Baumberger, R. T., doing business as Travel-Ome Trailer Company, Los Angeles, Calif. Vehicles used as trailers for motor vehicles. Serial No. 360,264; May 7. Class 19.

Beeman, George W., Detroit, Mich. Lather type shaving cream. Serial No. 359,770; May 7. Class 4.

Beeman, George W., Detroit, Mich. Brushless shaving cream. Serial No. 359,771; May 7. Class 4.

Beeman, George W., Detroit, Mich. Cream skin conditioner. Serial No. 359,772; May 7. Class 6.

Belfrage, Frank B., doing business as LaMarge Products Company, Kansas City, Mo. Syringes and rubber water bags. Serial No. 362,660; May 7. Class 44.

Bellnker, Kenneth, doing business as Kenbel Products, Philadelphia, Pa. Liquid deodorant, cleaner and disinfectant. Serial No. 362,163; May 7. Class 6.

Belle Knitting Mills. (See Koeningsberg Brothers.)

Berger, Max, doing business as Pride of the Family Products Co., New York, N. Y. Foods—namely, catsup. Serial No. 363,088; May 7. Class 46.

Bethlehem Steel Company, Bethlehem, Pa. Wire bale ties. Serial No. 362,012; May 7. Class 13.

Bickum, Dorothy, New York, N. Y. Corsets, corselets, Brassières, etc. Serial No. 362,103; May 7. Class 39.

Biltmore Hotel. (See Long, Baron.)

Blackstock, Carl, doing business as Blackstock Lumber Co., Seattle, Wash. Shake lumber. Serial No. 362,661; May 7. Class 12.

Böhme, H. Th., Aktiengesellschaft, Chemnits, Germany. Chemical dye aids. Serial Nos. 362,211–18; May 7. Class 6.

Bon-Ton, Incorporated, Chicago, Ill. Distilled liquors. Serial No. 360,876; May 7. Class 49.

Botany Worsted Mills, Passaic, N. J. Woolen and worsted piece goods. Serial No. 350,077; May 7. Class 42.

Brittigan, Robert, Corporation, The, Chicago, Ill. Calculating device for measuring the length of goods or the number of articles by weight. Serial No. 362,905; May 7. Class 26.

Bruner-Ritter, Inc., New York, N. Y. Metallic wrist watch strap bracelets. Serial No. 363,036; May 7. Class 28.

Bulmerco, Inc., New York, N. Y. Cider. Serial No. 362,135; May 7. Class 45.

Burry Biscuit Corporation, Chicago, Ill. Cookies. Serial No. 362,165; May 7. Class 46.

Calvert Distilling Company, The, Relay, Md. Whiskey. Serial No. 362,067; May 7. Class 49.

Capex Company, Chicago, Ill. Artificially constructed pillars, backgrounds and the like. Serial No. 361,381; May 7. Class 12.

Caranol-Silverman Company, St. Louis, Mo. Wearing apparel. Serial No. 354,891; May 7. Class 39.

Carbonaire Beverage Dispenser Co. Inc., New York, N. Y. Apparatus for furnishing through a conduit to cooling beverage-containers and the like the cold vapor from dry ice the temperature and pressure of which vapor is controlled by suitable valves and gauges attached to the conduit and to the container of the apparatus in which the dry ice is placed for vaporizing. Serial No. 360,065; May 7. Class 23.

Cardel, Inc., St. Louis, Mo. Toilet lotions. Serial No. 362,251; May 7. Class 6.

Caron Spinning Company, Rochelle, Ill. Yarn. Serial No. 362,347; May 7. Class 43.

Catevenis, Crist E., doing business as Herb Product Co., Fort Lauderdale, Fla. Preparation for the treatment of piles. Serial No. 362,558; May 7. Class 6.

Central Fibre Products Co., Hutchinson, Kans. Wall board. Serial No. 362,610; May 7. Class 12.

Central Radio Laboratories, Milwaukee, Wis. Variable resistance devices used as volume controls for radio receiving sets. Serial No. 362,013; May 7. Class 21.

Century Distilling Co., Peoria, Ill. Whiskey. Serial No. 360,988; May 7. Class 49.

Century Distilling Co., Peoria, Ill. Whiskey. Serial No. 361,163; May 7. Class 49.

Century Distilling Co., Peoria, Ill. Whiskey. Serial Nos. 362,292–4; May 7. Class 49.

Century Distilling Co., Peoria, Ill. Whiskey. Serial Nos. 362,666–8; May 7. Class 49.

Chevette, Inc., New York, N. Y. Ladies' silk underwear. Serial No. 361,798; May 7. Class 39.

Clark, James, Distilling Corporation, Jersey City, N. J. Whiskey, gin, brandy, etc. Serial Nos. 362,803–4; May 7. Class 49.

Collins, Clyde, Chemical Co., Inc., Memphis, Tenn. Maltless beverages and syrups and extracts for making the same. Serial No. 360,216; May 7. Class 45.

Colorado Fuel and Iron Products Company, The, Denver, Colo. Metal strap ties for bales and the like. Serial Nos. 362,014–15; May 7. Class 13.

Colorado Fuel and Iron Products Company, The, Denver, Colo. Metal strap ties for bales and the like. Serial No. 362,017; May 7. Class 13.

Colovos, George, doing business as Oriental Laboratories, Chicago, Ill. Polish and dressings for shoes and burnishing inks. Serial No. 362,166; May 7. Class 4.

Consolidated Packing Company, San Francisco, Calif. Dried fruits. Serial No. 363,156; May 7. Class 46.

Continental Coffee Company, Chicago, Ill. Coffee. Serial No. 362,772; May 7. Class 46.

Continental Distilling Corporation, Philadelphia, Pa. Whiskey, gin, rum, etc. Serial No. 361,879; May 7. Class 49.

Continental Pure Products Co. (See Polefsky, Jacob S.)

Convertible Door Manufacturing Company, Milwaukee, Wis. Wood structures. Serial No. 362,297; May 7. Class 12.

Cool Maid Candy Company, Salt Lakek City, Utah. Maltless powder. Serial No. 362,678; May 7. Class 45.

Coty, Inc., Wilmington, Del. Lipsticks, perfumes, toilet waters, etc. Serial No. 359,344; May 7. Class 6.

Cowan and Cowan, Inc., Buffalo, N. Y. Laxatives. Serial No. 362,071; May 7. Class 6.

D E G E A Aktiengesellschaft (Auergesellschaft), Berlin, Germany. Gas masks, respirators, dental appliances for the examination of the gums, etc. Serial No. 355,663; May 7. Class 44.

Day & Young, Santa Clara, Calif. Fresh deciduous fruits and vegetables. Serial No. 361,569; May 7. Class 46.

Dennis, William J., Des Moines, Iowa. Cube roots and cube root extract, etc. Serial No. 357,370; May 7. Class 6.

Detroit Dental Manufacturing Co., Detroit, Mich. Dental waxes. Serial No. 362,674; May 7. Class 44.

De Villani, Jean L., Paris, France. Beauty oil. Serial No. 358,091; May 7. Class 6.

Deward & Rich, Inc. (See Lloyd & Elliott, Inc., assignor.)

Doctors, Dorothea, Inc., New York, N. Y. Ladies' undergarments. Serial No. 359,576; May 7. Class 39.

Drioli, Francesco, Zara, Italy. Cordials. Serial Nos. 362,868–9; May 7. Class 49.

Elite Laundry Company, Inc., Philadelphia, Pa. Cloth laundry bags. Serial No. 362,813; May 7. Class 2.

El Rey Products Co., Los Angeles, Calif. Composition shingles, composition roofing, composition siding material, etc. Serial No. 359,784; May 7. Class 12.

El Rey Products Co., Los Angeles, Calif. Plastic roof cement and asbestos fiber roof coating. Serial No. 359,785; May 7. Class 12.

Englander, Jacob, doing business as Federal Products Co., East Orange, N. J. Whiskey, gin, rum, etc. Serial No. 360,824; May 7. Class 49.

Enterprise Manufacturing Company, The, Akron, Ohio. Artificial fish bait. Serial No. 363,317; May 7. Class 22.

Fauss, Charles, Jr., doing business as Charles Fauss Jr. & Co., Newport, Ky. Whiskey, gin, rum, etc. Serial No. 361,953; May 7. Class 49.

Federal Products Co. (See Englander, Jacob.)

Medicinal preparation. Laboratoire de l'Amibiasine. 323,889-90; May 7; Serial Nos. 358,327-8; published Feb. 12, 1935.

Medicinal preparation for the relief of tuberculosis. W. H. Dury. 324,029; May 7; Serial No. 356,179; published Feb. 12, 1935.
Medicine used in the clinical treatment of diabetes. N. K. Edgars. 322,962; May 7; Serial No. 355,434; published Feb. 12, 1935.
Medicines and pharmaceutical preparations for relieving headaches, etc. Remeon Corporation. 323,848; May 7; Serial No. 359,282; published Feb. 26, 1935.
Nail-polish. O. L. Graf. 103,161; renewed Mar. 16, 1935.
Nose and throat spray, inhalant, etc. Sanco Incorporated. 323,862; May 7; Serial No. 359,487; published Feb. 26, 1935.
Oil for imparting luster, etc. to textile fibers. Soluble. Standard Oil Company of New Jersey. 323,839; May 7; Serial No. 359,406; published Feb. 19, 1935.
Ointment. Re-Mar Chemical Co. Inc. 323,871; May 7; Serial No. 357,784; published Feb. 12, 1935.
Ointment or salve. Little Bear Specialties Company. 323,906; May 7; Serial No. 345,499; published May 1, 1934.
Ointment, Stimulating antiseptic medicinal. J. W. Bates. 323,884; May 7; Serial No. 358,715; published Feb. 26, 1935.
Paste for cleaning the skin, ointment for treating catarrh, etc. Labbe Products Manufacturers. 323,931; May 7; Serial No. 347,144; published Feb. 12, 1935.
Perfumes and face powder. Guerlain Perfumery Corporation of Delaware. 323,909; May 7; Serial No. 357,317; published Feb. 12, 1935.
Perfumes, face powders, toilet waters, etc. L. Paskin. 323,900; May 7; Serial No. 340,234; published Oct. 3, 1933.
Pharmaceutical preparations. American Drug & Press Association. 104,924; renewed June 29, 1935.
Pharmaceutical preparations. Richard Hudnut. 105,585; renewed Aug. 8, 1935.
Pharmaceutical preparations for toilet purposes. M. Earle. 106,157; renewed July 6, 1935.
Photographic developers. Eastman Kodak Company. 106,243; renewed Mar. 30, 1935.
Poultice, Compound mustard. M. Levinstein. 323,920; May 7; Serial No. 359,748; published Feb. 26, 1935.
Powder, Hygienic vaginal. H. Mookow. 323,991; May 7; Serial No. 338,751; published Feb. 12, 1935.
Powder, lavender water, facial creams, etc., Face and dusting. Worthall, Ltd. 324,042; May 7; Serial No. 353,278; published Oct. 9, 1934.
Preparation comprising protein for internal administration. Wm. S. Merrell Company. 323,841; May 7; Serial No. 359,396; published Feb. 19, 1935.
Preparation for the treatment of common colds. N. Edwards. 323,868; May 7; Serial No. 357,946; published Feb. 12, 1935.
Preparation for the treatment of constipation. Petrolager Laboratories, Inc. 324,035; May 7; Serial No. 360,042; published Feb. 26, 1935.
Preparation to be applied externally for the treatment of pneumonia, etc. R. E. Stallings. 323,886; May 7; Serial No. 358,573; published Feb. 26, 1935.
Preparations for the treatment of the feet. Cope's Products, Inc. 323,915; May 7; Serial No. 358,831; published Feb. 12, 1935.
Quinine preparation. H. Silten. 324,041; May 7; Serial No. 352,506; published Feb. 26, 1935.
Remedies for colds, headache, and la grippe. Hoosier Remedy Company. 105,502; renewed July 27, 1935.
Remedy for rheumatic affections and neuralgias. Bayer Company. 105,665; renewed Aug. 10, 1935.
Salve for hemorrhoids. Brothers Corporation. 323,966; May 7; Serial No. 359,843; published Feb. 26, 1935.
Shampoo, hair pomade, hair grower, and hair oil. A. F. Jenkins. 323,838; May 7; Serial No. 359,429; published Feb. 26, 1935.
Shampoo, Liquid. R. L. Watkins Company. 105,681; renewed Aug. 10, 1935.
Skin lotions. A. Thierer. 323,867; May 7; Serial No. 357,995; published Feb. 12, 1935.
Starch. Corn Products Refining Company. 323,988; May 7; Serial No. 359,614; published Feb. 26, 1935.
Starch, Laundry. F. Fenn. 323,985; May 7; Serial No. 358,178; published Feb. 12, 1935.
Skin freshener and tonic and liquefying cream. Pond's Extract Company. 323,881; May 7; Serial No. 359,520; published Feb. 26, 1935.
Substitute for the iodids. Bayer Company. 105,479; renewed July 27, 1935.
Tooth-paste. Bristol-Myers Company. 105,039; renewed July 6, 1935.
Water emulsion of a synthetic resin. Resinous Products & Chemical Company. 323,850; May 7; Serial No. 359,241; published Feb. 26, 1935.

CLASS 7

Twines. American Manufacturing Company. 103,369; renewed Mar. 30, 1935.

CLASS 9

Powder, fuse powder, sporting powder, Blasting. American Cyanamid & Chemical Corporation. 324,033; May 7; Serial No. 360,067; published Feb. 26, 1935.

CLASS 10

Fertilizers. F. S. Royster Guano Co. 99,642–3; renewed Sept. 8, 1934.

CLASS 11

Type-writer ribbons and carbon paper. Carter's Ink Company. 104,815; renewed June 15, 1935.

CLASS 12

Building material. R. Guastavino Company. 323,963; May 7; Serial No. 359,912; published Feb. 26, 1935.
Gypsum patching plaster and gypsum dry fill insulation. American Gypsum Company. 323,973; May 7; Serial No. 359,764; published Feb. 26, 1935.
Mortar, Plastic refractory. Quigley Company. 323,851; May 7; Serial No. 359,239; published Feb. 26, 1935.
Roofing, Asphalt. United States Gypsum Company. 323,932; May 7; Serial No. 360,261; published Feb. 26, 1935.

CLASS 13

Drains, combined refuse separators, etc., Floor. Compound Injector & Specialty Co. 324,050; May 7.
Screws, and hanger bolts, Wood and sheet metal. Continental Screw Company. 323,971; May 7; Serial No. 359,781; published Feb. 26, 1935.

CLASS 15

Oils, Lubricating. Penn-State Petroleum Company. 323,989; May 7; Serial No. 360,729.
Petroleum, Refined. Chester Oil Company. 12,252; renewed May 19, 1935.

CLASS 17

Cigars. C. H. Pattengill Corporation. 102,689; renewed Feb. 23, 1935.

CLASS 19

Tandem drive for vehicles, trucks, etc. Thornton Tandem Company. 323,913; May 7; Serial No. 358,864; published Feb. 26, 1935.
Trucks, Metal. Market Forge Company. 104,622; renewed June 8, 1935.

CLASS 20

Linoleum, felt base and similar hard surfaced floor coverings. Armstrong Cork Company. 324,019; May 7; Serial No. 354,554; published Feb. 26, 1935.
Linoleums. Nairn Linoleum Co. 105,920; renewed Aug. 24, 1935.

CLASS 21

Electrode holders, insulated cable, cable connecters, etc. G. H. Abel. 324,023; May 7; Serial No. 351,295; published Feb. 26, 1935.
Lamps, Electric incandescent. Duro-Test Corporation. 323,905; May 7; Serial No. 360,267; published Feb. 26, 1935.

CLASS 22

Amusement apparatus, Coin controlled. Exhibit Supply Company. 323,900–1; May 7; Serial Nos. 360,470–1; published Feb. 26, 1935.
Balls, Golf. Acushnet Process Company. 323,898; May 7; Serial No. 360,516; published Feb. 26, 1935.
Balls, Golf. Worthington Ball Company. 323,896; May 7; Serial No. 360,557; published Feb. 26, 1935.
Card shuffling and dealing device, Playing. H. H. Timbers. 324,031; May 7; Serial No. 360,112; published Feb. 26, 1935.
Dolls. Geo. Borgfeldt & Co. 105,150; renewed July 6, 1935.
Exercising apparatus. W. Bower. 323,897; May 7; Serial No. 360,522; published Feb. 26, 1935.
Exercising apparatus. W. Bower. 323,945; May 7; Serial No. 360,165; published Feb. 26, 1935.
Games. Parker Brothers, Inc. 106,014; renewed Sept. 14, 1935.
Games, toys, and sporting goods. Continental Rubber Works. 105,996; renewed Sept. 14, 1935.
Sporting supplies. Enterprise Manufacturing Company. 105,722; renewed Aug. 17, 1935.

CLASS 23

Boring and drilling machines. Moline Tool Company. 104,626; renewed June 8, 1935.
Dispensers, Automatic beer. Bishop & Babcock Manufacturing Co. 324,037; May 7; Serial No. 353,794; published Feb. 26, 1935.
Files, Steel. Columbia Import & Export Co. 324,030; May 7; Serial No. 360,131; published Feb. 26, 1935.
Knives. Eagle Pencil Company. 12,122; re-renewed Apr. 14, 1935.
Locomotive-engine parts, Finished. Locomotive Finished Material Company. 105,603; renewed Aug. 10, 1935.
Loom leather strapping and pickers, Textile. Joel S. Perkins & Son. 324,060; May 7.
Mallets, type-writer platens, etc., Rubber. Continental Rubber Works. 104,971; renewed June 29, 1935.
Pumps, Cistern and well. O. P. Schriver Company. 105,448; renewed July 27, 1935.
Screw-wrenches and vises. Bonney Vise & Tool Works Inc. 104,592; renewed June 8, 1935.
Shakers, Testing-sieve. W. S. Tyler Company. 105,404; renewed July 20, 1935.

Squeeze rolls, Rubber covered. American Wringer Company. 323,946; May 7; Serial No. 360,162; published Feb. 26, 1935.
Tool, Combination. Bonney Vise & Tool Works Inc. 105,480; renewed July 27, 1935.
Tools or holders for carrying industrial diamonds as cutting agents. Koebel Diamond Tool Co. 323,921–8; May 7; Serial Nos. 355,205–12; published Feb. 26, 1935.
Tools or holders for carrying industrial diamonds as cutting agents. Koebel Diamond Tool Co. 323,954–60; May 7; Serial Nos. 355,215–21; published Feb. 26, 1935.
Tools or holders for carrying industrial diamonds as cutting agents. Koebel Diamond Tool Co. 324,007–8; May 7; Serial Nos. 355,213–14; published Feb. 26, 1935.
Tools or holders for carrying industrial diamonds as cutting agents. Koebel Diamond Tool Co. 324,010–13; May 7; Serial Nos. 355,197–200; published Feb. 26, 1935.
Tools or holders for carrying industrial diamonds as cutting agents. Koebel Diamond Tool Co. 324,046–9; May 7; Serial Nos. 355,201–4; published Feb. 26, 1935.
Wrenches. Bonney Vise & Tool Works Inc. 105,781; renewed Aug. 17, 1935.
Wrenches. Walworth Manufacturing Co. 103,135; renewed Mar. 16, 1935.

CLASS 26

Gages, Water. Nathan Manufacturing Company. 104,098; renewed Apr. 27, 1935.
Meters, electric indicators, electric testing apparatus, etc., Electricity. Sangamo Electric Company. 105,828; renewed Aug. 17, 1935.
Patterns for garments, Paper. New York Pattern Company. 323,948; May 7; Serial No. 360,140; published Feb. 26, 1935.
Patterns for garments, Paper. New York Pattern Company. 323,949; May 7; Serial No. 360,138; published Feb. 26, 1935.
Photographic apparatus. Zeiss Ikon Aktiengesellschaft. 323,929; May 7; Serial No. 346,392; published Feb. 26, 1935.
Sensitized photographic paper. Eastman Kodak Company. 104,254; renewed May 11, 1935.

CLASS 27

Watches, watch cases, watch movements, etc. I. D. Watch Case Co. 323,943; May 7; Serial No. 360,174; published Feb. 26, 1935.

CLASS 28

Articles made of or plated with precious metals. Montgomery Ward & Co. Inc. 103,246; renewed Mar. 23, 1935.

CLASS 29

Tooth brushes. I. Sekine. 104,427; renewed May 25, 1935.

CLASS 32

Beds, bedsteads, couches, etc. Vi-Spring Products Limited. 323,980; May 7; Serial No. 359,682; published Feb. 26, 1935.
Mattresses. Grand Rapids Bedding Company. 103,234–5; renewed Mar. 23, 1935.
Mattresses. Taylor Bedding Mfg. Co. 323,855; May 7; Serial No. 359,190; published Feb. 26, 1935.
Mattresses. Coiled-wire spring. Grand Rapids Bedding Company. 103,236; renewed Mar. 23, 1935.
Seat pads. Evr-Klean Seat Pad Co. 324,085; May 7.

CLASS 33

Glass shades and reflectors. General Electric Company. 103,692-3; renewed Apr. 13, 1935.

CLASS 34

Burners, oil fuel installation plants, etc., Oil. W. F. Wiltshire. 323,885; May 7; Serial No. 358,580; published Feb. 26, 1935.
Metal burner top plates for weed burning apparatus. Fairmont Railway Motors, Incorporated. 323,842; May 7; Serial No. 359,353; published Feb. 26, 1935.

CLASS 35

Belting for power transmission. Consolidated Sewing Machine and Supply Co. 323,880; May 7; Serial No. 359,506; published Feb. 26, 1935.
Beltings, Leather. Chas. L. Ireson (Inc.). 103,876; renewed Apr. 20, 1935.
Hose, rubber belting and composite rubber packing for pistons, Rubber. Bowers Rubber Works. 105,950–5; renewed Aug. 31, 1935.
Packing, Non-metallic machinery. Bowers Rubber Works. 103,150; renewed Mar. 16, 1935.
Packing, Sheet. Mechanical Rubber Company. 103,667; renewed Apr. 13, 1935.
Packings, Industrial and automotive. Federal Metallic Packing Company. 323,944; May 7; Serial No. 360,167; published Feb. 26, 1935.
Packings, Industrial and automotive. Neveroil Bearing Company. 323,942; May 7; Serial No. 360,180; published Feb. 26, 1935.
Piston rings. Perfect Circle Company. 324,032; May 7; Serial No. 360,106; published Feb. 26, 1935.
Rubber goods, Manufactured. Continental Rubber Works. 104,206; renewed May 11, 1935.

CLASS 36

Musical string instruments. Targ and Dinner, Inc. 323,891; May 7; Serial No. 358,300; published Feb. 26, 1935.
Musical wind instruments. Targ and Dinner, Inc. 323,892; May 7; Serial No. 358,302; published Feb. 26, 1935.

CLASS 37

Mounts for photographs and pictures. Chilcote Company. 324,055; May 7.

CLASS 38

Magazine. C. R. Cook Paint Company. 104,816; renewed June 15, 1935.

CLASS 39

Boots, shoes, slippers, and rubbers. Powell & Campbell. 103,677; renewed Apr. 13, 1935.
Brassières, corsets, girdles, etc. D. Halmoff. 324,082; May 7.
Coats and suits, dresses, hats, etc. Neva-Wet Corporation of America, Inc. 324,060; May 7.
Coats, vests, trousers, and overcoats made to order. United Woolen Mills Company. 105,242; renewed July 13, 1935.
Coats, vests, trousers, etc. J. Schoeneman, Incorporated. 324,088; May 7.
Dresses, blouses, coats, etc. "Anny Blatt" Société à Responsabilité Limitée au Capital de 50,000 Francs. 324,054; May 7.
Dresses, coats, capes, etc. Adler & Adler, Inc. 324,084; May 7.

Laxer, Harry M., assignor to Idealite, Inc., New York, N. Y. Lamp base or similar article. 95,525; May 7.
Lesnik, Seymour J., Newark, N. J., assignor to American Record Corporation, New York, N. Y. Buckle slide. 95,526; May 7.
Levin, David, New York, N. Y. Shoe. 95,527; May 7
Lieber, Herman, Woodside, N. Y. Shoe. 95,528; May 7.
Lindstrom, George D., and E. North, Rockford, assignors to National Lock Co., Rockford, Ill. Door handle. 95,529; May 7.
Mackintosh, Frederick, Bristol, R. I., assignor to Gebring Solomon & Birnbaum, Inc., New York, N. Y. Lace. 95,530; May 7.
Malbach, John J., assignor to Davis & Catterall, New York, N. Y. Textile fabric or similar article. 95,531; May 7.
Morall, Charles, Forest Hills, assignor to Delman, Inc., New York, N. Y. Shoe. 95,532; May 7.
Moray, Virgil W., New York, N. Y. Heating coil. 95,533; May 7.
Nagel-Chase Mfg. Co., The. (See Schultz, Edward, assignor.)
National Lock Co. (See Lindstrom, G. D., and North, assignors.)
Nieman, Henry W., Columbus, Ohio. Shoe. 95,534; May 7.
Nieman, Henry W., Columbus, Ohio. Shoe. 95,535; May 7.
Nieman, Henry W., Columbus, Ohio. Shoe. 95,536; May 7.
Nieman, Henry W., Columbus, Ohio. Shoe. 95,537; May 7.
Nieman, Henry W., Columbus, Ohio. Shoe. 95,538; May 7.
Nieman, Henry W., Columbus, Ohio. Shoe. 95,539; May 7.
North, Edwin. (See Lindstrom, G. D., and North.)
Perugia, Andre, Paris, France. Shoe. 95,540; May 7.
Piccola, Frank J., Lynn, Mass. Boat. 95,541; May 7.
Polley, Flora B., New York, N. Y. Shoe. 95,542; May 7.
Priestley, William, Cranston, R. I., assignor to Gehring, Solomon & Birnbaum, Inc., New York, N. Y. Lace. 95,543; May 7.
Public, Dedicated to the free use of the. (See Busch, Thomas N., assignor.)
Rampfel, Henry, Lakewood, N. J., assignor to Nathan Straus & Sons, Inc., New York, N. Y. Plate or similar article. 95,544; May 7.
Revere Copper and Brass Incorporated. (See Geddes, Norman B., assignor.)
Reynolds, Edwin, Vineland, N. J. Clothespin or similar article. 95,545; May 7.
Richardson Company, The. (See Rieser, Oliver O., assignor.)
Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,546; May 7.
Robinson, Grace C., assignor to Mary Chess Inc., New York, N. Y. Bottle. 95,547; May 7.
Rogers, Edward J., Kansas City, Mo. Character doll or similar article. 95,548; May 7.
Sachs, Morris, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt for personal wear. 95,549; May 7.
Safeguard, Inc. (See Hunter, John P., assignor.)
Scholnick Shoe Co. (See Atkins, Thomas R., assignor.)
Scholnick Shoe Co. (See Doring, Ernest C., assignor.)
Scholnick Shoe Co. (See Fishman, Jacob, assignor.)
Scholnick Shoe Co. (See Ziniti, Evelyn, assignor.)
Schultz, Edward, assignor to The Nagel-Chase Mfg. Co., Chicago, Ill. Smoking stand. 95,550; May 7.
Schultz, Edward, assignor to The Nagel-Chase Mfg. Co., Chicago, Ill. Smoking stand. 95,551; May 7.
Seagram, Joseph E. & Sons, Inc. (See Guyer, William, assignor.)
Sperlich, Herman A., and J. H. Uhlig, Detroit, Mich. Ironing machine cabinet. 95,552; May 7.
Stechbart, Bruno, assignor to The Bell & Howell Company, Chicago, Ill. Picture projecting machine base. 95,553; May 7.
Stechbart, Bruno, assignor to The Bell & Howell Company, Chicago, Ill. Picture projecting machine base. 95,554; May 7.
Steelman, James S., assignor to Whitall Tatum Company, Millville, N. J. Bottle. 95,555; May 7.
Steelman, James S., Millville, N. J., assignor to The Black Prince Distilleries, Inc., Nutley, N. J. Bottle. 95,556; May 7.
Stevenson, James H., Los Angeles, Calif. Child's wheeled vehicle. 95,557; May 7.
Straus, Nathan, & Sons, Inc. (See Rampfel, Henry, assignor.)
Sutton, Joseph A., New York, N. Y. Lace. 95,558; May 7.
Tin Decorating Company of Baltimore, The. (See Connor, Martha H., assignor.)
Uhlig, Johannes H. (See Sperlich, H. A., and Uhlig.
Vogel, Joseph M., Adrian, Mich. Beverage mixer. 95,559; May 7.
Whitall Tatum Company. (See Steelman, James S., assignor.)
Williams, Harry E., St. Louis, Mo. Shoe. 95,560; May 7.
Williams, Harry E., St. Louis, Mo. Shoe. 95,561; May 7.
Youngholm, Albin, San Francisco, Calif. Instantaneous water heater. 95,562; May 7.
Zahn, Samuel, New York, N. Y. Dress. 95,563; May 7.
Zahn, Samuel, New York, N. Y. Dress. 95,564; May 7.
Zahn, Samuel, New York, N. Y. Dress. 95,565; May 7.
Zahn, Samuel, New York, N. Y. Dress. 95,566; May 7.
Zegorav, Bogislava, New York, N. Y. Shoe. 95,567; May 7.
Zegorav, Bogislavs, New York, N. Y. Shoe. 95,568; May 7.
Ziniti, Evelyn, New York, N. Y., assignor to Scholnick Shoe Co., Jamaica Plain, Mass. Shoe. 95,569; May 7.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 7TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

A. J. & K. Company, The. (See Janer, Andre, assignor.)
Abameier, Carl, La Grange Park, assignor to United States Gypsum Company, Chicago, Ill. Apparatus for feeding plaster board into a drying kiln. 2,000,269; May 7.
Accetta, Anthony C., Cleveland, Ohio. Fish lure. 2,000,734; May 7.
Adams, Elmer W., Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill. Insect repellent. 2,000,004; May 7.
Adams, Richard E., Moorestown, N. J. Playing cards. 2,000,812; May 7.
Adrian, Emile, St. Michel-sur-Meurthe, France. Knot-forming mechanism. 2,000,504; May 7.
Agfa Ansco Corporation. (See Schaeffer, Albert, assignor.)
Ahlborn, J. Frederick, et al. (See Livingston, Maurice H., assignor.)
Air Cushion Products Company, The. (See Arens, Edward W., assignor.)
Air Reduction Company. (See Anderson, James L., assignor.)
Akitt, Norman B., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging. 2,000,682; May 7.
Akitt, Norman B., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging. 2,000,683; May 7.
Aktiengesellschaft Brown Boveri & Cie. (See Brunner, G., and Kern, assignors.)
Alden, Carroll R., assignor to Ex-Cell-O Aircraft & Tool Corporation, Detroit, Mich. Machine tool. 2,000,553; May 7.
Allen, Earl M., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 2,000,871; May 7.
Allen, Roland H. (See Lessing, R., and Allen.)
Allen, William W., Aldan, and A. L. Grammer, Meadowbrook, assignors to The Curtis Publishing Company, Philadelphia, Pa. Opposing offset in printing and the like. 2,000,684; May 7.
Allen-Bradley Company. (See Kenney, Mahlon W., assignor.)
Allis-Chalmers Manufacturing Company. (See Babb, Charles L., assignor.)
Allis-Chalmers Manufacturing Company. (See Dimberg, Paul C., assignor.)
Allis-Chalmers Manufacturing Company. (See Nichols, Louis C., assignor.)
All-Steel-Equip Company. (See Knell, John, assignor.)
Altenkirch, Edmund, Neuenhagen, near Berlin, Germany, assignor to The Hoover Company, North Canton, Ohio. Continuous absorption refrigeration. 2,000,005; May 7.
Alvey-Ferguson Company. (See Roland, Robert J., assignor.)
Amantea, Samuel, Niagara Falls, N. Y. Paper making machine. 2,000,006; May 7.
American Car and Foundry Company. (See Clarke, A. W., and Dietrichson, assignors.)
American Car and Foundry Company. (See Herdlein, Wallace H., assignor.)
American Engineering Company. (See Kay, Frank W., assignor.)
American Floor Surfacing Machine Company, The. (See Myers, Harry L., assignor.)
American Laundry Machinery Company, The. (See Couch, Forrest J., assignor.)
American Laundry Machinery Company, The. (See Patterson, John S., assignor.)
American Lurgi Corporation. (See Freise, Max G., assignor.)
American Porcelain Company. (See Hoffmann, Fred P., assignor.)
American Seating Company. (See Hanson, Walter M., assignor.)
American Steel Foundries. (See Oelkers, Alfred H., assignor.)
American Steel & Wire Company. (See Reis, Charles G., assignor.)
American Telephone and Telegraph Company. (See Espenschied, L., and Green, assignors.)
American Telephone and Telegraph Company. (See Wright, Sumner B., assignor.)
American Type Founders Company. (See Kelly, William M., assignor.)
Anchor, James, Detroit, Mich. Actuated fender shield. 2,000,813; May 7.
Anderson, Fabian K., assignor of thirty-three and one-third per cent to J. Quinn and thirty-three and one-third per cent to E. Regan, Buffalo, N. Y. Nonrefillable bottle. 2,000,814; May 7.
Anderson, James L., Closter, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Torch cutting or welding apparatus. 2,000,007; May 7.
Anderson, William J., assignor of three-fourths to J. W. McClintock, Los Angeles, Calif. Roll paper cutter. 2,000,432; May 7.
Andrew, Victor J., Wooster, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Control system. 2,000,685; May 7.
Andrews, Arthur A., Tiptree, England. Motion picture apparatus. 2,000,872; May 7.
Andrews, L. V., Worcester, Mass., and C. M. Terry, Decatur, assignors to A. W. Cash Company, Decatur, Ill. Combustion control. 2,000,270; May 7.
Animal Trap Company of America. (See Graybill, Hershey R., assignor.)
Apfel, Jacob, G. Ling, and R. S. Jarrett, Hamilton, Ohio. Lawn edger and weeder. 2,000,460; May 7.
Arens, Edward W., assignor to The Air Cushion Products Company, Cleveland, Ohio. Pneumatic core mattress. 2,000,873; May 7.
Armstrong, Harry H., and A. B. Menefee, Los Angeles, Calif. Floating uranium ores, particularly carnotite. 2,000,656; May 7.
Arnold, Edwin E. (See Burr, G. A., and Arnold.)
Arnold, Edwin E., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Valve structure for compressors and pumps. 2,000,735; May 7.
Arnold, Max, New York, N. Y. Permanent waving appliance. 2,000,207; May 7.
Arnold, Philip S., Flint, assignor of one-fifth to C. E. Wisner, Detroit, Mich. Automatic gauge control and means therefor. 2,000,057; May 7.
Aschheim, Selmar, Berlin-Charlottenburg, assignor to Schering-Kahlbaum A. G., Berlin, Germany. Oestrus exciting product and producing same. 2,000,117; May 7.
Ashline, George L. (See Jansen, Henry, assignor.)
Athey Truss Wheel Co. (See Kuchar, Joseph, assignor.)
Atlantic Refining Company, The. (See Murphy, George B., assignor.)
Atlas-Ago, Chemische Fabrik, Aktiengesellschaft. (See Munch, Carl, assignor.)
Aumack, Raymond L., Cranford, N. J. Venting device for gasoline tanks. 2,000,431; May 7.
Avery, Edgar T., Maplewood, N. J. Burner installation for domestic boilers. 2,000,733; May 7.
Axe, Roy T. (See Edwards, O. M., and Axe.)
B. W. S. Company Limited, The. (See Bernon, Maurice L., assignor.)
Babb, Charles L., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Pump unit. 2,000,874; May 7.
Babcock, Leo A., Cattaragus, N. Y., assignor to Oakes & Burger Co. Milk pasteurizer. 2,000,370; May 7.
Bailey, William M., Lynn, Mass., assignor, by mesne assignments, to General Electric Company. Variable mica condenser. 2,000,686; May 7.
Bake, Louis S. (See Downing, F. B., and Bake.)
Bakelite Building Products Co. (See Harshberger, Norman P., assignor.)
Baker Perkins Company. (See Eggert, Gustav B., assignor.)
Balfe, George T., assignor to Detroit Gasket & Manufacturing Company, Detroit, Mich. Sheet metal punch machine. 2,000,208; May 7.
Ball, Joseph A., Los Angeles, Calif., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y. Three color photography. 2,000,058; May 7.
Ballantine, John P., Seattle, Wash. Multiple-rate power metering. 2,000,736; May 7.
Barbieri, Cesare, New York, N. Y., assignor to Vortex Cup Company, Chicago, Ill. Dispenser. 2,000,008; May 7.
Barco Manufacturing Co. (See Bard, Francis N., assignor.)
Bard, Francis N., Highland Park, assignor to Barco Manufacturing Co., Chicago, Ill. Train pipe connecter. 2,000,157; May 7.
Barden, William S., Stapleton, N. Y., assignor to Radio Corporation of America. Push-pull amplifier control. 2,000,433; May 7.
Bartlett, C. O., & Snow Company, The. (See Osborn, Irwin S., assignor.)
Basch, William J., Brooklyn, N. Y. Window screen. 2,000,554; May 7.
Bassick Company, The. (See Moore, Raymond G., assignor.)
Bastion, John A. (See Cargill, E. L., and Bastion.)
Bates Laboratories, Inc. (See Oswald, Alfred E., assignor.)

Batterman, John J., assignor to Gabriel Pneumatic Vulcanizer, Incorporated, Cleveland, Ohio. Vulcanizer for repair of inner tubes. 2,000,461; May 7.

Baumbach, Charles, and K. Pietsch, Hersfeld, Germany. Aseptic syringe. 2,000,434; May 7.

Bauer, Fred, Redlands, Calif. Cement plaster. 2,000,371; May 7.

Bauer, Oliver F., and W. R. Carpenter, Rochester, N. Y., assignors to Gleason Works, Rochester, N. Y. Machine for producing gears. 2,000,209; May 7.

Bauersfeld, Walther, assignor to the firm of Carl Zeiss, Jena, Germany. Microscope stand. 2,000,737; May 7.

Baur, Karl. (See Beppo, W., and Baur.)

Bayless, John L., Anchorage, assignor to Jefferson Island Salt Company, Louisville, Ky. Carton. 2,000,210; May 7.

Bayley, Allen A., administrator. (See Bayley, Arthur J.)

Bayley, Arthur J., Milwaukee, Wis., Allen A. Bayley, administrator of said Arthur J. Bayley, deceased. Door controller. 2,000,574; May 7.

Beasley, Arthur J., assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Coupler mechanism. 2,000,436; May 7.

Beatty, Floyd A., Corliss Station, assignor to Lewis Foundry & Machine Company, Groveton, Pa. Up-cut shear. 2,000,314; May 7.

Bechand, A. B., et al. (See Manor, Florian F., assignor.)

Beck, Ernst, Bitterfeld, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Spinning bobbin. 2,000,372; May 7.

Becker, Heinrich, assignor to Maschinenfabrik Augsburg-Nurnberg A. G., Augsburg, Germany. Drive for fuel pumps for combustion power engines. 2,000,555; May 7.

Bee Line Manufacturing Company. (See Smith, Roy D., assignor.)

Bell & Howell Company, The. (See Howell, Albert S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Black, Harold S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Clark, James E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Erickson, John R., assignor.)

Bell Telephone Laboratories, Incorporated. (See Given, Frederick J., assignor.)

Bell Telephone Laboratories, Incorporated. (See Power, James E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Rettenmeyer, Francis X., assignor.)

Bell Telephone Laboratories, Incorporated. (See Smythe, Edward E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Walker, Albert C., assignor.)

Benedict, Rich K., assignor to The Hydraulic Press Manufacturing Company, Mount Gilead, Ohio. Variable delivery pump or motor. 2,000,271; May 7.

Benner, Raymond C., H. P. Kirchner, and R. L. Melton, assignors to the Carborundum Company, Niagara Falls, N. Y. Apparatus for treating fabrics. 2,000,315; May 7.

Benoit, Leon, Chicago, Ill. Egg carton. 2,000,738; May 7.

Bentley, Cecil, Niagara Falls, Ontario, Canada. Racket. 2,000,416; May 7.

Berggren, Per J., Chicago, Ill. Flexible drive connection for web reeling apparatus. 2,000,436; May 7.

Bergheimer, Edward. (See Heisel, P., and Bergheimer.)

Berl, Ernst, Darmstadt, Germany, assignor to The Mathieson Alkali Works, Inc. Carrying out electro-chemical reactions. 2,000,815; May 7.

Bernon, Maurice Louis, Westbourne Grove, assignor to The H. W. S. Company Limited, Ealing, London, England. Child's folding push-chair. 2,000,875; May 7.

Best Foods, Inc., The. (See Rector, Thomas M., assignor.)

Best Foods, Inc., The. (See Schaub, Jacob, assignor.)

Best, John A., Augusta, Ga. Card index. 2,000,657; May 7.

Bettendorf, William E., and H. H. York, assignors, by mesne assignments, to The Micro Corporation, Bettendorf, Iowa. Bread slicing machine. 2,000,816; May 7.

Better Packages, Inc. (See Poeppelmeier, Frank H., assignor.)

Biddle, James G., & Company. (See Kiefaber, E. W., Doerr, Whitson, and Creagmile, assignors.)

Big Rock Ranch Company. (See Heise, William H., assignor.)

Binnie, David, Northwich, assignor to Imperial Chemical Industries Limited, London, England. Pyrolysis of hydrocarbons. 2,000,118; May 7.

Birdsey, Charles E., Pasadena, Calif., assignor to United States Gypsum Company, Chicago, Ill. Kiln feed mechanism. 2,000,272; May 7.

Birkenmaier, Theodore. (See Boll, L. P., and Birkenmaier.)

Bishop, Howard B., Summit, N. J. Making manganese sulphur compounds. 2,000,211; May 7.

Bishop, William B., Decatur, assignor to A. E. Staley Manufacturing Company, Decatur, Ill. Soy bean flour. 2,000,317; May 7.

Bixby, Kenneth B., Geneseo, assignor to Midland Electric Coal Corporation, Indianapolis, Ind. Apparatus for drying pulverized material. 2,000,517; May 7.

Black-Clawson Company, The. (See Meeker, W. P. and Price, assignors.)

Black, David, Newton, and J. Reid, Braintree, assignors to H. D. Foss and Company, Inc., Cambridge, Mass. Container for candy packages and the like. 2,000,158; May 7.

Black Diamond Steamship Corporation. (See Hanlon, Michael J., assignor.)

Black, Harold S., Westfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Vacuum tube apparatus. 2,000,505; May 7.

Blalock, Burman K. (See Hess, Joseph F., assignor.)

Blank, Maurice G., assignor to Eastman Kodak Company, Rochester, N. Y. Safety shutter for motion picture projectors. 2,000,575; May 7.

Blount, Arthur L. (See Merrill, D. R., and Blount.)

Blunt, Edmund H., Brooklyn, N. Y. Feed water heater for locomotives, etc. 2,000,009; May 7.

Bolack, Florence B. (See Forman, James, assignor.)

Böhm, Otto, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Modulation. 2,000,771; May 7.

Boll, Lester P., University City, and T. Birkenmaier, assignors to W. N. Matthews Corporation, St. Louis, Mo. Fuse switch. 2,000,876; May 7.

Boller, Ernest R., Cleveland Heights, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Mordant. 2,000,576; May 7.

Bolognino, Andrew, New York, N. Y. Ticket machine. 2,000,159; May 7.

Bomberger, Allen H., Ephrata, Pa. Combined salt and pepper shaker. 2,000,818; May 7.

Boon, Joseph L., assignor to Eastman Kodak Company, Rochester, N. Y. Direct view finder. 2,000,577; May 7.

Booth, Clement. (See Foerster, A. W., and Booth.)

Borden, Perry A. (See Bristol, C. W., and Borden.)

Borlos, Leopold C. (See Johnstone, R. McC., and Borlos.)

Borsook, Louis, Toronto, Ontario, Canada. Knitting machine and process for knitting béret caps and the like. 2,000,373; May 7.

Bottsford, Edward D. (See Ralston, L. T. M. and Bottsford.)

Bourdon, Russell G., assignor to The Shaw-Walker Company, Muskegon, Mich. Folder paper fastener. 2,000,059; May 7.

Bowers, Ward E., Washington, D. C. Oscillation system. 2,000,010; May 7.

Bradbury, William T. (See Kahn, B. B., and Bradbury.)

Bradley, Neil H., Minneapolis, Minn. Guard. 2,000,212; May 7.

Brady, Thomas, Caldwell, N. J., assignor to R. M. Turner, New York, N. Y. Automatic drink vending machine. 2,000,556; May 7.

Braun, Gesa, assignor to Standard Brands Incorporated, New York, N. Y. Manufacture of hydroxy carboxylic acids. 2,000,213; May 7.

Brennan, Raymond F., Attleboro, Mass. Ornamental cross. 2,000,060; May 7.

Brenner, A. T., et al. (See Manor, Florian F., assignor.)

Brewster, Oswald C., Kansas City, Mo., M. G. Paulus, and A. E. Thompson, Casper, Wyo., assignors to Standard Oil Company, Chicago, Ill. Continuous pressure distillation process. 2,000,687; May 7.

Brickman, Samuel. (See Langbein, Edward H., assignor.)

Briggs and Stratton Corporation. (See Fitz Gerald, John W. assignor.)

Bright Star Battery Company. (See Corigliano, Peter, assignor.)

Brink, Winfield S., assignor to The Firestone Steel Products Company, Akron, Ohio. Vehicle wheel. 2,000,877; May 7.

Brinton, H., Company. (See Gorman, W. D., and Moses, assignors.)

Bristol, Carlton W., Naugatuck, and P. A. Borden, Waterbury, assignors to The Bristol Company, Waterbury, Conn. Controller apparatus. 2,000,739; May 7.

Bristol Company, The. (See Bristol, C. W., and Borden, assignors.)

Britton, Edgar C., H. S. Nutting, and M. E. Huscher, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich. Acetic acid. 2,000,878; May 7.

Broadbent, Frederick G. (See Willshaw, H., Norcorss, and Broadbent.)

Brodd, George S., Chicago, Ill. Coin selector. 2,000,462; May 7.

Broeg, William E., Chicago, Ill., assignor to Standard Brands Incorporated, New York, N. Y. Composition of matter and producing porous material. 2,000,160; May 7.

Bromfield, Lloyd T., New York, N. Y. Machine for treating bags. 2,000,507; May 7.

Bromfield, Lloyd T., New York, N. Y. Drying burlap bags. 2,000,506; May 7.

Bronander, Wilhelm B., Montclair, N. J. Slicing machine. 2,000,508; May 7.

Brooker, Leslie G. S., assignor to Eastman Kodak Company, Rochester, N. Y. Pyridinium iodides and preparing them. 2,000,578; May 7.

Brophy, Dorothy H., Schenectady, N. Y., assignor to General Electric Company. Alkali metal alloy. 2,000,740; May 7.

Brown, Benjamin W. (See Chapman, J., and Brown.)

Brown Instrument Company, The. (See Brown, R. P., and Harrison, assignors.)

Brown Instrument Company, The. (See Krogh, Anker E., assignor.)

Brown Instrument Company, The. (See Side, Frederick W., assignor.)

Brown, Richard P., Philadelphia, and T. R. Harrison, Wyncote, assignors to The Brown Instrument Company, Philadelphia, Pa. Apparatus for gas analyses. 2,000,119; May 7.

Brown, Robert C., Evanston, Ill. Domestic refrigerator. 2,000,879; May 7.

Browne, Montague P., assignor to Mechanical Devices Corporation of America, Buffalo, N. Y. Sliding seat mounting for vehicles. 2,000,463; May 7.

Brunner, Gustav, Baden, and E. Kern, Ennetbaden, assignors to Aktiengesellschaft Brown Boveri & Cie, Baden, Switzerland. Motor control system. 2,000,880; May 7.

Bryson, William A. (See Dahlstrom, J. A., and Bryson.)

Buchanan, Stephen N., Elizabeth, assignor to The Thomas & Betts Co., Elizabeth, N. J. Entrance fitting. 2,000,874; May 7.

Buckland, Bruce O., Schenectady, N. Y., assignor to General Electric Company. Fluid jet pump. 2,000,741; May 7.

Buczkowski, Edward J., Ambler, Pa., assignor, by mesne assignments, to Keasbey & Mattison Company. Shingle method. 2,000,557; May 7.

Bulldog Electric Products Company. (See Frank, W. H., Messing, and H. J. L. Frank, assignors.)

Burgess, C. F., Laboratories, Inc. (See Kliefoth, Max H., assignor.)

Burgett, Lynn S., Euclid, Ohio. Arc welding apparatus. 2,000,161; May 7.

Burkhardt Company, The. (See Johnson, Stanley G., assignor.)

Burkhardt, Conrad C. C., Philadelphia, Pa. Tank car. 2,000,819; May 7.

Burnet, Samuel F., Webster Groves, assignor to Laclede Christy Clay Products Company, St. Louis, Mo. Steam generating apparatus. 2,000,509; May 7.

Burr, Gordon A., Wilkinsburg, and E. E. Arnold, Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. 2,000,688; May 7.

Busch, Thomas N., Lake City, Fla., dedicated to the free use of the public. Turpentine-face scribe. 2,000,375; May 7.

Buscham, Christian A., Newark, N. J., assignor to Exotic Vanities, Inc., New York, N. Y. Receptacle. 2,000,162; May 7.

Buse, Frederick W. (See Schenk, Frans E. M., assignor.)

Bush, Edward B., Lemont, Ill., assignor to Chadeloid Chemical Company, New York, N. Y. Stain and related composition. 2,000,120; May 7.

Bush, Edward B., Lemont, Ill., assignor, by mesne assignments, to Chadeloid Chemical Company. Wood stain. 2,000,121; May 7.

Busbold, Fred G., Lawrence, Mass. Water closet. 2,000,658; May 7.

C-S Engineering Company. (See Coffin, J. S., Jr., and Scheliens, assignors.)

Cahill, George F., New York, N. Y. Game and game apparatus. 2,000,123; May 7.

Calcott, William S., Pennsgrove, and C. J. Pedersen, Carneys Point, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Wood staining. 2,000,689; May 7.

Cameron, John D., Dresden, Ontario, Canada. Horse shoeing and veterinary rack. 2,000,122; May 7.

Cameron Machine Company. (See Johnstone, R. M., and Borlos, assignors.)

Campbell, Charles, London, England, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Apparatus for sorting and counting from statistical record-cards. 2,000,214; May 7.

Cannon, James H., Los Angeles, Calif. Cord connecter. 2,000,318; May 7.

Carbide and Carbon Chemicals Corporation. (See Fife, Harvey R., assignor.)

Carbonara, Victor E., assignor to Pioneer Instrument Company, Incorporated, Brooklyn, N. Y. Measuring instruments. 2,000,659; May 7.

Carborundum Company, The. (See Benner, R. C., Kirchner, and Melton, assignors.)

Cargill, Eugene L., and J. A. Bastion, Dallas, Tex., assignors to The Texas Company, New York, N. Y. Heating apparatus. 2,000,376; May 7.

Carlberg, Carl G., Omaha, Nebr. Bottle closure. 2,000,742; May 7.

Carlsen, Leonard O., assignor to Gleason Works, Rochester, N. Y. Machine for producing gears. 2,000,215; May 7.

Carlson, Gustave A., Detroit, Mich. Grinding machine. 2,000,216; May 7.

Carlsson, Richard E., Stockholm, Sweden. Bracket arrangement for shelves or the like. 2,000,124; May 7.

Carpenter, Claude H., and C. M. Derby, Frewsburg, N. Y. Milk testing device. 2,000,579; May 7.

Carpenter, Daniel A., New York, N. Y. Elastic coupling. 2,000,217; May 7.

Carpenter, William R. (See Bauer, O. F., and Carpenter.)

Carr, James I., Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of diaryl sulphones. 2,000,061; May 7.

Carroll, Fred M., Yonkers, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Tabulating machine. 2,000,218; May 7.

Carruthers, Eben H., Ithaca, assignor to United Furnace Engineering Company, Inc., New York, N. Y. Combustion of liquid fuels. 2,000,580; May 7.

Carry, Edward F., deceased, Chicago, Ill., M. D. Carry, executrix, assignor to Pullman-Standard Car Manufacturing Company. Cooling and ventilating system. 2,000,477; May 7.

Carry, Mabel D., executrix. (See Carry, Edward F.)

Carton Development Corporation. (See Dart, Robert H., assignor.)

Casablancas, Fernando, Sabadell, Spain. Apparatus for imparting pressure to the cylinders of the mechanisms for drawing textile rovings. 2,000,660; May 7.

Casey, Frank J., Albion, Nebr. Dandelion puller. 2,000,219; May 7.

Cash, A. W., Company. (See Andrews, L. V., and Terry, assignors.)

Caterpillar Tractor Co. (See Gedstad, Rudolph, assignor.)

Caterpillar Tractor Co. (See Thoen, Lowell H., assignor.)

Celanese Corporation of America. (See Dreyfus, C., and Whitehead, assignors.)

Certain-Teed Products Corporation. (See Knapp, George, assignor.)

Chadborn, Fredreic C., Newburgh, N. Y. Automatic mixing valve. 2,000,319; May 7.

Chadeloid Chemical Company. (See Bush, Edward B., assignor.)

Chambersburg Engineering Company. (See Clarke, Eugene C., assignor.)

Chapman, James, Atlanta, and B. W. Brown, Hapeville, Ga. Protector motion for looms. 2,000,820; May 7.

Chelva Heat Inc. (See Ralston, L. T. M., and Bottsford, assignors.)

Chemical Construction Corporation. (See Hechenbleikner, Ingenuin, assignor.)

Cherry-Burrell Corporation. (See Neely, Raymond J., assignor.)

Chicago Cardboard Company. (See Ziemmerman, Henry, assignor.)

Chicago Pneumatic Tool Company. (See Collins, Lester L., assignor.)

Chicago Pneumatic Tool Company. (See Wasson, Harry C., assignor.)

Choice, Frank C. (See Ricks, F., Elliott, and Choice.)

Christensen, Niels C., Salt Lake City, Utah. Making pigments from lead ores. 2,000,661; May 7.

Cincinnati Bickford Tool Company, The. (See Schauer, L. L., Boss, and McKewen, assignors.)

Cincinnati Grinders Incorporated. (See Foerster, A. W., and Booth, assignors.)

Cincinnati Grinders Incorporated. (See Peaslee, W., and Nenninger, assignors.)

Cincinnati Grinders Incorporated. (See Roehm, Erwin G., assignor.)

Clancy, Fred V., San Jose, Calif. Brake shoe expander. 2,000,011; May 7.

Clark Equipment Company. (See Spatta, George, assignor.)

Clark, James E., Long Island City, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Mounting electrodes. 2,000,163; May 7.

Clarke, Allen W., and W. F. Dietrichson, Berwick, Pa., assignors to American Car and Foundry Company, New York, N. Y. Cooling and conditioning air. 2,000,821; May 7.

Clarke, Eugene C., Chambersburg, assignor to Chambersburg Engineering Company, Chambersburg, Pa. Slide valve. 2,000,822; May 7.

Clarke, Louis A., Fishkill, assignor to The Texas Company, New York, N. Y. Solvent refining of hydrocarbon oil. 2,000,690; May 7.

Clean Coal Company Limited. (See Lessing, R., and Allen, assignors.)

Clesi, Francis P., C. B. Cousley, and C. Meyers, New Orleans, La. Regulator for charging generators. 2,000,125; May 7.

Clover, Ralph, North Vernon, Ind. Turntable. 2,000,823; May 7.

Clum Manufacturing Company. (See Pease, Frederick J., assignor.)

Coffin, Ernest, and F. F. Ruau, Deptford, London, England. Dust extraction apparatus. 2,000,662; May 7.

Coffin, Joel S., Jr., Englewood, and E. L. Scheliens, Ridgewood, assignors to C-S Engineering Company, Englewood, N. J. Lubricated bearing. 2,000,581; May 7.

Cohen, Joseph H., Bridgeport, Conn. Splash guard for vehicle wheel fenders. 2,000,220; May 7.

Cohen, Joseph H., Bridgeport, Conn. Electrical device for automobiles. 2,000,743; May 7.

Colby, Bevan W. (See Fiske, A. H., Colby, and Lewis.)

Cole, John E. (See Lubs, H. A., and Cole.)

Coleman, Gerald H. (See Grether, E. F., and Coleman.)

Coleman, Gerald H., assignor to The Dow Chemical Company, Midland, Mich. Purifying tetrachloroethylene. 2,000,881; May 7.

Collins, Lester L., Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Compressor discharge valve. 2,000,691; May 7.

Colt's Patent Fire Arms Manufacturing Co. (See Teller, Spencer J., assignor.)

Colvin, William, Jr., Troy, N. Y. Electrical condenser. 2,000,437; May 7.

Comstock, Daniel F., Boston, Mass., assignor, by mesne assignments, to Stator Refrigeration, Inc. Insulating housing. 2,000,882; May 7.

Conklin, William F., Tarentum, H. S. Hopkins, and J. M. Hover, Crafton, Pa., Tarentum Savings and Trust Company, M. C. Voigt, and C. C. Cox, administrators of said William F. Conklin, deceased. Sheet piling mechanism. 2,000,273; May 7.
Conte, Sebastiano, Princeton, N. J. Electric water heater. 2,000,478; May 7.
Conway, Irvin M. (See McNamara, L. C., Potter, and Conway.)
Cook, Cleo C. and M. M., Visalia, Calif. Closure operating mechanism. 2,000,479; May 7.
Cook, Milford M. (See Cook, Cleo C. and M. M.)
Corigliano, Peter, St. Albans, N. Y., assignor to Bright Star Battery Company, Hoboken, N. J. Dry cell. 2,000,510; May 7.
Couch, Forrest J., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Fabric folding machine. 2,000,062; May 7.
Couch, Forrest J., Rochester, N. Y., assignor to The American Laundry Machinery Company, Norwood, Ohio. Folding machine. 2,000,063; May 7.
Cousley, Charles B. (See Clesi, F. P., Cousley, and Meyers.)
Covell, Harold S., and C. Lohman, assignors to Hart & Cooley Manufacturing Company, Holland, Mich. Honeycomb directional grille. 2,000,274; May 7.
Cover, Harvey S., South Bend, Ind. Respirator. 2,000,064; May 7.
Cox, Catherine C., et al., administrators, et al. (See Conklin, W. F., Hopkins, and Hover.)
Crane Co. (See Lange, Joseph O., assignor.)
Crane Packing Company, et al. (See Wilkinson, Francis C. W., assignor.)
Creagmile, William B., et al. (See Keifaber, E. W., Doerr, Whitson, and Creagmile.)
Creighton, Harry M., East Norwalk, assignor, by mesne assignments, to The R. U. V. Engineering Corporation, South Norwalk, Conn. Active ray treating device. 2,000,377; May 7.
Crockett, William B., Notre Dame de Grace, Quebec, Canada. Recessing cutter. 2,000,824; May 7.
Cullen, Ernest, San Diego, assignor to John B. Smiley, Los Angeles, Calif. Combination wrench and pliers. 2,000,012; May 7.
Cullen, Harry E., and H. O. Bonning, Minneapolis, Minn., assignors to H. P. Watson, Minneapolis, Minn., deceased. Alfred F. Pillsbury and Bessie Watson, executors. Valve. 2,000,883; May 7.
Curnen, Bernard V. (See Gray, John W., assignor.)
Curtis Publishing Company, The. (See Allen, W. W., and Grammer, assignors.)
Curtiss Aeroplane & Motor Company. (See Osborn, E. R., and Wright, assignors.)
Curtiss Aeroplane & Motor Company. (See Steward, Colby W., assignor.)
Cutler-Hammer, Inc. (See Evans, Clarence T., assignor.)
Cyprien Ste-Marie. (See Lavallée, Wilfrid, assignor.)
Dahlstrom, John A., Bay Village, and W. A. Bryson, Lakewood, Ohio, assignors to Perfection Stove Company, Cleveland, Ohio. Oil burner. 2,000,884; May 7.
Darrah, William A., assignor to United States Gypsum Company, Chicago, Ill. Drying materials. 2,000,663; May 7.
Dart, Robert H., Sacramento, Calif., assignor, by mesne assignments, to Carton Development Corporation, New York, N. Y. Lining collar for fruit boxes. 2,000,126; May 7.
Davies, Tom J., New York, N. Y. Wheel wrench. 2,000,744; May 7.
Davies, Walter R., Missoula, Mont. Heater. 2,000,825; May 7.
Davies, Walter R., Missoula, Mont. Electrical heater. 2,000,826; May 7.
Davis & Furber Machine Company. (See Flynn, Edward S., assignor.)
Davis, Homer J., Wilmington, Del. Fiber tube rolling machine. 2,000,065; May 7.
Davison, Robert L., assignor to John B. Pierce Foundation, New York, N. Y. Spandrel truss. 2,000,885; May 7.
Dawson, Carlton W., Taft, Calif. Power wrench for well tubing and rods. 2,000,221; May 7.
Dawson, George H., Chicago, and P. O. Unger, Glen Ellyn, assignors to Wilson-Jones Company, Chicago, Ill. Summary board. 2,000,558; May 7.
Dayton Rubber Manufacturing Company, The. (See Kreider, Edward H., assignor.)
De Boer, Rudolph F., Grand Rapids, Mich. Ash receiver. 2,000,275; May 7.
Deine & Co. Orbono-Gesellschaft. (See Janke, Paul, assignor.)
Deisch, Noel, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y. Adjusting effective incremental permeability of magnetic circuits. 2,000,378; May 7.
Deisch, Noel, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y. Method of and apparatus for the formation of images. 2,000,379; May 7.
Deisch, Noel, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y. Apparatus for the formation of images. 2,000,380; May 7.
Delaya-Crey, Thomas C., Bristol, Conn., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Bearing and guard therefor. 2,000,276; May 7.
De Laval Separator Company, The. (See Stresynski, George J., assignor.)
Demag Aktiengesellschaft. (See Siebert, Heinrich, assignor.)
Demol, Albert E., Paterson, N. J. Boil-off or dyeing apparatus. 2,000,745; May 7.
Derby, Charles M. (See Carpenter, C. H., and Derby.)
Dearosiers, Marie B., East Springfield, Mass. Lingerie clasp. 2,000,127; May 7.
Detroit Gasket & Manufacturing Company. (See Balfe, George T., assignor.)
Devine, William P., Dorchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel covering machine. 2,000,128; May 7.
Dichter, Samuel J., assignor to Martha Maid Manufacturing Co., Chicago, Ill. Garment. 2,000,633; May 7.
Didier, William J., Racine, Wis. Artificial limb joint construction. 2,000,066; May 7.
Diesel, Norman F. (See Malm, C. J., Nadeau, and Diesel.)
Dietrich, Wilhelm, Oppau, and M. Luther, Mannheim, assignors to I. G. Farbenindustrie Gesellschaft, Frankfort-on-the-Main, Germany. Oxidation of hydrocarbon materials. 2,000,222; May 7.
Dietrichson, William F. (See Clarke, A. W., and Dietrichson.)
Dillehay, Edward R., Glen Ellyn, and O. G. Rieser, Oak Park, Ill., assignors to The Richardson Company, Lockland, Ohio. Composition for storage battery containers. 2,000,582; May 7.
Di Mauro, Giuseppe, Brooklyn, N. Y., assignor of two-thirds to W. M. Goldweber, Bayonne, N. J. Collapsible container. 2,000,067; May 7.
Dimberg, Paul C., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Uniting nickel chrome steel turbine blades. 2,000,692; May 7.
Ditchfield, Frank. (See McWilliams, J. P., and Ditchfield.)
Ditchfield, Frank, assignor of one-half to The Youngstown Steel Door Company, Cleveland, Ohio, and one-half to Pressed Steel Car Company, Pittsburgh, Pa. House car. 2,000,164; May 7.
Ditchfield, Frank, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. House car. 2,000,320; May 7.
Doerr, Josef, et al. (See Kiefaber, E. W., Doerr, Whitson, and Creagmile.)
Domenjoz, John A., New York, N. Y. Aeronautical machine. 2,000,068; May 7.
Donaldson Company. (See Lowther, Wilfred W., assignor.)
Doubrava, Harry W. (See Harris, I. C., and Doubrava.)
Dougherty, James G., New York, N. Y. Electric heating. 2,000,438; May 7.
Doughty, William E., assignor to James Vernor Company, Detroit, Mich. Beverage dispensing apparatus. 2,000,583; May 7.
Dovjikov, Alexander D., Wilkinsburg, C. L. Fortescue, Pittsburgh, and C. F. Wagner, Swissvale, Pa., assignors to Westinghouse Electric and Manufacturing Company. System impervious to unbalanced faults. 2,000,693; May 7.
Dow Chemical Company, The. (See Britton, E. C., Nutting, and Huscher, assignors.)
Dow Chemical Company, The. (See Coleman, Gerald H., assignor.)
Dow Chemical Company, The. (See Dow, Herbert H., assignor.)
Dow Chemical Company, The. (See Grether, E. F., and Coleman, assignors.)
Dow, Herbert H., deceased, by W. H. Dow and C. Turner, administrators, assignors to The Dow Chemical Company, Midland, Mich. Heat transfer. 2,000,886; May 7.
Dow, Willard H., et al., administrators. (See Dow, Herbert H.)
Downing, Frederick B., Carneys Point, and L. S. Bake, Pennsgrove, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of lead alkyls. 2,000,069; May 7.
Dray, Michael, Bronx, N. Y. Automatic submarine safety apparatus. 2,000,746; May 7.
Dreyfus, Camille, New York, N. Y., and W. Whitehead, Cumberland, Md., assignors to Celanese Corporation of America. Producing artificial straw and product thereof. 2,000,013; May 7.
Du Brul, Clarence J., Cincinnati, Ohio. Mitering sheet material. 2,000,634; May 7.
Duffy, Peter J., Houston, Tex. Extinguishing oil well fires. 2,000,881; May 7.
Du Mont, Allen B., Upper Montclair, N. J. Telautograph. 2,000,014; May 7.
Dunbar, Charles, Middleton, and W. Todd, Manchester, England, assignors to Imperial Chemical Industries Limited. Wetting preparations and their manufacture. 2,000,559; May 7.
Dunlop Tire & Rubber Corporation. (See McChesney, Cuyler S., assignor.)
Dunlop Tire and Rubber Corporation. (See Willshaw, H., Norcross, and Broadbent, assignors.)
Dunnam, Richard A., Dayton, Ohio. Grooving machine. 2,000,129; May 7.
Du Pont Cellophane Company. (See Herndon, Lee R., assignor.)

Du Pont Cellophane Company. (See Rankin, Julius D., assignor.)
Du Pont, E. I., de Nemours & Company. (See Calcott, W. S., and Pedersen, assignors.)
Du Pont, E. I., de Nemours & Company. (See Carr, James I., assignor.)
Du Pont, E. I., de Nemours & Company. (See Downing, F. B., and Bake, assignors.)
Du Pont, E. I., de Nemours & Company. (See Hannum, Chester W., assignor.)
Du Pont, E. I., de Nemours & Company, The. (See Harris, Charles R., assignor.)
Du Pont, E. I., de Nemours & Co. (See Lubs, H. A., and Cole, assignors.)
Du Pont, E. I., de Nemours & Company. (See Pitman, Earle C., assignor.)
Du Pont, E. I., de Nemours & Company. (See Vail, Walter E., assignor.)
Du Pont, E. I., de Nemours & Company. (See Walker, Joseph F., assignor.)
Du Pras, Louis, Marquette, Mich. Self-locking differential. 2,000,223; May 7.
Durand & Huguenin A.-G. (See Haller, Josef, assignor.)
Durkee, Maurice M., assignor to A. E. Staley Manufacturing Company, Decatur, Ill. Process and apparatus for heating steam. 2,000,277; May 7.
Eastman Kodak Company. (See Blank, Maurice G., assignor.)
Eastman Kodak Company. (See Boon, Joseph L., assignor.)
Eastman Kodak Company. (See Brooker, Leslie G. S., assignor.)
Eastman Kodak Company. (See Fordyce, Charles R., assignor.)
Eastman Kodak Company. (See Fuerst, Carl C., assignor.)
Eastman Kodak Company. (See Fuller, Albert B., assignor.)
Eastman Kodak Company. (See Kenyon, W. O., and Van Dyke, assignors.)
Eastman Kodak Company. (See Malm, C. J., and Fletcher, assignors.)
Eastman Kodak Company. (See Malm, C. J., and Fordyce, assignors.)
Eastman Kodak Company. (See Malm, C. J., Nadeau, and Diesel, assignors.)
Eastman Kodak Company. (See Othmer, Donald F., assignor.)
Eastman Kodak Company. (See Sheppard, S. E., and Hudson, assignors.)
Eastman Kodak Company. (See Staud, C. J., and Minsk, assignors.)
Eastman Kodak Company. (See Staud, C. J., and Van Dyke, assignors.)
Eastman Kodak Company. (See Stone, Herbert G., assignor.)
Eastman Kodak Company. (See Taylor, Ernest R., assignor.)
Eaton, Charles F., West Newbury, assignor to North American Chemical Company, Cambridge, Mass. Magazine shoe filler unit. 2,000,321; May 7.
Eby, Eugene D., Pittsfield, Mass., assignor to General Electric Company. Fluid-stop joint. 2,000,747; May 7.
Edison, Thomas A., Incorporated. (See Stanley, Harold D., assignor.)
Edwards, Herbert C., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 2,000,635; May 7.
Edwards, Herbert C., assignor to Packard Motor Car Company, Detroit, Mich. Internal combustion engine. 2,000,828; May 7.
Edwards, Oliver M., and R. T. Axe, assignors, by mesne assignments, to The Syracuse Trust Company, Syracuse, N. Y. Self contained window structure. 2,000,511; May 7.
Edwards Railway Motor Company, et al. (See Newlin, Mike H., assignor.)
Eggert, Gustav B., assignor to Baker Perkins Company, Inc., Saginaw, Mich. Lubricating system for dough dividers. 2,000,512; May 7.
Eggert, Gustav B., deceased, by B. H. Liskow, administrator, assignor to Baker Perkins Company, Inc., Saginaw, Mich. Oil wiper. 2,000,513; May 7.
Egloff, Gustav. (See Morrell, J. C., and Egloff.)
Eisenhut, Otto, Heidelberg, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of gaseous mixtures containing hydrogen. 2,000,224; May 7.
Eitel, William W., and J. McCullough, San Bruno, assignors to Heintz & Kaufman, Ltd., San Francisco, Calif. Thermionic tube stem machine. 2,000,560; May 7.
Electric Storage Battery Company. The. (See Terry, Charles W., assignor.)
Electrical Engineers Equipment Co. (See Hoye, Peder B., assignor.)
Electrogear Corporation. (See Neuland, Alfons H., assignor.)
Electromatic Typewriters, Inc. (See Thompson, Russel G., assignor.)
Elliott, Harold E. (See Ricks, F., and Elliott.)
Elliott, Harold E. (See Ricks, F., Elliott, and Choice.)
Ells, Burdick R., et al. (See Minton, Corwin R., assignor.)
Elsner, Richard, Elizabethton, Tenn., assignor to North American Rayon Corporation. Viscose solution. 2,000,887; May 7.
Engster, Frank W., Troy, N. Y., assignor to General Electric Company. Terminal for electric cables. 2,000,748; May 7.
Enock, Arthur G., Wembley Park, England. Apparatus for pasteurizing milk and other substances. 2,000,514; May 7.
Equitable Paper Bag Co. Inc. (See Poppe, George W., assignor.)
Erickson, John R., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Acoustic device. 2,000,165; May 7.
Erospha, Inc. (See Wicha, Alois, assignor.)
Espenschied, Lloyd, Hollis, N. Y. Railway signal system. 2,000,166; May 7.
Espenschied, Lloyd, Kew Gardens, N. Y., and E. I. Green, East Orange, N. J., assignors to American Telephone and Telegraph Company. Wide band transmission system. 2,000,130; May 7.
Esseling, August T. (See Jonas, G. B., and Esseling.)
Estate Stove Company, The. (See Kahn, Bertrand B., assignor.)
Estate Stove Company, The. (See Kahn, B. B., and Bradbury, assignors.)
Eternal Calendar Corporation. (See Turnbaugh, Elbert L., assignor.)
Evans, Charles S. (See Starrett, Wendelin D., assignor.)
Evans, Clarence T., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Snap operating mechanism. 2,000,322; May 7.
Evans, Job McG. and O. R. Yerington, North Kansas City, Mo. Tobacco press. 2,000,382; May 7.
Evans Products Company. (See Toblin, Kenneth J., assignor.)
Ex-Cell-O Aircraft & Tool Corporation. (See Alden, Carroll R., assignor.)
Exotic Vanities, Inc. (See Buscham, Christian A., assignor.)
Fairmount Glass Works, Inc. (See Ferguson, John, assignor.)
Faltelowitz, Arnold. (See Lippmann, L. M., and Faltelowitz.)
Falconbridge Nickel Mines Limited. (See Gronningsaeter, Anton M., assignor.)
Falk, Morris, Fitchburg, Mass. Lock. 2,000,829; May 7.
Fankboner, Harland, assignor to The Goss Printing Press Company, Chicago, Ill. Web renewing mechanism. 2,000,439; May 7.
Farber, Jacob, assignor to L. C. Farber, New York, N. Y. Coin control register bank. 2,000,323; May 7.
Farber, Lina C. (See Farber, Jacob, assignor.)
Farren, Robert E., Revere, Mass. Ignition trouble eliminator. 2,000,830; May 7.
Fehrle, Alfred. (See Streitwolf, K., Fehrle and Hilmer.)
Feldmann, Wilhelm. (See Heinrich, R., and Feldman.)
Felix, Edgar H., Ridgewood, N. J., assignor to Radio Inventions, Incorporated, New York, N. Y. Television system. 2,000,694; May 7.
Ferguson, John, assignor to Fairmount Glass Works, Inc., Indianapolis, Ind. Electric furnace. 2,000,278; May 7.
Fetter, Ralph S., Buffalo, N. Y. Closure for fruit jars and the like. 2,000,831; May 7.
Fibreboard Products Inc. (See Ford, G. F. and Pittman, assignors.)
Fichandler, Carl, New York, N. Y. Frequency control. 2,000,584; May 7.
Field, Harold C. (See Hayes, Carl I., assignor.)
Fife, Harvey R., Pittsburgh, Pa., assignor to Carbide and Carbon Chemicals Corporation. Composite article and making the same. 2,000,383; May 7.
Filkorn, C. A. (See Husarik, Ynstina, assignor.)
Filso Leather Products, Co. (See Solomon, Morris, assignor.)
Fink, Jean, assignor to Waltham Watch Company, Waltham, Mass. Electro-magnetic impulse clock. 2,000,585; May 7.
Firestone Steel Products Company, The. (See Brink, Winfield S., assignor.)
Firestone Tire & Rubber Company, The. (See Taylor, Raymond S., assignor.)
Fisher, Charles B., Williamsport, Pa. Bow. 2,000,832; May 7.
Fisher, James B., and M. Hofmann, assignors to Waukesha Motor Company, Waukesha, Wis. Injection engine. 2,000,225; May 7.
Fisher Hosiery Co. (See Katzenmoyer, Harry E., assignor.)
Fiske, Augustus H., Warren, B. W. Colby, Providence, and G. B. Lewis, Rumford, assignors to Rumford Chemical Works, Rumford, R. I. Multiuse batter product. 2,000,888; May 7.
Fitch, Clyde J. (See Lemmon, W. S., and Fitch.)
Fitz Gerald, John W., assignor to Briggs and Stratton Corporation, Milwaukee, Wis. Lock. 2,000,279; May 7.
Fitz Gerald, John W., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Lock. 2,000,280; May 7.
Fleischer, I., & Sons. (See Fleischer, Nathan I., assignor.)
Fleischer, Nathan I., assignor to I. Fleischer & Sons, Cincinnati, Ohio. Protective cover for garments. 2,000,324; May 7.
Fletcher, Charles L. (See Malm, C. J., and Fletcher.)
Flexible Steel Lacing Company. (See Olsen, John C., assignor.)

Flury, Godfrey, Austin, Tex. Safety arrow release device for bows in archery. 2,000,015; May 7.
Flynn, Edward S., Lowell, Mass., assignor to Davis & Furber Machine Company, North Andover, Mass. Card roller mounting machine. 2,000,070; May 7.
Flynn, Edward S., Lowell, assignor to Davis & Furber Machine Company, North Andover, Mass. Card clothing resetting machine. 2,000,071; May 7.
Flynt, Robert C., assignor of two-fifths to Forrest G. Miles, Winston-Salem, N. C. Sheet folding mechanism. 2,000,896; May 7.
Foerster, Adolph W., Detroit, Mich., and C. Booth, assignors to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machine. 2,000,586; May 7.
Food Concentrates, Inc. (See Northcutt, R. T., and Johnston, assignors.)
Food Machinery Corporation. (See Hatch, Hugh B., assignor.)
Ford, George F., Los Angeles, and W. F. Pittman, Huntington Park, assignors to Fibreboard Products Inc., San Francisco, Calif. Gluing machine. 2,000,825; May 7.
Fordyce, Charles R. (See Malm, C. J., and Fordyce.)
Fordyce, Charles R., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic film. 2,000,587; May 7.
Forman, Howard L., Kitchawan, N. Y. Refrigerating apparatus. 2,000,440; May 7.
Forman, James, Astoria, Long Island, N. Y., assignor to F. B. Roach, New York, N. Y., doing business under the name of Progress Supply Company. Liquid dispenser. 2,000,107; May 7.
Fortescue, Charles Le G. (See Dovjikov, A. D., Fortescue, and Wagner.)
Foss, H. D., and Company. (See Black, D., and Reid, assignors.)
Foster Machine Company. (See McKena, John O., assignor.)
Frank, Harrison J. L. (See Frank, W. H., Messing, and H. J. L. Frank.)
Frank, William H., J. A. Messing, and H. J. L. Frank, assignors to Bulldog Electric Products Company, Detroit, Mich. Multiple fuse device. 2,000,016; May 7.
Frankfort Distilleries Incorporated. (See Miller, Samuel C., assignor.)
Franklin, Oliver H., assignor of one-half to T. A. and E. E. Hudson, Tyler, Tex. Nut cracking machine. 2,000,749; May 7.
Fransen, Frank J. (See Seger, D., Smith, and Fransen.)
Frantz, Charton C., Pittsburgh, Pa. Baking bread. 2,000,394; May 7.
Freeman, Hubert M., deceased, East Pittsburgh, Pa., by Max F. Reges, administrator, Bloomfield, N. J., and Wallace G. Wade, Philadelphia, Pa., assignors to Westinghouse Electric and Manufacturing Company. Hot cathode electron discharge tube. 2,000,695; May 7.
Freise, Max G., Angermund, near Duesseldorf, Germany, assignor to American Lurgi Corporation, New York, N. Y. Production of zinc. 2,000,833; May 7.
Frey, Charles N. (See Gore, H. C., Jones, and Frey.)
Frick, Henry H., Pricks, Pa. Power transmission wheel. 2,000,834; May 7.
Friend, Robert O., and J. A. Montgomery, Chicago, Ill. Zeolite water softener. 2,000,696; May 7.
Fry, Lloyd A., assignor of one-half to The Lebon Company, Chicago, Ill. Treating asphalt shingles and composition therefor. 2,000,228; May 7.
Fuerst, Carl C., assignor to Eastman Kodak Company, Rochester, N. Y. Camera construction. 2,000,588; May 7.
Fuller, Albert B., assignor to Eastman Kodak Company, Rochester, N. Y. Exposure control apparatus. 2,000,589; May 7.
Fuller Company. (See Morrow, Joseph H., assignor.)
Fuller, Everett W. (See Story, B. W., and Fuller.)
Fulton Company, The. (See Thorp, Joel R., assignor.)
Gabriel Pneumatic Vulcanizer Incorporated. (See Batterman, John J., assignor.)
Gadget's Inc. (See Mallory, Bonnie L., assignor.)
Gagnier, George E. (See Place, Bion C., assignor.)
Garove, Arthur S. (See White, E. J., and Garove.)
Gates, Paul G., Long Beach, Calif. Baller. 2,000,750; May 7.
Gedstad, Rudolph, Peoria, Ill., assignor to Caterpillar Tractor Co., San Leandro, Calif. Road machine. 2,000,072; May 7.
General Airmeters Company. (See Moore, Robert S., assignor.)
General Ashless Works, Inc. (See Neresheimer, H., Ruppel, and Vilsmeier, assignors.)
General Ashless Works, Inc. (See Zitscher, A., and Lambert, assignors.)
General Electric Company. (See Bailey, William M., assignor.)
General Electric Company. (See Brophy, Dorothy H., assignor.)
General Electric Company. (See Buckland, Bruce O., assignor.)
General Electric Company. (See Eby, Eugene D., assignor.)
General Electric Company. (See Engster, Frank W., assignor.)
General Electric Company. (See Hosegood, Philip E., assignor.)
General Electric Company. (See Kiefer, Johannes, assignor.)
General Electric Company. (See Kraft, Hans, assignor.)
General Electric Company. (See Mansur, Clarence W., assignor.)
General Electric Company. (See Norris, Marvin L., assignor.)
General Electric Company. (See Standerwick, Reginald G., assignor.)
General Electric Company. (See Suits, Chauncey G., assignor.)
General Electric Company. (See Warrington, Albert R. van C., assignor.)
General Electric Company. (See Zelt, Elmer J., assignor.)
General Motors Corporation. (See Delaval-Crow, Thomas C., assignor.)
General Motors Corporation. (See George, Herbert, assignor.)
General Motors Corporation. (See Hutchinson, Philip H., assignor.)
General Motors Corporation. (See Schweller, Sylvester M., assignor.)
Geophysical Service, Inc. (See Polk, James V., assignor.)
George, Herbert, Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Refrigerating apparatus. 2,000,590; May 7.
Gilbert, William N., Hudson Heights, N. J., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Scale base system. 2,000,168; May 7.
Gillespie Auto Laundry System, Inc. (See Silverman, Samuel J., assignor.)
Given, Frederick J., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Filter. 2,000,441; May 7.
Gleason Works. (See Bauer, O. F., and Carpenter, assignors.)
Gleason Works. (See Carlsen, Leonard O., assignor.)
Glick, Oscar P., Denver, Colo. Putty softener. 2,000,751; May 7.
Globe Oil Tools Company. (See Howard, John H., assignor.)
Goas, Harry A., Schuylkill Haven, Pa., assignor to Julius Kayser & Co. Body garment and method of manufacture. 2,000,073; May 7.
Godfrey, Bert O., Brooklyn, N. Y. Trammel point for pitchometers. 2,000,281; May 7.
Goldberger, Frans, Breda, Netherlands, assignor, by mesne assignments, to Sylvania Industrial Corporation, Fredericksburg, Va. Artificial sausage casing. 2,000,835; May 7.
Goldberger, Frans, Breda, Netherlands, assignor, by mesne assignments, to Sylvania Industrial Corporation, Fredericksburg, Va. Manufacturing from nitrocellulose, skins and envelopes particularly adapted for use as artificial sausage casings. 2,000,836; May 7.
Goldsmith, Alfred N., New York, N. Y., assignor to Radio Corporation of America. Talking motion picture apparatus. 2,000,697; May 7.
Goldweber, William M. (See De Mauro, Giuseppe, assignor.)
Goodman Manufacturing Company. (See Pratt, Charles A., assignor.)
Goodrich, B. F., Company, The. (See Semon, W. L., and Sloan, assignors.)
Goodrich, B. F., Company, The. (See Sloan, Arthur W., assignor.)
Gore, Herbert C., Scarsdale, Stephen Jónsa, and C. N. Frey, New York, N. Y., assignors to Standard Brands, Incorporated, Dover, Del. Production of malt sirup. 2,000,169; May 7.
Gorissen, Engelbert, Wuppertal-Barmen, Germany. Blower, more particularly for use in vacuum cleaners. 2,000,480; May 7.
Gorman, William D., Philadelphia, Pa., and C. Moses, New York, N. Y., assignors to H. Brinton Company, Philadelphia, Pa. Knitting machine. 2,000,837; May 7.
Gorton, George, Racine, Wis. Swingable support for engraving machine cutter heads. 2,000,838; May 7.
Goss, Byron C., assignor to United States Ordnance Engineers, Inc., Cleveland, Ohio. Disabling and incapacitating gas generating chemical. 2,000,131; May 7.
Goss Printing Press Company, The. (See Faukboner, Harland, assignor.)
Goss Printing Press Company, The. (See Richter, Charles J., assignor.)
Grabb, George W., Sharpsburg, assignor of one-half to R. T. Scully, Pittsburgh, Pa. Shoe attachment for arch supports. 2,000,591; May 7.
Grammer, Allen L. (See Allen, W. W., and Grammer.)
Grant, Harry C., Jr., assignor to Walter Kidde & Company, Inc., New York, N. Y. Supervised electric system. 2,000,074; May 7.
Grant, Jim A., New York, N. Y. Threshing and scutching machine. 2,000,282; May 7.
Grasselli Chemical Company, The. (See Boller, Ernest R., assignor.)
Gray, John W., assignor of one-half to Bernard V. Curnen, Chattanooga, Tenn. Shock absorber. 2,000,133; May 7.
Gray, Russell J., Minneapolis, Minn. Lubricating means. 2,000,170; May 7.
Graybill, Hershey E., assignor to Animal Trap Company of America, Lititz, Pa. Animal trap. 2,000,752; May 7.
Green, Estill I. (See Espenschied, L., and Green.)

Greenfield, Eugene, and F. J. Thibault, assignors to Liquefied Gas Development Company, Detroit, Mich. Support. 2,000,592; May 7.
Greider, James B., Racine, Wis. Footwear. 2,000,366; May 7.
Grether, Ernest F., and G. H. Coleman, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich. Direct developed azo dyes and their production. 2,000,889; May 7.
Griscom, Samuel B., Pittsburgh, and H. C. Nycum, Wilkinsburg, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electromagnetic over-speed protection. 2,000,753; May 7.
Groff, Emory L. (See Hoffman, C. T., and Groff.)
Groff, Emory L., Trustee. (See Hoffman, Charles T., assignor.)
Gronningsaeter, Anton M., New York, N. Y., assignor to Falconbridge Nickel Mines Limited, Toronto, Ontario, Canada. Reduction of oxygeneous nickel or nickel copper compounds. 2,000,171; May 7.
Gross, Leo H., Bartelso, Ill. Door operating device. 2,000,515; May 7.
Grove, Theron A., Revere, Mass. Screw thread repairing tool. 2,000,227; May 7.
Gruender, Oscar C., assignor to Nordberg Manufacturing Co., Milwaukee, Wis. Bearing protection device. 2,000,835; May 7.
Guhl, Henry C., Haven, Kans., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Variable ratio transformer. 2,000,754; May 7.
Haberstump, Alfred H., Detroit, Mich., assignor to The Murray Corporation of America. Window support. 2,000,561; May 7.
Haglund, Gustaf, assignor to Patentaktiebolaget Grondal-Ramen, Stockholm, Sweden. Removing resin from sulphite cellulose. 2,000,562; May 7.
Hale, Newton J. (See Hodgkinson, Thomas E., assignor.)
Hale, Newton J. (See Hurd, R. O., and Hodgkinson, assignors.)
Haller, Josef, Leverkusen-Wiesdorf, Germany, assignor, by mesne assignments to Durand & Huguenin A.-G., Basel, Switzerland. Azo dyestuff. 2,000,133; May 7.
Hallock, Vernon R., Riverhead, N. Y. Clam-opener. 2,000,075; May 7.
Hamilton-Wade Company. (See Howard, Albert L., assignor.)
Hanlon, Michael J., Weehawken, N. J., assignor to Black Diamond Steamship Corporation, New York, N. Y. Automatic hatch beam locking device. 2,000,839; May 7.
Hanna, Clinton R., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motion picture apparatus. 2,000,698; May 7.
Hannum, Chester W., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Motor fuel. 2,000,283; May 7.
Hansen, Julius W., Princeton, Ind. Clock. 2,000,327; May 7.
Hanson, Walter M., Grand Rapids, Mich., assignor to American Seating Company, Grand Rapids, Mich. Hinge. 2,000,172; May 7.
Happel, Albert, assignor to Kent-Owens Machine Company, Toledo, Ohio. Variable speed transmission. 2,000,593; May 7.
Harding, William R., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Arc welding generator. 2,000,699; May 7.
Harrington, George G., assignor to Reed Roller Bit Company, Houston, Tex. Roller bit. 2,000,076; May 7.
Harris, Charles R., Niagara Falls, N. Y., assignor to The E. I. du Pont de Nemours & Company, Incorporated, Wilmington, Del. Manufacture of hydrocyanic acid. 2,000,134; May 7.
Harris, Irving C., Los Angeles, and H. W. Doubrava, Beverly Hills, Calif. Apparatus for transmitting energy. 2,000,173; May 7.
Harris, Melvin N., Oakland, Calif. Finger ring. 2,000,228; May 7.
Harris, William, Newark, N. J. Match. 2,000,328; May 7.
Harrison, Charles, Vancouver, British Columbia, Canada. Hose coupling. 2,000,481; May 7.
Harrison, Thomas R. (See Brown, R. P., and Harrison.)
Harshberger, Norman P., Scarsdale, assignor to Bakelite Building Products Co., Inc., New York, N. Y. Apparatus for and method of applying surfacing material to a fabric web. 2,000,077; May 7.
Hart & Cooley Manufacturing Company. (See Covell, H. S., and Lohman, assignors.)
Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Hand brake. 2,000,078; May 7.
Hatch, Hugh B., Dunedin, Fla., assignor to Food Machinery Corporation, San Jose, Calif. Fruit coloring room. 2,000,637; May 7.
Hawkins, Paul, Company. (See Hahn, Harry W., assignor.)
Haydon, Arthur W., Hinsdale, Ill. Electric motor and clock mechanism. 2,000,516; May 7.
Hayes, Carl L., Cranston, assignor to Harold C. Field, Providence, R. I. Multiple furnace. 2,000,664; May 7.
Haynes, Charles F., Weatherford, Tex., assignor of one-half to E. M. Schenecker, Fort Worth, Tex. Electric fan. 2,000,886; May 7.
Haseltine Corporation. (See Lewis, Harold M., assignor.)
Haseltine Corporation. (See Wheeler, Harold A., assignor.)
Heald Machine Company, The. (See Schmidt, William D., assignor.)
Healls, George A., assignor to I-T-E Circuit Breaker Company, Philadelphia, Pa. Electric circuit interrupter. 2,000,442; May 7.
Hechenbleikner, Ingenuin, assignor to Chemical Construction Corporation, Charlotte, N. C. Apparatus for the treatment of a gas by a liquid. 2,000,443; May 7.
Hechenbleikner, Ingenuin, assignor to Chemical Construction Corporation, Charlotte, N. C. Method of and apparatus for bringing a liquid and a gas into intimate contact or mixture. 2,000,444; May 7.
Heck, Bernard F., St. Paul, Minn. Device for forming plate gangs for multicolor printing. 2,000,755; May 7.
Heck, Bernard F., St. Paul, Minn. Forming plate gangs for multicolor printing. 2,000,756; May 7.
Heinrich, Richard, Berlin-Sudende, and W. Feldmann, Berlin-Spandau, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Electrical cleaning of fluids. 2,000,017; May 7.
Heinrich, Richard, Berlin-Sudende, Germany, assignor to International Precipitation Company, Los Angeles, Calif. Electrical precipitation of suspended particles from gases. 2,000,020; May 7.
Heinrich, Richard, Berlin-Sudende, Germany, assignor to Siemens Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Separation of emulsions by electrical action. 2,000,018; May 7.
Heinrich, Richard, Berlin-Sudende, and W. Feldmann, Berlin-Spandau, Germany, assignors to International Precipitation Company, Los Angeles, Calif. Electrical precipitation. 2,000,019; May 7.
Heintz & Kaufman, Ltd. (See McCullough, Jack, assignor.)
Heintz Manufacturing Company. (See Lambert, Albert L., assignor.)
Heintz & Kaufman, Ltd. (See Eltel, W. W., and McCullough, assignors.)
Heintz & Kaufman, Ltd. (See Heintz, Ralph M., assignor.)
Heintz, Ralph M., Palo Alto, assignor to Heintz & Kaufman, Ltd., San Francisco, Calif. Radio tube socket. 2,000,563; May 7.
Heise, William H., assignor to Big Rock Ranch Company, Los Angeles, Calif. Device to level body of a tilted chassis. 2,000,229; May 7.
Heise, William H., assignor to Big Rock Ranch Company, Los Angeles, Calif. Lever means for leveling hearse bodies. 2,000,230; May 7.
Heisel, Paul, and E. Bergheimer, Gersthofen, near Augsburg, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Preparing alkali metal alcoholates. 2,000,329; May 7.
Hempstead, Joseph A., Pittsburgh, Pa. Air mixing device for gaseous fuels. 2,000,464; May 7.
Henglein, Friedrich A., Cologne-Deuts, and O. Nitzschke, Leverkusen-I. G. Werk, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. 2,000,135; May 7.
Henry, William A., Littleton, Colo. Pressure controlled throttle valve. 2,000,387; May 7.
Hentschel, Ernest R., deceased, Washington, D. C., John Olsen, administrator, assignor to Wired Radio, Inc., New York, N. Y. Sound reproducing system. 2,000,840; May 7.
Hepler, Carroll D., assignor to Trumbull Electric Manufacturing Company, Pacific Division, Seattle, Wash. Electric safety switch. 2,000,231; May 7.
Herdlein, Wallace H., St. Louis, Mo., assignor to American Car and Foundry Company, New York, N. Y. Apparatus for conditioning air. 2,000,841; May 7.
Herndon, Lee R., Kenmore, assignor to Du Pont Cellophane Company, Inc., New York, N. Y. Machine. 2,000,079; May 7.
Hertsberg, Harry, Brooklyn, N. Y. Talking picture screen. 2,000,174; May 7.
High, Carl F., Flint, Mich. Honing tool. 2,000,330; May 7.
Higley, Frank R., Cleveland Heights, Ohio. Vehicle drive. 2,000,465; May 7.
Hill, Edward G., Richmond, assignor to Hill Engineering Corporation, Richmond, Va. Motor vehicle clutch control mechanism. 2,000,331; May 7.
Hill Engineering Corporation. (See Hill, Edward G., assignor.)
Hilmer, Hans. (See Streitwolf, K., Fehrle, and Hilmer.)
Hinkle, James M., Barbourville, Ky., assignor to E. C. Kirby, Indianapolis, Ind. Die oiler. 2,000,482; May 7.
Hitchins, Harry M., Minneapolis, Minn. Egg package. 2,000,284; May 7.
Hochwalt, Carroll A., assignor to The Mead Research Engineering Company, Dayton, Ohio. Pigment. 2,000,842; May 7.
Hochwalt, Carroll A. (See Thomas, C. A., and Hochwalt.)
Hoe, R., & Co. (See Horton, Albert J., assignor.)
Hogelin, Isaac E., Guthrie Center, Iowa. Ladder bracket. 2,000,483; May 7.
Hodgkinson, Thomas E., assignor to N. J. Hale, San Francisco, Calif. Testing device. 2,000,594; May 7.
Hodgkinson, Thomas E. (See Hurd, R. O., and Hodgkinson.)
Hoffman, Charles T., and E. L. Groff, Washington, D. C., assignors to E. L. Groff, trustee. Ice cream freezer. 2,000,021; May 7.

Hoffman, Charles T., Washington, D. C., assignor to E. L. Groff, trustee. Ice cream freezer. 2,000,022; May 7.
Hoffman, Charles T., Washington, D. C., assignor to E. L. Groff, trustee. Ice cream freezer for refrigerators. 2,000,023; May 7.
Hoffman Beverage Company. (See Rue, H. E. and Nordstrom, assignors.)
Hoffmann, Fred P., Evanston, assignor, by mesne assignments, to American Porcelain Company, Chicago, Ill. Making dental porcelain. 2,000,285; May 7.
Hofmann, Max. (See Flaher, J. B., and Hofmann.)
Hofstadt, Richard, Wolfen, near Bitterfeld, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of ribbons. 2,000,388; May 7.
Holcomb, Michael, Cleveland, Ohio. Detachable connecter. 2,000,757; May 7.
Hollingsworth, Raymond A., and B. H. Moe, Seattle, Wash. Cabin construction. 2,000,638; May 7.
Holy, Mitchell B. (See Snodgrass, E. N., and Holy.)
Hoover Company, The. (See Altenkirch, Edmund, assignor.
Hopkins, Homer S. (See Conklin, W. F., Hopkins, and Hover.
Horni, Paul P., Newark, N. J. Door for fire alarm boxes and the like. 2,000,517; May 7.
Horton, Albert J., White Plains, assignor to R. Hoe & Co., Inc., New York, N. Y., Irving Trust Company, permanent trustee. Lithographic printing machine. 2,000,518; May 7.
Horton, Erwin C. (See Hueber, H., and Horton.)
Hosmer, Phillip E., Schenectady, N. Y., assignor to General Electric Company. Timer. 2,000,758; May 7.
Hotchkiss, Clifford, Elkhart, Ind., assignor, by mesne assignments, to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Sign flasher. 2,000,700; May 7.
Hover, John M. (See Conklin, W. F., Hopkins, and Hover.)
Hoyt, Foster B., Maywood, assignor to Electrical Engineers Equipment Co., Melrose Park, Ill. Switch. 2,000,080; May 7.
Howard, Albert L., assignor to Hamilton-Wade Company, Brockton, Mass. Upholstery finishing strip. 2,000,466; May 7.
Howard, John H., Huntington Park, assignor to Globe Oil Tools Company, Los Nietos, Calif. Core catcher. 2,000,289; May 7.
Howenstein, George H., Detroit, Mich. Window construction. 2,000,564; May 7.
Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Motion picture machine. 2,000,286; May 7.
Hudson, Emma E., et al. (See Franklin, Oliver H., assignor.
Hudson, James H. (See Sheppard, S. E., and Hudson.)
Hudson, T. A., et al. (See Franklin, Oliver H., assignor.)
Hueber, Henry, Buffalo, and E. C. Horton, Hamburg, assignors to Trico Products Corporation, Buffalo, N. Y. Motor. 2,000,590; May 7.
Huebner, William C., New York, N. Y. Photographic vacuum squeegee and negative holder. 2,000,390; May 7.
Hummel, August C., Cincinnati, Ohio. Portable device for dispensing gummed tape. 2,000,287; May 7.
Hunt, Geo. L., Automotive Equipment Co. (See Seger, D., Smith, and Franzen, assignors.)
Hurd, Roy O., and T. E. Hodgkinson, assignors to N. J. Hale, San Francisco, Calif. Apparatus for electrical testing. 2,000,595; May 7.
Husarik, Justina, Russelton, assignor of one-half to C. A. Filtore, Springdale, Pa. Padlock. 2,000,445; May 7.
Huscher, Myron E. (See Britton, E. C., Nutting, and Huscher.)
Huss, Joseph F., assignor of one-half to B. K. Blalock, Charlotte, N. C. Automobile theft preventing device. 2,000,196; May 7.
Huston, Robert E. (See Huston, Stinson, and R. E.)
Huston, Stinson and R. E., Trinity, Tex. Lid for baskets. 2,000,698; May 7.
Hutchings, Edward W., Perry, Fla. Manufacture of barrel staves. 2,000,291; May 7.
Hutchinson, John H., Portslade-by-Sea, assignor to Pipes, Limited, London, England. Roofing and like tiles. 2,000,592; May 7.
Hutchinson, Philip H., Montclair, N. J., assignor to General Motors Corporation, Detroit, Mich. Bore cutting machine. 2,000,288; May 7.
Hyde, Walter L., Maplewood, Mo. Fence post. 2,000,232; May 7.
Hydraulic Brake Company. (See Oliver, Wallace F., assignor.)
Hydraulic Press Manufacturing Company, The. (See Benedek, Elek E., assignor.)
I-T-E Circuit Breaker Company. (See Healis, George A., assignor.)
Ide, John M., Cambridge, Mass. Vibrator. 2,000,024; May 7.
Ide, John M., Cambridge, Mass. Vibrator. 2,000,025; May 7.
Ide, John M., Cambridge, Mass. Vibrator. 2,000,026; May 7.
I. G. Farbenindustrie Aktiengesellschaft. (See Beck, Ernst, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Dietrich, W., and Luther, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Eisenhut, Otto, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Heisel, P., and Bergheimer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Henglein, F. A., and Nitzschke, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hofstadt, Richard, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Neukirch, Eberhard, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Reppe, W., and Baur, assignors.)
Imperial Chemical Industries Limited. (See Binnie, David, assignor.)
Imperial Chemical Industries Limited. (See Dunbar, C., and Todd, assignors.)
Imperial Chemical Industries Limited. (See Thorpe, J. F. and Linstead, assignors.)
International Business Machines Corporation. (See Campbell, Charles, assignor.)
International Business Machines Corporation. (See Carroll, Fred M., assignor.)
International Business Machines Corporation. (See Gilbert, William N., assignor.)
International Business Machines Corporation. (See Kirkegaard, Einar L., assignor.)
International Business Machines Corporation. (See Lake, Clair D., assignor.)
International Business Machines Corporation. (See Lemmon, Walter S., assignor.)
International Business Machines Corp. (See Lemmon, W. S., and Fitch, assignors.)
International Business Machines Corporation. (See Maul, Michael, assignor.)
International Business Machines Corporation. (See Weinlich, H. A., and Kölm, assignors.)
International Business Machines Corporation. (See Wood, George R., assignor.)
International Motors Company. (See Matthews, Philip E., assignor.)
International Precipitation Company. (See Heinrich, Richard, assignor.)
International Precipitation Company. (See Heinrich R., and Feldmann, assignors.)
Irving Trust Company, receiver. (See Horton, Albert J.)
J. P. Tubular Heater Company, The. (See Jackson, R. A. F., and Wilson, assignors.)
Jackson, Robert A. F., Glasgow, and A. V. Wilson, Motherwell, assignors, to The J. P. Tubular Heater Company, Limited, Mossend, Lanarkshire, Scotland. Electric heater. 2,000,640; May 7.
Jaeck, Wolfgang, Basel, assignor to the Firm of Society of Chemical Industry in Basle, Basel, Switzerland. Dyeing nitrocellulose lacquers. 2,000,393; May 7.
James, Joseph H., Salt Lake City, Utah. Slag conveyer. 2,000,484; May 7.
James Manufacturing Company. (See Shodron, John G., assignor.)
Janer, Andre, Flushing, assignor to The A. J. & K. Company, Incorporated, New York, N. Y. Container for lip sticks and the like. 2,000,701; May 7.
Janke, Paul, Ascona, assignor to Dehne & Co., Orbono-Gesellschaft, Brissago, Switzerland. Composition for killing insects and fungi. 2,000,843; May 7.
Jansen, Henry, assignor of one-half to G. L. Ashline, Chicago, Ill. Tile. 2,000,565; May 7.
Jarrett, Richard S. (See Apfel, J., Ling, and Jarrett.)
Jefferson Island Salt Company. (See Bayless, John L., assignor.)
Jenkins, Thomas A., Roselle, N. J. Liquid chilling apparatus. 2,000,446; May 7.
Jennings, Chester S. (See Perry, H. R., and Jennings.)
Jennings, Frank H., assignor to National Rubber Machinery Company, Akron, Ohio. Planing machine. 2,000,394; May 7.
Jensen, Louis, assignor to United Autographic Register Co., Chicago, Ill. Typewriter attachment. 2,000,641; May 7.
Jensen, Otto T., Fresno, Calif. Toy. 2,000,332; May 7.
Johns, George M., near Sappington, Mo. Coin selector. 2,000,519; May 7.
Johns-Manville Products Corporation. (See Powell, Edward R., assignor.)
Johnson, Arthur A., assignor to John I. Paulding, Inc., New Bedford, Mass. Electric switch. 2,000,447; May 7.
Johnson, Arthur A., Great Neck, N. Y. Curing concrete. 2,000,759; May 7.
Johnson, Stanley G., Grosse Pointe, Mich., assignor to The Burkhardt Company. Loose leaf binder. 2,000,081; May 7.
Johnson, Stanley G., Grosse Pointe, Mich., assignor to The Burkhardt Company. Loose leaf binder. 2,000,844; May 7.
Johnston, Andrew L., Jr. (See Northcutt, R. T., and Johnston.)
Johnstone, Robert McC., Short Hills, and V. C. Borlos, West Englewood, N. J., assignors to Cameron Machine Company, Brooklyn, N. Y. Combined slitting and crushing device. 2,000,175; May 7.
Jonas, Gottfried B., and A. T. Esseling, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Window of metal or similar material in metal wall. 2,000,845; May 7.
Jones, Harry C., Los Angeles, assignor to N. H. Mann, Hollywood, Calif. Glow lamp. 2,000,895; May 7.

Jones, Harry C., New York, N. Y. Apparatus for securing registration position of an article. 2,000,520; May 7.
Jones, Leo D., assignor to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal treatment of substances and mechanism therefor. 2,000,521; May 7.
Jones, Paul A., San Francisco, Calif. Book holder and line finder. 2,000,485; May 7.
Journal Box Servicing Corporation. (See McNamara, L. C., Potter, and Conway, assignors.)
Joyner, William. (See Sutliffe, Frank C., assignor.)
Jozsa, Stephen. (See Gore, H. C., Jozsa, and Frey.)
Juelson, Agnes, Chicago, Ill. Curtain protector. 2,000,846; May 7.
Kahn, Bertrand B., Cincinnati, assignor to The Estate Stove Company, Hamilton, Ohio. Stove. 2,000,334; May 7.
Kahn, Bertrand B., Cincinnati, assignor to The Estate Stove Company, Hamilton, Ohio. Stove. 2,000,335; May 7.
Kahn, Bertrand B., Cincinnati, and W. T. Bradbury, assignor to The Estate Stove Company, Hamilton, Ohio. Stove. 2,000,333; May 7.
Kaiser, Jacob, Vaihingen, and E. Sauer, Stuttgart, Germany. Artificial manure and producing same. 2,000,082; May 7.
Kaspar, Albert, Cicero, Ill. Window. 2,000,522; May 7.
Kasson, Julius et al. (See Van Note, Eugene, assignor.)
Kasson, Max et al. (See Van Note, Eugene, assignor.)
Katzenmoyer, Harry E., Lauredale, assignor to Fisher Hosiery Co., Inc., Reading, Pa. Run resistant fabric. 2,000,176; May 7.
Kay, Frank W., assignor to American Engineering Company, Philadelphia, Pa. Domestic type stoker. 2,000,702; May 7.
Kayser, Julius, & Co. (See Goas, Harry A., assignor.)
Kazanjian, John G., assignor to Peter Paul Incorporated, Naugatuck, Conn. Molding machine. 2,000,027; May 7.
Keasbey & Mattison Company. (See Buczkowski, Edward J. A., assignor.)
Kehm, Arthur L., Harrisburg, S. Dak., assignor to Meinzer & Kehm Company. Building panel. 2,000,847; May 7.
Keil, Gustav B., St. Joseph, Mich., assignor to Nineteen Hundred Corporation, Binghamton, N. Y. Timing device for washing machines. 2,000,448; May 7.
Keiper, Phillip C., Chicago, Ill., assignor to Westinghouse Elevator Company. Elevator control system. 2,000,703; May 7.
Kelco Company. (See Wig, Rudolph J., assignor.)
Keller, John M., Cleveland, Ohio. Skate. 2,000,396; May 7.
Kellett, Benjamin W., New Orleans, La. Coal bagging machine. 2,000,848; May 7.
Keller, Blaine, Charlotte, N. C. Pressure filter. 2,000,137; May 7.
Kelly, William M., Westfield, assignor to American Type Founders Company, Elizabeth, N. J. Auxiliary rotary printing attachment for printing presses. 2,000,486; May 7.
Kelsey-Hayes Wheel Company. (See White, John W., assignor.)
Kelvinator Corporation. (See Philipp, Lawrence A., assignor.)
Kenney, Mahlon W., assignor to Allen-Bradley Company. Milwaukee, Wis. Rheostat. 2,000,177; May 7.
Kenney, Mahlon W., Berwyn, Ill., assignor to Allen-Bradley Company, Milwaukee, Wis. Rheostat. 2,000,178; May 7.
Kent-Owens Machine Company. (See Happel, Albert, assignor.)
Kenyon, William O., and R. H. Van Dyke, assignors to Eastman Kodak Company, Rochester, N. Y. Preparation of lactyl cellulose esters. 2,000,596; May 7.
Kern, Erwin. (See Brunner, G., and Kern.)
Kerr, Ford F., Fresno, Calif. Rack for displaying rugs. 2,000,386; May 7.
Keuffel, Adolf W., Montclair, assignor to Keuffel & Esser Company, Hoboken, N. J. Slide rule case. 2,000,337; May 7.
Keuffel & Esser Company. (See Keuffel, Adolf W., assignor.)
Keyes, Robert E., Dedham, assignor to B. F. Sturtevant Company, Inc., Boston, Mass. Air distribution unit. 2,000,597; May 7.
Keyser, Carl. (See Winning, W. F., and Keyser.)
Kidde, Walter, & Company. (See Grant, Harry C., Jr., assignor.)
Kidde, Walter & Company. (See Mapes, Daniel, assignor.)
Kiefaber, Edwin W., and J. Doerr, Philadelphia, T. B. Whitson, Moylan, and W. B. Creagmile, Norwood, assignors of fifty one-hundredths to J. G. Biddle, trading as James G. Biddle Company, and fifty one-hundredths to Rubicon Company, Philadelphia, Pa. Rheostat. 2,000,849; May 7.
Kiefer, Johannes, Berlin-Charlottenberg, Germany, assignor to General Electric Company. Arc lamp projector. 2,000,760; May 7.
Kilgore Manufacturing Company, The. (See Peake, Edward S., assignor.)
King, Elizabeth C. (See King, Robert J. and E. C.)
King, Robert J. Company, The. (See King, Robert J. and E. C., assignors.)
King, Robert J. and E. C., Stamford, assignors to The Robert J. King Company, Inc., Stamford, Conn. Compounding of rubber, etc. 2,000,028; May 7.
Kirby, E. C. (See Hinkle, James M., assignor.)
Kirchner, Henry P. (See Benner, R. C., Kirchner, and Melton.)
Kirkegaard, Einar L., Detroit, Mich., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Accounting machine. 2,000,283; May 7.
Klatinger, Emil, Trier-on-the-Mosel, Germany. Apparatus for producing hollow aluminum boot-trees by tip casting. 2,000,449; May 7.
Kleinschmidt, Edward E., Park Ridge, and L. M. Potts, Evanston, assignors, by mesne assignments, to Teletypesetter Corporation, Chicago, Ill. Keyboard perforator and counter. 2,000,029; May 7.
Kleinschmidt, Edward F., assignor to Teletype Corporation, Chicago, Ill. Facsimile printing telegraph system and apparatus. 2,000,083; May 7.
Klett, Fred F., Jersey City, N. J., assignor to Radio Corporation of America. Capsule making machine. 2,000,234; May 7.
Kliefoth, Max H., assignor to C. F. Burgess Laboratories, Inc., Madison, Wis. Indurating clay and product formed therefrom. 2,000,338; May 7.
Kloss, Athniel, Scobey, Mont. Making cereal coffee. 2,000,450; May 7.
Knapp, George, St. Louis County, Mo., assignor to Certain-teed Products Corporation, New York, N. Y. Covering for surfaces exposed to the weather. 2,000,030; May 7.
Knapp, Harold D., Merchantville, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Telephone sound reproducer. 2,000,523; May 7.
Knell, John, assignor to All-Steel-Equip Company, Aurora, Ill. Outlet box and cable clamp. 2,000,850; May 7.
Knell, John, assignor to All-Steel-Equip Company, Aurora, Ill. Outlet box. 2,000,851; May 7.
Knutson, Alfred W., Geneseo, Ill. Quilt and rug frame. 2,000,397; May 7.
Koch, Arthur A., Beardsley, Minn. Lip stick holder. 2,000,487; May 7.
Kohler, John F., White Plains, N. Y. Device for feeding plates onto a conveyer. 2,000,761; May 7.
Kölm, Ulrich. (See Weinlich, H. A., and Kölm.)
Korsmo, Torbjorn C., assignor to Madison-Kipp Corporation, Madison, Wis. Die casting machine. 2,000,488; May 7.
Kothny, Gottlank L., Strafford, Pa., and F. C. Narvesen, East Rockaway, L. I., N. Y., assignors to Sperry-Sun Well Surveying Company, Philadelphia, Pa. Well surveying instrument. 2,000,524; May 7.
Kraft, Hans, Schenectady, N. Y., assignor to General Electric Company. Fluid jet pump. 2,000,762; May 7.
Kramer, Emil M., Muskegon, Mich. Brake testing device. 2,000,289; May 7.
Krause, Charles E. (See Slepian, J., Tanberg, and Krause.)
Krein, Frederick T., assignor to Vortex Cup Company, Park Ridge, Ill. Making confection packages. 2,000,339; May 7.
Kremer, Edward H., assignor to The Dayton Rubber Manufacturing Company, Dayton, Ohio. Belt connecter. 2,000,598; May 7.
Krieger, Adolf W., Brooklyn, N. Y. Combination aquarium. 2,000,451; May 7.
Kries, John, Glendale, N. Y. Line adjuster. 2,000,891; May 7.
Krogh, Anker E., assignor to The Brown Instrument Company, Philadelphia, Pa. Automatic control. 2,000,235; May 7.
Krupp, Fried., Grusonwerk Aktiengesellschaft. (See Leysner, Arthur, assignor.)
Kuchar, Joseph, assignor to Athey Truss Wheel Co., Chicago, Ill. Trailer jack. 2,000,179; May 7.
Kuhner, Max H., assignor to Riley Stoker Corporation, Worcester, Mass. Steam generator. 2,000,138; May 7.
Laclede Christy Clay Products Company. (See Burnet, Samuel F., assignor.)
Lademann, William L., Bronx, N. Y. Elevator apparatus. 2,000,704; May 7.
Lake, Clair D., Binghamton, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Card feeding and handling device. 2,000,236; May 7.
Lake, Clair D., Binghamton, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Sorting machine. 2,000,237; May 7.
La Marca, Patsy, Coraopolis, and O. D. Romito, Charleroi, Pa. Shoe stretching last. 2,000,340; May 7.
Lamb, Anthony H., Elizabeth, assignor to Weston Electrical Instrument Corporation, Newark, N. J. Photoelectric device. 2,000,642; May 7.
Lambert, Albert L., Philadelphia, Pa., assignor to Heintz Manufacturing Company. Refrigerating system. 2,000,525; May 7.
Lamberz, Wilhelm. (See Zitscher, A., and Lamberz.)
Lamson Company, The. (See Perry, H. R., and Jennings, assignors.)
Lane, John D., Boston, assignor to R. H. Wilbur, Melrose, Mass. Band. 2,000,763; May 7.

Lane, Orley B., Washington, D. C. Computing device consisting of a mathematical curve. 2,000,526; May 7.
Langbein, Edward H., Brooklyn, assignor to Samuel Brinkman, Manhattan, N. Y. Shears. 2,000,852; May 7.
Lange, Joseph O., assignor to Crane Co., Chicago, Ill. Valve. 2,000,853; May 7.
La Pointe Machine Tool Company, The. (See West, D. H., and Monroe, assignors.)
Larsh, Everett P. Vandalia, assignor to The Master Electric Company, Dayton, Ohio. Grease seal for bearings. 2,000,841; May 7.
Larsen Leon H., Norwalk, Conn., assignor to R. T. Vanderbilt Co. Inc., New York, N. Y. Composition of matter, etc. 2,000,031; May 7.
Lathrop, George E., Louisville, Ky., assignor, by mesne assignments, to The Pepsickle Corporation of the United States, New York, N. Y. Confection and making same. 2,000,842; May 7.
Laubenfels, Clarence R., Burlington, Iowa. Thermostatic switch. 2,000,398; May 7.
Lavallée, Wilfrid, Longueuil, Quebec, assignor of one-half to Cyprien Ste-Marie, Longueuil, Quebec, Canada. Lock for safes. 2,000,238; May 7.
Lawson, Axel A., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener supplying mechanism. 2,000,139; May 7.
Leake, Arthur G., Bridgeport, Conn. Strengthening structural members. 2,000,500; May 7.
Leathers, Ward, Haworth, N. J., assignor to The Quadrex Corporation. Tubular fitter. 2,000,854; May 7.
Leaver, Charles. (See Stratford, R. K., and Leaver.)
Lebaron Detroit Company. (See Votypka, John, assignor.)
Lederer, Karl M., assignor to Weston Electrical Instrument Corporation, Newark, N. J. Thermocouple mounting. 2,000,499; May 7.
Lee Rubber & Tire Corporation. (See Nellen, A. H., and Leopold, Jr.)
Lehon Company, The. (See Fry, Lloyd A., assignor.)
Leighton, John W., Port Huron, Mich. Individual wheel support for motor vehicles. 2,000,180; May 7.
Lemmon, Walter S., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Communication system. 2,000,765; May 7.
Lemmon, Walter S., New York, N. Y., and C. J. Fitch, Jersey City, N. J., assignors to International Business Machines Corp., New York, N. Y. Communication system. 2,000,764; May 7.
Leofanti, Gene, Dongan Hills, N. Y. Reproducing apparatus. 2,000,766; May 7.
Leopold, Frederick, Jr. (See Nellen, A. H., and Leopold.)
Lessing, Rudolf, and R. H. Allen, London, assignors to The Clean Coal Company Limited, London, England. Separation of powdered or granular material, especially coal. 2,000,181; May 7.
Leupold, Voipel & Co. (See Stevens, John C., assignor.)
Lewis Foundry & Machine Company. (See Beatty, Floyd A., assignor.)
Lewis, Georgia B. (See Fiske, A. H., Colby, and Lewis.)
Lewis, Harold M., Douglaston, N. Y., assignor to Haseltine Corporation. Short wave receiver arrangement. 2,000,084; May 7.
Lewis, Harold R., Hoopeston, Ill. Canning corn. 2,000,802; May 7.
Lewis, William A., Jr., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Phase sequence apparatus. 2,000,767; May 7.
Leysner, Arthur, Magdeburg, assignor to firm Fried. Krupp Grusonwerk Aktiengesellschaft, Magdeburg-Buckau, Germany. Distillation of zinc and similar metals. 2,000,140; May 7.
Lichtenstein, Ellis, Woodmere, N. Y. Toilet seat cover. 2,000,569; May 7.
Liggieri, Frank, Paterson, N. J. Sharpening device. 2,000,141; May 7.
Lincke, Rudolf, assignor to the firm Carl Zeiss, Jena, Germany. Making contact glasses for eyes. 2,000,768; May 7.
Lincoln, John C., assignor to The Union Trust Company, Cleveland, Ohio. Making welding rod or flux holder. 2,000,182; May 7.
Lindblad, Axel B., Djursholm, Sweden. Working up auriferous and cupriferous arsenical pyrites. 2,000,183; May 7.
Lindenblad, Nils E., Port Jefferson, N. Y., assignor to Radio Corporation of America. Transmission line. 2,000,032; May 7.
Linderman, Garrett B., Jr., assignor to Pittsburgh Equitable Meter Company, Pittsburgh, Pa. Recorder chart. 2,000,523; May 7.
Linderman, Garrett B., Jr., assignor to Pittsburgh Equitable Meter Company, Pittsburgh, Pa. Laminated composite paper. 2,000,528; May 7.
Lindseth, Theodore, Coronado, Calif. Cooling, freezing, and heating apparatus. 2,000,467; May 7.
Ling, George. (See Apfel, J., Ling, and Jarrett.)
Linn, Joseph C., Hagerstown, assignor to The Perfect Circle Company, Hagerstown, Ind. Slitting fixture for piston rings. 2,000,239; May 7.
Linstead, Reginald P. (See Thorpe, J. F., and Linstead.)
Linstead, Reginald P. (See Thorpe, J. F., Linstead, and Thomas.)
Lippert, Henry E., Pittsburgh, Pa. Locomotive fuel conveyer. 2,000,468; May 7.
Lippert, Henry E., Pittsburgh, Pa. Locomotive fuel conveyer. 2,000,469; May 7.
Lippmann, Ludwig M., and A. Faltelowitz, Berlin, Germany, said Faltelowitz, assignor to said Lippmann. Denicotinizing tobacco. 2,000,855; May 7.
Liquefied Gas Development Company. (See Greenfield, E., and Thibault, assignors.)
Liskow, Bernard H., administrator. (See Eggert, Gustav B.)
Little, Edwin G. (See McWhirter, W. C., and Little.)
Livingston, Maurice H., Chicago, Ill. Radioreception. 2,000,529; May 7.
Livingston, Maurice H., assignor of forty per cent to J. M. Weisbaum and twenty-five per cent to J. F. Ahlborn, Chicago, Ill. Radioreception. 2,000,530; May 7.
Loeffler, Frits, Yonkers, N. Y. Electric clock. 2,000,600; May 7.
Loewenstein, Casper N., Columbus, Ohio. System for eliminating static. 2,000,142; May 7.
Lohman, Conrad. (See Covell, H. S., and Lohman.)
Long, Bernard, assignor to Societe Anonyme des Manufactures des Glaces & Products Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France. Surfacing glass. 2,000,240; May 7.
Long, Thomas H., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Phototube. 2,000,705; May 7.
Lotter, Adolph G., assignor to Stationers Loose Leaf Company, Milwaukee, Wis. Loose leaf binder. 2,000,184; May 7.
Lowther, Wilfred W., Minneapolis, assignor to Donaldson Company, Inc., St. Paul, Minn. Air cleaner. 2,000,706; May 7.
Lubs, Herbert A., and J. E. Cole, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of thioindigo dyes. 2,000,033; May 7.
Lusher, Francis A., assignor to Rutenber Electric Co., Marion, Ind. Table top electric range. 2,000,343; May 7.
Luther, Martin. (See Dietrich, W., and Luther.)
Luton, Clarence W., and J. Beddow, Toledo, Ohio, assignors to Universal Oil Products Company, Chicago, Ill. Hydrocarbon oil conversion. 2,000,399; May 7.
Lyon, George A., Allenhurst, assignor to Lyon Incorporated, Asbury Park, N. J. Cover for spare tires of automobiles. 2,000,290; May 7.
Lyon Incorporated. (See Lyon, George A., assignor.)
Lyons, Arthur C., Pennside, assignor to Reading Hardware Corporation, Reading, Pa. Hinge construction. 2,000,856; May 7.
Maclaren, James G., San Francisco, Calif. Pneumatic dispatch carrier. 2,000,400; May 7.
Macoustic Engineering Company. (See White, Richard M., assignor.)
Madison-Kipp Corporation. (See Korsmo, Torbjorn C., assignor.)
Maginnis, Alonzo H., Rochelle, Ill. Pulp molding machine. 2,000,085; May 7.
Magnesium Development Corporation. (See Wood, Robert T., assignor.)
Major, Randolph T., Westfield, assignor to Merck & Co. Inc., Rahway, N. J. Manufacture of certain para-N-sec-alkylamino-phenols and other substituted phenols and their salts. 2,000,034; May 7.
Mallory, Bonnie L., assignor to Gadget's Inc., Cleveland, Ohio. Shock absorber. 2,000,086; May 7.
Malm, Carl J., and C. B. Fordyce, Rochester, N. Y., assignors to Eastman Kodak Company, Rochester, N. Y. Precipitation of cellulose esters. 2,000,601; May 7.
Malm, Carl J., and C. L. Fletcher, assignors to Eastman Kodak Company, Rochester, N. Y. Fibrous esterification of cellulose. 2,000,602; May 7.
Malm, Carl J., and C. R. Fordyce, assignors to Eastman Kodak Company, Rochester, N. Y. Treatment of cellulosic material prior to esterification. 2,000,603; May 7.
Malm, Carl J., G. F. Nadeau, and N. F. Diesel, assignors to Eastman Kodak Company, Rochester, N. Y. Manufacture of alkoxyadetaldehydes and alkoxyacetic acids. 2,000,604; May 7.
Mandahl, Thor F., assignor to Svenska Ackumulator Aktiebolaget Jungner, Stockholm, Sweden. Slit filter. 2,000,490; May 7.
Mangin, James, assignor to New Brunswick Electric Supply Company, New Brunswick, N. J. Electric fixture-supporting and connecting device. 2,000,241; May 7.
Manley, Robert E., Beacon, assignor to The Texas Company, New York, N. Y. Solvent refining of hydrocarbon oil. 2,000,707; May 7.
Mann, Ned H. (See Jones, Harry C., assignor.)
Manning, Reginald W., Phoenix, Ariz. Container. 2,000,242; May 7.
Manor, Florian F., Oshkosh, Wis., assignor of one-third to A. B. Bechaud and one-third to A. T. Brenner, Fond du Lac, Wis. Electrical illuminating device. 2,000,491; May 7.
Manske, Fred A., assignor to United States Gypsum Company, Chicago, Ill. Wall construction. 2,000,243; May 7.
Mansur, Clarence W., Malden, Mass., assignor to General Electric Company. Nonmetallic gear wheels. 2,000,769; May 7.

Mapes, Daniel, Upper Montclair, N. J., assignor to Walter Kidde & Company, Inc., New York, N. Y. Release device for fluids. 2,000,708; May 7.
Martha Maid Manufacturing Co. (See Dichter, Samuel J., assignor.)
Maschinenfabriken Augsburg-Nurnberg A. G. (See Becker, Heinrich, assignor.)
Masin, Jacob S., Anniston, Ala., assignor to Swann Research, Incorporated. Aluminum oxide abrasive and making the same. 2,000,857; May 7.
Maslin, Albert J. See Mercereau, J. T., and Maslin.)
Mason Box Company, The. (See Weller, George H., assignor.)
Master Electric Company, The. (See Larsh, Everett P., assignor.)
Matchette, Frank J., assignor to The Servidor Company, New York, N. Y. Cabinet. 2,000,401; May 7.
Matchette, Frank J., assignor to The Servidor Company, New York, N. Y. Cabinet. 2,000,402; May 7.
Mathiesen Alkali Works, Inc. (See Berl, Ernst, assignor.).
Matthews, Philip E., Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Rear engine drive for self-propelled vehicles. 2,000,709; May 7.
Matthews, W. N., Corporation. (See Boll, L. P., and Birkenmaier, assignors.)
Maul, Michael, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Analyzing record cards. 2,000,403; May 7.
Maul, Michael, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Sorting machine. 2,000,404; May 7.
Maxmoor Corporation. (See Moore, Arlington, assignor.)
Maxwell, William R., Hicksville, Ohio. Safety device for firearms. 2,000,858; May 7.
Mayer, Emil, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie M. b. H., Berlin, Germany. Modulation. 2,000,770; May 7.
McBrien, Roger W., Alton, and N. F. Wilson, East Alton, Ill.; said Wilson assignor to said McBrien. Alarm circuit. 2,000,185; May 7.
McCheseney, Cuyler S., Kenmore, assignor to Dunlop Tire and Rubber Corporation, Buffalo, N. Y. Inflated article and making the same. 2,000,452; May 7.
McClellan, Garriott L., Cincinnati, Ohio. Support for the head while sleeping or resting in a sitting position. 2,000,344; May 7.
McClintock, James H. (See Anderson, William J., assignor.)
McCullough, Jack. (See Eitel, W. W., and McCullough.)
McCullough, Jack, San Bruno, assignor to Heintz & Kaufman, Ltd., San Francisco, Calif. Filament support. 2,000,567; May 7.
McFadden, Ross M., Glendale, Calif. Curling device. 2,000,893; May 7.
McFadden, Ross M., Glendale, Calif. Curler. 2,000,894; May 7.
McGill, William H., Winchester, Mass. Grindstone. 2,000,772; May 7.
McGlauflin, John R., Denver, Colo. Carpenter's tool. 2,000,773; May 7.
McGowen, William R., assignor to The McKay Company, Pittsburgh, Pa. Glider. 2,000,859; May 7.
McHale, Michael J., Scranton, Pa. Thread guide. 2,000,405; May 7.
McKay Company, The. (See McGowen, William R., assignor.)
McKean, John O., assignor to Foster Machine Company, Westfield, Mass. Bobbin conveyer for winding machines. 2,000,774; May 7.
McKeen, Henry E., Montreal, Quebec, Canada. Retaining wall and constructing it. 2,000,492; May 7.
McKewen, John H. (See Schauer, L. L., Sosa, and McKewen.)
McNamara, Frederick W. (See Sprague, F. D., and McNamara.)
McNamara, Leo C., T. W. Potter, and I. M. Conway, Indianapolis, Ind., assignors to Journal Box Servicing Corporation, Indianapolis, Ind. Reclaiming used journal-box waste. 2,000,291; May 7.
McNulty, John W., Ridley Park, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Refrigeration apparatus. 2,000,775; May 7.
McWhirter, William C., and E. G. Little, Wilkinsburg, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway switch operating apparatus. 2,000,860; May 7.
McWilliams, John P., and F. Ditchfield, assignors to The Youngstown Steel Door Company, Cleveland, Ohio. Repair house car construction. 2,000,531; May 7.
Mead Research Engineering Company, The. (See Hochwalt, Carroll A., assignor.)
Mead Research Engineering Company, The. (See Thomas, C. A., and Hochwalt, assignors.)
Mechanical Devices Corporation of America. (See Browne, Montague P., assignor.)
Meeker, William P., and E. C. Price, Franklin, assignors to The Black-Clawson Company, Hamilton, Ohio. Siphon. 2,000,087; May 7.
Megley, Harley J., Chicago, Ill. Type bar machine. 2,000,088; May 7.
Meinser & Kehm Company. (See Kehm, Arthur L., assignor.)
Melton, Romie L. (See Benner, R. C. Kirchner, and Melton.)
Menefee, Arthur B. (See Armstrong, H. H., and Menefee.)
Mercereau, James T., Sharon, and A. J. Maslin, Sharpeville, assignors to Westinghouse Electric & Manufacturing Company, Pittsburgh, Pa. Regulating system. 2,000,776; May 7.
Merck & Co. Inc. (See Major, Randolph T., assignor.)
Merco Nordstrom Valve Company. (See Nordstrom, Sven J., assignor.)
Merrill, David R., Long Beach, and A. L. Blount, Wilmington, assignors to Union Oil Company of California, Los Angeles, Calif. Separation and recovery of naphthenic acids and phenols. 2,000,244; May 7.
Mersereau, Edward C. (See Miller, F. D., and Mersereau.)
Messing, Joseph A. (See Frank, W. H., Messing and H. J. L. Frank.)
Metzner, Albert W. (See Sherman, J. Q., and Metzner.)
Meyer, John F., Chicago, Ill. Game apparatus. 2,000,778; May 7.
Meyers, Clarence. (See Cleal, F. P., Cousley and Meyers.)
Michelson, Albert S., assignor to National Rubber Machinery Company, Akron, Ohio. Vulcaniser. 2,000,406; May 7.
Micro Corporation, The. (See Bettendorf, W. E., and Yerk, assignors.)
Midland Electric Coal Corporation. (See Bixby, Kenneth R., assignor.)
Mikkonen, Simo. (See Niukkanen, W. P., and Mikkonen.)
Miles, Arthur, New Port Richey, Fla. Chassis and spring mounting for motor vehicles. 2,000,568; May 7.
Miles, Forrest G. (See Flynt, Robert C., assignor.)
Miller, Carl G., New York, assignor to Richard K. Parsell, Brooklyn, N. Y. Vacuum therapy device. 2,000,710; May 7.
Miller, Frank D., and E. C. Mersereau, Buffalo, assignors to National Brake Company, Inc., Buffalo, N. Y. Hand brake mechanism. 2,000,089; May 7.
Miller, Frank S., Steubenville, Ohio. Material handling apparatus. 2,000,292; May 7.
Miller, Jacob C., Whitefish Bay, Wis. Liquid dispensing device. 2,000,493; May 7.
Miller, Max O., Los Angeles, Calif. Photography. 2,000,470; May 7.
Miller, Samuel C., assignor to Frankfort Distilleries Incorporated, Louisville, Ky. Bottle and closure therefor. 2,000,407; May 7.
Miller, S. Eugene. (See Weis, Paul B., assignor.)
Miller, Trevlyn W., Malvern Komgha, Union of South Africa. Machine for brushing citrus or other fruits. 2,000,779; May 7.
Miller, Walter K., La Grange, assignor to Shellmar Products Company, Chicago, Ill. Bag. 2,000,345; May 7.
Miller, Walter R., Mansfield, Ohio. Metallic container. 2,000,780; May 7.
Miller, Wilber B., Flushing, N. Y., assignor to Oxweld Acetylene Company. Coated welding electrode. 2,000,861; May 7.
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Minevitch, Borrah, New York, N. Y. Chromatic harmonica with tone controls. 2,000,408; May 7.
Minneapolis-Honeywell Regulator Company. (See Hotchkiss, Clifford, assignor.)
Minsk, Louis M. (See Staud, C. J., and Minsk.)
Minton, Corwin R., assignor of one-third to William B. Phillips, and one-third to Burdick R. Ellis, Los Angeles, Calif. Filtering product and making the same. 2,000,777; May 7.
Minutoli, Andrea, San Francisco, Calif. Wall construction. 2,000,409; May 7.
Mitchell Camera Corporation. (See Mitchell, George A., assignor.)
Mitchell, George A., Los Angeles, assignor to Mitchell Camera Corporation, West Hollywood, Calif. Camera focusing mechanism. 2,000,090; May 7.
Mithoff, Robert C. (See Shiffler, W. H., and Mithoff.)
Mobbs, Herbert, Northampton, England. Golf bag. 2,000,711; May 7.
Moe, Bjarne H. (See Hollingsworth, R. A., and Moe.)
Monroe, Kenneth C. (See West, D. H., and Monroe.)
Montgomery, John A. (See Friend, R. O., and Montgomery.)
Mood, George McF., Charleston, S. C. Water motor. 2,000,781; May 7.
Moore, Arlington, New York, assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y. Pressure delivery of fuel in internal combustion engines. 2,000,091; May 7.
Moore, Fred E., Alhambra, Calif. Chair bed. 2,000,471; May 7.
Moore, Joseph W., Bristol, Va. Steam wrapping sealer. 2,000,782; May 7.
Moore, Raymond G., Bridgeport, assignor to The Bassick Company, Bridgeport, Conn. Hood catch. 2,000,245; May 7.
Moore, Robert S., Silver Spring, Md., assignor to General Airmotors Company, Scranton, Pa. Hooded cylinder head for gas engines. 2,000,248; May 7.
Moore Inventions Corporation. (See Moore, Arlington, assignor.)
Moorhouse, Alfred, Detroit, Mich. Transmission mechanism. 2,000,605; May 7.

Morrell, Jacque C., and G. Bgloff, assignors to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,000,410; May 7.
Morrell, Jacque C., and G. Bgloff, assignors to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,000,411; May 7.
Morrell, Jacque C., and G. Bgloff, assignors to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,000,412; May 7.
Morrow, Joseph H., Hohenstaufen, assignor to Fuller Company, Catasauqua, Pa. Seal for conveying apparatus. 2,000,238; May 7.
Morton, James, Carlisle, Cumberland, England. Apparatus for supplying fibrous material for incorporation in fabrics. 2,000,843; May 7.
Moses, Charles. (See Gorman, W. D., and Moses.)
Müller, Otto B., Berlin-Lichterfelde, Germany. Adjustable gauge. 2,000,783; May 7.
Munch, Carl, Düren, assignor to Atlas-Ago, Chemische Fabrik, Aktiengesellschaft, Molkau-bei Leipzig, Germany. Waterproof abrasive paper. 2,000,532; May 7.
Murphy, Demery A., Torrance, Calif., assignor, by mesne assignments, to The National Superior Company, Toledo, Ohio. Metallic swing joint for pipes. 2,000,346; May 7.
Murphy, George B., assignor to The Atlantic Refining Company, Philadelphia, Pa. Conversion of hydrocarbon oils. 2,000,186; May 7.
Murray Corporation of America, The. (See Haberstump, Alfred H., assignor.)
Murray, John D., Chicago, assignor to The Murray Liquafilm Corporation, Chicago, Ill. Coating of paper. 2,000,847; May 7.
Murray, John J., Arlington, and L. A. White, Medford, said White, assignor to Rogers Isinglass & Glue Company, Gloucester, Mass. Enamel and making same. 2,000,453; May 7.
Murray Liquafilm Corporation, The. (See Murray, John D., assignor.)
Mustard, Oscar J., Pocahontas, assignor of one-half to P. Royall, Tazewell, Va. Tag holder for mine cars. 2,000,896; May 7.
Muzzio, James A., Madison, Ohio. Egg separator. 2,000,477; May 7.
Myers, Harry L., assignor to The American Floor Surfacing Machine Company, Toledo, Ohio. Portable sanderplane. 2,000,784; May 7.
Myers, Joseph C. (See Uhlmann, H. B., and Myers.)
Myers, Walter H., Wollstonecraft, New South Wales, Australia. Electric cooking stove and the like. 2,000,413; May 7.
N. V. Philips' Gloeilampenfabrieken. (See Jonas, G. B., and Essling, assignors.)
N. V. Machinerieen-en Apparaten Fabriken "Meaf". (See von Schatz, Friedrich, assignor.)
Nadeau, Gale F. (See Malm, C. J., Nadeau, and Diesel.)
Nall, Harry G., Sydney, New South Wales, Australia. Lawn mower. 2,000,143; May 7.
Narvesen, Frederick C. (See Kothny, G. L., and Narvesen.)
National Brake Company. (See Miller, F. D., and Mersereau, assignors.)
National Cash Register Company, The. (See Shipley, Bernis M., assignor.)
National Gypsum Company. (See Venzie, Frederick M., assignor.)
National Malleable and Steel Castings Company. (See Baseley, Arthur J., assignor.)
National Rubber Machinery Company. (See Jennings, Frank H., assignor.)
National Rubber Machinery Company. (See Michelson, Albert S., assignor.)
National Superior Company, The. (See Murphy, Demery A., assignor.)
Neal, Leon P., Detroit, Mich., assignor to J. Weidenhoff. Battery clip. 2,000,665; May 7.
Neely, Raymond J., Little Falls, N. Y., assignor to Cherry-Burrell Corporation, Wilmington, Del. Outlet fitting for tanks. 2,000,246; May 7.
Nellen, Arthur H., and F. Leopold, Jr., Harmonville, assignors to Lee Rubber & Tire Corporation, Conshohocken, Pa. Vehicle tire. 2,000,785; May 7.
Nenninger, Lester F. (See Peaslee, W., and Nenninger.)
Neresheimer, Heinrich, W. Ruppel, and A. Vilsmeier, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuff of the anthraquinone series. 2,000,348; May 7.
Neukirch, Eberhard, Bitterfeld, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Explosive composition. 2,000,414; May 7.
Neuland, Alfons H., Irvington, N. J., assignor to Electrogear Corporation. Electric system and control for motor vehicles and other purposes. 2,000,786; May 7.
New Brunswick Electric Supply Company. (See Mangin, James, assignor.)
Newell, Robert E., Irwin, assignor to Robertshaw Thermostat Company, Youngwood, Pa. Thermostatic structure. 2,000,294; May 7.
Newhouse, Walter F., Benton Harbor, Mich. Machine for making barrels. 2,000,569; May 7.
Newlin, Mike H., Sanford, assignor of one-half to T. B. Upchurch, Jr., Raeford, and one-half to Edwards Railway Motor Company, Sanford, N. C. Mowing machine. 2,000,144; May 7.
Nichols, Louis C., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Unidirectional breather. 2,000,862; May 7.
Nina, Anthony A., Philadelphia, Pa., assignor to Television Laboratories, Ltd., San Francisco, Calif. Separable tube connecter. 2,000,570; May 7.
Nineteen Hundred Corporation. (See Kell, Gustav B., assignor.)
Ninkkanen, William P., and S. Mikkonen, Portland, Oreg. Combination drafting table and instruments therefor. 2,000,247; May 7.
Nitsch, Charles H., assignor to Stokes and Smith Company, Philadelphia, Pa. Box machine. 2,000,712; May 7.
Nitzschke, Oswin. (See Henglein, F. A., and Nitzschke.)
Norcross, Thomas. (See Willshaw, H., Norcross, and Broadbent.)
Nordberg Manufacturing Co. (See Gruender, Oscar C., assignor.)
Nordstrom, Elof. (See Rue, H. E., and Nordstrom.)
Nordstrom, Sven J., Piedmont, assignor to Merco Nordstrom Valve Company. San Francisco, Calif. Valve. 2,000,494; May 7.
Norman Confections, Inc. (See Snodgrass, E. N., and Holy, assignors.)
Norris, Marvin L., Fort Wayne, Ind., assignor to General Electric Company. Clutch. 2,000,713; May 7.
North American Chemical Company. (See Eaton, Charles F., assignor.)
North American Rayon Corporation. (See Elsaner, Richard, assignor.)
Northcutt, Robert T., Cranford, and A. L. Johnston, Jr., Plainfield, N. J., assignors, by mesne assignments, to Food Concentrates, Inc., New York, N. Y. Producing a food powder. 2,000,533; May 7.
Northern Maine Plywood Company. (See Winchell, Thomas R., assignor.)
Norwood, Harry Y., assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. 2,000,092; May 7.
Nutt, Arthur, Eggertsville, assignor, by mesne assignments, to The Reed Propeller Co., Inc., Garden City, N. Y. Lubrication system. 2,000,714; May 7.
Nutting, Howard S. (See Britton, E. C., Nutting, and Huscher.)
Nycum, Homer C. (See Griscom, S. B., and Nycum.)
Oakes & Burger Co. (See Babcock, Leo A., assignor.)
O'Connor, John F., Chicago, Ill. Grate. 2,000,473; May 7.
O'Connor, John F., Chicago, Ill. Door mounting and operating mechanism. 2,000,474; May 7.
O'Donnell, Philip L., Cincinnati, Ohio. Adhesive material. 2,000,475; May 7.
Oelkers, Alfred H., assignor to American Steel Foundries, Chicago, Ill. Roller bearing axle. 2,000,534; May 7.
Oldham, John M., assignor to L. A. Young, Detroit, Mich. Handgrip for golf clubs and the like. 2,000,295; May 7.
Oliver, Wallace F., assignor to Hydraulic Brake Company, Detroit, Mich. Master cylinder. 2,000,187; May 7.
Olsen, John, administrator. (See Hentschel, Ernest R.)
Olsen, John C., assignor to Flexible Steel Lacing Company, Chicago, Ill. Seal. 2,000,849; May 7.
Osborn, Irwin S., Cleveland Heights, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Refuse incineration. 2,000,296; May 7.
Osborn, Robert R., Garden City, and T. P. Wright, Port Washington, N. Y., assignors to Curtiss Aeroplane & Motor Company, Inc. Aircraft. 2,000,666; May 7.
Osterholm, William C., Oak Park, Ill. Grinding machine. 2,000,667; May 7.
Oswald, Alfred E., Hackensack, N. J., assignor to Bates Laboratories, Inc., New York, N. Y. Battery reconditioning apparatus. 2,000,571; May 7.
Othmer, Donald F., assignor to Eastman Kodak Company, Rochester, N. Y. Counter current liquid extraction apparatus. 2,000,606; May 7.
Oxweld Acetylene Company. (See Miller, Wilber B., assignor.)
Packard Motor Car Company. (See Edward, Herbert C., assignor.)
Pannutti, Antonio D., Jr., Falling Waters, W. Va. Separable fastener. 2,000,415; May 7.
Pardoe, William D., Lawrenceville, assignor to Thermoid Rubber Company, Trenton, N. J. Felted asbestos product. 2,000,416; May 7.
Parsell, Richard K. (See Miller, Carl G., assignor.)
Pate, Antonio, North Providence, R. I. Self winding spring motor. 2,000,145; May 7.
Patek, John M., Milwaukee, Wis. Froth flotation process for oxide ores. 2,000,350; May 7.
Patentaktiebolaget Gröndal-Ramen. (See Haglund, Gustaf, assignor.)
Patterson, John S., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Neckband and collar finishing press. 2,000,093; May 7.
Paul, Sydney, assignor to Superior Body Company, Lima, Ohio. Vehicle loading device. 2,000,351; May 7.
Paulding, John I., Inc. (See Johnson, Arthur A., assignor.)
Paulus, Max G. (See Brewster, O. C., Paulus, and Thompson.)
Peake, Edward S., assignor to The Kilgore Manufacturing Company, Westerville, Ohio. Gas cannon. 2,000,607; May 7.
Pease, Frederick J., Wauwatosa, assignor to Clum Manufacturing Company, Milwaukee, Wis. Electrode. 2,000,668; May 7.

Pease, William T., Huntington Park, assignor to Snow Manufacturing Co., Los Angeles, Calif. Gate valve construction. 2,000,352; May 7.
Peaslee, Willetta, and L. F. Nenninger, assignors to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machinery. 2,000,608; May 7.
Peavey, Joseph L., Meridian, Miss. Cover attachment for first aid kits. 2,000,495; May 7.
Pedersen, Charles J. (See Calcott, W. S., and Pedersen.)
Pelsch, Fred W., Chicago, Ill. Gauge. 2,000,535; May 7.
Penn, Marco M., Tampa, Fla. Automatic gig. 2,000,146; May 7.
Penney, Gaylord W., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. High speed commutator. 2,000,715; May 7.
Perfect Circle Company, The. (See Linn, Joseph C., assignor.)
Perfect Circle Company, The. (See Teetor, Ralph R., assignor.)
Perfection Stove Company. (See Dahlstrom, J. A., and Bryson, assignors.)
Perry, Harold R., Swarthmore, Pa., and C. S. Jennings, assignors to The Lamson Company, Syracuse, N. Y. Conveyer. 2,000,417; May 7.
Peter Paul, Incorporated. (See Kazanjian, John G., assignor.)
Peters, William H., Castleton-on-Hudson, assignor to Wheeler Paper Corporation, Albany, N. Y. Toilet paper container and dispenser. 2,000,454; May 7.
Peterson, Victor, Chicago, Ill., and A. C. Schaefer, Los Angeles, Calif. Printing. 2,000,064; May 7.
Petroleum Processes Corporation, The. (See Tears, Claude F., assignor.)
Pew, Victor G., Kitzmiller, Md. Lawn mower attachment. 2,000,249; May 7.
Pezzella, Rocco, Washington, D. C. Hair curling device. 2,000,496; May 7.
Philipp, Lawrence A., assignor to Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 2,000,787; May 7.
Phillips, William B., et al. (See Minton, Corwin R., assignor.)
Pierce, John B., Foundation. (See Davison, Robert L., assignor.)
Pietsch, Karl. (See Baudouin, C., and Pietsch.)
Pillsbury, Alfred F., executors, et al. (See Cullen, H. E., and Ronning.)
Pioneer Instrument Company. (See Carbonara, Victor E., assignor.)
Pipes, Limited. (See Hutchinson, John H., assignor.)
Pitman, Earle C., Princeton, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Insulated electric conductor. 2,000,095; May 7.
Pitman, John C., Saugus, Mass. Frying kettle. 2,000,609; May 7.
Pitre, Andre, Brooklyn, N. Y. Amusement and exercising device. 2,000,250; May 7.
Pittman, Walter F. (See Ford, G. F., and Pittman.)
Pittsburgh Equitable Meter Company. (See Linderman, Garrett B., Jr., assignor.)
Place, Bion C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Nonperforated channel assembly. 2,000,147; May 7.
Poeppelmeier, Frank H., Dayton, assignor, by mesne assignments, to Set-O-Type Manufacturing Company, Cleveland, Ohio. Type retaining plate. 2,000,035; May 7.
Poeppelmeier, Frank H., Dayton, Ohio, assignor, by mesne assignments, to Better Packages, Inc. Automobile tape moistener. 2,000,536; May 7.
Pohl, Ernst, Kiel, Germany. Method of and apparatus for making Röntgen projections. 2,000,497; May 7.
Poliakoff, Rouvime B., New York, N. Y. Locking device for dial telephones. 2,000,669; May 7.
Polk, James V., Dallas, Tex., assignor to Geophysical Service Inc. Insulated electrical connection. 2,000,716; May 7.
Poppe, George W., assignor to Equitable Paper Bag Co., Inc., Brooklyn, N. Y. Paper receptacle and making same. 2,000,188; May 7.
Popsicle Corporation of the United States, The. (See Lathrop, George E., assignor.)
Porter, Francis L. (See White, H. G., and Porter.)
Porter, Howard C., LaGrange Park, assignor to Signode Steel Strapping Company, Chicago, Ill. Package binder. 2,000,610; May 7.
Potter, Thomas W. (See McNamara, L. C., Potter, and Conway.)
Potts, Louis M. (See Kleinschmidt, E. E., and Potts.)
Powell, Edward R., Alexandria, Ind., assignor, by mesne assignments, to Johns-Manville Products Corporation, New York, N. Y. Heat insulating wall construction. 2,000,863; May 7.
Power, James R., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Regulated rectifier. 2,000,180; May 7.
Powers, David W., et al. (See Powers, Frank M., assignor.)
Powers, Frank M., assignor of one-third to T. C. Powers and one-third to D. W. Powers, Chicago, Ill. Tent. 2,000,644; May 7.
Powers, Thomas C., et al. (See Powers, Frank M., assignor.)
Prange, Maurice N., Detroit, Mich. Abrasive stone holder. 2,000,611; May 7.
Pratt, Charles A., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 2,000,670; May 7.
Pressed Steel Car Company et al. (See Ditchfield, Frank, assignor.)
Price, Edward C. (See Meeker, W. P., and Price.)
Progress Supply Company. (See Forman, James.)
Prudhomme, Eugène A., Levallois-Perret, assignor to Lucien Henri Roman, Paris, France. Manufacturing formaldehyde. 2,000,096; May 7.
Pullman Standard Car Manufacturing Company. (See Carry, Edward F., assignor.)
Putnam, Walter, Pasadena, Calif. Flush valve. 2,000,297; May 7.
Quadrex Corporation, The. (See Leathers, Ward, assignor.)
Quinn, James, et al. (See Anderson, Fabian K., assignor.)
R. U. V. Engineering Corporation, The. (See Creighton, Harry M., assignor.)
Radinse, Rudolph E., Avon Lake, Ohio. Wire brush mounting. 2,000,612; May 7.
Radio Corporation of America. (See Barden, William S., assignor.)
Radio Corporation of America. (See Goldsmith, Alfred N., assignor.)
Radio Corporation of America. (See Klett, Fred F., assignor.)
Radio Corporation of America. (See Knapp, Harold D., assignor.)
Radio Corporation of America. (See Knapp, Harold D., assignor.)
Radio Corporation of America. (See Lindenblad, Nils E., assignor.)
Radio Corporation of America. (See Trevor, Bertram, assignor.)
Radio Corporation of America. (See van der Pol, B., and Veldhuyzen, assignors.)
Radio Inventions, Incorporated. (See Felix, Edgar H., assignor.)
Ralston, Louis T. M., and E. D. Bottsford, New York, N. Y., assignors to Chelva Heat, Inc., Newark, N. J. Electrical heating device. 2,000,455; May 7.
Rankin, Julius D., Yonkers, assignor to Du Pont Cellophane Company, Inc., New York, N. Y. Package. 2,000,251; May 7.
Ransom, Harrison S., Moline, Ill. Mark-out cabinet for press make-ready. 2,000,537; May 7.
Rapidol Distributing Corp. (See Rever, Lee B., assignor.)
Rausch, Karl, Dresden, Germany, assignor to The Turner Tanning Machinery Company, Portland, Me. Machine for treating hides, skins, leather, and other similar pieces of work. 2,000,148; May 7.
Reading Hardware Corporation. (See Lyons, Arthur G., assignor.)
Rector, Thomas M., Rutherford, N. J., assignor, by mesne assignments, to The Best Foods, Inc., New York, N. Y. Apparatus for preparing food products. 2,000,645; May 7.
Rector, Thomas M., Rutherford, N. J., assignor to The Best Foods, Inc., New York, N. Y. Preparing food products. 2,000,646; May 7.
Reed Propeller Co., The. (See Nutt, Arthur, assignor.)
Reed Roller Bit Company. (See Harrington, George G., assignor.)
Reed, William E., Pittsburgh, Pa. Making wire fabric. 2,000,788; May 7.
Regan, Edward, et al. (See Anderson, Fabian K., assignor.)
Reges, Wax F., administrator. (See Freeman, H. M., and Wade.)
Reich, Morris, Columbus, Ohio. Garment. 2,000,149; May 7.
Reid, James. (See Black, D., and Reid.)
Reis, Charles C., Duluth, Minn., assignor to American Steel & Wire Company, Chicago, Ill. Tool setting gauge. 2,000,789; May 7.
Renfro, O. H., South Gate, Calif. Tire mounting machine. 2,000,036; May 7.
Reppe, Walter, and K. Baur, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of acetals. 2,000,252; May 7.
Research Corporation. (See Wintermute, Harry A., assignor.)
Resnick, Murray H., New York, N. Y. Hand bag and reversible cover therefor. 2,000,538; May 7.
Rettenmeyer, Francis X., Woodside, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Radio receiving system. 2,000,190; May 7.
Rever, Lee B., assignor to Rapidol Distributing Corp., New York, N. Y. Dye swab and comb combination. 2,000,790; May 7.
Reynolds, Arthur W., Newtown, Conn. Spring tooth harrow. 2,000,097; May 7.
Richardson Company, The. (See Dillehay, E. R., and Rieser, assignors.)
Richter, Charles J., Berwyn, assignor to The Goss Printing Press Company, Chicago, Ill. Web renewing mechanism. 2,000,253; May 7.
Rickabaugh, Dudley Y., Kelseyville, Calif. Gasoline engine fuel vaporizer. 2,000,498; May 7.
Ricks, Fred, and H. E. Elliott, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Lockstitch sewing machine. 2,000,254; May 7.

Ricks, Fred, H. E. Elliott, and F. C. Choice, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 2,000,613; May 7.

Riebe, John, Bronx, N. Y. Door-stay. 2,000,191; May 7.

Rieser, Oliver O. (See Dillehay, H. R., and Rieser.)

Riley Stoker Corporation. (See Kuhner, Max H., assignor.)

Rimoczer, Ödön, Budapest, Hungary. Apparatus for automatically determining the exposure in photographic apparatus. 2,000,637; May 7.

Rivard, Lawrence B., Dearborn, Mich. Independent vehicle wheel suspension. 2,000,255; May 7.

Roberts, Claudius H. M., Long Beach, Calif., assignor to Trutolite Company, Webster Grove, Mo. Breaking petroleum emulsions. 2,000,717; May 7.

Robertshaw Thermostat Company. (See Newell, Robert E., assignor.)

Rocke, Erwin G., Norwood, assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machine. 2,000,614; May 7.

Rogers Fabrikker & Glue Company. (See Murray, J. J., and White, assignors.)

Roland, Robert J., Cincinnati, assignor to The Alvey-Ferguson Company, Oakley, Cincinnati, Ohio. Conveyer. 2,000,496; May 7.

Roman, Lucien Henri. (See Prudhomme, Eugene A., assignor.)

Romito, Quirino D. (See La Marca, P., and Romito.)

Rowning, Henry O. (See Cullen, H. E., and Rowning.)

Roos, Oscar A., New York, N. Y. Internal combustion motor carburetion apparatus and system of control therefor. 2,000,098; May 7.

Roth, Chester H., New York, N. Y. Hosiery. 2,000,615; May 7.

Royall, Powell. (See Mustard, Oscar J., assignor.)

Ruan, Feli F. (See Coffin, E., and Ruan.)

Rubicon Company et al. (See Klefaber, E. W., Doerr, Whitson and Crengnile, assignors.)

Rudd, Clayton O. and O. C., Phoenix, Ariz. Ant trap. 2,000,041; May 7.

Rudd, Oscar C. (See Rudd, Clayton O., and O. C.)

Rue, Harold R., and B. Nordstrom, East Orange, assignors to Hoffman Beverage Company, Newark, N. J. Shipping case. 2,000,193; May 7.

Rumford Chemical Works. (See Fiske, A. H., Colby, and Lewis, assignors.)

Ruppel, Wilhelm. (See Nereebeimer, H., Ruppel, and Villsmeier.)

Rutenber Electric Co. (See Lusher, Francis A., assignor.)

Ruth, Joseph P., Jr., Denver, Colo. Ore conditioning device. 2,000,418; May 7.

Sage, Henry E. (See Scheide, Lester B., assignor.)

Sanitary Public Service Corporation. (See Schaefer, George, Jr., assignor.)

Sarar, Stjepan, Detroit, Mich. Brick facing support. 2,000,614; May 7.

Sarber, Emery N., Vancouver, British Columbia, Canada. Advertising condiment shaker. 2,000,419; May 7.

Sauer, Eberhard. (See Kaiser, Jacob.)

Schaefer, Archie C. (See Peterson, V., and Schaefer.)

Schaefer, George, Jr., Flushing, assignor to Sanitary Public Service Corporation, New York, N. Y. Paper delivery mechanism. 2,000,089; May 7.

Schaefer, Albert, Marxheim in Taunus, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Treating photographic layers in a bath containing a wetting agent and new preparations intended for acting on photographic layers. 2,000,253; May 7.

Schaffler-Gifford, Konrad, Vienna, Austria. Electric time fuse. 2,000,617; May 7.

Schaub, Jacob, Westfield, N. J., assignor, by mesne assignments, to The Best Foods, Inc., New York, N. Y. Dispensing device. 2,000,864; May 7.

Schauer, Lawrence L., A. M. Sosa and J. R. McKewen, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Hydraulic transmission system. 2,000,426; May 7.

Schauer, Lawrence L., A. M. Sosa and J. R. McKewen, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Duplex control for radial drills. 2,000,427; May 7.

Scheide, Lester B., Hartford, Conn., assignor of one-half to H. E. Sage, West Hartford, Conn. Building structure. 2,000,889; May 7.

Schellens, Eugene L. (See Coffin, J. S., Jr., and Schellens.)

Schenck, Harry E., Jr., Palisade, N. J. Motion picture camera. 2,000,205; May 7.

Schmeckebier, E. M. (See Haynes, Charles F., assignor.)

Schenk, Franz H. M., Altona, Germany, assignor to Frederick W. Buse, Pittsburgh, Pa. Traveling chain grate. 2,000,399; May 7.

Schering-Kahlbaum A. G. (See Aschheim, Selmar, assignor.)

Schifter, John, New York, N. Y. Dyeing swab. 2,000,456; May 7.

Schlorff, Joseph E., Pesotum, Ill. Safety oil can. 2,000,290; May 7.

Schmalenbach, Adolf, Essen-Ruhr, Germany. Apparatus for the production of ammonium sulphate. 2,000,038; May 7.

Schmidt, William D., assignor to The Heald Machine Company, Worcester, Mass. Tool setting gauge. 2,000,476; May 7.

Schmiedeknecht, Victor E., Louisville, Ky. Bathtub and shower control valve. 2,000,781; May 7.

Schmiedeknecht, Victor E., Louisville, Ky. Sprinkler head for shower baths. 2,000,782; May 7.

Schmitt, Harry A. (See Wood, S. M., and Schmitt.)

Schmitt, Paul, Paris, France. Rheostat. 2,000,718; May 7.

Schneider, Hermann. (See Straub, F., and Schneider.)

Scholl Mfg. Co., The. (See Scholl, William M., assignor.)

Scholl, William M., Chicago, Ill. Foot measure and shoe size indicator. 2,000,257; May 7.

Scholl, William M., assignor to The Scholl Mfg. Co., Inc., Chicago, Ill. Foot measuring and impression device. 2,000,256; May 7.

Schroder, George T., New York, N. Y. Insect trap. 2,000,193; May 7.

Schulse, Herman E., East Orange, N. J., assignor to Uniclox Corporation. Chronological instrument. 2,000,457; May 7.

Schultz, Carl A., Joliet, Ill. Collapsible two-room doll house. 2,000,618; May 7.

Schweier, Sylvester M., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Refrigerating apparatus. 2,000,619; May 7.

Scotland Williams, Incorporated. (See Williams, Louis N. D., assignor.)

Scott & Williams, Incorporated. (See Swinglehurst, Harry, Jr., assignor.)

Scruby, Horace F., Beverly Hills, Calif. Tire grooving machine. 2,000,300; May 7.

Scully, Rees T. (See Grabb, George W., assignor.)

Seger, Dana, and R. D. Smith, Davenport, Iowa, and F. J. Fransen, Rock Island, Ill., assignors to Geo. L. Hunt Automotive Equipment Co., Davenport, Iowa. Kingpin angle gauge. 2,000,865; May 7.

Semon, Waldo L., Cuyahoga Falls, and A. W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 2,000,039; May 7.

Semon, Waldo L., Silver Lake Village, and A. W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 2,000,040; May 7.

Semon, Waldo L., Silver Lake Village, and A. W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 2,000,041; May 7.

Servidor Company, The. (See Matchette, Frank J., assignor.)

Set-O-Type Manufacturing Company. (See Poeppelmeier, Frank H., assignor.)

Seymour, William H., Los Angeles, Calif. Headlight signal. 2,000,258; May 7.

Sharp, Elmer E. (See Stein, Emerson W., assignor.)

Sharples Specialty Company, The. (See Jones, Leo D., assignor.)

Shaw-Walker Company, The. (See Bourdon, Russell G., assignor.)

Shekter, Abraham J., Jamaica, N. Y. Electric switch mechanism. 2,000,648; May 7.

Shellmar Products Company. (See Miller, Walter K., assignor.)

Shelmire, Stanley R., assignor to Standard-Trump Bros. Machine Company, Laconia, N. H. Knitting machine. 2,000,194; May 7.

Sheppard, Samuel E., and J. H. Hudson, Rochester, N. Y., assignors to Eastman Kodak Company, Rochester, N. Y. Compressed foam gelatin. 2,000,042; May 7.

Sherman, John Q., Dayton, Ohio. Transfer material stripper. 2,000,100; May 7.

Sherman, John Q., Dayton, Ohio. Pin feed platen roll. 2,000,651; May 7.

Sherman, John Q., Dayton, Ohio, assignor to The Standard Register Company. Pin feed platen roll. 2,000,649; May 7.

Sherman, John Q., and A. W. Metzner, Dayton, Ohio; said Metzner assignor to said Sherman. Multipin wheel platen. 2,000,650; May 7.

Sherman, Ralston M., Glastonbury, assignor to The Silent Glow Oil Burner Corporation, Hartford, Conn. Charging barometric feed devices. 2,000,854; May 7.

Shiffler, William H., and R. C. Mitchoff, Berkeley, Calif., assignors to Standard Oil Company of California, San Francisco, Calif. Azeotropic drying of mixtures of water and alcohols or ketones. 2,000,043; May 7.

Shipley, Bernis M., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 2,000,101; May 7.

Shipley, Grant B., assignor to The Wood Preserving Corporation, Pittsburgh, Pa. Adzing and boring machine. 2,000,458; May 7.

Shodron, John G., assignor to James Manufacturing Company, Fort Atkinson, Wis. Apparatus for the storage of hay. 2,000,102; May 7.

Shodron, John G., assignor to James Manufacturing Company, Fort Atkinson, Wis. Apparatus for storage, curing, and preservation of hay. 2,000,103; May 7.

Sichtermann, Eugen, Rodenkirchen, near Cologne, Germany. Deep-sea electric telephone cable. 2,000,355; May 7.

Side, Frederick W., assignor to The Brown Instrument Company, Philadelphia, Pa. Electric switch. 2,000,422; May 7.

Siebel, Emeline R., executrix. (See Siebel, Ewald H.)

Siebel, Ewald H., Chicago, Ill., deceased; E. R. Siebel, executrix, assignor, by mesne assignments, to Spencer, White & Prentis, Incorporated, New York, N. Y. Auger bucket for machines for digging caissons and the like. 2,000,195; May 7.

Siebert, Heinrich, assignor to Demag Aktiengesellschaft, Duisburg, Germany. Excavator. 2,000,150; May 7.

Siemens-Schuckertwerke Aktiengesellschaft. (See Heinrich, R., and Feldmann, assignors.)

Signode Steel Strapping Company. (See Porter, Howard C., assignor.)

Silent Glow Oil Burner Corporation, The. (See Sherman, Ralston M., assignor.)

Silverman, Samuel J., Portland, Oreg., assignor to Gilleple Auto Laundry System, Inc., Chicago, Ill. Wash rack for automobiles. 2,000,151; May 7.

Simmons, Harold B., Caldwell, N. J. Pneumatic suspension for vehicles. 2,000,196; May 7.

Singmaster, James A., Bronxville, N. Y. Artificial silk filament. 2,000,671; May 7.

Slepian, Joseph, and R. Tanberg, Pittsburgh, Pa., and C. E. Krause, Greensburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Porous lightning arrester. 2,000,719; May 7.

Sloan, Arthur W. (See Semon, W. L., and Sloan.)

Sloan, Arthur W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Antioxidant. 2,000,044; May 7.

Sloan, Arthur W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Antioxidant. 2,000,045; May 7.

Smiley, John B. (See Cullen, Ernest, assignor.)

Smith, Ferris N., Grand Rapids, Mich. Humidifier. 2,000,356; May 7.

Smith, Howard F., Birmingham, England. Holder for stair carpets. 2,000,259; May 7.

Smith, Robert M., Youngstown, Ohio. Treating water. 2,000,197; May 7.

Smith, Roy D. (See Seger, D., Smith, and Fransen.)

Smith, Roy D., assignor to Bee Line Manufacturing Company, Davenport, Iowa. Mechanism for operating upon automobile axles. 2,000,572; May 7.

Smith, Roy D., assignor to Bee Line Manufacturing Company, Davenport, Iowa. Chassis checking gauge. 2,000,866; May 7.

Smith, William H., San Francisco, Calif. Permanent binder for loose leaves. 2,000,357; May 7.

Smythe, Edwin H., Evanston, Ill., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound and picture system. 2,000,198; May 7.

Snodgrass, Edward N., Denver, Colo., and M. E. Holy, Chicago, Ill., assignors to Norman Confections, Inc., Denver, Colo. Progressive container. 2,000,301; May 7.

Snow Manufacturing Co. (See Pease, William T., assignor.)

Snyder, Carl M., Glen Ellyn, and F. A. Walker, Oak Park, Ill., assignors to Walker Dishwasher Corporation, Chicago, Ill. Impeller. 2,000,720; May 7.

Snyder, Charles E., Jordan, Pa. Vine divider. 2,000,260; May 7.

Snyder, De Forrest E., Hazleton, Pa. Hot line clamp and insulator. 2,000,652; May 7.

Societe Anonyme des Manufactures des Glaces & Products Chimiques de Saint-Gobain, Chauny & Cirey.) See Long, Bernard, assignor.)

Society of Chemical Industry in Basle. (See Jaeck, Wolfgang, assignor.)

Society of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)

Socony-Vacuum Oil Company. (See Story, B. W., and Fuller, assignors.)

Solomon, Morris, Brooklyn, assignor to Fiiso Leather Products Co., Inc., New York, N. Y. Portable receptacle. 2,000,302; May 7.

Somerville, William E., Coal City, Ill. Stranding machine. 2,000,104; May 7.

Sosa, Augustus M. (See Schauer, L. L., Sosa, and McKewen.)

Spaldo, Louis C., assignor to Waxed Products Company, Inc., Brooklyn, N. Y. Dispenser for rolled materials. 2,000,867; May 7.

Spaatta, George, assignor to Clark Equipment Company, Buchanan, Mich. Metal wheel. 2,000,573; May 7.

Spencer, White & Prentis, Incorporated (See Siebel, Ewald H., assignor.)

Sperry-Sun Well Surveying Company. (See Kothny, G. L., and Narvesen, assignors.)

Spiess, Georg, Leipsig, Germany. Sheet separating and conveying device. 2,000,261; May 7.

Sprague, Frank D., and F. W. McNamara, North Adams, assignors to Sprague Specialties Co., Quincy, Mass. Sealing means for electrolytic devices. 2,000,793; May 7.

Sprague Specialties Co. (See Sprague, F. D., and McNamara, assignors.)

Staley, A. E., Manufacturing Company. (See Bishop, William B., assignor.)

Staley, A. E., Manufacturing Company. (See Durkee, Maurice M., assignor.)

Stalmer, August, Toledo, Ohio. Curtain stretcher. 2,000,358; May 7.

Standard Brands Incorporated (See Braun, Geza, assignor.)

Standard Brands Incorporated. (See Broeg, William E., assignor.)

Standard Brands Incorporated. (See Gore, H. C., Jozsa, and Frey, assignors.)

Standard Oil Company. (See Adams, Elmer W., assignor.)

Standard Oil Company. (See Brewster, O. C., Paulus, and Thompson, assignors.)

Standard Oil Company of California. (See Shiffler, W. H., and Mithoff, assignors.)

Standard Oil Development Company. (See Stratford, R. K., and Leaver, assignors.)

Standard Register Company, The. (See Sherman, John Q., assignor.)

Standard-Trump Bros. Machine Company. (See Shelmire, Stanley R., assignor.)

Standerwick, Reginald G., Marblehead, Mass., assignor to General Electric Company. Centrifugal compressor 2,000,721; May 7.

Stanley, Harold D., Bloomfield, assignor, by mesne assignments, to Thomas A. Edison, Incorporated, West Orange, N. J. Sealing battery posts. 2,000,199; May 7.

Starrett, Wendelin D., Alameda, Calif., assignor to Charles S. Evans, San Francisco, Calif. Cigarette making apparatus. 2,000,423; May 7.

Stationers Loose Leaf Company. (See Lotter, Adolph G., assignor.)

Stator Refrigeration, Inc. (See Comstock, Daniel F., assignor.)

Staud, Cyril J., and L. M. Minsk, assignors to Eastman Kodak Company, Rochester, N. Y. Hydrolysis of cellulose esters. 2,000,620; May 7.

Staud, Cyril J., and R. H. Van Dyke, assignors to Eastman Kodak Company, Rochester, N. Y. Propionation of cellulosic material. 2,000,621; May 7.

Stein, Emerson W., Sea Breeze, assignor of one-half to E. E. Sharp, Fishers, N. Y. Merchandising display fixture for suckers and other merchandise. 2,000,359; May 7.

Stevens, John C., Portland, assignor to Leupold, Voipel & Co., Portland, Oreg. Water level recorder. 2,000,046; May 7.

Steward, Colby W., Kenmore, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Exhaust manifold. 2,000,722; May 7.

Stoker and Smith Company. (See Nitsch, Charles H., assignor.)

Stone, Herbert G., Kingsport, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y. Making artificial silk. 2,000,047; May 7.

Stone, Herbert G., Kingsport, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y. Making artificial silk. 2,000,048; May 7.

Stone, Thos. E., Jr. (See Deisch, Noel, assignor.)

Story, Bertrand W., and E. W. Fuller, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, (Incorporated), New York, N. Y. Mineral oil composition. 2,000,105; May 7.

Stout, William B., Detroit, Mich. Automobile. 2,000,360; May 7.

Stowell, Jerome N., Fargo, N. Dak. Power converting unit and system. 2,000,868; May 7.

Straka, Anton, Chicago, Ill. Audio amplifying transformer and static eliminator. 2,000,424; May 7.

Stratford, Reginald K., Sarnia, Ontario, and C. Leaver, Toronto, Ontario, Canada, assignors to Standard Oil Development Company. Continuously using clay in treating tower systems. 2,000,672; May 7.

Straub, Frits, Basel, and H. Schneider, Riehen, near Basel, assignors to "Society of Chemical Industry in Basle", Basel, Switzerland. Producing fast tints on animal fibers. 2,000,794; May 7.

Strauss, Joseph B., Chicago, Ill. Apparatus for taking photographs. 2,000,425; May 7.

Streitwolf, Karl, Frankfort-on-the-Main, A. Febrle, Bad Sodem-on-the-Taunus, and H. Hilmer, Frankfort-on-the Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Preparing dihydroxy benzenearsonic acids. 2,000,361; May 7.

Strexynski, George J., Poughkeepsie, assignor to The De Laval Separator Company, New York, N. Y. Self-draining centrifugal bowl. 2,000,459; May 7.

Sturtevant, B. F., Company. (See Keyes, Robert E., assignor.)

Sults, Chauncey G., Scotia, N. Y., assignor to General Electric Company. Welding system. 2,000,723; May 7.

Superior Body Company. (See Paul, Sydney, assignor.)

Sutliffe, Frank C., assignor to William Joyner, San Francisco, Calif. Hypodermic injector. 2,000,262; May 7.

Suverkrup, Herbert F. (See Williamson, C. J., and Suverkrup.)

Svenska Ackumulator Aktiebolaget Jungner. (See Mandahl, Thor F., assignor.)

Swallow, Francis P. (See Swift, W. E., and Swallow.)

Swann Research, Incorporated. (See Masin, Jacob S., assignor.)

Swann Research, Incorporated. (See Udy, Marvin J., assignor.)

Sweeney-Block & Co. (See Sweeney, Frank E., assignor.)

Sweeney, Frank E., Roselle, N. J., assignor to Sweeney-Block & Co., Inc., New York, N. Y. Closure. 2,000,795; May 7.

Swift, Willard E., and F. P. Swallow, Worcester, assignors to United States Envelope Company, Springfield, Mass. Paper drinking cup. 2,000,796; May 7.
Swift, Willard E., Jr., Worcester, assignor to United States Envelope Company, Springfield, Mass. Church collection envelope and making the same. 2,000,797; May 7.
Swinglehurst, Harry, Jr., Floral Park, assignor to Scott & Williams, Incorporated, New York, N. Y. Circular knitting machine. 2,000,798; May 7.
Sylvania Industrial Corporation. (See Goldberger, Franz, assignor.)
Symington Company, The. (See Akitt, Norman B., assignor.)
Symons Brothers Development Company. (See Symons, Loren G., assignor.)
Symons, Loren G., Hollywood, assignor to Symons Brothers Development Company, Hollywood, Calif. Wire cloth tightener. 2,000,426; May 7.
Syracuse Trust Company, The. (See Edwards, O. M., and Axe, assignors.)
Tanberg, Ragnar. (See Slepian, J., Tanberg, and Krause.)
Tarentum Savings and Trust Company et al., administrators. (See Conklin, W. F., Hopkins, and Hover.)
Tauchmann, George F., Berkeley, Calif. Reflector mounting. 2,000,303; May 7.
Taugher, Frank P., Forest Hills, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Crane hoist control. 2,000,724; May 7.
Taylor, Ernest R., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose acetate composition comprising a tertiary alcohol. 2,000,622; May 7.
Taylor Instrument Companies. (See Norwood, Harry Y., assignor.)
Taylor, Lester M., Dayton, Ohio. Automatic variable pitch propeller. 2,000,049; May 7.
Taylor, Raymond S., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Tire construction. 2,000,869; May 7.
Taylor, William, Toronto, Ontario, Canada, assignor to J. M. Teahan, Detroit, Mich. Apparatus for molding ceramic structures. 2,000,623; May 7.
Teague, Giles M., Charlotte, N. C. Making confections. 2,000,676; May 7.
Teahan, James M. (See Taylor, William, assignor.)
Tears, Claude F., Mountain Lakes, N. J., assignor to The Petroleum Processes Corporation, Wichita, Kans. High melting point wax and production of same. 2,000,427; May 7.
Technicolor, Inc. (See Ball, Joseph A., assignor.)
Teetor, Ralph R., Hagerstown, Ind. Fishing rod handle. 2,000,263; May 7.
Teetor, Ralph R., assignor to The Perfect Circle Company, Hagerstown, Ind. Piston skirt expander. 2,000,106; May 7.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Böhm, Otto, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Mayer, Emil, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Walter, Ludwig, assignor.)
Teletype Corporation. (See Kleinschmidt, Edward F., assignor.)
Teletypesetter Corporation. (See Kleinschmidt, E. E., and Potts, assignors.)
Television Laboratories, Ltd. (See Nina, Anthony A., assignor.)
Teller, Spencer Jay, West Hartford, assignor to Colt's Patent Fire Arms Manufacturing Co., Hartford, Conn. Container closure means. 2,000,200; May 7.
Terman, Frederick E., Stanford University, Calif. Thermionic tube. 2,000,304; May 7.
Terman, Frederick E., Stanford University, Calif. Frequency multiplier. 2,000,362; May 7.
Terman, Frederick E., Stanford University, Calif., assignor to Wired Radio, Inc., New York, N. Y. Electron tube. 2,000,673; May 7.
Terry, Charles M. (See Andrews, L. V., and Terry.)
Terry, Charles W., Detroit, Mich., assignor to The Electric Storage Battery Company, Philadelphia, Pa. Regulating the output of a generator. 2,000,674; May 7.
Terry, Charles W., Detroit, Mich., assignor to The Electric Storage Battery Company, Philadelphia, Pa. Regulating the output of a generator. 2,000,675; May 7.
Tesch, Elisabeth. (See Tesch, Franz, and E.)
Tesch, Franz H. and E., Hanover, Germany. Necktie. 2,000,799; May 7.
Texas Company, The. (See Cargill, E. L., and Bastion, assignors.)
Texas Company, The. (See Clarke, Louis A., assignor.)
Texas Company, The. (See Manley, Robert E., assignor.)
Textier de la Caillerie, Ulysse, Secondigny-en-Gatine, France. Land and water motor vehicle. 2,000,827; May 7.
Thermoid Rubber Company. (See Pardoe, William D., assignor.)
Thibault, Federico J. (See Greenfield, E., and Thibault.)
Thoen, Lowell H., Stockton, assignor to Caterpillar Tractor Co., San Leandro, Calif. Mower. 2,000,363; May 7.
Thoen, Lowell H., Stockton, assignor to Caterpillar Tractor Co., San Leandro, Calif. Land vehicle construction. 2,000,364; May 7.
Thomas & Betts Co., The. (See Buchanan, Stephen N., assignor.)
Thomas, Charles A., and C. A. Hochwalt, Dayton, assignors to The Mead Research Engineering Company, Chillicothe, Ohio. Pigment. 2,000,050; May 7.
Thomas, John. (See Thorpe, J. F., Linstead, and Thomas.)
Thompson, Andrew E. (See Brewster, O. C., Paulus, and Thompson.)
Thompson, Russell G., assignor to Electromatic Typewriters, Inc., Rochester, N. Y. Apparatus for writing checks. 2,000,201; May 7.
Thomsen, Alfred M., San Francisco, Calif. Distillation of mineral oils, tars, and still residues. 2,000,305; May 7.
Thorp, Joel R., assignor to The Fulton Company, West Allis, Wis. Deflecting device. 2,000,107; May 7.
Thorpe, Jocelyn F., R. P. Linstead, and J. Thomas, Earl's Road, Grangemouth, Scotland. Metal compound containing an isoindole nucleus and making the same. 2,000,051; May 7.
Thorpe, Jocelyn F., and R. P. Linstead, Earl's Road, Grangemouth, Scotland, assignor to Imperial Chemical Industries Limited. Manufacture of colored compounds and the product thereof. 2,000,052; May 7.
Tobin, Kenneth J., Chicago, Ill., assignor, by mesne assignments, to Evans Products Company, Detroit, Mich. Hanger for automobiles. 2,000,306; May 7.
Todd, William. (See Dunbar, C., and Todd.)
Tollins, Michael, Dorchester, Mass. Razor blade sharpener. 2,000,800; May 7.
Traver, Harry G., Beaver Falls, Pa. Chair. 2,000,624; May 7.
Tretolite Company. (See Roberts, Claudius H. M., assignor.)
Tretolite Company, The. (See Walker, John C., assignor.)
Trevor, Bertram, Riverhead, N. Y., assignor to Radio Corporation of America. Tuning system. 2,000,677; May 7.
Trico Products Corporation. (See Hueber, H., and Horton, assignors.)
Trumbull Electric Manufacturing Company. (See Hepler, Carroll D., assignor.)
Tucker Diesel Motor Co. Ltd. (See Tucker, Emmitt M., assignor.)
Tucker, Emmitt M., Sacramento, Calif., assignor to Tucker Diesel Motor Co. Ltd. Two-cycle gas engine. 2,000,108; May 7.
Turnbaugh, Elbert L., Reno, Nev., assignor to Eternal Calendar Corporation, San Francisco, Calif. Dual century calendar. 2,000,365; May 7.
Turner, Clara, et al., administrators. (See Dow, Herbert H.)
Turner, Louis J., Ottawa, Ontario, Canada. Power transmitting mechanism. 2,000,500; May 7.
Turner, Ross M. (See Brady, Thomas, assignor.)
Turner Tanning Machinery Company, The. (See Rausch, Karl, assignor.)
Tyler, Bert E., Los Angeles, Calif. Oil well swab. 2,000,109; May 7.
Udy, Marvin J., Anniston, Ala., assignor to Swann Research, Incorporated. Simultaneously producing phosphoric acid and silicon alloys. 2,000,627; May 7.
Uhlmann, Henry B., and J. C. Myers, Philadelphia, Pa. Bell lining and shock absorber. 2,000,540; May 7.
Unger, Paul O. (See Dawson, G. H., and Unger.)
Uniclox Corporation. (See Schulse, Herman E., assignor.)
Union Oil Company of California. (See Merrill, D. R., and Blount, assignors.)

Universal Oil Products Company. (See Morrell, J. C., and Egloff, assignors.)
Upchurch, Thomas B., Jr., et al. (See Newlin, Mike H., assignor.)

Vail, Walter E., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Production of carboxylic acid. 2,000,053; May 7.
Vanderbilt, R. T., Co. Inc. (See Larson, Leon H., assignor.)
Van der Pol, Balthasar, and R. Veldhuyzen, Eindhoven, Netherlands, assignors to Radio Corporation of America. Differential condenser. 2,000,678; May 7.
Van Dyke, Russel H. (See Kenyon, W. O., and Van Dyke.)
Van Dyke, Russel H. (See Staud, C. J., and Van Dyke.)
Van Horn, Chris S., Bloomsburg, Pa. Dental casting machine. 2,000,801; May 7.
Van Note, Eugene, Kearny, N. J., assignor of one-half to M. and J. Kasson, New York, N. Y. Hinge and rest. 2,000,541; May 7.
Van Osdel, William J., Chicago, Ill. Alternating current clock. 2,000,307; May 7.
Vaughan, John F., Belmont, Mass. Measuring instrument. 2,000,625; May 7.
Vaughn, Chester L., Yorktown, Ind. Lock. 2,000,264; May 7.
Vazquez, Eugenio A., Habana, Cuba. Recovery of sugar and salts from sugar cane molasses. 2,000,202; May 7.
Veldhuyzen, Romyn. (See van der Pol, B., and Veldhuyzen.)
Venzie, Frederick M., Philadelphia, Pa., assignor to National Gypsum Company, Buffalo, N. Y. Floor slab construction. 2,000,110; May 7.
Vernor, James, Company. (See Doughty, William E., assignor.)
Vickers, Harry F., Detroit, Mich. Vacuum system for hydraulically operated mechanisms. 2,000,205; May 7.
Victor, Joseph N., Allentown, Pa. Window construction. 2,000,366; May 7.
Vilsmeier, Anton. (See Noreisheimer, H., Ruppel, and Vilsmeier.)
Voigt, Mabel C., et al., administrators. (See Conklin, W. F., Hopkins, and Hover.)
Von Schlitz, Friedrich, Berlin-Charlottenburg, Germany, assignor to N. V. Machinerieen-en Apparaten Fabricken "Mepaf", Utrecht, Netherlands. Volume metering apparatus. 2,000,308; May 7.
Vortex Cup Company. (See Barbieri, Cesare, assignor.)
Vortex Cup Company. (See Krein, Frederick T., assignor.)
Votypka, John, assignor to Lebaron Detroit Company, Detroit, Mich. Vehicle body and top construction. 2,000,626; May 7.
Wade, David E., Albany, N. Y. Ink well and pen filling device. 2,000,501; May 7.
Wade, Wallace G. (See Freeman, H. M., and Wade.)
Wagner, Charles F. (See Dovjikov, A. D., Fortescue, and Wagner.)
Walker, Albert C., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electrical conductor. 2,000,428; May 7.
Walker Dishwasher Corporation. (See Snyder, C. M., and Walker, assignors.)
Walker, Forrest A. (See Snyder, C. M. and Walker.)
Walker, John C., Eldorado, Kans., assignor, by mesne assignments, to The Tretolite Company, Webster Groves, Mo. Breaking of oil-water emulsions. 2,000,725; May 7.
Walker, John C., Eldorado, Kans., assignor, by mesne assignments, to The Tretolite Company, Webster Groves, Mo. Breaking of oil-water emulsions. 2,000,802; May 7.
Walker, Joseph F., Perth Amboy, N. J., assignor to E. I. du Pont de Nemours & Company, Inc., Wilmington, Del. Stabilization of formaldehyde solutions. 2,000,152; May 7.
Walter, Ludwig, assignor to Telefunken Gesellschaft fur Drahtlose Telegraphie m. b. H., Berlin, Germany. Flexible high frequency line. 2,000,679; May 7.
Waltham Watch Company. (See Fink, Jean, assignor.)
Warrington, Albert R. van C., Media, Pa., assignor to General Electric Company. Electroresponsive device. 2,000,803; May 7.
Wasson, Harry C., Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Fluid pressure control apparatus. 2,000,542; May 7.
Watson, Arthur C., Marietta, Ohio. Method and apparatus for producing visual effects. 2,000,153; May 7.
Watson, Bessie, executors, et al. (See Cullen, H. E., and Ronning.)
Watson, Charles L., San Francisco, Calif. Constant temperature oven. 2,000,266; May 7.
Watson, Henry P. (See Cullen, H. E., and Ronning, assignors.)
Waukesha Motor Company. (See Fisher, J. B., and Hofmann, assignors.)
Waxed Products Company, Inc. (See Spaldo, Louis C., assignor.)
Weatherhead, Albert J., Jr., assignor to The Weatherhead Company, Cleveland, Ohio. Hose coupling. 2,000,680; May 7.
Weatherhead Company, The. (See Weatherhead, Albert J., Jr., assignor.)
Weber, Jay L., Tulsa, Okla. Train automatic air connecter. 2,000,720; May 7.
Weeks, Francis H., New York, N. Y. Stevedoring apparatus. 2,000,054; May 7.
Wehren, Ernst, Bern, Switzerland. Coin freed substation for automatic telephone systems. 2,000,804; May 7.
Weidenhoff, Joseph. (See Neal, Leon P., assignor.)
Weikel, Henry C., Jr., assignor to The United States Printing and Lithograph Co., Baltimore, Md. Testing apparatus. 2,000,502; May 7.
Weinlich, Hermann A., and U. Kölm, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Card verifier. 2,000,203; May 7.
Weis, Paul B., assignor to S. E. Miller, Aurora, Ill. Keyless lock mechanism. 2,000,111; May 7.
Weinbaum, Joseph M., et al. (See Livingston, Maurice H., assignor.)
Weller, George H., Providence, R. I., assignor to The Mason Box Company, Attleboro Falls, Mass. Display case. 2,000,681; May 7.
Wentorf, Robert H., assignor to West Bend Aluminum Company, West Bend, Wis. One cup coffee maker. 2,000,309; May 7.
West Bend Aluminum Company. (See Wentorf, Robert H., assignor.)
West, Donald H., Marlboro, and K. C. Monroe, Hudson, Mass., assignors to The La Pointe Machine Tool Company, Hudson, Mass. Machine tool and hydraulic actuating mechanism therefor. 2,000,805; May 7.
Western Electrical Instrument Corporation. (See Lederer, Karl M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Andrew, Victor J., assignor.)
Western Electric & Manufacturing Company. (See Arnold, Edwin E., assignor.)
Westinghouse Electric and Manufacturing Company. (See Burr, G. A., and Arnold, assignors.)
Westinghouse Electric and Manufacturing Company. (See Freeman, H. M., and Wade, assignors.)
Westinghouse Electric & Manufacturing Company. (See Griscom, S. B., and Nycum, assignors.)
Westinghouse Electric and Manufacturing Company. (See Dovjikov, A. D., Fortescue, and Wagner, assignors.)
Westinghouse Electric & Manufacturing Company. (See Guhl, Henry C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hanna, Clinton R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Harding, William R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lewis, William A., Jr., assignor.)
Westinghouse Electric & Manufacturing Company. (See Long, Thomas H., assignor.)
Westinghouse Electric & Manufacturing Company. (See McNulty, John W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mercereau, J. T., and Maslin, assignors.)
Westinghouse Electric & Manufacturing Company. (See Penney, Gaylord W., assignor.)
Westinghouse Electric and Manufacturing Company. (See Slepian, J., Tanberg, and Krause, assignors.)
Westinghouse Electric & Manufacturing Company. (See Taugher, Frank P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Willby, Norman H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wolfert, Edward R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Young, Douglass A., assignor.)
Westinghouse Elevator Company. (See Keiper, Phillip C., assignor.)
Weston Electrical Instrument Corporation. (See Lamp, Anthony H., assignor.)
Wheeler, Frank K. B. (See Wheeler, Walter H., assignor.)
Wheeler, Harold A., Great Neck, N. Y., assignor to Hazeltine Corporation. Superheterodyne radioreceiver. 2,000,113; May 7.
Wheeler Paper Corporation. (See Peters, William H., assignor.)
Wheeler, Walter H., assignor to F. K. B. Wheeler, Minneapolis, Minn. Frame for concrete columns. 2,000,543; May 7.
Wheller, Harry S., Elizabeth, N. J. Heater. 2,000,112; May 7.
Whipple, Willis A., Chicago, Ill. Vibratory current interrupter. 2,000,204; May 7.
White, Edward J., and A. S. Garove, Detroit, Mich. Pickup and delivery system. 2,000,154; May 7.
White, Henry G., and F. L. Porter, High Point, N. C. Mirror making. 2,000,310; May 7.
White, John W., assignor, by mesne assignments, to Kelsey-Hayes Wheel Company, Detroit, Mich. Apparatus for forming brake drums. 2,000,155; May 7.
White, Lewis E., assignor to H. L. Worthington, San Francisco, Calif. Electric steaming apparatus. 2,000,628; May 7.
White, Louis A. (See Murray, J. J., and White.)
White, Raymond E., Seattle, Wash. Diesel engine. 2,000,267; May 7.
White, Richard M., East Cleveland, assignor to Macoustic Engineering Company, Cleveland, Ohio. Method of and apparatus for sound modification. 2,000,806; May 7.
White, Tom C., Billings, Mont. Vehicle jack. 2,000,503; May 7.
Whitehead, William. (See Dreyfus, C., and Whitehead.)
Whitson, Thomas B., et al. (See Kelfaber, E. W., Doerr, Whitson, and Creagmile.)
Wicha, Alois, Dresden, Germany, assignor to Erospha, Inc., Brooklyn, N. Y. Fluid actuator. 2,000,629; May 7.

Wickstrum, Cecil M., Omaha, Nebr. Tent construction. 2,000,205; May 7.
Wig, Rudolph J., assignor to Kelco Company, Los Angeles, Calif. Readily water soluble dry alginate. 2,000,807; May 7.
Wilbur, Ralph H. (See Lane, John D., assignor.)
Wiley, Samuel, Metuchen, N. J. Flare container. 2,000,058; May 7.
Wilkinson, Francis C. W., Burnham, assignor of one-half to Crane Packing Limited, Slough, England, and one-half to Crane Packing Company, Chicago, Ill. Heat exchange apparatus. 2,000,653; May 7.
Willby, Norman H., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Motor control system. 2,000,727; May 7.
Willby, Norman H., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Control system. 2,000,728; May 7.
Williams, Frank B. and H. E., Carthage, Mo. Upholstering for metal spring constructions. 2,000,114; May 7.
Williams, Frederick V., Olathe, Kans. Toy. 2,000,808; May 7.
Williams, Harold E. (See Williams, F. B. and H. E.)
Williams, Louis N. D., Ogonts, Pa., assignor to Scotland Williams, Incorporated, New York, N. Y. Transfer mechanism for circular knitting machines. 2,000,429; May 7.
Williams, Sion H., Hornbeak, Tenn. Bow facing oar. 2,000,630; May 7.
Williamson, Colonel J., and H. F. Suverkrup, San Bernardino, Calif. Automatic valve control system. 2,000,367; May 7.
Willshaw, Harry, Sutton Coldfield, and T. Norcross, and F. G. Broadbent, Erdington, Birmingham, England, assignors to Dunlop Tire and Rubber Corporation, Buffalo, N. Y. Apparatus for molding and vulcanizing pneumatic tire covers and the like. 2,000,430; May 7.
Wilson, Andrew V. (See Jackson, R. A. F., and Wilson.)
Wilson-Jones Company. (See Dawson, G. H., and Unger, assignors.)
Wilson Locknut Company. (See Wilson, Wylie G., assignor.)
Wilson, Norval F. (See McBrien, R. W., and Wilson.)
Wilson, Wylie G., Elizabeth, assignor to Wilson Locknut Company, Jersey City, N. J. Method and apparatus for compressing and indenting. 2,000,056; May 7.
Winchell, Thomas E., West Newton, Mass., assignor to Northern Maine Plywood Company, Portland, Maine. Barrel. 2,000,544; May 7.
Windecker, Charles E., Painesville, Ohio. Car. 2,000,631; May 7.
Winning, William F., and C. Keyser, Braddock, Pa. Target. 2,000,368; May 7.
Wintermuth, Harry A., Plainfield, N. J., assignor to Research Corporation, New York, N. Y. Electrical treatment of fluids. 2,000,654; May 7.
Winthrop Chemical Company. (See Streitwolf, K., Fehrle and Hilmer, assignors.)
Wired Radio, Inc. (See Hentschel, Ernest R., assignor.)
Wired Radio, Inc. (See Terman, Frederick E., assignor.)
Wismer, Charles E. (See Arnold, Philip S., assignor.)
Witham, George S., Jr., Lincoln, N. H. Hydration of pulp. 2,000,268; May 7.
Wolarsky, Isidore, Mount Vernon, N. Y. Fixture hanger. 2,000,545; May 7.
Wolfert, Edward R., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electrical control system. 2,000,729; May 7.
Wollensak, Andrew, assignor to Wollensak Optical Company, Rochester, N. Y. Adjustable lens mount. 2,000,811; May 7.
Wollensak Optical Company. (See Wollensak, Andrew, assignor.)
Wood, Fred E., Glen Ellyn, Ill. Gas-time meter. 2,000,655; May 7.
Wood, George R., Toronto, Ontario, Canada, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Coin scale. 2,000,156; May 7.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Roll handling mechanism. 2,000,809; May 7.
Wood, Henry A. W., New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Preparing electrotype plates. 2,000,810; May 7.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, Robert T., Cleveland, Ohio, assignor, by mesne assignments, to Magnesium Development Corporation. Alloy. 2,000,115; May 7.
Wood, Sydney M., Lake Bluff, Ill. Jetty. 2,000,312; May 7.
Wood, Sydney M., Lake Bluff, Ill., and H. A. Schmitt, Milwaukee, Wis. Jetty. 2,000,311; May 7.
Wood Preserving Corporation, The. (See Shipley, Grant B., assignor.)
Woodsome, John O., Detroit, Mich. Paper drying process and apparatus. 2,000,546; May 7.
Woodward, Arthur H., Winnetka, Ill. Sleeping car. 2,000,547; May 7.
Woodward, Arthur H., Winnetka, Ill. Sleeping car. 2,000,548; May 7.
Woodward, Arthur H., Winnetka, Ill. Sleeping car. 2,000,549; May 7.
Woodward, Arthur H., Winnetka, Ill. Sleeping car. 2,000,550; May 7.
Woodward, Arthur H., Winnetka, Ill. Sleeping car. 2,000,551; May 7.
Worthington, Harry L. (See White, Lewis E., assignor.)
Wortmann, Edward F., Jersey City, N. J. Automatic freezing and dispensing apparatus. 2,000,730; May 7.
Wright, Sumner B., South Orange, N. J., assignor to American Telephone and Telegraph Company. Transmission regulation. 2,000,116; May 7.
Wright, Theodore P. (See Osborn, R. R., and Wright.)
Yerington, Orville R. (See Evans, J. McG., and Yerington.)
Yerk, Henry H. (See Bettendorf, W. E., and Yerk.)
Young, Douglass A., East Orange, N. J., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Meter. 2,000,731; May 7.
Young, Leonard A. (See Oldham, John M., assignor.)
Youngstown Steel Door Company, The. (See Ditchfield, Frank, assignor.)
Youngstown Steel Door Company, The. (See McWilliams, J. P., and Ditchfield, assignors.)
Yozewitch, Joseph, Brooklyn, N. Y. Combination sink plug and vacuum cup. 2,000,206; May 7.
Zaikowsky, Wladimir M., Pasadena, Calif. Stop-cock. 2,000,552; May 7.
Ziegelmeyer, John S. (See Zingre, Charles, assignor.)
Zeiss, Carl. (See Bauersfeld, Walther, assignor.)
Zeiss, Carl. (See Lincke, Rudolf, assignor.)
Zeiss, Carl H., Winnetka, Ill. Game. 2,000,369; May 7.
Zelt, Elmer J., Fort Wayne, Ind., assignor to General Electric Company. Threaded connection. 2,000,732; May 7.
Ziemmerman, Henry, assignor to Chicago Cardboard Company, Chicago, Ill. Folding display and package. 2,000,870; May 7.
Zingre, Charles, Webster Groves, assignor to John S. Ziegelmeyer, St. Louis, Mo. Support for drooping plants. 2,000,632; May 7.
Zitscher, Arthur, Offenbach-on-the-Main, and W. Lambers, Leverkusen-Wiesdorf, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Water-insoluble azo-dyestuffs and fiber dyed therewith. 2,000,313; May 7.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Attachment for doughnut cutting and cooking machines. J. Baumann. 19,557; May 7.
Boiler feed control. O. F. Carlson. 19,558; May 7.
Counterbalance for well pumps. A. L. Skinner. 19,565; May 7.
Electrical heating elements, Forming. E. L. Wiegand. 19,567; May 7.
Electroprocessing machine. A. H. Hannon. 19,560; May 7.
Fishing reel. C. A. Godshalk, F. Henke, and D. Behrsing. 19,559; May 7.
Masks for fowls. J. Jones. 19,562; May 7.
Pressing machine. E. V. McTague. 19,563; May 7.
Thermopile. J. F. Quereau. 19,564; May 7.
Transmission, Picture. C. F. Jenkins. 19,561; May 7.
Water heating and infusion apparatus. A. Vulls. 19,566; May 7.

LIST OF DESIGN INVENTIONS

Applicator, Massage. A. Kretschan. 95,516; May 7.
Automobile. H. J. Earl. 95,495–6; May 7.
Bag or the like, Hand. B. Blacher. 95,483; May 7.
Base or similar article, Lamp. H. M. Laxer. 95,522–5; May 7.
Belt for personal wear. M. Sachs. 95,549; May 7.
Beverage mixer. J. M. Vogel. 95,559; May 7.
Boat. F. J. Piccola. 95,541; May 7.
Bottle. W. Guyer. 95,506; May 7.
Bottle. G. C. Robinson. 95,547; May 7.
Bottle. J. S. Steelman. 95,553–6; May 7.
Box cover. M. H. Connor. 95,487; May 7.
Buckle slide. S. J. Lesnik. 95,526; May 7.
Cabinet, Display. F. B. Keuthan. 95,513; May 7.
Cabinet, Ironing machine. H. A. Sperlich and J. H. Uhlig. 95,552; May 7.
Car body, Touring. J. O. Heinze. 95,507; May 7.
Centerpiece, Table. N. B. Geddes. 95,482; May 7.
Check writer. J. P. Hunter. 95,509; May 7.
Clothespin or similar article. E. Reynolds. 95,545; May 7.
Coil, Heating. V. W. Moray. 95,533; May 7.
Confection, Frozen. H. W. Hahn. 95,570; May 7.
Corselette. J. F. Greig. 95,502; May 7.
Doll or similar article, Character. E. J. Rogers. 95,548; May 7.
Door handle. G. D. Lindstrom and E. North. 95,529; May 7.
Dress. P. Helt. 95,508; May 7.
Dress. S. Zahn. 95,563–6; May 7.
Dress, Ensemble. J. Kirschner. 95,514; May 7.
Garment or similar article, Sleeping. L. Davis. 95,488; May 7.
Glass, Wine. J. G. Green. 95,501; May 7.
Hand-covering, Knitted. A. J. Friedlander. 95,498; May 7.
Lace. W. R. Adaire. 95,478; May 7.
Lace. W. R. Adaire. 95,478; May 7.
Lace. E. Alper. 95,479; May 7.
Lace. F. Mackintosh. 95,530; May 7.
Lace. W. Priestley. 95,543; May 7.
Lace. J. A. Sutton. 95,558; May 7.
Lamp and clock case, Combined. C. L. Connally. 95,486; May 7.
Lamp bracket. H. E. De Vries. 95,490; May 7.
Oil burning apparatus or similar article. J. G. Gilmore and H. B. Donley. 95,500; May 7.
Pedestal lamp. J. Kollwitz. 95,515; May 7.
Picture projecting machine base. B. Stachbart. 95,553–4; May 7.
Plate or similar article. H. Rumpfel. 95,544; May 7.
Pocket receptacle, Flexible. W. R. Buxton. 95,485; May 7.
Sandal. D. Gilbert. 95,499; May 7.
Scale casing. A. Bousfield. 95,484; May 7.
Shade, Lamp. H. M. Laxer. 95,518–21; May 7.
Shoe. T. R. Atkins. 95,480–1; May 7.
Shoe. E. C. Doring. 95,491–4; May 7.
Shoe. J. Fishman. 95,497; May 7.
Shoe. M. Kalmon. 95,510; May 7.
Shoe. N. K. Kean. 95,511–12; May 7.
Shoe. D. Levin. 95,527; May 7.
Shoe. H. Lieber. 95,528; May 7.
Shoe. C. Morall. 95,532; May 7.
Shoe. H. W. Nieman. 95,534–9; May 7.
Shoe. A. Perugia. 95,540; May 7.
Shoe. F. B. Polley. 95,542; May 7.
Shoe. H. E. Williams. 95,560–1; May 7.
Shoe. B. Zegorav. 95,567–8; May 7.
Shoe. E. Zinitl. 95,569; May 7.
Smoking stand. E. Schultz. 95,550–1; May 7.
Storage battery case. O. O. Rieser. 95,546; May 7.
Target. L. G. La Borie. 95,517; May 7.
Textile fabric or similar article. J. J. Malbach. 95,531; May 7.
Textile fabric or similar article of manufacture. G. Deist. 95,489; May 7.
Vase. L. Guild. 95,503–5; May 7.
Vehicle, Child's wheeled. J. H. Stevenson. 95,557; May 7.
Water heater, Instantaneous. A. Youngholm. 95,562; May 7.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 7TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive and making the same. Aluminum oxide. J. S. Masin. 2,000,857; May 7.
Abrasive stone holder. M. N. Prange. 2,000,611; May 7.
Accounting machine. E. L. Kirkegaard. 2,000,233; May 7.
Acetals, Production of. W. Reppe and K. Baur. 2,000,252; May 7.
Acetic acid. E. C. Britton, H. S. Nutting, and M. E. Huscher. 2,000,878; May 7.
Acid: *See*—
Acetic acid.
Acid and silicon alloys, Simultaneously producing phosphoric. M. J. Udy. 2,000,627; May 7.
Acid, Manufacture of hydrocyanic. C. R. Harris. 2,000,134; May 7.
Acid, Production of carboxylic. W. E. Vail. 2,000,053; May 7.
Acids and phenols, Separation and recovery of naphthenic. D. R. Merrill and A. L. Blount. 2,000,244; May 7.
Acids, Manufacture of alkoxyacetaldehydes and alkoxyacetic. C. J. Malm, G. F. Nadeau, and N. F. Diesel. 2,000,604; May 7.
Acids, Manufacture of hydroxy carboxylic. G. Brann. 2,000,213; May 7.
Acids, Preparing dihydroxy benzenearsonic. K. Streitwolf, A. Fehrle, and H. Hilmer. 2,000,361; May 7.
Acoustic device. J. R. Erickson. 2,000,165; May 7.
Active ray treating device. H. M. Creighton. 2,000,377; May 7.
Adhesive material. P. L. O'Donnell. 2,00,475; May 7.
Adjustable gauge. O. M. Miller. 2,000,783; May 7.
Adzing and boring machine. G. B. Shipley. 2,000,458; May 7.
Aeronautical machine. J. A. Domenjos. 2,000,068; May 7.
Air, Apparatus for conditioning. W. H. Herdlein. 2,000,841; May 7.
Air cleaner. W. W. Lowther. 2,000,706; May 7.
Air, Cooling and conditioning. A. W. Clarke and W. F. Dietrichson. 2,00,821; May 7.
Aircraft. R. R. Osborn and T. P. Wright. 2,000,666; May 7.
Air distribution unit. R. E. Keyes. 2,000,597; May 7.
Air mixing device for gaseous fuel. J. A. Hempstead. 2,000,454; May 7.
Alginate, Readily water soluble dry. R. J. Wig. 2,000,807; May 7.
Alkali metal alcoholates, Preparing. P. Heisel and E. Berghelmer. 2,000,829; May 7.
Alloy. R. T. Wood. 2,000,115; May 7.
Ammonium sulphate, Apparatus for the production of. A. Schmalenbach. 2,000,038; May 7.
Amplifier control, Push-pull. W. S. Barden. 2,000,433; May 7.
Amusement and exercising device. A. Pitre. 2,000,250; May 7.
Animal trap. H. R. Graybill. 2,000,752; May 7.
Ant trap. C. O. and O. C. Rudd. 2,000,647; May 7.
Antioxidant. A. W. Sloan. 2,000,044–5; May 7.
Apparatus for securing registration position of an article. H. C. Jones. 2,000,520; May 7.
Aquarium, Combination. A. W. Krieger. 2,000,451; May 7.
Arc lamp projector, J. Kiefer. 2,000,760; May 7.
Arc welding generator. W. R. Harding. 2,000,699; May 7.
Arrow release device for bows in archery, Safety. G. Flury. 2,000,015; May 7.
Asbestos product, Felted. W. D. Pardoe. 2,000,416; May 7.
Ash receiver. R. F. De Boer. 2,000,275; May 7.
Automobile. W. B. Stout. 2,000,360; May 7.
Automobiles, Electrical device for. J. H. Cohen. 2,000,743; May 7.
Axle, Roller bearing. A. H. Oelkers. 2,000,534; May 7.
Axles, Mechanism for operating upon automobile. R. D. Smith. 2,000,572; May 7.
Azeotropic drying of mixtures of water and alcohols or ketones. W. H. Shiffler and R. C. Mithoff. 2,000,043; May 7.
Azo-dyestuffs and fiber dyed therewith, Water-insoluble. A. Bittcher and W. Lambers. 2,000,313; May 7.
Bag: *See*—
Golf bag.
Bag. W. K. Miller. 2,000,345; May 7.
Bags, Drying burlap. L. T. Bromfield. 2,000,506; May 7.
Bailer. F. G. Gates. 2,000,750; May 7.
Band. J. D. Lane. 2,000,763; May 7.
Band transmission system, Wide. L. Espenschied and E. I. Green. 2,000,130; May 7.
Bank, Coin control register. J. Farber. 2,000,323; May 7.
Barometric feed devices, Charging. R. M. Sherman. 2,000,354; May 7.

Barrel. T. R. Winchell. 2,000,544; May 7.
Barrel staves, Manufacture of. E. W. Hutchings. 2,000,391; May 7.
Bathtub and shower control valve. V. E. Schmiedeknecht. 2,000,791; May 7.
Batter product, Multiuse. A. H. Fiske, B. W. Colby, and G. B. Lewis. 2,000,888; May 7.
Battery clip. L. P. Neal. 2,000,665; May 7.
Battery posts, Sealing. H. D. Stanley. 2,000,199; May 7.
Battery reconditioning apparatus. A. E. Oswald. 2,000,571; May 7.
Bearing: *See*—
Lubricated bearing.
Bearing and guard therefor. T. C. Delaval-Crow. 2,000,276; May 7.
Bearing protection device. O. C. Gruender. 2,000,385; May 7.
Belt connecter. E. H. Kremer. 2,000,598; May 7.
Beverage dispensing apparatus. W. E. Doughty. 2,000,583; May 7.
Binder for loose leaves, Permanent. W. H. Smith. 2,000,357; May 7.
Binder, Loose leaf. S. G. Johnson. 2,000,081; May 7.
Binder, Loose leaf. S. G. Johnson. 2,000,844; May 7.
Binder, Loose leaf. A. G. Lotter. 2,000,184; May 7.
Bit: *See*—
Roller bit.
Blower, more particularly for use in vacuum cleaners. E. Gorissen. 2,000,480; May 7.
Board: *See*—
Summary board.
Bobbin conveyer for winding machines. J. O. McKean. 2,000,774; May 7.
Bobbin, Spinning. E. Beck. 2,000,372; May 7.
Body of a tilted chassis, Device to level. W. H. Heise. 2,000,229; May 7.
Boil-off or dyeing apparatus. A. E. Demol. 2,000,745; May 7.
Book holder and line finder. P. A. Jones. 2,000,485; May 7.
Boot-trees by tip casting, Apparatus for producing hollow. E. Kistinger. 2,000,449; May 7.
Bore cutting machine. P. H. Hutchinson. 2,000,288; May 7.
Bottle and closure therefor. S. C. Miller. 2,000,407; May 7.
Bottle closure. C. G. Carlberg. 2,000,742; May 7.
Bottle, Nonrefillable. F. K. Anderson. 2,000,814; May 7.
Bow. C. B. Fisher. 2,000,832; May 7.
Bowl, Self-draining centrifugal. G. J. Streszynski. 2,000,459; May 7.
Box: *See*—
Outlet box.
Box and cable clamp, Outlet. J. Knell. 2,000,850; May 7.
Box machine. C. H. Nitsch. 2,000,712; May 7.
Bracket: *See*—
Ladder bracket.
Bracket arrangement for shelves or the like. R. E. Carlson. 2,000,124; May 7.
Brake: *See*—
Hand brake.
Brake drums, Apparatus for forming. J. W. White. 2,000,155; May 7.
Brake mechanism, Hand. F. D. Miller and E. C. Mersereau. 2,000,089; May 7.
Brake shoe expander. F. V. Clancy. 2,000,011; May 7.
Brake testing device. E. M. Kramer. 2,000,289; May 7.
Bread, Baking. C. C. Frants. 2,000,384; May 7.
Bread slicing machine. W. E. Bettendorf and H. H. Yerk. 2,000,816; May 7.
Brick facing support. S. Sarar. 2,000,616; May 7.
Bucket for machines for digging caissons and the like, Auger. E. H. Siebel. 2,000,195; May 7.
Building structure. L. B. Scheide. 2,000,530; May 7.
Burner: *See*—
Oil burner.
Burner installation for domestic boilers. E. T. Avery. 2,000,733; May 7.
Cabin construction. R. A. Hollingsworth and B. H. Moe. 2,000,638; May 7.
Cabinet. F. J. Matchette. 2,000,401–2; May 7.
Cabinet for press make-ready, Mark-out. H. S. Ransom. 2,000,537; May 7.
Cable, Deep-sea electric telephone. E. Sichtermann. 2,000,355; May 7.
Calendar, Dual century. E. L. Turnbaugh. 2,000,365; May 7.
Camera construction. C. C. Fuerst. 2,000,588; May 7.
Camera focusing mechanism. G. A. Mitchell. 2,000,090; May 7.

Camera, Motion picture. H. R. Schenck, Jr. 2,000,895; May 7.
Can: *See*—
Safety oil can.
Cannon, Gas. E. S. Peake. 2,000,607; May 7.
Capsule making machine. F. F. Klett. 2,000,234; May 7.
Car. C. E. Windecker. 2,000,631; May 7.
Car construction, Repair house. J. P. McWilliams and F. Ditchfield. 2,000,531; May 7.
Car, House. F. Ditchfield. 2,000,164; May 7.
Car, House. F. Ditchfield. 2,000,320; May 7.
Car, Sleeping. A. H. Woodward. 2,000,547–51; May 7.
Car, Tank. C. C. C. Burkhardt. 2,000,819; May 7.
Card clothing resetting machine. E. S. Flynn. 2,000,071; May 7.
Card feeding and handling device. C. D. Lake. 2,000,230; May 7.
Card roller mounting machine. E. S. Flynn. 2,000,070; May 7.
Card verifier. H. A. Weinlich and U. Kölm. 2,000,203; May 7.
Cards, Analyzing record. M. Maul. 2,000,403; May 7.
Cards, Playing. R. E. Adams. 2,000,812; May 7.
Carpenter's tool. J. R. McGlauflin. 2,000,773; May 7.
Carrier: *See*—
Pneumatic dispatch carrier.
Carton. J. L. Bayless. 2,000,210; May 7.
Carton, Egg. L. Benoit. 2,000,738; May 7.
Case: *See*—
Display case. Slide rule case.
Shipping case.
Cash register. B. M. Shipley. 2,000,101; May 7.
Casing: *See*—
Sausage casing.
Catch, Hood. R. G. Moore. 2,000,245; May 7.
Cellulose acetate composition comprising a tertiary alcohol. E. R. Taylor. 2,000,622; May 7.
Cellulose esters, Hydrolysis of. C. J. Staud and L. M. Minsk. 2,000,620; May 7.
Cellulose esters, Precipitation of. C. J. Malm and C. R. Fordyce. 2,000,601; May 7.
Cellulose, Fibrous esterification of. C. J. Malm and C. L. Fletcher. 2,000,602; May 7.
Cellulosic material prior to esterification, Treatment of. C. J. Malm and C. R. Fordyce. 2,000,603; May 7.
Cellulosic material, Propionation of. C. J. Staud and R. H. Van Dyke. 2,000,621; May 7.
Cement plaster. F. Bauer. 2,000,371; May 7.
Centrifugal compressor. R. G. Standerwick. 2,000,721; May 7.
Centrifugal treatment of substances and mechanism therefor. L. D. Jones. 2,000,521; May 7.
Ceramic structures, Apparatus for molding. W. Taylor. 2,000,623; May 7.
Chair: *See*—
Folding push-chair.
Chair. H. G. Traver. 2,000,624; May 7.
Chair bed. F. E. Moore. 2,000,471; May 7.
Channel assembly, Nonperforated. B. C. Place. 2,000,147; May 7.
Chart, Recorder. G. B. Lindermann, Jr. 2,000,527; May 7.
Chassis checking gauge. R. D. Smith. 2,000,866; May 7.
Checks, Apparatus for writing. R. G. Thompson. 2,000,201; May 7.
Chemicals, Disabling and incapacitating gas generating. B. C. Goss. 2,000,131; May 7.
Chronological instrument. H. E. Schulse. 2,000,457; May 7.
Cigarette making apparatus. W. D. Starrett. 2,000,423; May 7.
Circuit, Alarm. R. W. McBrien and N. F. Wilson. 2,000,185; May 7.
Circuit interrupter, Electric. G. A. Healls. 2,000,442; May 7.
Circuits, Adjusting effective incremental permeability of magnetic. N. Deisch. 2,000,378; May 7.
Circular knitting machine. H. Swinglehurst, Jr. 2,000,798; May 7.
Clamp and insulator, Hot line. D. E. Snyder. 2,000,652; May 7.
Clasp, Lingerie. M. B. Desrosiers. 2,000,127; May 7.
Clay and product formed therefrom, Method of indurating. M. H. Kilefoth. 2,000,338; May 7.
Clay in treating tower systems, Continuously using. R. K. Stratford and C. Leaver. 2,000,672; May 7.
Cleaner: *See*—
Air cleaner.
Clip: *See*—
Battery clip.
Clock. J. W. Hansen. 2,000,327; May 7.
Clock, Alternating current. W. J. Van Osdel. 2,000,307; May 7.
Clock, Electric. F. Loeffler. 2,000,600; May 7.
Clock, Electromagnetic impulse. J. Fink. 2,000,585; May 7.
Closure. F. E. Sweeney. 2,000,795; May 7.
Closure for fruit jars and the like. R. S. Fetter. 2,000,831; May 7.
Closure operating mechanism. C. C. and M. M. Cook. 2,000,479; May 7.
Clutch. M. L. Norris. 2,000,713; May 7.
Clutch control mechanism, Motor vehicle. E. G. Hill. 2,000,331; May 7.
Coal bagging machine. B. W. Kellett. 2,000,848; May 7.
Coating of paper. J. D. Murray. 2,000,847; May 7.
Coffee maker, One cup. R. H. Wentorf. 2,000,309; May 7.
Coffee, Making cereal. A. Kloss. 2,000,450; May 7.
Coin freed substation for automatic telephone systems. E. Wehren. 2,000,804; May 7.
Coin selector. G. S. Brodd. 2,000,462; May 7.
Coin selector. G. M. D. Johns. 2,000,519; May 7.
Collapsible container. G. Di Mauro. 2,000,067; May 7.
Colored compounds and the product thereof, Manufacture of. J. F. Thorpe and B. P. Linstead. 2,000,052; May 7.
Combustion control. L. V. Andrews and C. M. Terry. 2,000,270; May 7.
Communication system. W. S. Lemon. 2,000,765; May 7.
Communication system. W. S. Lemmon and C. J. Fitch. 2,000,764; May 7.
Commutator, High speed. G. W. Penney. 2,000,715; May 7.
Composite article and making the same. H. R. Fife. 2,000,383; May 7.
Composition for killing insects and fungi. P. Janke. 2,000,843; May 7.
Composition for storage battery containers. E. R. Dillehay and O. G. Rieser. 2,000,582; May 7.
Composition of matter and producing porous matter. W. E. Broeg. 2,000,160; May 7.
Composition of matter, etc. L. H. Larson. 2,000,031; May 7.
Compressing and indenting, Method and apparatus for. W. G. Wilson. 2,000,056; May 7.
Compressor discharge valve. L. L. Collins. 2,000,691; May 7.
Computing device consisting of a mathematical curve. O. B. Lane. 2,000,526; May 7.
Concrete, Curing. A. A. Johnson. 2,000,759; May 7.
Condenser: *See*—
Differential condenser. Variable mica condenser.
Electrical condenser.
Conductor, Electrical. A. C. Walker. 2,000,428; May 7.
Conductor, Insulated electric. E. C. Pitman. 2,000,095; May 7.
Confection and making same. G. E. Lathrop. 2,000,342; May 7.
Connecter: *See*—
Belt connecter. Train pipe connecter.
Cord connecter. Tube connecter.
Detachable connecter.
Train automatic air connecter.
Confections, Making. G. M. Teague. 2,000,676; May 7.
Connection for web reeling apparatus, Flexible drive. P. J. Berggren. 2,000,436; May 7.
Connection, Insulated electrical. J. V. Polk. 2,000,716; May 7.
Connection, Threaded. E. J. Zelt. 2,000,732; May 7.
Container: *See*—
Collapsible container. Metallic container.
Flare container. Progressive container.
Container. R. W. Manning. 2,000,242; May 7.
Container and dispenser, Toilet paper. W. H. Peters. 2,000,454; May 7.
Container closure means. S. J. Teller. 2,000,200; May 7.
Container for candy packages and the like. D. Black and J. Reid. 2,000,158; May 7.
Container for lip sticks and the like. A. Janer. 2,000,701; May 7.
Control, Automatic. A. E. Krogh. 2,000,235; May 7.
Control for radial drills, Duplex. L. L. Schauer, A. M. Sosa, and J. H. McKewen. 2,000,421; May 7.
Control system. V. J. Andrew. 2,000,685; May 7.
Control system. N. H. Willby. 2,000,728; May 7.
Controller apparatus. C. W. Bristol and P. A. Borden. 2,000,739; May 7.
Conveyer. H. R. Perry and C. S. Jennings. 2,000,417; May 7.
Conveyer. R. J. Roland. 2,000,499; May 7.
Cooling and ventilating system. E. F. Carry. 2,000,477; May 7.
Cooling, freezing, and heating apparatus. T. Lindseth. 2,000,467; May 7.
Cord connecter. J. H. Cannon. 2,000,318; May 7.
Core catcher. J. H. Howard. 2,000,389; May 7.
Corn, Canning. H. R. Lewis. 2,000,892; May 7.
Coupler mechanism. A. J. Bazeley. 2,000,435; May 7.
Coupling: *See*—
Elastic coupling. Hose coupling.
Cover: *See*—
Toilet seat cover.
Cover attachment for first aid kits. J. L. Peavey. 2,000,495; May 7.

Fabric folding machine. F. J. Couch. 2,000,062; May 7.
Fabrics, Apparatus for treating. R. C. Benner, H. P. Kirchner, and R. L. Melton. 2,000,315; May 7.
Facsimile printing telegraph system and apparatus. E. F. Kleinschmidt. 2,000,083; May 7.
Fan, Electric. C. F. Haynes. 2,000,386; May 7.
Fastener: *See*—
Folded paper fastener. Separable fastener.
Fastener supplying mechanism. A. A. Lawson. 2,000,139; May 7.
Fence post. W. L. Hyde. 2,000,232; May 7.
Fender shield, Actuated. J. Anchor. 2,000,813; May 7.
Fibrous material for incorporation in fabrics, Apparatus for supplying. J. Morton. 2,000,643; May 7.
Filament, Artificial silk. J. A. Siegmaster. 2,000,671; May 7.
Filament support. J. McCullough. 2,000,567; May 7.
Film, Photographic. C. R. Fordyce. 2,000,587; May 7.
Filter: *See*—
Pressure filter. Slit filter.
Filter. F. J. Given. 2,000,441; May 7.
Filtering product and making the same. C. R. Minton. 2,000,777; May 7.
Finger ring. M. N. Harris. 2,000,228; May 7.
Firearms, Safety device for. W. R. Maxwell. 2,000,858; May 7.
Fires, Extinguishing oil well. P. J. Duffy. 2,000,381; May 7.
Fish lure. A. C. Accetta. 2,000,734; May 7.
Fishing rod handle. R. R. Teetor. 2,000,263; May 7.
Fitter, Tubular. W. Leathers. 2,000,854; May 7.
Fitting, Entrance. S. N. Buchanan. 2,000,874; May 7.
Fitting for tanks, Outlet. R. J. Neely. 2,000,246; May 7.
Fixture hanger. I. Wolarsky. 2,000,545; May 7.
Fixture-supporting and connecting device, Electric. J. Mangin. 2,000,241; May 7.
Flare container. S. Wiley. 2,000,055; May 7.
Floor slab construction. F. M. Vensie. 2,000,110; May 7.
Flour, Soy bean. W. B. Bishop. 2,000,817; May 7.
Fluid actuator. A. Wicha. 2,000,629; May 7.
Fluid jet pump. B. O. Buckland. 2,000,741; May 7.
Fluid jet pump. H. Kraft. 2,000,762; May 7.
Fluid pressure control apparatus. H. C. Wasson. 2,000,542; May 7.
Fluid-stop joint. E. D. Eby. 2,000,747; May 7.
Fluids, Electrical cleaning of. R. Heinrich and W. Feldmann. 2,000,017; May 7.
Flush valve. W. Putnam. 2,000,297; May 7.
Folder paper fastener. R. G. Bourdon. 2,000,059; May 7.
Folding display and package. H. Ziemmerman. 2,000,870; May 7.
Folding machine. F. J. Couch. 2,000,063; May 7.
Folding push-chair, Child's. M. L. Bernon. 2,000,875; May 7.
Food powder, Producing a. R. T. Northcutt and A. L. Johnston, Jr. 2,000,533; May 7.
Food products, Apparatus for preparing. T. M. Rector. 2,000,645; May 7.
Food products, Preparing. T. M. Rector. 2,000,646; May 7.
Foot measure and shoe size indicator. W. M. Scholl. 2,000,257; May 7.
Foot measuring and impression device. W. M. Scholl. 2,000,256; May 7.
Footwear. J. B. Greider. 2,000,326; May 7.
Formaldehyde, Manufacturing. E. A. Prudhomme. 2,000,096; May 7.
Formaldehyde solutions, Stabilization of. J. F. Walker. 2,000,152; May 7.
Frame: *See*—
Quilt and rug frame.
Frame for concrete columns. W. H. Wheeler. 2,000,543; May 7.

Freezer for refrigerators, Ice cream. C. T. Hoffman. 2,000,023; May 7.
Freezer, Ice cream. C. T. Hoffman. 2,000,022; May 7.
Freezer, Ice cream. C. T. Hoffman and E. L. Groff. 2,000,021; May 7.
Freezing and dispensing apparatus. E. F. Wortmann. 2,000,730; May 7.
Frequency control. C. Fichandler. 2,000,584; May 7.
Froth flotation process for oxide ores. J. M. Patek. 2,000,350; May 7.
Fuel in internal combustion engines, Pressure delivery of. A. Moore. 2,000,091; May 7.
Fuel, Motor. C. W. Hanaum. 2,000,288; May 7.
Fuel vaporiser, Gasoline engine. D. Y. Rickabaugh. 2,000,498; May 7.
Fuels, Combustion of liquid. E. H. Carruthers. 2,000,580; May 7.
Furnace: *See*—
Electric furnace. Multiple furnace.
Fuse device, Multiple. W. H. Frank, J. A. Messing and H. J. L. Frank. 2,000,016; May 7.
Fuse, Electric time. K. Schaffer-Glössl. 2,000,017; May 7.
Fuse switch. L. P. Boll and T. Birkenmaier. 2,000,876; May 7.
Game. C. H. Zeiss. 2,000,369; May 7.
Game and game apparatus. G. F. Cahill. 2,000,123; May 7.
Game apparatus. J. F. Meyer. 2,000,778; May 7.
Garment. S. J. Dichter. 2,000,633; May 7.
Garment. M. Reich. 2,000,149; May 7.
Garment and method of manufacture, Body. H. A. Goas. 2,000,073; May 7.
Gas analysis, Apparatus for. R. P. Brown and T. R. Harrison. 2,000,119; May 7.
Gas by a liquid, Apparatus for the treatment of a. I. Hechenbleikner. 2,000,443; May 7.
Gas-time meter. F. E. Wood. 2,000,655; May 7.
Gaseous mixtures containing hydrogen, Production of. O. Elsenhut. 2,000,224; May 7.
Gate: *See*—
Traveling chain gate.
Gauge: *See*—
Adjustable gauge. Kingpin angle gauge.
Chassis checking gauge. Tool setting gauge.

Paper, Waterproof abrasive. C. Munch. 2,000,532; May 7.
Para-N-sec-alkylamino-phenols and other substituted phenols, Manufacture of certain. R. T. Major. 2,000,034; May 7.
Pasteuriser, Milk. L. A. Babcock. 2,000,370; May 7.
Petroleum emulsions, Breaking. C. H. M. Roberts. 2,000,717; May 7.
Phase sequence apparatus. W. A. Lewis, Jr. 2,000,767; May 7.
Photoelectric device. A. H. Lamb. 2,000,642; May 7.
Photographic layers in a bath containing a wetting agent and new preparations intended for acting on photographic layers, Treating. A. Schaeffer. 2,000,853; May 7.
Photographs, Apparatus for taking. J. B. Strauss. 2,000,425; May 7.
Photography. M. O. Miller. 2,000,470; May 7.
Photography, Three color. J. A. Ball. 2,000,058; May 7.
Phototube. T. H. Long. 2,000,705; May 7.
Pick-up and delivery system. E. J. White and A. S. Garove. 2,000,154; May 7.
Picture apparatus, Motion. A. A. Andrews. 2,000,872; May 7.
Picture apparatus, Motion. C. R. Hanna. 2,000,698; May 7.
Picture apparatus, Talking motion. A. N. Goldsmith. 2,000,697; May 7.
Picture machine, Motion. A. S. Howell. 2,000,286; May 7.
Pigment. F. A. Henglein and O. Nitzschke. 2,000,135; May 7.
Pigment. C. A. Hochwalt. 2,000,842; May 7.
Pigment. C. A. Thomas and C. A. Hochwalt. 2,000,050; May 7.
Pigments from lead ores, Making. N. C. Christensen. 2,000,661; May 7.
Pin feed platen roll. J. Q. Sherman. 2,000,649; May 7.
Pin feed platen roll. J. Q. Sherman. 2,000,651; May 7.
Piston skirt expander. R. R. Teetor. 2,000,106; May 7.
Pitch propeller, Automatic variable. L. M. Taylor. 2,000,049; May 7.
Planing machine. F. H. Jennings. 2,000,394; May 7.
Plaster board into a drying kiln, Apparatus for feeding. C. Absmeier. 2,000,269; May 7.
Plate gangs for multicolor printing, Device for forming. B. F. Heck. 2,000,755; May 7.
Plate gangs for multi-color printing, Forming. B. F. Heck. 2,000,756; May 7.

Plates onto a conveyer, Device for feeding. J. F. Kohler. 2,000,761; May 7.
Plug and vacuum cup, Combination sink. J. Yozewitch. 2,000,206; May 7.
Pneumatic dispatch carrier. J. G. Maclaren. 2,000,400; May 7.
Porcelain, Making dental. F. P. Hoffmann. 2,000,285; May 7.
Portable receptacle. M. Solomon. 2,000,302; May 7.
Post: *See*—
Fence post.
Powdered or granular material, especially coal, Separation of. R. Lessing and R. H. Allen. 2,000,181; May 7.
Power converting unit and system. J. N. Stowell. 2,000,868; May 7.
Power metering, Multiple-rate. J. P. Ballantine. 2,000,736; May 7.
Power transmission wheel. H. H. Frick. 2,000,834; May 7.
Power transmitting mechanism. L. J. Turner. 2,000,500; May 7.
Press: *See*—
Neckband and collar finishing press. Tobacco press.
Pressure filter. B. Kelley. 2,000,137; May 7.
Pressure to the cylinders of the mechanisms for drawing textile rovings, Apparatus for imparting. F. Casablancas. 2,000,660; May 7.
Printing. V. Peterson and A. C. Schaefer. 2,000,094; May 7.
Printing attachment for printing presses, Auxiliary rotary. W. M. Kelly. 2,000,486; May 7.
Progressive container. E. N. Snodgrass and M. E. Holy. 2,000,301; May 7.
Protector: *See*—
Curtain protector.
Puller: *See*—
Dandelion puller.
Pulp, Hydration of. G. S. Witham, Jr. 2,000,268; May 7.
Pulp molding machine. A. H. Maginnis. 2,000,085; May 7.
Pump: *See*—
Fluid jet pump.
Pump or motor, Variable delivery. E. K. Benedek. 2,000,271; May 7.
Pump unit. C. L. Babb. 2,000,874; May 7.
Punch machine, Sheet metal. G. T. Balfe. 2,000,208; May 7.
Putty softener. O. P. Glick. 2,000,751; May 7.
Pyrites, Working up auriferous and cupriferous arsenical. A. R. Lindblad. 2,000,183; May 7.
Quilt and rug frame. A. W. Knutson. 2,000,397; May 7.
Rack for automobiles, Wash. S. J. Silverman. 2,000,151; May 7.
Rack for displaying rugs. F. F. Kerr. 2,000,336; May 7.
Racket. C. Bentley. 2,000,316; May 7.
Radioreceiver, Superheterodyne. H. A. Wheeler. 2,000,113; May 7.
Radio receiving system. F. X. Rettenmeyer. 2,000,190; May 7.
Radioreception. M. H. Livingston. 2,000,529–30; May 7.
Range, Table top electric. F. A. Lusher. 2,000,343; May 7.
Radio transformer, Variable. H. C. Guhl. 2,000,754; May 7.
Receiver arrangement, Short wave. H. M. Lewis. 2,000,084; May 7.
Recessing cutter. W. B. Crockett. 2,000,824; May 7.
Receptacle: *See*—
Portable receptacle.
Receptacle. C. A. Buschan. 2,000,162; May 7.
Receptacle and making same, Paper. G. W. Poppe. 2,000,188; May 7.
Rectifier, Regulated. J. R. Power. 2,000,189; May 7.
Reel: *See*—
Fishing reel.
Refrigerating apparatus. H. L. Forman. 2,000,440; May 7.
Refrigerating apparatus. H. George. 2,000,590; May 7.
Refrigerating apparatus. L. A. Philipp. 2,000,787; May 7.
Refrigerating apparatus. S. M. Schweller. 2,000,619; May 7.
Refrigerating system. A. L. Lambert. 2,000,525; May 7.
Refrigeration apparatus. J. W. McNulty. 2,000,775; May 7.
Refrigeration, Continuous absorption. E. Altenkirch. 2,000,605; May 7.
Refrigerator, Domestic. R. C. Brown. 2,000,879; May 7.
Refuse incineration. I. S. Osborn. 2,000,296; May 7.
Regulating system. J. T. Mercereau and A. J. Maslin. 2,000,776; May 7.
Regulator for charging generators. F. P. Clesi, C. B. Cousley, and C. Meyers. 2,000,125; May 7.
Release device for fluids. D. Mapes. 2,000,708; May 7.
Reproducing apparatus. G. Leofanti. 2,000,766; May 7.
Resin from sulphite cellulose, Removing. G. Haglund. 2,000,562; May 7.
Respirator. H. S. Cover. 2,000,064; May 7.
Rheostat. M. W. Kenney. 2,000,177–8; May 7.
Rheostat. E. W. Kiefaber, J. Doerr, T. B. Whitson, and W. B. Creagmile. 2,000,849; May 7.
Rheostat. P. Schmitt. 2,000,718; May 7.
Ribbons, Manufacture of. R. Hofstadt. 2,000,388; May 7.
Ring: *See*—
Finger ring.
Road machine. R. Gedstad. 2,000,072; May 7.
Roll handling mechanism. H. A. W. Wood. 2,000,809; May 7.
Roll paper cutter. W. J. Anderson. 2,000,432; May 7.
Roller bit. G. G. Harrington. 2,000,076; May 7.
Röntgen projections, Method of and apparatus for making. E. Pohl. 2,000,497; May 7.
Room, Fruit coloring. H. B. Hatch. 2,000,637; May 7.
Rubber composition and method of preserving rubber. W. L. Semon and A. W. Sloan. 2,000,039–41; May 7.
Rubber, etc., Compounding of. R. J. King and E. C. King. 2,000,028; May 7.
Rust resistant fabric. H. E. Katzenmoyer. 2,000,176; May 7.
Safety oil can. J. E. Schlorff. 2,000,299; May 7.
Sanderplane, Adjustable. H. L. Myers. 2,000,784; May 7.
Sausage casing, Artificial. F. Goldberger. 2,000,835; May 7.
Scale base system. W. N. Gilbert. 2,000,168; May 7.
Scale, Coin. G. R. Wood. 2,000,156; May 7.
Screen: *See*—
Talking picture screen. Window screen.
Screw thread repairing tool. T. A. Grove. 2,000,227; May 7.
Seal. G. A. Burr and E. E. Arnold. 2,000,688; May 7.
Seal. J. C. Olsen. 2,000,349; May 7.
Seal for bearings, Grease. E. P. Larah. 2,000,341; May 7.
Seal for conveying apparatus. J. H. Morrow. 2,000,293; May 7.
Sealer, Steam wrapping. J. W. Moore. 2,000,782; May 7.
Sealing means for electrolytic devices. F. D. Sprague and F. W. McNamara. 2,000,793; May 7.
Separable fastener. A. D. Pannuttl, Jr. 2,000,415; May 7.
Separator: *See*—
Egg separator.
Sewing machine. F. Ricks, H. E. Elliott and F. C. Choice. 2,000,613; May 7.
Sewing machine, Lockstitch. F. Ricks and H. E. Elliott. 2,000,254; May 7.
Shaker, Advertising condiment. E. N. Sarber. 2,000,419; May 7.
Shaker, Combined salt and pepper. A. H. Bomberger. 2,000,818; May 7.
Sharpener, Razor blade. M. Tollins. 2,000,800; May 7.
Sharpening device. F. Liggieri. 2,000,141; May 7.
Shear, Up-cut. F. A. Beatty. 2,000,314; May 7.
Shears. E. H. Langhein. 2,000,852; May 7.
Sheet folding mechanism. R. C. Flynt. 2,000,636; May 7.
Sheet material, Mitering. C. J. Du Brul. 2,000,634; May 7.
Sheet piling mechanism. W. F. Conklin, H. S. Hopkins and J. M. Hover. 2,000,273; May 7.
Sheet separating and conveying device. G. Spiess. 2,000,261; May 7.
Shingle method. E. J. Buczkowski. 2,000,557; May 7.
Shingles and composition therefor, Treating asphalt. L. A. Fry. 2,000,226; May 7.
Shipping case. H. E. Rue and B. Nordstrom. 2,000,102; May 7.
Shock absorber. J. W. Gray. 2,000,132; May 7.
Shock absorber. B. L. Mallory. 2,000,086; May 7.
Shoe attachment for arch supports. G. W. Grabb. 2,000,591; May 7.
Shoe filler unit, Magazine. C. F. Eaton. 2,000,321; May 7.
Shutter for motion picture projectors, Safety. M. G. Blank. 2,000,575; May 7.
Sign flasher. C. Hotchkiss. 2,000,700; May 7.
Signal: *See*—
Headlight signal.
Signal system, Railway. L. Espenschied. 2,000,166; May 7.
Silk, Making artificial. H. G. Stone. 2,000,047–8; May 7.
Siphon. W. P. Meeker and E. C. Price. 2,000,087; May 7.
Syrup, Production of malt. H. C. Gore, S. Józsa, and C. N. Frey. 2,000,109; May 7.
Skate. J. M. Keller. 2,000,396; May 7.
Skins and envelopes particularly adapted for use as artificial sausage casings, Manufacturing from nitrocellulose. F. Goldberger. 2,000,836; May 7.
Slag conveyer. J. H. James. 2,000,484; May 7.
Slicing machine. W. B. Bronander. 2,000,508; May 7.
Slide rule case. A. W. Keuffel. 2,000,337; May 7.
Slide valve. E. C. Clarke. 2,000,822; May 7.
Slit filter. T. F. Mandahl. 2,000,490; May 7.
Slitting and crushing device, Combined. R. M. Johnstone and L. C. Borloz. 2,000,175; May 7.
Slitting fixture for piston rings. J. C. Linn. 2,000,239; May 7.
Snap operating mechanism. C. T. Evans. 2,000,322; May 7.
Socket, Radio tube. R. M. Heintz. 2,000,563; May 7.
Solution, Viscose. R. Elssner. 2,000,887; May 7.
Solvent refining of hydrocarbon oil. L. A. Clarke. 2,000,690; May 7.
Solvent refining of hydrocarbon oil. R. E. Manley. 2,000,707; May 7.
Sorting and counting from statistical record-cards, Apparatus for. C. Campbell. 2,000,214; May 7.
Sorting machine. C. D. Lake. 2,000,237; May 7.

Sorting machine. M. Maul. 2,000,404; May 7.
Sound and picture system. E. H. Smythe. 2,000,198; May 7.
Sound modification, Method of and apparatus for. R. M. White. 2,000,606; May 7.
Sound reproducing system. E. R. Hentschel. 2,000,840; May 7.
Speed transmission, Variable. A. Happel. 2,000,593; May 7.
Spring motor, Self winding. A. Pate. 2,000,145; May 7.
Sprinkler head for shower baths. V. E. Schmiedeknecht. 2,000,792; May 7.
Squeegee and negative holder, Photographic vacuum. W. C. Huebner. 2,000,890; May 7.
Stain and related composition. E. R. Bush. 2,000,120; May 7.
Stain, Wood. E. R. Bush. 2,000,121; May 7.
Stand: *See*—
Microscope stand.
Static, System for eliminating. C. N. Loewenstein. 2,000,142; May 7.
Steam generating apparatus. S. F. Burnet. 2,000,509; May 7.
Steam generator. M. H. Kuhner. 2,000,138; May 7.
Steam, Process and apparatus for heating. M. M. Durkee. 2,000,277; May 7.
Steaming apparatus, Electric. L. E. White. 2,000,628; May 7.
Stevedoring apparatus. F. H. Weeks. 2,000,054; May 7.
Stoker, Domestic type. F. W. Kay. 2,000,702; May 7.
Stop-cock. W. M. Zalkowsky. 2,000,552; May 7.
Stove. B. B. Kahn. 2,000,334–5; May 7.
Stove. B. B. Kahn and W. T. Bradbury. 2,000,333; May 7.
Stove and the like, Electric cooking. W. H. Myers. 2,000,413; May 7.
Stranding machine. W. E. Somerville. 2,000,104; May 7.
Straw and product thereof, Producing artificial. C. Dreyfus and W. Whitehead. 2,000,013; May 7.
Stretcher, Curtain. A. Stalzer. 2,000,358; May 7.
Structural members, Strengthening. A. G. Leake. 2,000,599; May 7.
Submarine safety apparatus, Automatic. M. Dray. 2,000,746; May 7.
Sugar and salts from sugar cane molasses, Recovery of. E. A. Vasquez. 2,000,202; May 7.
Summary board. G. H. Dawson and P. O. Unger. 2,000,558; May 7.
Support: *See*—
Brick facing support. Window support.
Support. B. Greenfield and F. J. Thibault. 2,000,592; May 7.
Support for drooping plants. C. Zingre. 2,000,632; May 7.
Support for engraving machine cutter heads, Swingable. G. Gorton. 2,000,838; May 7.
Support for the head while sleeping or resting in a sitting position. G. L. McClellan. 2,000,344; May 7.
Suspension for vehicles, Pneumatic. H. B. Simmons. 2,000,196; May 7.
Swab, Dyeing. J. Schifter. 2,000,456; May 7.
Swab, Oil well. B. E. Tyler. 2,000,109; May 7.
Switch: *See*—
Electric safety switch. Fuse switch.
Electric switch. Thermostatic switch.
Switch. P. B. Hoye. 2,000,080; May 7.
Switch mechanism, Electric. A. J. Shekter. 2,000,648; May 7.
Switch operating apparatus, Railway. W. C. McWhirter and R. G. Little. 2,000,860; May 7.
Syringe, Ampulla. C. Baudouin and K. Pietsch. 2,000,424; May 7.
System impervious to unbalanced faults. A. D. Dovjikov, C. L. Fortescue, and C. F. Wagner. 2,000,693; May 7.
Table and instruments therefor, Combination drafting. W. P. Niukkanen and S. Mikkonen. 2,000,247; May 7.
Tabulating machine. F. M. Carroll. 2,000,218; May 7.
Talking picture screen. H. Hertzberg. 2,000,174; May 7.
Tape moistener, Automobile. F. H. Poeppelmeier. 2,000,536; May 7.
Target. W. F. Winning and C. Keyser. 2,000,368; May 7.
Telautograph. A. B. Du Mont. 2,000,014; May 7.
Telephone sound reproducer. H. D. Knapp. 2,000,523; May 7.
Television system. E. H. Felix. 2,000,694; May 7.
Tent. F. M. Powers. 2,000,644; May 7.

Valve construction, Gate. W. T. Pease. 2,000,852; May 7.
Valve control system, Automatic. C. J. Williamson and H. F. Suverkrup. 2,000,567; May 7.
Valve structure for compressors and pumps. E. E. Arnold. 2,000,735; May 7.

Variable mica condenser. W. M. Bailey. 2,000,686; May 7.
Vehicle body and top construction. J. Votypka. 2,000,626; May 7.
Vehicle construction, Land. L. H. Thoen. 2,000,364; May 7.
Vehicle jack. T. C. White. 2,000,503; May 7.
Vehicle, Land and water motor. U. Textier de la Caillerie. 2,000,827; May 7.
Vehicle loading device. S. Paul. 2,000,351; May 7.
Vehicle wheel. W. S. Brink. 2,000,877; May 7.
Venting device for gasoline tanks. R. L. Aumack. 2,000,431; May 7.
Vibrator. J. M. Ide. 2,000,024–6; May 7.
View finder, Direct. J. L. Boon. 2,000,577; May 7.
Vine divider. C. E. Snyder. 2,000,260; May 7.
Visual effects, Method and apparatus for producing. A. C. Watson. 2,000,153; May 7.
Volume metering apparatus. F. von Schütz. 2,000,308; May 7.
Vulcanizer. A. S. Michelson. 2,000,406; May 7.
Vulcanizer for repair of inner tubes. J. J. Batterman. 2,000,461; May 7.
Wall and constructing it, Retaining. H. E. McKeen. 2,000,492; May 7.
Wall construction. F. A. Manske. 2,000,243; May 7.
Wall construction. A. Minutoli. 2,000,409; May 7.
Watch. W. Harris. 2,000,328; May 7.
Water closet. F. G. Bushold. 2,000,658; May 7.
Water heater, Electric. S. Conte. 2,000,478; May 7.
Water level recorder. J. C. Stevens. 2,000,046; May 7.
Water motor. G. M. Mood. 2,000,781; May 7.
Water, Treating. R. M. Smith. 2,000,197; May 7.
Waving appliance, Permanent. M. Arnold. 2,000,207; May 7.
Wax and production of same, High melting point. C. F. Tears. 2,000,427; May 7.
Web renewing mechanism. H. Fankhauser. 2,000,439; May 7.
Web renewing mechanism. C. J. Richter. 2,000,253; May 7.
Welding apparatus, Arc. L. S. Burgett. 2,000,161; May 7.
Welding rod or flux holder, Making. J. C. Lincoln. 2,000,182; May 7.
Welding system. C. G. Suits. 2,000,723; May 7.
Well surveying instrument. G. L. Kothny and F. C. Narvesen. 2,000,524; May 7.
Wetting preparations and their manufacture. C. Dunbar and W. Todd. 2,000,559; May 7.
Wheel: *See*—
Metal wheel. Vehicle wheel.
Power transmission wheel.
Wheel supports for motor vehicles, Individual. J. W. Leighton. 2,000,180; May 7.
Wheel suspension, Independent vehicle. L. B. Rivard. 2,000,255; May 7.
Wheel wrench. T. J. Davies. 2,000,744; May 7.
Wheels, Nonmetallic gear. C. W. Mansur. 2,000,769; May 7.
Window. A. Kaspar. 2,000,522; May 7.
Window construction. G. H. Howenstein. 2,000,564; May 7.
Window construction. J. N. Victor. 2,000,366; May 7.
Window of metal or similar material in metal wall. G. B. Jonas and A. T. Esseling. 2,000,845; May 7.
Window screen. W. J. Basch. 2,000,554; May 7.
Window structure, Self contained. O. M. Edwards and R. T. Axe. 2,000,511; May 7.
Window support. A. H. Haberstump. 2,000,561; May 7.
Wiper, Oil. G. B. Eggert. 2,000,513; May 7.
Wire cloth tightener. L. G. Symons. 2,000,426; May 7.
Wire fabric, Making. W. E. Reed. 2,000,788; May 7.
Wood staining. W. S. Calcott and C. J. Pedersen. 2,000,689; May 7.
Wrench: *See*—
Wheel wrench.
Wrench and pliers, Combination. E. Cullen. 2,000,012; May 7.
Wrench for well tubing and rods, Powder. C. W. Dawson. 2,000,221; May 7.
Zeolite water softener. R. O. Friend and J. A. Montgomery. 2,000,696; May 7.
Zinc and similar metals, Distillation of. A. Leysner. 2,000,140; May 7.
Zinc, Production of. M. G. Freise. 2,000,833; May 7.

CLASSIFICATION OF PATENTS

ISSUED MAY 7, 1935

NOTE.—First number—class, second number—subclass, third number—patent number

1— 13.6: 2,000,569
2— 3: 2,000,540
73: 2,000,633
146: 2,000,799
173: 2,000,242
228: 2,000,149
3— 2: 2,000,066
4— 98: 2,000,658
243: 2,000,566
295: 2,000,205
5— 124: 2,000,859
348: 2,000,873
351: 2,000,114
7— 3: 2,000,012
8— 5: 2,000,794
19: 2,000,745
20: 2,000,559
9— 25: 2,000,630
10— 1: 2,000,227
72: 2,000,056
126: 2,000,482
12— 42: 2,000,126
128.3: 2,000,340
13— 6: 2,000,278
15— 179: 2,000,612
16— 10: 2,000,259
136: 2,000,856
164: 2,000,541
17— 9: 2,000,075
45: 2,000,835
18— 1: 2,000,321
15: 2,000,398
17: 2,000,406
2,000,430
18: 2,000,461
48: 2,000,013
50: 2,000,039

It's Time for Pabst—, No. 3099. For Beer and Ale. Premier-Pabst Corporation. 15,148; May 14.

It's Time for Pabst—, No. 3,100. For Beer and Ale. Premier-Pabst Corporation. 15,149; May 14.

Junket Mix. For a Preparation for Making Ice Cream in Automatic Refrigerator or Hand Freezer. Chr. Hansen's Laboratory Inc. 15,144; May 14.

Might Master Stroke. For Men's, Women's, and Children's Outer and Under Clothing, Sheets, etc. Maison Blanche Company. 15,145; May 14.

Snapshots of Modern Bakers. For Baker's Malt. Premier-Pabst Corporation. 15,146; May 14.

LIST OF REISSUE PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Cross, Roy, Kansas City, Mo., assignor, by mesne assignments, to Gasoline Products Company, Inc., Wilmington, Del. Treating petroleum hydrocarbons. 19,568; May 14.

Gasoline Products Company. (See Cross, Roy, assignor.)

Goldberg, Samuel D., assignor to Novocol Chemical Mfg. Co. Inc., Brooklyn, N. Y. Anesthetic composition. 19,569; May 14.

Halliburton, Erle P., Los Angeles, Calif., assignor to Halliburton Oil Well Cementing Company, Duncan, Okla. Method and apparatus for cementing wells. 19,570; May 14.

Halliburton Oil Well Cementing Company. (See Halliburton, Erle P., assignor.)

Kramer, Henry H. (See Schmidt, F. A., and Kramer.)

Novocol Chemical Mfg. Co. Inc. (See Goldberg, Samuel D., assignor.)

Schmidt, Folkert A., and H. H. Kramer, assignors to Stahl-Urban Company, Terre Haute, Ind. Manufacturing Garments. 19,571; May 14.

Stahl-Urban Company. (See Schmidt, F. A., and Kramer, assignors.)

LIST OF DESIGN PATENTEES

American Spirits, Inc. (See Kessler, Sidney, assignor.)

Andrews, Charles T., assignor to Marvin Nelson, Montreal, Quebec, Canada. Lamp. 95,571; May 14.

Annick, Michael, assignor to F. Wesel Manufacturing Company, Scranton, Pa. Shaving machine. 95,572; May 14.

Ball Brothers Company. (See Petty, Fred J., assignor.)

Bel Geddes, Norman, New York, N. Y., assignor to Revere Copper and Brass Incorporated, Rome, N. Y. Dish. 95,573; May 14.

Bell Telephone Laboratories, Incorporated. (See Lum, George R., assignor.)

Bennett, John L., and S. A. Platt, Decatur, Ill. Grill utensil. 95,574; May 14.

Birtman Electric Company. (See Morgan, John R., assignor.)

Blood, Mayme E., Downers Grove, Ill., assignor to Collingbourne Mills, Inc., Elkin, Ill. Crocheted brassière. 95,575; May 14.

Blue Plate Foods, Inc. (See Smith, Frasier, assignor.)

Brenner, George M., Oak Park, Ill. Bottle. 95,576; May 14.

Brinckerhoff, Phil, Los Angeles, assignor to Payne Furnace & Supply Company, Inc., Beverly Hills, Calif. Console heater. 95,577; May 14.

Carson, Oswald B., Scarsdale, N. Y. Spectacle temple. 95,578; May 14.

Celluloid Corporation. (See Marder, Leo, assignor.)

Chatham Manufacturing Company. (See Neaves, William A., assignor.)

Collingbourne Mills, Inc. (See Blood, Mayme E., assignor.)

Continental Distilling Corporation. (See Kessler, Frank T., assignor.)

Dictograph Products Company. (See Koch, Henry, assignor.)

Dunbar, George S., Columbus, Ohio, assignor to The Federal Glass Company, Columbus, Ohio. Glass plate or article of similar nature. 95,579; May 14.

Eck, Joseph B., Sheboygan, Wis. Coaster wagon. 95,580; May 14.

Federal Glass Company. (See Dunbar, George S., assignor.)

Forstmann, Curt E., Montclair, N. J. Textile fabric. 95,581; May 14.

Fry, Benjamin W., St. Louis, Mo. Vending machine casing. 95,582; May 14.

Galway, John A., New York, N. Y. Shoe. 95,583; May 14.

Gibbs, Leon M., Birmingham, Ala. Game apparatus. 95,584; May 14.

Harman, Emil, assignor to Philco Radio & Television Corporation, Philadelphia, Pa. Combined controlling and indicating device for radioreceivers. 95,585; May 14.

Harvey, Harold C., assignor to Harvey Paper Products Company, Sturgis, Mich. Liner for sink strainers. 95,586; May 14.

Harvey Paper Products Company. (See Harvey, Harold C., assignor.)

Herberts Machinery Company. (See Merrigan, William J., assignor.)

Hershau, Nathan, New York, N. Y. Finger ring or the like. 95,587; May 14.

Holsman, Isidore, Chicago, Ill. Illuminated advertising sign or similar article. 95,588; May 14.

Kessler, Frank T., assignor to Continental Distilling Corporation, Philadelphia, Pa. Bottle. 95,589; May 14.

Kessler, Sidney, assignor to American Spirits, Inc., New York, N. Y. Bottle. 95,590; May 14.

Koch, Henry, assignor to Dictograph Products Company, Inc., Jamaica, N. Y. Cabinet for telephone equipment. 95,591; May 14.

Kramer, Arthur L., Dallas, Tex. Plate or similar article. 95,592; May 14.

Kramer, Arthur L., Dallas, Tex. Tumbler or similar article. 95,593; May 14.

Kramer, Arthur L., Dallas, Tex. Goblet or similar article. 95,594; May 14.

Kreidler, Urban A., East Orange, N. J., assignor to National Biscuit Company, New York, N. Y. Pastry cup. 95,595; May 14.

Lewis, Florence N., New York, N. Y. Bottle. 95,596; May 14.

Lobel, Paul A., New York, N. Y. Dispenser for cups or the like. 95,597; May 14.

Lum, George R., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Mounting for a hand telephone. 95,598; May 14.

Marder, Leo, Brooklyn, N. Y., assignor to Celluloid Corporation, Trny. 95,599; May 14.

Merrigan, William J., assignor to Herberts Machinery Company, Ltd., Los Angeles, Calif. Bench saw. 95,600; May 14.

Merrigan, William J., assignor to Herberts Machinery Co., Ltd., Los Angeles, Calif. Band saw. 95,601; May 14.

Merrigan, William J., assignor to Herberts Machinery Co., Ltd., Los Angeles, Calif. Jig saw. 95,602; May 14.

Morgan, John R., Oak Park, assignor to Birtman Electric Company, Chicago, Ill. Casing for vacuum cleaners. 95,603; May 14.

Morgan, John R., Oak Park, assignor to Birtman Electric Company, Chicago, Ill. Casing for vacuum cleaners. 95,604; May 14.

Moulded Pulp Corporation. (See Plunkett, Paul, assignor.)

National Biscuit Company. (See Kreidler, Urban A.)

Neaves, William A., Elkin, N. C., assignor to Chatham Manufacturing Company, Winston-Salem, N. C. Knit fabric. 95,605; May 14.

Nelson, Marvin. (See Andrews, Charles T., assignor.)

Parsons, Paul L., Belvidere, Ill. Casket handle. 95,606; May 14.

Payne Furnace & Supply Company. (See Brinckerhoff, Phil, assignor.)

Petty, Fred J., assignor to Ball Brothers Company, Muncie, Ind. Glass jar. 95,607; May 14.

Pfeil, Arthur P., Buffalo, N. Y. Window silencer. 95,608; May 14.

Philco Radio & Television Corporation. (See Harman, Emil, assignor.)

Platt, Stephen A. (See Bennett, J. L., and Platt.)

Plunkett, Paul, Greenwich, Conn., assignor to Moulded Pulp Corporation, Dover, Del. Bottle. 95,609; May 14.

Revere Copper and Brass Incorporated. (See Bel Geddes, Norman, assignor.)

Revere Copper and Brass Incorporated. (See Zettler, Emil R., assignor.)

Richardson Company, The. (See Rieser, Oliver O., assignor.)

Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,610; May 14.

Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,611; May 14.

Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,612; May 14.

Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,613; May 14.

Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,614; May 14.

Riemer, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Storage battery case. 95,615; May 14.

Ritter, Herbert F., Bogota, N. J. Tape measure. 95,616; May 14.

Sakier, George, assignor to Schenley Products Company, New York, N. Y. Bottle. 95,617; May 14.

Saxton, Ellsworth E., Seattle, Wash. Combined folding doll house and yard. 95,618; May 14.

Schenley Products Company. (See Sakier, George, assignor.)

Sikorsky Aircraft Corporation. (See Sikorsky, Igor I., assignor.)

Sikorsky, Igor I., Nichols, assignor to Sikorsky Aircraft Corporation, Stratford, Conn. Airplane. 95,619; May 14.

Smith, Frasier, Wheeling, W. Va., assignor to Blue Plate Foods, Inc., New Orleans, La. Jar. 95,620; May 14.

Wesel, F., Manufacturing Company. (See Annick, Michael, assignor.)

Zettler, Emil R., Deerfield, Ill., assignor to Revere Copper and Brass Incorporated, Rome, N. Y. Kettle. 95,621; May 14.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 14TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abbott, Scott M., Chicago, Ill. Gas cartridge firing device. 2,001,405; May 14.

Abbott, Scott M., assignor to Crane Packing Company, Chicago, Ill. Dispensing attachment for cans. 2,001,481; May 14.

Abele, Theodore J., assignor to Stuber & Knck Co., Peoria, Ill. Receptacle. 2,001,445; May 14.

Abell, Henry C., Interlaken, N. J. Locking device for nuts, screws, bolts, and the like. 2,001,645; May 14.

Abendroth, Karl W., assignor to General Railway Signal Company, Rochester, N. Y. Testing device and method for signal light reflectors. 2,001,660; May 14.

Abitsch, George, San Francisco, Calif. Duplex stand. 2,001,646; May 14.

Abramson, John H., assignor to Greenlee Bros. & Co., Rockford, Ill. Impact testing machine and method. 2,001,087; May 14.

Adams, Campbell V., Chicago, Ill. Power hammer. 2,000,908; May 14.

Adams, Ross T., R. S. Poole, and M. Raymer, assignors to Kellogg Company, Battle Creek, Mich. Packaging machine. 2,001,175; May 14.

Agfa Ansco Corporation. (See Heymer, Gerd, assignor.)

Air Reduction Company. (See Anderson, James L., assignor.)

Air Reduction Company. (See Schlitt, Joseph L., assignor.)

Akerberg, Carl G., assignor to Giant Grip Manufacturing Company, Oshkosh, Wis. Resilient calk for horseshoes. 2,001,118; May 14.

Akers, John W., Clarkston, Wash. Portable electric lamp. 2,001,406; May 14.

Akron Standard Mold Company, The. (See Bostwick, Henry C., assignor.)

Aktiebolaget Tonsor. (See Tobias, Werner, assignor.)

Aktiengesellschaft für Stickstoffdünger. (See Welbezahn, K., and Walter, assignors.)

Alcott, Frank H., Jamaica, N. Y. Building construction. 2,000,897; May 14.

Alden, Gardner R., assignor to Dennison Manufacturing Company, Framingham, Mass. Gummed paper and preparing. 2,001,049; May 14.

Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. High frequency transmission system for railways. 2,001,514; May 14.

Allegheny Steel Company. (See Browne, Vere R., assignor.)

Allen-Bradley Company. (See Wilms, Gustav O., assignor.)

Allen, Russell B. (See Moore, R. H., and Allen.)

Alsaker, Alfred, assignor to The Delta Star Electric Company, Chicago, Ill. Making self-cleaning contacts. 2,000,909; May 14.

Alt, Eugene C., Brooklyn, N. Y. Steering mechanism. 2,001,647; May 14.

Altgelt, Herman E., South Bend, Ind., assignor to Oliver Farm Equipment Company. Lister planter. 2,001,560; May 14.

Aluminum Company of America. (See Stanley, George J., assignor.)

Amel, Abraham, Pawtucket, R. I. Thread guide for winding machines. 2,001,374; May 14.

American Blind Stitch Machine Company. (See Dearborn, Charles A., assignor.)

American Brake Shoe and Foundry Company, The. (See Poe, Fred M., assignor.)

American Car and Foundry Company. (See Rich, Donald U., assignor.)

American Car and Foundry Motors Company. (See Guernsey, Charles O., assignor.)

American Car and Foundry Motors Company. (See Mathauer, Edmund G., assignor.)

American Cyanamid & Chemical Corporation. (See Daniels, L. C., and Jaeger, assignors.)

American District Telegraph Company. (See Hopkins, Richard M., assignor.)

American Fork & Hoe Company, The. (See Wilcox, Hallie M., assignor.)

American Gas Products Corporation. (See Rasch, William T., assignor.)

American Laundry Machinery Company, The. (See Hanney, Angus F., assignor.)

American Moistening Company. (See Loepsinger, A. J., and Trafton, assignors.)

American Steel Foundries. (See Hedgcock, William C., assignor.)

American Steel Foundries. (See Kinne, Edmund P., assignor.)

American Telephone and Telegraph Company. (See Rea, W. T., and Henneberger, assignors.)

American Telephone and Telegraph Company. (See Staples, Elliot M., assignor.)

American Thermos Bottle Company, The. (See Payson, Arthur H., assignor.)

Anderberg, Fritz H., Centerville, S. Dak. Tire inflator. 2,001,233; May 14.

Anderson, James L., Closter, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Metal cutting machine. 2,001,294; May 14.

Anglin, Henry J., Morristown, N. J. Transfer file case. 2,001,561; May 14.

Appel, Harry A., New York, and E. LeBlanc, Woodside, N. Y. Automatic toothbrush paste feeder. 2,000,910; May 14.

Arden Box Toe Company. (See Lovell, Stanley P., assignor.)

Arkell, Barlett. (See Jarrier, René, assignor.)

Arkell & Smiths. (See Wikstrom, Frank G., assignor.)

Armour and Company. (See Jordan, Isaac N., assignor.)

Arndt, Franklin E., Galion, Ohio, assignor to The Galion Iron Works & Mfg. Co., Galion, Ohio. Blade supporting means for road scrapers. 2,001,648; May 14.

Aro Equipment Corporation, The. (See Ginter, Charles W., assignor.)

Arutunoff, Armais, Bartlesville, assignor to Reda Pump Company, Bartlesville, Okla. Submergible electric motor. 2,001,649; May 14.

Ashton Valve Company, The. (See Baker, Harry S., assignor.)

Asklund, Sven J. E., Stockholm, Sweden. Switch for direction indicators. 2,001,234; May 14.

Atlas Tack Corporation. (See Leahy, James F., assignor.)

Atwater Kent Manufacturing Company. See Tarzian, Sarkes, assignor.)

Aubrey, William H., assignor to Frick Company, Waynesboro, Pa. Can dump for ice machines. 2,001,008; May 14.

Audubon Wire Cloth Corporation. (See Gore, Frealon M., assignor.)

Aurynger, John J., Takoma Park, Md. Device for unifying inductances, capacities, and resistances. 2,001,235; May 14.

Autogiro Company of America. (See Pecker, Joseph S., assignor.)

Auto Research Corporation. (See Bijur, Joseph, assignor.)

Babcock, Oscar H., Jr., Pittsburgh, Pa. Tire tread remover. 2,001,595; May 14.

Babcock & Wilcox Company, The. (See Lucke, Charles E., assignor.)

Bagley, William H., Jr., assignor of thirty per cent to J. A. Bent and thirty per cent to R. J. Welch, Detroit, Mich. Motor mounting. 2,001,562; May 14.

Bagpak, Inc. See Cundall, R. N., and Powell, assignors.)

Baban, George F., Charlotte, N. C. Heddle bar lock for looms. 2,001,236; May 14.

Bailey Meter Company. (See Lucke, Charles E., assignor.)

Baker, B. J., & Company, et al. (See Welch, William E., assignor.)

Baker, Harry S., Arlington, assignor to The Ashton Valve Company, Cambridge, Mass. Pop safety valve. 2,001,375; May 14.

Baker, Horace C., Green Bay, assignor to Patten Paper Company, Ltd., Appleton, Wis. Envelope stuffing machine. 2,001,009; May 14.

Ball, Charles F., assignor to Chain Belt Company, Milwaukee, Wis. Concrete pumping system. 2,001,661; May 14.

Ballard, Milton H. (See Seely, T. H., and Ballard.)

Balousek, William E., assignor to W. J. Dennis & Company, Chicago, Ill. Plant support. 2,000,911; May 14.

Balsiger, Harold E., assignor to Landis Tool Company, Waynesboro, Pa. Automatic control mechanism. 2,001,447; May 14.

Bamberger, Curt. (See Weinand, K., Bamberger, and Utsch.)

Bane, John N., South Boston, Va. Bookmark. 2,001,650; May 14.

Banning, Samuel W., trustee. (See Moseley, William H., assignor.)

Bany, Herman, Lansdowne, Pa., assignor to General Electric Company. Control of circuit breakers. 2,001,563; May 14.

Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Sheet delivery mechanism for printing presses. 2,001,295; May 14.

Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Sheet delivery mechanism for printing presses. 2,001,296; May 14.

Barney, Fred H. (See Gourley, W. J., and Barney.)

Barrett Company, The. (See Bergelm, Frank H., assignor.)

Barrow, James T., New York, N. Y. Water heater. 2,001,515; May 14.

Barth, Karl, and K. Schuler, Munich, and J. Wanger, Aubing, Germany. Apparatus for aerating beer wort. 2,001,568; May 14.

Bates, Arthur, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for shaping shoe uppers. 2,000,912; May 14.

Bates, Fred G., Highland Park, Mich. Hinge. 2,001,356; May 14.

Baumann, Fritz. (See Stein, B., and Baumann.)

Bear, Joseph W., Roanoke, and R. R. Sublette, Vinton, assignors to Double Envelope Corporation, Roanoke, Va. Envelope. 2,001,340; May 14.

Beasley, Milton R., Norwood, assignor to Bird & Son, Inc., East Walpole, Mass. Manufacture of artificially colored granules. 2,001,448; May 14.

Bedwell, Harry F., Lyons, Ind. Piston ring. 2,001,119; May 14.

Beerline, Martin, Findlay, Ohio. Animated toy. 2,001,482; May 14.

Bell Telephone Laboratories, Incorporated. (See Bjornson, Bjorn G., assignor.)

Bell Telephone Laboratories, Incorporated. (See Blattner, David G., assignor.)

Bell Telephone Laboratories, Incorporated. (See Bode, Hendrik W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Fay, Clifford E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Flanders, Paul B., assignor.)

Bell Telephone Laboratories, Incorporated. (See Samuel, Arthur L., assignor.)

Bell Telephone Laboratories, Incorporated. (See Thuras, Albert L., assignor.)

Benade, Walther, Dessau in Anhalt, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Orthohydroxyazo dyes. 2,001,010; May 14.

Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)

Benjamin Electric Manufacturing Company. (See Corwin, Raymond W., assignor.)

Benjamin, Reuben B., Chicago, assignor to Benjamin Electric Manufacturing Company, Des Plaines, Ill. Series socket with renewable elements. 2,001,376; May 14.

Bent, James A., et al. (See Bagley, William H., Jr., assignor.)

Berejkoff, Anatole P., Schenectady, N. Y., assignor to General Electric Company. Interpolating device. 2,001,565; May 14.

Bergeim, Frank H., Leonia, N. J., assignor to The Barrett Company, New York, N. Y. Rubber composition and making the same. 2,001,176; May 14.

Bergstrom, Ernest H., Dorchester, Mass. Toy pistol. 2,001,449; May 14.

Berns, John E., Bremerton, Wash. Revolver holster. 2,001,321; May 14.

Bieberbach, Max W., Jr. (See Villa, John, assignor.)

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Lubrication of machinery. 2,000,933; May 14.

Billé, Léon, Nogen-sur-Marne, France. Machine for the manufacture of pipes. 2,001,237; May 14.

Bingham, Frederick C., New York, N. Y., assignor to Boorum & Pease Company, Brooklyn, N. Y. Protector for covers of loose leaf binders. 2,001,651; May 14.

Bird, James H., San Antonio, Tex. Hook guard. 2,001,652; May 14.

Bird & Son, Inc. (See Beasley, Milton R., assignor.)

Bjornson, Bjorn G., Brooklyn, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission control in two-way signaling systems. 2,001,088; May 14.

Blair, Ira E., Los Angeles, Calif. Equalizing attachment for trucks. 2,000,914; May 14.

Blake, Valerie F., New York, N. Y. Knockdown furniture. 2,000,910; May 14.

Blattner, David G., Mountain Lakes, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Horn. 2,001,089; May 14.

Bloom, Arvid B., Lompoc, Calif. Ash tray and the like. 2,000,916; May 14.

Bloss, Richard E., and R. C. Pfeil, assignors to International-Stacy Corporation, Columbus, Ohio. Counterbalancing device. 2,001,662; May 14.

Boals, Eli R., assignor to H. F. Thompson, Pasadena, Calif. Hair waving apparatus. 2,001,238; May 14.

Bodde, Theodore, Niagara Falls, assignor, by mesne assignments, to The General Railway Signal Company, Rochester, N. Y. Train control system. 2,000,917; May 14.

Boddie, Clarence A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transmitting circuit. 2,001,450; May 14.

Bode, Hendrik W., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission network. 2,001,090; May 14.

Bodor, Andrew, Newark, N. J., assignor to Reinforced Paper Bottle Corporation, New York, N. Y. Winding mechanism for paper bottles. 2,001,177; May 14.

Boebler, Fritz J., Houston, Tex. Trailer hitch. 2,001,451; May 14.

Boehringer, C. F., & Sachne G m. b. H. (See Müller, R. and Rabald, assignors.)

Bohli, Jakob, Solothurn, Switzerland. Electric starting motor. 2,001,178; May 14.

Bol, Cornelis, Eindhoven, Netherlands, assignor to General Electric Company. Gaseous electric discharge device. 2,001,516; May 14.

Bolidens Gruvaktiebolag. (See Smitt, Gosta Johan Jakob, assignor.)

Boorum & Pease Company. (See Bingham, Frederick C., assignor.)

Booton, Herman. (See Booton, John H., and H.)

Boonton, John H. and H. Leicester, England. Reverse plating. 2,001,653; May 14.

Bopp, Frederick W., Providence, R. I. Making jewelry chains. 2,001,483; May 14.

Borg-Warner Corporation. (See Ruesenberg, Carl A., assignor.)

Borg-Warner Corporation. (See Swennes, Benjamin A., assignor.)

Boston Wire Stitcher Company. (See Cavanagh, John F., assignor.)

Boston Wire Stitcher Company. (See Maynard, Arthur H., assignor.)

Bostwick, Henry C., Coventry Township, Summit County, assignor to The Akron Standard Mold Company, Akron, Ohio. Tire machine. 2,001,050; May 14.

Boyles, Carroll H., Milwaukee, assignor to Heating Unit Corporation, Cedarburg, Wis. Electrical resistance unit. 2,001,297; May 14.

Bradbury, Albert W., Cliftondale, and R. E. Hood, Lynn, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 2,001,298; May 14.

Brase, Wilhelm, Berlin, Germany. Clutching device. 2,001,120; May 14.

Brenaman, Sherman R. (See Lawhorn, E. F., and Brenaman.)

Breuer, Adam A., Chicago, Ill. Portable suction cleaner. 2,001,121; May 14.

Brickner, Arthur J., Muskegon Heights, assignor to Brickner-Kropf Machine Company, Muskegon, Mich. Lap. 2,001,122; May 14.

Brickner Kropf Machine Company. (See Brickner, Arthur J., assignor.)

Broms, Arthur W., Chicago, Ill. Tension control means. 2,000,918; May 14.

Bronshvalg, Isidor, Bronx, N. Y. Ready made tie. 2,001,452; May 14.

Brown Bag Filling Machine Company. (See Chandler, Austin S., assignor.)

Brown, Robert H. (See Metz, H., and Brown.)

Brown, Samuel B., Los Angeles, Calif. Pump or engine. 2,001,011; May 14.

Browne, Cecil O. (See Whitaker, A., and Browne.)

Browne, Vere B., assignor to Allegheny Steel Company, Brackenridge, Pa. Stable chromium-nickel iron alloy. 2,001,123; May 14.

Brugge, Bernard J., assignor to The Lincoln Electric Company, Cleveland, Ohio. Electric arc welding. 2,001,179; May 14.

Brün, Willi, Bridgeport, Conn., assignor to Remington Arms Company, Inc. Manufacture of copper ammonium salts of diazo amino tetrazole. 2,001,299; May 14.

Brunk, Charles O. A., assignor to Memorial Mausoleum Corporation, Detroit, Mich. Burial vault. 2,000,919; May 14.

Brunner, Harold E., Larchmont, N. Y., assignor, by mesne assignments, to SKF Industries, Inc., Philadelphia, Pa. Antifrictionally mounted spindle. 2,001,560; May 14.

Bruno, Frank A., Newark, N. J., assignor to Angelina Marland, Brooklyn, N. Y. Tamperproof meter box with cut-out control and fuse drawer for electric meters. 2,001,051; May 14.

Buckendale, Laurence R., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Slack adjuster. 2,001,239; May 14.

Buckman and Company. (See Buckman, Henry H., assignor.)

Buckman, Henry H., assignor to Buckman and Company, Jacksonville, Fla. System for temperature control. 2,001,484; May 14.

Buckner, William A., Fresno, Calif. Traveling sprinkler. 2,001,180; May 14.

Budd, Edward G., Manufacturing Company. (See Paugh, James J., assignor.)

Burcham, James P., Indianapolis, Ind. Adjustable grille. 2,001,181; May 14.

Burger, Frederick W., Niles, assignor to Clark Equipment Company, Buchanan, Mich. Spacer means for dual wheels. 2,001,407; May 14.

Burgher, Everett K., Puerto Mexico, Mexico. Piston lift for pumping of liquids. 2,001,012; May 14.

Burns, Bruce, and H. B. Lewis, assignors, by mesne assignments, to Hughes Industries Co., Ltd., Los Angeles, Calif. Multiple film handling device. 2,001,322; May 14.

Burroughs Adding Machine Company. (See Muller, Robert L., assignor.)

Burrows, Thomas C., Wink, Tex. Angle indicator. 2,001,654; May 14.

Burton, Robert N., River Forest, Ill., assignor to Highway Trailer Company, Edgerton, Wis. Automatic extensible drawbar. 2,001,408; May 14.

Busch, Thomas N., Lake City, Fla., dedicated to the free use of the public. Turpentine face scribe. 2,001,655; May 14.

Buttolph, Leroy J., Grantwood, assignor to General Electric Vapor Lamp Company, Hoboken, N. J. Method of and apparatus for starting electric discharge devices. 2,001,517; May 14.

Buttolph, Leroy J., Grantwood, assignor to General Electric Vapor Lamp Company, Hoboken, N. J. Method and apparatus for starting and operating gaseous electric discharge devices. 2,001,518; May 14.

Buttolph, Leroy J., Grantwood, assignor to General Electric Vapor Lamp Company, Hoboken, N. J. Electric discharge device and operating same. 2,001,519; May 14.

Campbell, William J., assignor to Climax Machinery Company, Indianapolis, Ind. Smoking stand. 2,000,920; May 14.

Candy, Albert T., Jr., Oak Park, assignor to Candy & Company, Inc., Chicago, Ill. Candle wick. 2,001,377; May 14.

Candy & Company. (See Candy, Albert T., Jr., assignor.)

Caps, Arthur W., and P. Landrock, Rochester, N. Y., assignors to Photostat Corporation, Providence, R. I. Camera. 2,001,596; May 14.

Caps, Arthur W., and P. Landrock, Rochester, N. Y., assignors to Photostat Corporation, Providence, R. I. Camera. 2,001,597; May 14.

Caps, Arthur W., and P. Landrock, Rochester, N. Y., assignors to Photostat Corporation, Providence, R. I. Photographic copy conveyer. 2,001,598; May 14.

Cardwell, Thomas, St. Louis, Mo. Journal box lubricator. 2,001,182; May 14.

Carlson, Carl T., assignor to Erie City Iron Works, Erie, Pa. Heater. 2,001,603; May 14.

Carlson, Frank P., Astoria, N. Y. Coating device. 2,001,091; May 14.

Carlson, Johan A., assignor to L. F. Pratt, Ashland, Mass. Printing machine. 2,001,520; May 14.

Carpenter, Arthur W., assignor to United Research Corporation, New York, N. Y. Light-sensitive cell. 2,001,672; May 14.

Case, Byron A., Fort Wayne, Ind., assignor to General Electric Company. Electric valve translating circuit. 2,001,567; May 14.

Cattley, Edward C., Brooklyn, N. Y. Fishing reel. 2,001,521; May 14.

Cavanagh, John F., Providence, R. I., assignor to Boston Wire Stitcher Company, Portland, Oreg. Implement for driving staples, fasteners, and the like. 2,001,092; May 14.

Celanese Corporation of America. (See Crutchfield, Kenneth H., assignor.)

Celanese Corporation of America. (See Dreyfus, C., and Lee, assignors.)

Celanese Corporation of America. (See Dreyfus, C., and Whitehead, assignors.)

Celanese Corporation of America. (See Taylor, W. L., and Gibbins, assignors.)

Chain Belt Company. (See Ball, Charles F., assignor.)

Chandler, Austin S., assignor to The Brown Bag Filling Machine Company, Fitchburg, Mass. Spillage device for bag filling machines. 2,001,485; May 14.

Chapin, Harrison L. (See Folmer, W. F., and Chapin.)

Chelmsford Egg Supply Company (1934) Limited. (See Nierinck, Fernand, assignor.)

Chemical Construction Corporation. (See Hechenbleikner, Ingenuin, assignor.)

Cherpes, Peter N., and C. E. Kollias, Chicago, Ill. Bumper mechanism. 2,001,093; May 14.

Cherry-Burrell Corporation. (See Fielder, Harold S., assignor.)

Chester, Thomas, Detroit, Mich. Centrifugal blower. 2,001,522; May 14.

Chicago Pneumatic Tool Company. (See Mitchell, William J., assignor.)

Chicago Pump Company. (See Durdin, Augustus C., Jr., assignor.)

Chicago Rawhide Manufacturing Company. (See Johnson, Harold E., assignor.)

Cholev, Frank C., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Marking machine. 2,000,921; May 14.

Christensen, Niels C., Salt Lake City, Utah. Treating ores with sulphuric acid. 2,001,409; May 14.

Christiansen, Walter G., Glen Ridge, N. J., and S. E. Harris, Lynbrook, assignors to E. R. Squibb & Sons, New York, N. Y. Hydr xy diphenyl intermediates. 2,001,523; May 14.

Church, Clifford C., Needham, Mass. Manufacture of display cards, containers, and the like with raised figures. 2,000,922; May 14.

Clark Equipment Company. (See Burger, Frederick W., assignor.)

Clark, James d'A. (See Howell, C. M., and Clark.)

Clarke, George. (See Sheffield, C. C., and Clarke.)

Clarke, James M., Evansville, Ind., assignor to Servel Inc., New York, N. Y. Combination bubbler and glass filler. 2,001,341; May 14.

Clarkson, Richard G. (See Downing, F. B., Clarkson and Reynolds.)

Cleveland Automatic Machine Company, The. (See Rupple, Harry W., assignor.)

Cleveland Rock Drill Company, The. (See Curtis, John C., assignor.)

Climax Machinery Company. (See Campbell, William J., assignor.)

Cohen, Abraham, New Haven, Conn. Braking apparatus. 2,001,599; May 14.

Cohen, David, New York, N. Y. Attachment for meat grinding machines. 2,001,524; May 14.

Cohen, Samuel, Brooklyn, assignor to General Instrument Corporation, New York, N. Y. Multiple unit gang condenser. 2,001,600; May 14.

Colbiornsen, Almond L., Belgrade, Minn. Sleeve holder. 2,000,923; May 14.

Cole, Dale S. (See Leece, B. M., and Cole.)

Coleman, Roy E., Meriden, Conn., assignor to General Electric Company. Resinous and varnish composition and preparation thereof. 2,001,525; May 14.

Colledge, E. W., General Sales Agent, Inc. (See Omansky, Morris, assignor.)

Colt, Samuel S., Orange, N. J. Retaining tie for concrete forms. 2,001,052; May 14.

Colton, Roger B., and H. C. Mabbott, Fort H. G. Wright, N. Y. Binaural electric compensator. 2,000,924; May 14.

Columbus McKinnon Chain Corporation. (See Stahl, Frank E., assignor.)

Commercial Shearing & Stamping Company, The. (See Proctor, R. V., and Cushwa, assignors.)

Conran, William F., Brooklyn, N. Y. Fire protection standpipe system. 2,001,300; May 14.

Continental-Diamond Fibre Company. (See Landt, Gustave E., assignor.)

Continental Oil Company. (See McCollum, E. V., and McGhee, assignors.)

Continental Oil Company. (See Mills, Ronald Van A., assignor.)

Cook, Charles B., Los Angeles, Calif. Air conditioning apparatus. 2,001,410; May 14.

Cooke, Gordon A., Pasadena, Calif. Device for transmitting intelligence. 2,001,124; May 14.

Copeland Refrigeration Corporation. (See Gilbert, H. H., and Replogle, assignors.)

Cornett, Jeff D., et al. (See Ezell, Flor H., assignor.)

Cornwall, James E., Detroit, Mich. Automobile headlight. 2,001,378; May 14.

Corwin, Raymond W., Haddonfield, N. J., assignor to Benjamin Electric Manufacturing Company, Des Plaines, Ill. Series socket with removable elements. 2,001,379; May 14.

Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)

Coultas, Wilbur J., assignor to Deere & Company, Moline, Ill. Resilient wheel support for harvesters. 2,001,183; May 14.

Court, Frank T., assignor to Deere & Company, Moline, Ill. Harvester. 2,001,078; May 14.

Court, Frank T., assignor to Deere & Company, Moline, Ill. Cotton harvester. 2,001,079; May 14.

Cowles, Irving, Detroit, Mich., assignor to Union Bank of Chicago, Chicago, Ill. Lubricant discharge valve for forcefeed lubricating systems. 2,000,925; May 14.

Cox, Leo G., Pensacola, Fla. Protractor. 2,000,926; May 14.

Coxhead, Ralph C., Corporation. (See Fuchs, Charles A., assignor.)

Crane Packing Company. (See Abbott, Scott M., assignor.)

Crevelling, John L., Tucson, Ariz., assignor to The Lubrication Corporation, South Bend, Ind. Lubricating device. 2,001,568; May 14.

Crockett, James B., Cambridge, Mass. Manufacture from rubber latex of rubber articles carrying imprints. 2,001,125; May 14.

Crossen, Robert W., Jr., Plainfield, assignor to Farrell Manufacturing Company, Joliet, Ill. Valve control. 2,001,453; May 14.

Crouch, Nell W. (See Early, Edwin L., assignor.)

Crutchfield, Kenneth H., Cumberland, Md., assignor to Celanese Corporation of America. Plastic composition and working the same. 2,000,927; May 14.

Cummins, Clessie L., assignor to Oil Engine Development Company, Columbus, Ind. Fuel pump and distributing apparatus for internal combustion engines. 2,001,126; May 14.

Cundall, Robert N., Hamburg, and W. B. Powell, Buffalo, N. Y., assignors, by mesne assignments, to Bagpak, Inc. Bag and making same. 2,000,928; May 14.

Cuppy, Hazlitt A., San Francisco, Calif. Classifier. 2,001,184; May 14.

Curtis, John C., Garfield Heights, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Rock drill. 2,001,127; May 14.

Cushwa, Charles B. (See Proctor, R. V., and Cushwa.)

Cutler-Hammer, Inc. (See Schmidt, Edwin X., assignor.)

Cutter Manufacturing Company. (See Huff, Elbridge G., assignor.)

Cuttle, Francis, Riverside, Calif. Gate valve. 2,001,094; May 14.

Dahlen, Miles A., assignor to E. I. duPont de Nemours & Company, Wilmington, Del. Azo dyes and their preparation. 2,001,526; May 14.

Dahlstrom Metallic Door Company. (See Jacobson, Ludwig G., assignor.)

Daily, Stephen P., Jr. (See Quasso, Alfred D., assignor.)

Dainler-Benz Aktiengesellschaft. (See Wagner, Max, assignor.)

Daniels, Lloyd C., Crafton, and A. O. Jaeger, Mount Lebanon, Pa., assignors, by mesne assignments, to American Cyanamid & Chemical Corporation. Preparation of phthalic acid. 2,001,053; May 14.

Daniels, Lloyd C., Crafton, and A. O. Jaeger, Mount Lebanon, Pa., assignors, by mesne assignments, to American Cyanamid & Chemical Corporation. Salts of keto aromatic acids. 2,001,380; May 14.

Dardelet Threadlock Corporation. (See Thomson, Robert, assignor.)

Davis, Donald J. (See Davis, Joseph and D. J.)

Davis, Durrel H., assignor to Highway Trailer Company, Edgerton, Wis. Jack for semitrailers. 2,001,411; May 14.

Davis, Ernest, assignor to The Prosperity Company, Inc., Syracuse, N. Y. Garment or ironing press. 2,001,128; May 14.

Davis, Joseph, and D. J. Davis, assignors, by mesne assignments, to Walker Corporation, Chicago, Ill. Walking toy. 2,001,013; May 14.

Davis, Lawrence, Walpole, Mass. Cloth bolt ticket. 2,001,054; May 14.

Davis, Robert H., London, England. Submarine lifesaving outfit. 2,001,673; May 14.

Davis, Robert L., Grand Rapids, Mich., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Three-phase rectifier transformer. 2,001,454; May 14.

Davison, Charles H., Princeton, N. J. Construction of rugs of pile fabrics. 2,001,381; May 14.

Davison, Charles H., Edgerstoune, Princeton, N. J. Construction of rugs of pile fabrics. 2,001,527; May 14.

Dawson, Charles W. (See Kruse, J. F. W., Dawson, and Richardson.)

Day, Jeremiah C., Lexington, Ky. Garter. 2,001,240; May 14.

Day, J. H., Company, The. (See Kirchhoff, William G., assignor.)

Day, Roland B., Palos Verdes Estates, Calif., assignor to Universal Oil Products Company, Chicago, Ill. Eliminating impurities from gasoline. 2,001,185; May 14.

Deakin, Gerald, assignor, by mesne assignments, to Western Electric Company, Incorporated, New York, N. Y. Two-party line telephone system. 2,001,095; May 14.

Dearborn, Charles A., assignor to American Blind Stitch Machine Company, New York, N. Y. Work supporting means for sewing machines. 2,000,929; May 14.

Deere & Company. (See Coultas, Wilbur J., assignor.)

Deere & Company. (See Court, Frank T., assignor.)

Deere & Company. (See Thomann, Frederick A., assignor.)

Deere & Company. (See Tuft, Miles H., assignor.)

De Florez, Luis, Pomfret, Conn., assignor to The Texas Company, New York, N. Y. Converting hydrocarbon oils. 2,001,301; May 14.

De Frees, Nicholas W., Hastings, Minn., assignor to H. D. Hudson Manufacturing Company, Chicago, Ill. Spraying device. 2,001,455; May 14.

De Groot, Willem, and M. H. Druyvesteyn, Eindhoven, Netherlands, assignors to General Electric Company, Gaseous electric discharge device. 2,001,528; May 14.

Delano, James K., New York, N. Y. Portable gear case cleaner. 2,001,302; May 14.

Delta Star Electric Company, The. (See Alsaker, Alfred, assignor.)

De Nagy, Bela, New York, N. Y. Air motor. 2,000,930; May 14.

De Nagy, Bela, New York, N. Y. Alternating action polishing machine. 2,000,931; May 14.

Dennis, W. J., & Company. (See Balousek, William E., assignor.)

Dennison Manufacturing Company. (See Alden, Gardner R., assignor.)

Dennison, Stanley W. (See Zeltz, E. R. and Dennison.)

Dent Hardware Company, The. (See Lyons, A. G., and Diehl, assignors.)

Design Engineers, Incorporated. (See Horwitt, N. G., and Katcher, assignors.)

Dettwyler, William. (See Gubelmann, I. Goodrich and Dettwyler.)

Deutsch, Leo E., Hammond, Ind. Lock key. 2,001,601; May 14.

De Vries, Gerrit, Pipestone, Minn. Fishing float. 2,001,241; May 14.

Dewar, Peter K., Indianapolis, Ind., assignor to Link-Belt Company, Chicago, Ill. Chain link. 2,000,932; May 14.

De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Fish bait. 2,001,055; May 14.

Dick, Herman J., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Refrigerating apparatus. 2,001,323; May 14.

Diefenderfer, Victor J. and A. C. Lova, Allentown, Pa. Warp-beaming machine. 2,001,486; May 14.

Diehl, William S. (See Lyons, A. G., and Diehl.)

Dietz, Frank S., Jamestown, N. Y. Means and method for weather stripping. 2,001,602; May 14.

Dillström, Torbjörn V., Stockholm, Sweden, assignor to Hesselman Motor Corporation, Ltd., London, England. Internal combustion engine. 2,001,456; May 14.

Dodge, Will K., Upper Lake, Calif. Demountable wheel. 2,001,242; May 14.

Doherty, Harold F., Bridgeport, Conn., assignor to Jenkins Bros., New York, N. Y. Throttle valve. 2,001,487; May 14.

Dole Refrigerating Machine Company. (See Kleist, Herman W., assignor.)

Dollinger, William H., Franklin, Ohio. Window shade fixture. 2,001,603; May 14.

Domler, Charles A., assignor to The Hadley Company, Inc., Providence, R. I. Bracelet clasp. 2,001,056; May 14.

Donaldson, Eleanor, Minneapolis, Minn. Garment. 2,000,898; May 14.

Dooley Bros. (See Fellay, Louis J., assignor.)

Dornier, Claude, assignor of one-half to Dornier-Metallbauten G. m. b. H., Friedrichshafen, Germany. Heat exchanger. 2,001,186; May 14.

Dornier, Claude, Friedrichshafen-on-the-Bodensee, Germany. Rotor for helicopters. 2,001,529; May 14.

Dornier-Metallbauten G. m. b. H. (See Dornier, Claude, assignor.)

Double Envelope Corporation. (See Bear, J. W., and Sublette, assignors.)

Douthitt, Frank W., Ortonville, Minn. Corn cutting machine. 2,001,457; May 14.

Dow Chemical Company, The. (See Williams, William H., assignor.)

Downing, Frederick B., Carneys Point, N. J., R. G. Clarkson, Wilmington, Del., and H. H. Reynolds, Pennsgrove, N. J., assignors to E. I. duPont de Nemours & Company, Wilmington, Del. Preparing ortho-dihydroxy compounds of the benzene series. 2,001,014; May 14.

Drake, Samuel H., Groton, N. Y. Stropping device. 2,000,933; May 14.

Draper Corporation. (See Lackey, Riley G., assignor.)

Draper Corporation. (See Nichols, Edward C., assignor.)

Drexler, Ernest, Pittsburgh, Pa. Table for rolling mills. 2,001,129; May 14.

Dreyfus, Camille, New York, N. Y., and L. N. Lee, Cumberland, Md., assignors to Celanese Corporation of America. Treatment of cellulose esters. 2,000,934; May 14.

Dreyfus, Camille, New York, N. Y., and W. Whitehead, Cumberland, Md., assignors to Celanese Corporation of America. Treatment of textile materials. 2,000,935; May 14.

Drobile, Albert W., Cynwyd, Pa. Apparatus for coating fabrics. 2,001,488; May 14.

Druyvesteyn, Johan. (See de Groot, W., and Druyvesteyn.)

Druyvesteyn, Marl J. (See Uyterhoeven, W., and Druyvesteyn.)

Dubbs, Carbon P., assignor to Universal Oil Products Company, Chicago, Ill. Treating hydrocarbons. 2,001,187; May 14.

Dubilier Condenser Corporation. (See Nyman, Alexander, assignor.)

Dudley Lock Corporation. (See Hope, Samuel N., assignor.)

Dunlop Rubber Company Limited. (See Gorham, W. G., and Trobridge, assignors.)

Dunn, Irwin L., Tulsa, Okla. Safety plug. 2,001,458; May 14.

Duplessis, René E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Method of and machine for performing operations upon shoe parts. 2,000,936; May 14.

Du Pont, E. I., de Nemours & Company. (See Dahlen, Miles A., assignor.)

Du Pont, E. I., de Nemours & Company. (See Downing, F. B., Clarkson and Reynolds, assignors.)

Du Pont, E. I., de Nemours & Company. (See Gubelmann, I., Goodrich and Dettwyler, assignors.)

Du Pont, E. I., de Nemours & Company. (See Henke, C. O., and Prahl, assignors.)

Du Pont, E. I., de Nemours & Company. (See Howell, Edward T., assignor.)

Du Pont, E. I., de Nemours & Company. (See Nenher, Samuel, assignor.)

Du Pont, E. I., de Nemours & Company. (See Woodhouse, John C., assignor.)

Durdin, Augustus C., Jr., assignor to Chicago Pump Company, Chicago, Ill. Automatic control mechanism for electric motors. 2,000,899; May 14.

Dyce, Walter L., Webster, S. Dak. Golf club. 2,001,342; May 14.

Early, Edwin L., assignor of one-half to N. W. Crouch, Kansas City, Kans. Telephone shelf. 2,001,324; May 14.

Eclipse Machine Company. (See Watson, Ernest A., assignor.)

Edwards, Eldred E. (See MacGregor, J. R., and Edwards.)

Elsgruber, Georg, Nuremberg, Germany. Closed removable needle bearing. 2,001,675; May 14.

Elbaum, Harry, New York, N. Y. Combined mailing and return envelope. 2,001,489; May 14.

Electric and Musical Industries Limited. (See Whittaker, A., and Browne, assignors.)

Electric Controller Corporation. (See Turner, Charles A., assignor.)

Electrical Research Products, Inc. (See Lorance, George T., assignor.)

Electrolux Servel Corporation. (See Knight, Donald B., assignor.)

"Elin" Aktiengesellschaft für Elektrische Industrie. (See Weigner, O., and Senft, assignors.)

Elliott, Irwin, Harmon, assignor to Universal Oven Company, Incorporated, New York, N. Y. Method and mechanism for forming articles of plastic material. 2,001,243; May 14.

Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Composite reaction product. 2,000,937; May 14.

Ellis-Foster Company. (See Ellis, Carleton, assignor.)

Emery Industries, Inc. (See Heckel, Hermann, assignor.)

Epps, Carl, Rome, Ga., assignor to Tubize Chatillon Corporation. Yarn support. 2,000,900; May 14.

Erickson, Elmar, assignor, by mesne assignments, to J. H. McElroy, Chicago, Ill. Automatic gas engine control for hoists. 2,001,674; May 14.

Erie City Iron Works. (See Carlson, Carl T., assignor.)

Evans Case Company. (See Reilly, Alfred F., assignor.)

Evr-Klean Seat Pad Company. (See Holderbach, George, assignor.)

Ezell, Floy H., Sanger, assignor of one-third to B. F. Gentle, Dallas, and one-third to J. D. Cornett, Sanger, Tex. Coupling. 2,001,244; May 14.

Falconbridge Nickel Mines Limited. (See Grönningsæter, Anton M., assignor.)

Falk, Alfred, Munich, Germany. Manufacture of chewing gum. 2,001,412; May 14.

Faltico, Harold J., Spokane, Wash. Testing implement for spark plugs and ignition. 2,001,382; May 14.

Farnham, Paul O., Boonton, N. J., assignor, by mesne assignments to Radio Corporation of America, New York, N. Y. Vacuum tube oscillator. 2,001,413; May 14.

Farnham, Paul O., Boonton, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Oscillator circuit. 2,001,694; May 14.

Farnham, Paul O., Boonton, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Oscillator circuit. 2,001,695; May 14.

Farrell Manufacturing Company. (See Crossen, Robert W., Jr., assignor.)

Farrell, Philip H., Flushing, N. Y. Can opener. 2,001,303; May 14.

Fay, Clifford E., South Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,000,938; May 14.

Febre, Martha, New York, N. Y. Perambulator. 2,001,343; May 14.

Feild, Alexander L., assignor, by mesne assignments, to Rustless Iron Corporation of America, Baltimore, Md. Production of iron-chromium alloys. 2,001,015; May 14.

Feild, Alexander L., assignor, by mesne assignments, to Rustless Iron Corporation of America, Baltimore, Md. Production of iron-chromium alloys. 2,001,016; May 14.

Fellay, Louis J., assignor to Dooley Bros., Peoria, Ill. Drill boxing. 2,001,057; May 14.

Fellay, Louis J., assignor to Dooley Bros., Peoria, Ill. Drilling machine. 2,001,058; May 14.

Fenton, Albert S., Buffalo, N. Y. Line drier. 2,001,570; May 14.

Ferris, Walter, assignor to T. Oliger Company, Milwaukee, Wis. Hydraulic drive for machine tools. 2,001,059; May 14.

Feussner, Otto, and A. Jedele, Hanau-on-the-Main, Germany. Metal article. 2,001,017; May 14.

Fiant, Howard E. (See Lord, J. A., and Fiant.)

Fielder, Harold S., La Grange, Ill., assignor to Cherry-Burrell Corporation, Wilmington, Del. Temperature control means for liquid heaters. 2,001,344; May 14.

Finch, Clark, West Palm Beach, Fla. Self-starting synchronous motor. 2,001,604; May 14.

Fischer, Herman G., Chicago, and H. H. Osborn, Elmwood Park, Ill., assignors, by mesne assignments, to X-Ray Shoe Fitter, Inc., Milwaukee, Wis. Foot X-ray machine. 2,001,188; May 14.

Fisher, Ann M., Los Angeles, Calif. Conveying messages. 2,001,018; May 14.

Fisher Scientific Company. (See Natuszak, Maryan P., assignor.)

Flanders, Paul B., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Pressure measuring system. 2,001,096; May 14.

Fleischer, Arthur, Hartford, Conn., assignor to Kalunite Company, Philadelphia, Pa. Manufacture of alumina hydrate. 2,000,939; May 14.

Fletcher, Harold A., Chicago, Ill. Controllable pitch propeller. 2,001,189; May 14.

Fletcher Works, Incorporated. (See Schamm, Fletcher, assignor.)

Föhl, Carl, assignor to Ruthsaccumulator Aktiebolag, Berlin, Germany. Accumulating system. 2,001,304; May 14.

Foley, Leroy T. (See Minskey, S. V., Foley, and Leopold.)

Folmer-Chapin Corporation. (See Folmer, W. F., and Chapin, assignors.)

Folmer, William F., and H. L. Chapin, assignors to Folmer-Chapin Corporation, Rochester, N. Y. Insect exterminator. 2,001,414; May 14.

Ford, Tirey F. (See Semon, W. L., and Ford.)

Fordyce, John R., Hot Springs, Ark. Revetment. 2,001,120; May 14.

Forty, Albert G., assignor to C. G. Sargent's Sons Corporation, Graniteville, Mass. Drier. 2,001,345; May 14.

Fossal, Joseph, Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Edging machine. 2,000,940; May 14.

Foster, Harry D., Logan, Ohio, assignor to National Fireproofing Corporation, Pittsburgh, Pa. Making cellular clay products. 2,001,664; May 14.

Foster, Thomas J., Ridgewood, N. J. Building construction. 2,001,605; May 14.

Franwick, Edmond J., assignor to Hanau Engineering Company, Inc., Buffalo, N. Y. Dental blow torch. 2,001,665; May 14.

Freed, Edward A., Moline, Ill. Self-aligning bearing. 2,001,383; May 14.

Freeman, Benjamin W., assignor to The Louis G. Freeman Company, Cincinnati, Ohio. Shoe marking machine. 2,001,019; May 14.

Freeman, Claude D., et al. (See Freeman, Walter R., assignor.)

Freeman, John D., et al. (See Freeman, Walter R., assignor.)

Freeman, Louis G., Company, The. (See Freeman, Benjamin W., assignor.)

Freeman, Walter R., Jay, assignor of one-fourth to J. D. Freeman, Tulsa, Okla., and one-fourth to C. D. Freeman, Dallas, Tex. Lever lock. 2,001,415; May 14.

Frezzolini, James, New York, N. Y. Automatic garage door opener. 2,001,416; May 14.

Frick Company. (See Aubrey, William H., assignor.)

Frick Company. (See Kitzmiller, William R., assignor.)

Frickey, Royal E., assignor to Welding Service, Inc., San Francisco, Calif. Hardness tester. 2,001,097; May 14.

Fritze, Otto. (See Ruttenauer, A., and Fritze.)

Fuchs, Charles A., Hollis, assignor, by mesne assignments, to Ralph C. Coxhead Corporation, New York, N. Y. Securing a scale strip to a scale bar. 2,001,060; May 14.

G & W Electric Specialty Co. (See Sward, Cecil W., assignor.)

Gaidies, Georg, Berlin-Pankow, Germany, assignor to General Electric Company. Gaseous electric discharge device. 2,001,490; May 14.

Gallon Iron Works & Mfg. Co., The. (See Arndt, Franklin E., assignor.)

Gardner-Denver Company. (See Pearson, Gustav C., assignor.)

Gardner, Robert L., and R. D. Lloyd, Pittsburgh, Pa. Razor blade sharpening device. 2,000,941; May 14.

Garman, George W., Scotia, N. Y., assignor to General Electric Company. Electric discharge device system. 2,001,530; May 14.

Garvey, James D., Chicago, Ill. Pneumatic life belt. 2,001,384; May 14.

Gastrich, Gustav, assignor to Textile Machine Works, Wyomissing, Pa. Stocking. 2,001,676; May 14.

Gaylord, Robert H., Los Angeles, Calif. Elevator signaling system. 2,000,942; May 14.

Gelb, Robert L., Los Angeles, Calif., assignor to Warner Bros. Pictures, Inc., New York, N. Y. Stage apparatus. 2,001,678; May 14.

Gemex Company. (See Sand, John, assignor.)

General Aniline Works, Inc. (See Benade, Walther, assignor.)

General Aniline Works, Inc. (See Stein, R., and Baumann, assignor.)

General Aniline Works, Inc. (See Weinand, K., Bamberger, and Utsch, assignors.)

General Electric Company. (See Alexanderson, Ernst F. W., assignor.)

General Electric Company. (See Bany, Herman, assignor.)

General Electric Company. (See Berejkoff, Anatole P., assignor.)

General Electric Company. (See Bol, Cornelis, assignor.)

General Electric Company. (See Case, Byron A., assignor.)

General Electric Company. (See Coleman, Roy E., assignor.)

General Electric Company. (See de Groot, W., and Druyvesteyn, assignors.)

General Electric Company. (See Gaidies, Georg, assignor.)

General Electric Company. (See Garman, George W., assignor.)

General Electric Company. (See Hall, Chester L., assignor.)

General Electric Company. (See Herrlinger, Fritz, assignor.)

General Electric Company. (See Hintze, Helmut, assignor.)

General Electric Company. (See Jones, Benjamin W., assignor.)

General Electric Company. (See Krefft, Hermann, assignor.)

General Electric Company. (See Mason, Cyril A., assignor.)

General Electric Company. (See Meyer, W., and Weise, assignors.)

General Electric Company. (See Newman, Delbert F., assignor.)

General Electric Company. (See Owens, Joseph W., assignor.)

General Electric Company. (See Payne, John H., assignor.)

General Electric Company. (See Prince, David C., assignor.)

General Electric Company. (See Römbild, Edgar, assignor.)

General Electric Company. (See Ruttenauer, A., and Fritze, assignors.)
General Electric Company. (See Schmidt, Rudolf, assignor.
General Electric Company. (See Uyterhoeven, Willem, assignor.)
General Electric Company. (See Uyterhoeven, W., and Druyvesteyn, assignors.)
General Electric Company. (See Uyterhoeven, W., and Verburg, assignors.)
General Electric Company. (See Zurcher, Ernest, assignor.
General Electric Vapor Lamp Company. (See Buttolph, Leroy J., assignor.)
General Electric X-Ray Corporation. (See Wantz, Julius B., assignor.)
General Instrument Corporation. (See Cohen, Samuel, assignor.)
General Motors Corporation. (See Dick, Herman J., assignor.
General Motors Corporation. (See Holmes, John Q., assignor.
General Plate Company. (See Spencer, John A., assignor.
General Railway Signal Company. (See Abendroth, Karl W., assignor.)
General Railway Signal Company. (See Bodde, Theodore, assignor.)
General Railway Signal Company. (See Sprague, Frank J., assignor.)
Gentle, Benjamin F., et al. (See Ezell, Floy H., assignor.
Gephart, Orvon P., Miamisburg, Ohio, assignor to Howard D. Meincke. Manufacture of calcium sulphates. 2,001,245; May 14.
Gephart, Orvon P., Miamisburg, Ohio, assignor to Howard D. Meincke. Manufacture of paper. 2,001,246; May 14.
Gerstein, Hyman, Hartford, Conn. Emergency link. 2,001,606; May 14.
Gessner, David, Worcester, Mass. Vacuum extractor. 2,001,417; May 14.
Gianoli, Marcel L., Neuilly-sur-Seine, France. Automatic stabilizer for vehicles. 2,001,607; May 14.
Giant Grip Manufacturing Company. (See Akerberg, Carl G., assignor.)
Gibbins, Leslie B. (See Taylor, W. I., and Gibbins.)
Gibbs, Carroll H., Springfield, Mass. Beating-up line position indicator for looms. 2,001,061; May 14.
Gilbert, Charles T., Saginaw, Mich., assignor to National Washboard Company, Chicago, Ill. Washboard. 2,000,943; May 14.
Gilbert, Chester G., Washington, D. C., assignor to Research Corporation, New York, N. Y. Portland cement product. 2,001,608; May 14.
Gilbert, Harold H., Mount Clemens, and John R. Replogle, Detroit, assignors, by mesne assignments, to Copeland Refrigeration Corporation, Mount Clemens, Mich. Refrigerator article receptacle. 2,000,944; May 14.
Ginter, Charles W., assignor to The Aro Equipment Corporation, Bryan, Ohio. Nonsticking pneumatic hammer grease gun. 2,001,190; May 14.
Gleason Works. (See Heard, August C., assignor.)
Globe-Union Mfg. Co. (See Zimmerman, Herbert L., assignor.
Gloor, Walter E. (See Shankweiler, F. K., and Gloor.)
Golden, Roy L., Tucson, Ariz. Chord finder for tenor banjos. 2,001,191; May 14.
Gonzalez, Henry, New York, N. Y. Making ornamental thread objects. 2,001,192; May 14.
Goodman Manufacturing Company. (See Walter, Raymond A., assignor.)
Goodrich, B. F., Company, The. (See Haren, U. C., and Sapp, assignors.)
Goodrich, B. F., Company, The. (See Haushalter, Fred L., assignor.)
Goodrich, B. F., Company, The. (See James, James V., assignor.)
Goodrich, B. F., Company, The. (See Reed, Marion C., assignor.)
Goodrich, B. F., Company, The. (See Semon, W. L., and Ford, assignors.)
Goodrich, B. F., Company, The. (See Tritt, Forest G., assignor.)
Goodrich, Robert J. (See Gubelmann, I., Goodrich, and Dettwyler.)
Gore, Preston M., Oaklyn, assignor to Audubon Wire Cloth Corporation, Audubon, N. J. Wire belt. 2,001,677; May 14.
Gorham, Walter G., Erdington, Birmingham, and G. W. Trobridge, Sutton Coldfield, England, assignors to Dunlop Rubber Company Limited, London, England. Method of and apparatus for the production of goods of rubber or similar material. 2,001,305; May 14.
Gould Coupler Company, The. (See Richards, Willard F., assignor.)
Gourley, William J., and F. H. Barney, Fort Worth, Tex. Beam hanger. 2,001,247; May 14.
Grand Rapids Metalcraft Corporation. (See Visser, John, assignor.)
Grant, Alvin, Denver, Colo. Photographic enlarger. 2,001,002; May 14.
Grassmann, Peter, Berlin, Germany. Electric variable condenser. 2,001,459; May 14.
Greene, Edgeworth, Montclair, N. J. Bottle stopper. 2,001,609; May 14.
Greene, Michael A., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Double screw cap and forming same. 2,001,248; May 14.
Greenlaw, Price M., Washington, D. C. Blow-off tank for steam boilers. 2,001,249; May 14.
Greenlee Bros. & Co. (See Abramson, John H., assignor.)
Greer, Frederick W., Belmont, assignor to J. W. Greer Company, Cambridge, Mass. Wire bending machine. 2,001,273; May 14.
Greer, J. W., Company. (See Greer, Frederick W., assignor.)
Greiner, Gerhard et al. (See Monschein, Carl, assignor.)
Gressner, Albert, Flushing, N. Y. Attachment for sawing tapered material. 2,001,306; May 14.
Grimes, David, Dongan Hills, Staten Island, N. Y., assignor to Radio Corporation of America. Receiver detector control. 2,000,945; May 14.
Grinfin, William H., Cleveland, Ohio. Basket. 2,001,571; May 14.
Griswold, Walter R., assignor to Packard Motor Car Company, Detroit, Mich. Motor mounting. 2,001,020; May 14.
Grönningsæter, Anton M., New York, N. Y., assignor to Falconbridge Nickel Mines Limited, Toronto, Ontario, Canada. Electrolytic deposition of nickel from nickel salt solutions. 2,001,385; May 14.
Gruse, William A. (See Stevens, D. R., and Gruse.)
Gubelmann, Ivan, and R. J. Goodrich, South Milwaukee, and W. Dettwyler, Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Acridone dianthrimide vat dyestuffs and their production. 2,001,418; May 14.
Gubelmann, Ivan, and R. J. Goodrich, South Milwaukee, and W. Dettwyler, Milwaukee, Wis., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Anthraquinone acridone vat dyestuff. 2,001,419; May 14.
Guernsey, Charles O., Yeadon, Pa., assignor to American Car and Foundry Motors Company, New York, N. Y. Internal combustion engine. 2,001,358; May 14.
Guhl, Henry C., Haven, Kans. Solderless connecter for electric conducting cables. 2,001,131; May 14.
Guignard, Edouard, Paris, France, assignor to Société Parisienne pour l'Industrie des Chemins de Fer et des Tramways Électriques, Paris, France. Electric traction. 2,001,357; May 14.
Gulf Refining Company. (See Stevens, D. R., and Gruse, assignors.)
Hadley Company, The. (See Domler, Charles A., assignor.)
Haley, Cate, Rockwood Company. (See Rockwood, Aaron W., assignor.)
Hall, Chester L., Philadelphia, Pa., assignor, by mesne assignments, to General Electric Company. Heating apparatus. 2,001,531; May 14.
Hamblin, Clyde M., Washington, D. C. Apparatus for dispensing inflammable fluids. 2,000,946; May 14.
Hanau Engineering Company. (See Franwick, Edmond J., assignor.)
Hanney, Angus F., Norwood, assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Carrier for laundry assorting machines. 2,001,386; May 14.
Hanovia Chemical and Manufacturing Company. (See Trebler, Henning A., assignor.)
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. Oscillation generation. 2,001,132; May 14.
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. High frequency oscillator. 2,001,133; May 14.
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. Filter. 2,001,387; May 14.
Hardwicke-Etter Company. (See Streun, John A., assignor.)
Hardy, Charles, Pelham Manor, N. Y., assignor to Hardy Metallurgical Company. Metal powder. 2,001,134; May 14.
Hardy Metallurgical Company. (See Hardy, Charles, assignor.)
Haren, Urban C., Akron, and J. P. Sapp, Kent, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Feeding device. 2,001,572; May 14.
Harmon, Luther R., Milwaukee, Wis. Headlight proving appliance. 2,001,135; May 14.
Harris, Sidney E. (See Christansen, W. G., and Harris.)
Hartmann Trunk Company. (See Ritter, Julius, Jr., assignor.)
Harvey, Leo M., Los Angeles, Calif. Auxiliary windshield for motor cars. 2,001,420; May 14.
Haub, George R., Washington, Pa., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Apparatus for forming plates. 2,001,460; May 14.
Haug, John S., assignor to United Engineers and Constructors, Inc., Philadelphia, Pa. Jointed ash pan for combustible gas generators. 2,001,274; May 14.
Haughey, Frank E., assignor to said F. E. Haughey and M. A. Haughey, his wife, as tenants by the entireties, Philadelphia, Pa. Inspection tag for fire extinguishers. 2,001,679; May 14.
Haughey, Martha A. (See Haughey, Frank E., assignor.

Haunz, Charles F., Buffalo, N. Y. Battery separator. 2,001,421; May 14.
Hauser, Adalbert, New York, N. Y. Thrust screw connecter. 2,000,947; May 14.
Haushalter, Fred L., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Fluid sealing expansion joint. 2,001,573; May 14.
Hayes, Harvey C., Washington, D. C. Apparatus for determining the force of gravity. 2,000,948; May 14.
Hays, Robert J., Kingsland, Ark. Fruit jar lifter. 2,001,340; May 14.
Hazel-Atlas Glass Co. (See Greene, Michael A., assignor.)
Hazel-Atlas Glass Company. (See Haub, George R., assignor.)
Hazel-Atlas Glass Company. (See Ross, James W., assignor.)
Hazel-Atlas Glass Co. (See Williams, John J., assignor.)
Hazeltine Corporation. (See Lewis, Harold M., assignor.)
Hazelton Delbecoise, Inc. (See Perillat, Charles D., assignor.)
Heard, August C., assignor to Gleason Works, Rochester, N. Y. Method of and machine for relieving gear cutters. 2,001,021; May 14.
Heating Unit Corporation. (See Bayles, Carroll H., assignor.)
Hechenbleikner, Ingenuin, assignor to Chemical Construction Corporation, Charlotte, N. C. Making concentrated sulphuric acid or oleum. 2,001,359; May 14.
Heckel, Hermann, assignor, by mesne assignments, to Emery Industries, Inc., Cincinnati, Ohio. Liquid coating composition. 2,001,422; May 14.
Hedgcock, William C., Wilmette, assignor to American Steel Foundries, Chicago, Ill. Wheel and axle assembly. 2,001,193; May 14.
Helgis, Henry E., West Orange, assignor to Walter Kidde & Company, Inc., Bloomfield, N. J. Actuator for fire protection systems. 2,001,680; May 14.
Heinrich Kammer Motorenfabrik Aktiengesellschaft. (See Lehmann, Willy, assignor.)
Heintz Manufacturing Company. (See Lambert, A. L., and Meinel, assignors.)
Heller, Julius, Neunkirchen, assignor to firm Schraubenund Schniede-Waarenfabriks-Actiengesellschaft Breyiller & Co. und A. Urban & Sochne, Vienna, Austria. Foot arch support. 2,000,949; May 14.
Helmore, William. (See Swan, A., and Helmore.)
Hendley, Fred, assignor to The Okonite Company, Passaic, N. J. Process of and apparatus for marking. 2,001,401; May 14.
Henke, Clyde O., Wilmington, Del., and M. A. Prahl, Milwaukee, Wis., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Ether of hydroxbietyl alcohol. 2,001,275; May 14.
Henneberger, Thomas C. (See Rea, W. T., and Henneberger.)
Hercules Powder Company. (See Lorand, Eugene J., assignor.)
Hercules Powder Company. (See Shankweiler, F. K., and Gloor, assignors.)
Herrlinger, Fritz, Berlin, Germany, assignor to General Electric Company. Assembling packing rings in turbine rotors. 2,001,492; May 14.
Hesselman Motor Corporation, Ltd. (See Dillström, Torbjörn V., assignor.)
Heuston, Howard H., Boulder, Colo. Trash burner. 2,001,360; May 14.
Hewitt, Alfred G., assignor to The Visking Corporation, Chicago, Ill. Shirred tubing and preparing the same. 2,001,461; May 14.
Hexler, Charles J. (See Ziegler, George J., assignor.)
Heymer, Gerd, Dessau-Ziebigk, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Producing cinematographic three- and multi-color pictures. 2,001,250; May 14.
Hiering, William C., Millburn township, Essex County, assignor to J. E. Mercott Company, Newark, N. J. Hand bag. 2,001,307; May 14.
Highway Trailer Company. (See Burton, Robert N., assignor.)
Highway Trailer Company. (See Davis, Darrel H., assignor.)
Highway Trailer Company. (See Molinare, Anthony W., assignor.)
Highway Trailer Company. (See Williams, Leroy E., assignor.)
Hildenbrand, John J., New York, N. Y. Gas tank. 2,001,610; May 14.
Hill, Charles A. (See Mueller, O. B., Hill, Tielking, and Jones.)
Hiller, Friedrich, Cologne-on-the-Rhine, Germany. Index card. 2,001,462; May 14.
Hinderliter, Frank J. (See Johnson, Edwin A., assignor.)
Hintze, Helmut, Kopenich-Wendenschloss, Germany, assignor to General Electric Company. System of electrical distribution. 2,001,532; May 14.
Hitt, Henry C., Bremerton, Wash. Self-filling fountain pen filling device. 2,000,950; May 14.
Hodnefield, Olaus T., Glendale, Calif. Treating brakelining and impregnating compound for same. 2,001,194; May 14.
Hodson, Walter D., Chicago, Ill. Lubricated cordage. 2,000,951; May 14.
Hodson, Walter D., Chicago, Ill. Wire rope. 2,000,952; May 14.
Holderbach, George, assignor to Evr-Klean Seat Pad Company, St. Louis, Mo. Removable wall-lining. 2,001,136; May 14.
Holmes, John Q., Anderson, Ind., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Condenser winding machine. 2,001,347; May 14.
Holt, William E., Newark, N. J. Floor surfacing machine. 2,001,098; May 14.
Holt, William E., Newark, N. J. Floor surfacing machine. 2,001,099; May 14.
Hood, Roy E. (See Bradbury, A. W., and Hood.)
Hooker Electrochemical Company. (See Rue, John D., assignor.)
Hooker, Paul, T. L. B. Lyster, and J. D. Rue, Niagara Falls, assignors to Hooker Electrochemical Company, New York, N. Y. Reacting semifluid materials. 2,000,953; May 14.
Hookless Fastener Company. (See Quisling, Sverre, assignor.)
Hookless Fastener Company. (See Sundback, Gideon, assignor.)
Hoper Electrochemical Company. (See Hooker, P., Lyster, and Rue, assignors.)
Hoover Company, The. (See Hudson, Willis F., assignor.)
Hope, Samuel N., Wauwatosa, Wis., assignor, by Dudley Lock Corporation, Chicago, Ill. Latching means for lockers and the like. 2,001,493; May 14.
Hopkins, Alva E., Tacoma, Wash. Bait clip. 2,000,954; May 14.
Hopkins, Richard M., assignor to American District Telegraph Company, New York, N. Y. Alarm switch. 2,001,137; May 14.
Hoppe, Otto F., Frankfort-on-the-Main, Germany, assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,001,308; May 14.
Horner, Albert, Kapaa Kauai, Territory of Hawaii. Sink and drainboard construction. 2,001,423; May 14.
Horwitt, Nathan G., and M. Katcher, assignors to Design Engineers, Incorporated, New York, N. Y. Clock. 2,001,195; May 14.
Houdaille, Maurice. (See Lecler, Charles, assignor.)
Houdry Process Corporation. (See Joseph, Alfred, assignor.)
Houston, Herbert W., North Hollywood, Calif. Internal combustion engine. 2,001,533; May 14.
How, Harlan W., Aspinwall, Pa. Indirect heating and circulating system for sulphite digesters. 2,001,022; May 14.
Howard, Giles P. E., Luton, assignor to Messrs. George Kent, Limited, London, England. Automatic control mechanism. 2,001,348; May 14.
Howell, Charles M., Springfield, and J. d'A. Clark, Swarthmore, assignors to Scott Paper Company, Chester, Pa. Creped paper. 2,001,023; May 14.
Howell, Edward T., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of Bz1, Bz1'-dibenzanthronyl. 2,001,063; May 14.
Hoyer, Hans. (See Stout, O. M., and Hoyer.)
Hudson, H. D., Manufacturing Company. (See DeFrees, Nicholas W., assignor.)
Hudson, Willis F., Riverside, Ill., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,000,955; May 14.
Huff, Elbridge G., Malden, assignor to Cutter Manufacturing Company, Cambridge, Mass. Screen corner construction. 2,001,681; May 14.
Huggett, Leonard J., London, England. Display sign. 2,001,424; May 14.
Hughes Industries Co. (See Burns, B., and Lewis, assignors.)
Hughes, Ralph C., assignor to Reynolds Gas Regulator Co., Anderson, Ind. Fluid pressure regulator. 2,001,534; May 14.
Hughes Tool Company. (See Ricker, Norman H., assignor.)
Hunt, George. (See Stribling, John W., assignor.)
Hunter, Frank B., Indianapolis, Ind. Method of and apparatus for cleaning, sterilizing, and smoothing beaches. 2,000,956; May 14.
Hunter, John G., Columbus, Ohio. Combination telephone stand and telephone directory secretary. 2,000,957; May 14.
Husted, Harry A., Lakewood, Ohio. Steering wheel and identification, means. 2,001,349; May 14.
Hydrex Corporation. (See Thoke, Rudolph G., assignor.)
Hymans, Frederick, Larchmont, assignor to Otis Elevator Company, New York, N. Y. Elevator safety apparatus. 2,001,361; May 14.
I. G. Farbenindustrie Aktiengesellschaft. (See Kunz, M. A., Kochendoerfer, and Koeberle, assignors.)
Idzal, Milton M., Des Moines, Iowa. Stereoscopic picture. 2,001,024; May 14.
Industrial Patents Corporation. (See Walter, Charles T., assignor.)
Industrial Research, Limited. (See Snyder, F. H., and Maclaren, assignors.)
Ingersoll-Rand Company. (See Jimerson, Francis A., assignor.)
Ingersoll-Rand Company. (See McAllister, Raymond C., assignor.)
Ingersoll-Rand Company. (See Parkhill, M. S., and Tayler, assignors.)

Inland Steel Company. (See Smith, Wallace W., assignor.)
International Proprietaries, Incorporated, et al. (See Welch, William E., assignor.)
International-Stacey Corporation. (See Bloss, R. R., and Pfeil, assignors.)
Iowa Fiber Box Company, et al. (See Petersen, Karl W., assignor.)
Ipold, Victor, Vienna, Austria, assignor to Technik & Investment A.-G., Vadus, Liechtenstein. Burner for liquid fuel. 2,001,611; May 14.
Ireland, Murray, assignor to Waters-Genter Company, Minneapolis, Minn. Toaster. 2,001,362; May 14.
Irving, Philip L., assignor to Mueller Brass Co., Port Huron, Mich. Valve. 2,001,251; May 14.
Ives, Clifford E., Wilmette, Ill. Hydraulic transmission. 2,001,325; May 14.
J. & L. Tool Company. (See Pearson, Carl, assignor.)
Jackman, Fred W., Beverly Hills, Calif., assignor to Warner Bros. Pictures, Inc., New York, N. Y. Submarine camera. 2,001,682; May 14.
Jackman, Fred W., Beverly Hills, Calif., assignor to Warner Bros. Pictures, Inc., New York, N. Y. Submarine camera. 2,001,683; May 14.
Jacobson, Ludwig G., Jamestown, assignor to Dahlstrom Metallic Door Company, Jamestown, N. Y. Metal partition. 2,001,574; May 14.
Jacquemin, Marcel C. H., New Barking, England. Pipe for smoking. 2,001,612; May 14.
Jaeger, Alphons O. (See Daniels, L. C., and Jaeger.)
James, James V., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Coating cord material. 2,001,375; May 14.
Jamieson, Aubrey C., Kew, Victoria, Australia. Measuring and delivering apparatus. 2,001,025; May 14.
Jarrier, René, St. Quentin, France, assignor to Bartlett Arkell, New York, N. Y. Automatic sacking and weighing apparatus. 2,000,968; May 14.
Jarry, Robert M., Paris, France. Extracting the phenols of tars and similar mixtures. 2,001,613; May 14.
Jedele, Alfred. (See Feussner, O., and Jedele.)
Jenkins Bros. (See Doherty, Harold F., assignor.)
Jimerson, Francis A., Athens, Pa., assignor to Ingersoll Rand Company, Jersey City, N. J. Braking mechanism. 2,000,969; May 14.
Joers, Carl F., Los Angeles, Calif. Flashlight. 2,001,363; May 14.
John, Robert, New York, N. Y. Electric range. 2,001,326; May 14.
Johnson, Algot F., Minneapolis, Minn. Underwater drilling apparatus. 2,001,576; May 14.
Johnson, Clarence E., Quincy, Ill. Foldable chair. 2,001,252; May 14.
Johnson, Edwin A., Houston, Tex., assignor, by mesne assignments, to F. J. Hinderliter, Tulsa, Okla. Pressure head for oil wells. 2,001,684; May 14.
Johnson, Ernest C., Somerset, Pa. Leverage changing mechanism for motor vehicle brakes. 2,001,327; May 14.
Johnson, Frank E., assignor to John I. Paulding, Inc., New Bedford, Mass. Pull chain socket. 2,001,425; May 14.
Johnson, Harold E., Evanston, assignor to Chicago Rawhide Manufacturing Company, Chicago, Ill. Sealing means. 2,001,138; May 14.
Johnson, John H., Buffalo, Minn. Reciprocating engine. 2,001,377; May 14.
Johnson Matthey & Company. (See Turner, Harold, assignor.)
Johnson, Percy G., Letchworth, assignor to Victaulic Company Limited, London, England. Packing for pipe joints. 2,001,614; May 14.
Johnson, William V., Washington, D. C. Book holder. 2,001,139; May 14.
Jones, Benjamin W., Schenectady, assignor to General Electric Company, New York, N. Y. Time delay undervoltage protective system. 2,001,494; May 14.
Jones, Gordon R. (See Mueller, O. B., Hill, Tickling, and Jones.)
Jones, Sam P., assignor of forty per cent to E. W. Schadak, Dallas, Tex. Gas mixer. 2,000,901; May 14.
Jordan, Isaac N., assignor to Armour and Company, Chicago, Ill. Container. 2,001,140; May 14.
Joseph, Alfred, Enghien, France, assignor, by mesne assignments, to Houdry Process Corporation, Dover, Del. Process and apparatus for the treatment of heavy oils. 2,000,966; May 14.
Jost, Samuel E., Ogden, Utah. Tent. 2,001,196; May 14.
Judell, B. L., & Company. (See Mullen, John E., assignor.)
Kalunite Company. (See Fleischer, Arthur, assignor.)
Kaplan, Alexander, Cleveland, Ohio. Spool holder. 2,001,100; May 14.
Kapp, Frank J., New York, N. Y. Bottle closure. 2,001,426; May 14.
Karten, William T., Pittsburgh, Pa. Baking vessel. 2,001,615; May 14.
Katcher, Morris. (See Horwitt, N. G., and Katcher.)
Keall, Frank B., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Finishing machine. 2,000,961; May 14.
Kehoe, Michael J., Springfield, Ohio. Dishwashing machine. 2,001,328; May 14.
Kehrle, Adam C., Buckfastleigh, England. Bee feeder. 2,001,453; May 14.
Kell, Francis, & Son, Inc. (See Kell, Henry F., assignor.)
Kell, Henry F., Scarsdale, N. Y., assignor to Francis Kell & Son, Inc. Escutcheon plate and handle assembly. 2,001,666; May 14.
Kelley, Leonard O., assignor to The Standard Computing Scale Company, Detroit, Mich. Coin operated weighing scale. 2,001,388; May 14.
Kellogg Company. (See Adams, R. T., Poole, and Raymer, assignors.)
Kelly, Charles P., Newark, N. J. Air conditioner. 2,001,309; May 14.
Kent, George, Messrs., Limited. (See Howard, Giles P. E., assignor.)
Kern, Emil. (See Snyder, H. D., and Kern.)
Kerone, Edward B. W. (See Olsen, F., Seavey, and Kerone.)
Kerone, Edward B. W. (See Seavey, F. R., and Kerone.)
Kerr, Mary D., Columbia, S. C. Container. 2,001,464; May 14.
Kidde, Walter, & Company. (See Helgis, Henry E., assignor.)
Klefer, William E., Allentown, Pa. Bobbin. 2,001,569; May 14.
Killborn-Sauer Company, The. (See Sauer, Henry J., assignor.)
Kinne, Edmund P., Alliance, Ohio, assignor to American Steel Foundries, Chicago, Ill. Coupler. 2,001,197; May 14.
Kirchoff, William G., assignor to The J. H. Day Company, Cincinnati, Ohio. Dough divider. 2,001,026; May 14.
Kirsten, Kurt F. J. (See McManamna, G. P., and Kirsten.)
Kittilsen, Coom, Lille Trag near Porsgrunn, Norway. Transmission for transmitting power at different speed ratios from a driver shaft to a driven shaft. 2,001,141; May 14.
Kittleson, Henry O., Milan, Minn. Load handling apparatus. 2,001,253; May 14.
Kitzmiller, William R., assignor to Frick Company, Waynesboro, Pa. Defrosting system. 2,001,027; May 14.
Kitzmiller, William R., assignor to Frick Company, Waynesboro, Pa. Defrosting system. 2,001,028; May 14.
Klegman, Charles S., Detroit, Mich. Safety razor. 2,001,198; May 14.
Klein, Frederick, Glen Rock, N. J., assignor to Sipp-Eastwood Corporation, Paterson, N. J. Control mechanism for warping machines and the like. 2,001,004; May 14.
Klein, Mathias, & Sons. (See O'Russa, Lorence, assignor.)
Klein, Maurus, Berlin, Friedrichshagen, Germany. Manufacture of electric cables. 2,001,005; May 14.
Kleist, Herman W., assignor to Dole Refrigerating Machine Company, Chicago, Ill. Refrigerator. 2,001,199; May 14.
Klinger, Karl Gumpoldskirchen, near Vienna, Austria, assignor to Naamlooze Vennootschap Irma Industrie en Ruwmaterialen Maatschappij, Rotterdam, Netherlands. Packing plate with screen lining and manufacturing same. 2,001,616; May 14.
Klinkhamer, Hendrik A. W., assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Transformer for the conversion of polyphase currents. 2,001,465; May 14.
Knapp, Bernard, Kansas City, Mo. Aeroplane sign. 2,001,200; May 14.
Knapp-Monarch Company. (See Newnham, Eugene, assignor.)
Knapp-Monarch Company. (See Smith, John E., assignor.)
Knight, Donald B., Brooklyn, assignor to Electrolux Servel Corporation, New York, N. Y. Intermittent absorption refrigerating apparatus and method. 2,001,142; May 14.
Knight, Donald B., Brooklyn, assignor to Electrolux Servel Corporation, New York, N. Y. Intermittent absorption refrigerating apparatus. 2,001,143; May 14.
Koca, James F. (See Sears, R. W., 2d and Koca.)
Kochendoerfer, Gerd. (See Kunz, M. A., Kochendoerfer and Koeberle.)
Koeberle, Karl. (See Kunz, M. A., Kochendoerfer, and Koeberle.)
Kollias, Christ E. (See Cherpes, P. N., and Kollias.)
Korte, Alfred C., assignor to Metalcraft Corporation, St. Louis, Mo. Furniture pad. 2,000,902; May 14.
Krag, Franz K., Chicago, Ill. Can or jar opener. 2,000,962; May 14.
Kratz, Edouard M., Gary, Ind., assignor, by mesne assignments, to Marbo Products Corporation, Chicago, Ill. Making transparent film material. 2,001,389; May 14.
Krefft, Hermann, Berlin-Friedrichshagen, Germany, assignor to General Electric Company. Lamp unit. 2,001,495; May 14.
Krhanský, Rudolf, Montreal, Quebec, Canada. Dowel pin. 2,001,144; May 14.
Kroelling, Walter, Cleveland Heights, Ohio. Flying toy mechanism. 2,001,496; May 14.
Kruse, John F. W., and C. W. Dawson, Oakmont and A. T. Richardson, Verona, Pa., assignors to Woodings-Verona Tool Works, Verona, Pa. Apparatus for manufacturing tie plates. 2,001,578; May 14.
Kucera, Frank A., assignor to Union Special Machine Company, Chicago, Ill. Binder support for sewing machines. 2,001,446; May 14.

Kulick, Edward L. (See Kulick, Frank and E. L.)
Kulick, Frank, Detroit, and E. L. Kulick, Dearborn, Mich. Engine support for automobiles. 2,001,029; May 14.
Kunz, Max A., Mannheim, Gerd Kochendoerfer, and K. Koeberle, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Pyridino compounds and their production. 2,001,201; May 14.
Kunze, Ernest L., Chemnitz, Germany. Shock absorber. 2,001,202; May 14.
Kurtz, Cyrus B., Cleveland, Ohio. Lamp. 2,001,030; May 14.
Kushinsky, Albert, Perth Amboy, N. J. Arch support. 2,001,203; May 14.
Lackey, Riley G., New Holland, Ga., assignor to Draper Corporation, Hopedale, Mass. Bobbin supporting device. 2,001,667; May 14.
Lambert, Albert L., Narberth, and W. J. Meinel, assignors to Heintz Manufacturing Company, Philadelphia, Pa. Riveting. 2,001,145; May 14.
Lancaster, Eugene L., assignor of one-fourth to R. C. Lowe, Haskell, Tex. Harrow. 2,001,254; May 14.
Landis Tool Company. (See Balsiger, Harold E., assignor.)
Landrock, Paul. (See Caps, A. W., and Landrock.)
Landt, Gustave E., Norristown, Pa., assignor to Continental Diamond Fibre Company, Newark, Del. Cylindrical articles and method and apparatus for manufacturing the same. 2,001,031; May 14.
Lane, Louis R., Habana, Cuba. Puzzle. 2,001,067; May 14.
Lang, Franz, Munich, Germany, assignor to Lanova Aktiengesellschaft, Vaduz, Liechtenstein. Internal combustion engine. 2,001,535; May 14.
Lang, Franz, Munich, Germany, assignor to Lanova Aktiengesellschaft, Vaduz, Liechtenstein. Internal combustion engine. 2,001,536; May 14.
Langecker, Hedwig, Prague, Czechoslovakia, assignor to Schering-Kuhlbaum A. G., Berlin, Germany. Concentration of hormones in secretions of the human or animal body. 2,001,255; May 14.
Lanova Aktiengesellschaft. (See Lang, Franz, assignor.)
Lanyon, William J., Hanover, N. H. Collar protecting device. 2,001,617; May 14.
Larsson, Herman, Hedemora, Sweden. Folding support for folding tables. 2,001,364; May 14.
Laucks, I. F., Inc. (See Laucks, Irving F., assignor.)
Laucks, Irving F., assignor to I. F. Laucks, Inc., Seattle, Wash. Laminated cellulose unit and making same. 2,001,276; May 14.
Laugier, Carlos, assignor of thirty per cent to Marcos Odriozola and thirty per cent to T. R. Retana, Mexico, D. F., Mexico. Fuel charge heating means for automotive vehicles. 2,001,466; May 14.
Laurain, Alfred, assignor to Société du Caoutchouc Manufacturé, Paris, France. Buckle. 2,001,618; May 14.
Law, Duff C., deceased, Philadelphia, Pa., by J. F. Law, administratrix, Philadelphia, Pa., assignor to United Research Corporation, Long Island City, N. Y. Phototube. 2,001,685; May 14.
Law, Janet F., Administratrix. (See Law, Duff C.)
Lawhorn, Ervin F., and S. R. Brenaman, Lanark, Ill. Grinding device. 2,001,497; May 14.
Lawson, Axel A., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Outsole removing machine. 2,000,963; May 14.
Leahy, James F., assignor to Atlas Tack Corporation, Fairhaven, Mass. Coloring aluminum articles. 2,001,427; May 14.
Le Barbier, Emile P. L., Nice, France. Method and apparatus for obtaining stereoscopic effects. 2,001,256; May 14.
LeBlanc, Emile. (See Appel, H. A., and LeBlanc.)
Lecler, Charles, assignor Levallois-Perret, to M. Houdaille, Levallois-Perret, Seine, France. Resilient connection. 2,001,257; May 14.
Lee, Leslie N. (See Dreyfus, C., and Lee.)
Leece, Bennett M., Cleveland, and D. S. Cole, Cleveland Heights, Ohio, assignors to The Leece-Neville Company, Cleveland, Ohio. Generator regulating device. 2,001,579; May 14.
Leece-Neville Company, The. (See Leece, B. M. and Cole, assignors.)
Lehmann, Willy, Elchwalde, near Berlin, Germany, assignor to Heinrich Kamper Motorenfabrik Aktiengesellschaft, Berlin, Marienfelde, Germany. Diesel engine. 2,000,903; May 14.
Lenher, Samuel, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Polymerizing mono-olefines. 2,000,964; May 14.
Leopold, Henry. (See Minskey, S. Y., Foley and Leopold.)
Lester, Warren A., Oakland, Calif. Flushing valve mechanism. 2,001,390; May 14.
Levi, Emanuel, et al. (See Marten, Otto, assignor.)
Levilon Manufacturing Company. (See Sindy, Frank W., assignor.)
Levoyer, Antoine M. L., Paris, France. Motor car with trailer for camping. 2,001,619; May 14.
Lévy, René L., Montrouge, assignor to Societe d'Inventions Aeronautiques et Mechaniques S. I. A. M., Fribourg, Switzerland. Retractable landing gear for aeroplanes. 2,001,620; May 14.
Lewis, Harold M., Douglaston, N. Y., assignor to Hazeltine Corporation. Short wave converter. 2,001,277; May 14.
Lewis, Howard B. (See Bruns, B., and Lewis.)
Lewis, Harold M., Bradley Beach, N. J., assignor to Radio Corporation of America, New York, N. Y. Pretuned radioreceiver and producing same. 2,001,146; May 14.
Libbey Glass Manufacturing Company, The. (See Schutz, Harold R., assignor.)
Lilienfeld, Leon, Vienna, Austria. Treatment of artificial fibrous material. 2,001,621; May 14.
Lincoln Electric Company, The. (See Brugge, Bernard J., assignor.)
Lindhard, Povl T., Rumson, N. J., assignor to F. L. Smidth & Co., New York, N. Y. Rotary kiln and cooler. 2,001,258; May 14.
Lindstrom, Frank L., Bridgeport, Conn. Miniature or toy boat. 2,001,365; May 14.
Link-Belt Company. (See Dewar, Peter K., assignor.)
Lipman, Carl E. L., assignor to Lipman Patents Corporation, Chicago, Ill. Refrigerating system. 2,000,965; May 14.
Lipman Patents Corporation. (See Lipman, Carl E. L., assignor.)
Lloyd, Roy D. (See Gardner, R. L., and Lloyd.)
Loepsinger, Albert J., and W. M. Trafton, assignors to American Moistening Company, Providence, R. I. Hygroscopic material and method of preparing the same. 2,001,066; May 14.
Long, James A., and H. E. Fiant, Reading, Pa. Pipe joint and making the same. 1,001,204; May 14.
Loomis, Crawford C., Ilion, N. Y., assignor to Remington Arms Company, Inc. Firearm. 2,001,278; May 14.
Loomis, Crawford C., Ilion, N. Y., assignor to Remington Arms Company, Inc. Firearm. 2,001,279; May 14.
Lorance, George T., Chappaqua, assignor to Electrical Research Products, Inc., New York, N. Y. Switching system. 2,001,101; May 14.
Lorand, Eugene J., assignor to Hercules Powder Company, Wilmington, Del. Production of aralkyl ethers of cellulose. 2,001,102; May 14.
Lova, Alphonse C. (See Diefenderfer, V. J., and Lova.)
Lovell, Stanley P., Newton, assignor to Arden Box Toe Company, Watertown, Mass. Manufacture of shoes having stiffened parts. 2,001,032; May 14.
Lowe, R. C. (See Lancaster, Eugene L., assignor.)
Lubrication Corporation, The. (See Creveling, John L., assignor.)
Lucke, Charles E., New York, N. Y., assignor to Bailey Meter Company. Regulating valve. 2,000,966; May 14.
Lucke, Charles E., New York, N. Y., assignor to The Babcock & Wilcox Company, Newark, N. J. Method of and apparatus for conditioning gas or vapor. 2,001,259; May 14.
Ludwig, Louis, Brooklyn, N. Y. Electric flasher. 2,001,580; May 14.
Lundgren, William E., Auburn, assignor, by mesne assignments, of one-half to Sutton Tool Co., Inc., Wilkinsonville, Mass. Loom shuttle structure. 2,000,967; May 14.
Lundgren, William E., Auburn, assignor, by mesne assignments, of one-half to Sutton Tool Co., Inc., Wilkinsonville, Mass. Weft replenishing loom. 2,000,968; May 14.
Lundgren, William E., Auburn, assignor, by mesne assignments, of one-half to Sutton Tool Co., Inc., Wilkinsonville, Mass. Weft replenishing loom structure. 2,000,969; May 14.
Lyons, Arthur G., Pennside, and W. S. Diehl, Shillington, assignors, by mesne assignments, to The Dent Hardware Company, Fullerton, Pa. Lock mechanism. 2,001,329; May 14.
Lyster, Thomas L. B. (See Hooker, P., Lyster, and Rue.)
Mabbott, Harold C. (See Colton, R. B., and Mabbott.)
MacGregor, John R., Albany, and E. E. Edwards, Oakland, assignors to Standard Oil Company of California, San Francisco, Calif. Portable heater. 2,001,068; May 14.
Mack, Fred A., executors, et al. (See Schottenfels, Henry, assignor.)
Maclaren, Stanley F. M. (See Snyder, F. H., and Maclaren.)
Madigan, Joseph M., Detroit, Mich. Vehicle jack. 2,001,467; May 14.
Maier, Albert. (See von Soden-Fraunhofen, A. G., and Maier.)
Maier, Albert, assignor to Zahnradfabrik Friedrichshafen, Aktiengesellschaft, Friedrichshafen, Bodensee, Germany. Freewheeling clutch. 2,001,668; May 14.
Manaster, Ben B., Chicago, Ill. Adjustable cravat holder. 2,001,261; May 14.
Manning, Bowman & Co. (See Rehm, William C., assignor.)
Manross, Bert, Warren, Pa. Revivifier. 2,000,972; May 14.
Manross, Bert, Warren, Pa. Collector for Fuller's earth. 2,000,971; May 14.
Manross, Bert, Warren, Pa. Revivifying Fuller's earth. 2,000,973; May 14.
Marbo Products Corporation. (See Kratz, Edouard M., assignor.)
Mariani, Angelina. (See Bruno, Frank A., assignor.)
Marten, Otto, assignor of one-third to E. Levi, and one-third to H. W. Stodehill, Louisville, Ky. Toy looping wheel. 2,001,205; May 14.
Martin, James, Higher Denham, England. Construction and arrangement of aeroplane wings. 2,001,260; May 14.

Marx, Karl F., Dearborn, Mich. Stereoscopic moving picture film printing machine. 2,001,280; May 14.
Mason, Cyril A., Northampton, England, assignor to General Electric Company. Stethoscope. 2,001,537; May 14.
Mathauer, Edmund G., Philadelphia, Pa., assignor to American Car and Foundry Motors Company, New York, N. Y. Actuating folding doors. 2,001,103; May 14.
Matherne, Albert M., Goose Creek, Tex. Pump operating mechanism. 2,001,033; May 14.
Mathes, Wilhelm. (See Prahl, W., and Mathes.)
Matthes, Ernst C., Leipzig, Germany. Hair thinning device. 2,001,206; May 14.
Matuszak, Maryan P., assignor to Fisher Scientific Company, Pittsburgh, Pa. Gas absorption pipette. 2,001,501; May 14.
Mayer, Daniel J., Belleville, assignor to Metal Textile Corporation, West Orange, N. J. Semiabrasive fabric. 2,001,261; May 14.
Maynard, Arthur H., Warwick, R. I., assignor to Boston Wire Stitcher Company, Portland, Maine. Fastener-applying implement. 2,001,104; May 14.
McAllister, Raymond C., Painted Post, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Piston assembly. 2,000,970; May 14.
McCas, David G., Lancaster, Pa. Reducing electrical disturbances. 2,001,622; May 14.
McClaren, Alfred E., Joplin, Mo. Automatic railway crossing gate. 2,001,147; May 14.
McClintock, Edward H., West Springfield, Mass. Structural unit. 2,001,428; May 14.
McCollum, Elton V., Ponca City, Okla., and G. C. McGhee, Eunice, La., assignors to Continental Oil Company, Ponca City, Okla. Making dip determinations of geological strata. 2,001,429; May 14.
McElroy, John H. (See Erickson, Einar, assignor.)
McGhee, George C. (See McCollum, E. V., and McGhee.)
McKee, Cyril M. (See Shaw, Lester C., assignor.)
McKeever, Hugh, Tulsa, Okla. Game apparatus. 2,001,350; May 14.
McKenna Brass & Manufacturing Co. (See Moberg, Evan L., assignor.)
McManamna, Gerald P., and K. F. J. Kirsten, Seattle, Wash. Gas gun. 2,001,207; May 14.
Mead, Andrew W., Seattle, Wash. Traffic buffer. 2,000,974; May 14.
Meigs, Joseph V., Hastings-upon-Hudson, N. Y., assignor to Plastix Corporation, Wilmington, Del. Resinous product and making same. 2,001,430; May 14.
Meincke, Howard D. (See Gephart, Orvon P., assignor.)
Meinel, William J. (See Lambert, A. L., and Meinel.)
Memorial Mausoleum Corporation. (See Brunk, Charles O. A., assignor.)
Mergott, J. E., Company. (See Hiering, William C., assignor.)
Metalcraft Corporation. (See Korte, Alfred C., assignor.)
Metal Textile Corporation. (See Mayer, Daniel J., assignor.)
Metz, Herman, and R. H. Brown, Paterson, N. J.; said Brown assignor, by mesne assignments, to said Metz. Treating shoes. 2,001,060; May 14.
Meyer, Wilfried, Berlin-Steglitz, and E. Weise, Berlin, Germany, assignors to General Electric Company. Electric translating device. 2,001,498; May 14.
Miessner, Benjamin F., Short Hills, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. System for energising space discharge devices. 2,001,148; May 14.
Miessner, Benjamin F., Millburn Township, Essex County, assignor to Miessner Inventions, Inc. Apparatus for the production of music. 2,001,391; May 14.
Miessner, Benjamin F., Millburn Township, N. J., assignor to Miessner Inventions, Inc. Method and apparatus for the production of music. 2,001,392; May 14.
Miessner Inventions, Inc. (See Miessner, Benjamin F., assignor.)
Miller, Loyal J. (See Reed, Roy H., assignor.)
Mills, Ronald Van A., assignor to Continental Oil Company, Ponca City, Okla. Treating oil and gas wells. 2,001,350; May 14.
Minskey, Samuel V., L. T. Foley, and H. Leopold, Knox County, Tenn. Cylinder paper machine. 2,001,208; May 14.
Mitchell, William J., San Francisco, Calif., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Rig for rotary drills. 2,000,975; May 14.
Mitchell, William J., San Francisco, Calif., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Rotary drilling machine. 2,000,976; May 14.
Mittelman, Benjamin E., Chicago, Ill. Game. 2,001,366; May 14.
Moberg, Evan L., Latrobe, assignor to McKenna Brass & Manufacturing Co., Inc., Pittsburgh, Pa. Method and apparatus for bottling. 2,001,209; May 14.
Molinare, Anthony W., Forest Park, Ill., assignor to Highway Trailer Company, Edgerton, Wis. Electrical contact for articulated vehicles. 2,001,393; May 14.
Mönchein, Carl, assignor of one-fourth to G. Greiner and one-fourth to J. Reitner, Vienna, Austria. Retailing container for fruit and the like. 2,001,149; May 14.
Montgomery, Hiram W., Topanga, Calif. Insert for umbrellas. 2,001,623; May 14.
Moody, Virginius W., Brooklyn, assignor of two-thirds to Reynolds Metals Company, New York, N. Y., and one-third to Robertshaw Thermostat Company, Youngwood, Pa. Refrigerator and temperature control device. 2,001,105; May 14.
Moore, J. W., Valve Corporation. (See Moore, R. H., and Allen, assignors.)
Moore, Robert H., and R. B. Allen, Lexington, assignors to J. W. Moore Valve Corporation, Everett, Mass. Fusible safety device. 2,001,086; May 14.
Moore, William M., Maywood, Ill. Garment bag. 2,001,624; May 14.
Morse, Sterne, Richmond Heights, Ohio. Automatic regulation of water in storage batteries. 2,001,210; May 14.
Moseley, William H., Springfield, assignor of one-tenth to Samuel W. Banning, trustee, Chicago, Ill. Resurfacing concrete pavement. 2,000,977; May 14.
Moseley, William H., Springfield, assignor of one-tenth to Samuel W. Banning, trustee, Chicago, Ill. Resurfacing and widening road structures. 2,000,978; May 14.
Mosher, Lyman E., East Herkimer, N. Y. Crane and wire rack. 2,001,034; May 14.
Moss, Joseph, Woonsocket, R. I., assignor, by mesne assignments, to Whitin Machine Works, Whitinsville, Mass. Picker. 2,001,687; May 14.
Moutoux, Emil E., Riverhead, N. Y. Bait or minnow box. 2,001,468; May 14.
Mueller Brass Co. (See Irving, Philip L., assignor.)
Mueller Brass Co. (See Mueller, O. B., Hill, Tielking, and Jones, assignors.)
Mueller, Oscar B., C. A. Hill, and J. W. Tielking, Port Huron, Mich., and G. R. Jones, Rochester, N. Y., assignors to Mueller Brass Co., Port Huron, Mich. Heating tool. 2,001,538; May 14.
Mullen, John E., assignor of one-half to H. L. Judell & Company, San Francisco, Calif. Show case. 2,001,100; May 14.
Müller, Heinrich, Nurenburg, Germany. Wheeled toy. 2,001,625; May 14.
Müller, Richard, Heidelberg, and E. Rabald, Mannheim, assignors to C. F. Boehringer & Saehne G. m. b. H., Mannheim-Waldhof, Germany. Production of fatty acid anhydrides. 2,001,211; May 14.
Muller, Robert L., assignor to Burroughs Adding Machine Company, Detroit, Mich. Tally roll mechanism. 2,001,367; May 14.
Mundet, L., & Son, Inc. (See Villanyi, Charles M., assignor.)
Munlock Engineering Company. (See Munson, Luther S., assignor.)
Munson, Luther S., West Riverdale, Md., assignor to Munlock Engineering Company, Washington, D. C. Building wall. 2,001,469; May 14.
Myers, Eugene V., East Orange, N. J. Safety belt or the like. 2,000,980; May 14.
N. V. Machinerieen-en Apparaten Fabrieken "Meaf", (See Salnikoff, Wadim, assignor.)
N. V. Philips' Gloeilampenfabrieken. (See Klinkhamer, Hendrik A. W., assignor.)
Naamloose Vennootschap Irma Industrie en Ruwmaterialen Maatschappij. (See Klinger, Karl, assignor.)
Nanfeldt, William, Clifton, assignor to World Bestos Corporation, Paterson, N. J. Brake lining with metallic lubrication. 2,001,539; May 14.
National Fireproofing Corporation. (See Foster, Harry D., assignor.)
National Fireproofing Corporation. (See Shipley, Roy A., assignor.)
National Lock Co. (See North, Edwin W., assignor.)
National Lock Washer Company. (See Schunk, Joseph, assignor.)
National Postal Meter Company. (See Ryan, Commodore D., assignor.)
National Washboard Company. (See Gilbert, Charles T., assignor.)
Neinhouse, Menno, Muskegon, Mich. Window jack. 2,001,626; May 14.
Nelson, Edwin F., assignor to Universal Oil Products Company, Chicago, Ill. Hydrocarbon oil conversion. 2,001,150; May 14.
Nenstiehl, William C., Wilmington, Del. Closure for dispensing containers. 2,001,627; May 14.
Newman, Delbert F., Schenectady, N. Y., assignor to General Electric Company. Evaporator for refrigerating systems. 2,001,540; May 14.
Newnham, Eugene, St. Louis, Mo., assignor to Knapp-Monarch Company, Belleville, Ill. Motor support for air circulators and heaters. 2,001,151; May 14.
Nichols, Edward C., Upton, assignor to Draper Corporation, Hopedale, Mass. Parting means for looms. 2,001,310; May 14.
Nierinck, Fernand, Riverside, Chelmsford, assignor to Chelmsford Egg Supply Company (1934) Limited, London, England. Preserving foodstuffs. 2,001,628; May 14.
Noll, Elmer R., assignor to The William Powell Company, Cincinnati, Ohio. Valve. 2,001,035; May 14.
Nore, Waldo D., North Pitcairn, Pa. Water lock boiler feed system. 2,001,431; May 14.
Norgren, Carl A., Denver, Colo. Fire extinguisher. 2,001,394; May 14.
North, Edwin W., assignor to National Lock Co., Rockford, Ill. Lock. 2,001,262; May 14.

Nuttelman, Arthur, West Salem, Wis. Corn husker. 2,001,351; May 14.
Nyman, Alexander, Dobbs Ferry, assignor to Dubilier Condenser Corporation, New York, N. Y. Electrical device. 2,001,282; May 14.
Nyvall, Yngve J., San Pedro, Calif. Archer's bow. 2,001,470; May 14.
O'Connell, Timothy M., Philadelphia, Pa. Votive light. 2,001,312; May 14.
Odriosola, Marcos, et al. (See Laugier, Carlos, assignor.)
Oil Engine Development Company. (See Cummins, Clessie L., assignor.)
Oilgear Company, The. (See Ferris, Walter, assignor.)
Okonite Company, The. (See Hendey, Fred, assignor.)
Older, Clifford, Wilmette, Ill. Fluid pressure indicator. 2,001,368; May 14.
Oliver Farm Equipment Company. (See Altgelt, Herman E., assignor.)
Olney, George W., Minneapolis, Minn. Stoker for furnaces. 2,001,152; May 14.
Olsen, Fredrich, F. R. Seavey, and E. B. W. Kerone, Alton, assignors to Western Cartridge Company, East Alton, Ill. Priming composition. 2,001,212; May 14.
Olving, Bror G., Hamden, Conn., assignor to Products Protection Corporation. Circuit controlling and indicating device. 2,001,432; May 14.
Omansky, Morris, Boston, Mass., assignor to E. W. Colledge, General Sales Agent, Inc., Jacksonville, Fla. Plastic composition. 2,001,311; May 14.
O'Russa, Lorence, Princeville, assignor to Mathias Klein & Sons, Chicago, Ill. Wire gripping tool. 2,001,541; May 14.
Osawa, Juichi, Mita, Shibaku, Tokyo, Japan, assignor to Western Electric Company, Incorporated, New York, N. Y. Phase modulating system. 2,001,107; May 14.
Osborn, Howard H. (See Fischer, H. G., and Osborn.)
Osterhout, George H. United States Marine Corps., Paris Island, S. C. Fountain pen and filler. 2,001,263; May 14.
Otis Elevator Company. (See Hymans, Frederick, assignor.)
Owens, Joseph W., Schenectady, N. Y., assignor to General Electric Company. Undervoltage protective system. 2,001,542; May 14.
Pacific Electric Manufacturing Corporation. (See Thompson, Joseph S., assignor.)
Packard Motor Car Company. (See Griswold, Walter R., assignor.)
Packman, Percival J., Seven Kings, assignor to The Plessey Company Limited, Ilford, Essex, England. Electrical condenser. 2,001,153; May 14.
Paige, Richard E., Flushing, N. Y. Display device. 2,001,499; May 14.
Parker, Charles K., Richmond, assignor to Standard Oil Company of California, San Francisco, Calif. Stabilized hydrocarbon oil. 2,001,108; May 14.
Parker, Ledru R., San Antonio, Tex. Belt treatment. 2,001,582; May 14.
Parkhill, Mortimer S., and C. W. Taylor, Corning, N. Y., assignors to Ingersoll-Rand Company, Jersey City, N. J. Water jacket construction for engines. 2,000,979; May 14.
Parsons, Carl B., Detroit, Mich. Kitchen cabinet. 2,000,981; May 14.
Patent Button Company, The. (See White, Franklin R., assignor.)
Patten Paper Company. (See Baker, Horace C., assignor.)
Paugh, James J., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Welding. 2,001,688; May 14.
Paulding, John I., Inc. (See Johnson, Frank E., assignor.)
Paulding, John I., Inc. (See Wack, Henry K., assignor.)
Payne, John H., Ballston Spa, N. Y., assignor to General Electric Company. Control system. 2,001,543; May 14.
Payson, Arthur H., assignor to The American Thermos Bottle Company, Norwich, Conn. Double-walled vacuum container. 2,001,154; May 14.
Peale-Davis Company. (See Peale, Rembrandt, Jr., assignor.)
Peale, Rembrandt, Jr., St. Benedict, Pa., assignor, by mesne assignments, to Peale-Davis Company, Wilmington, Del. Process and mechanism for separating intermixed divided materials. 2,001,331; May 14.
Pearmain, William J., Racine, assignor to Twin Disc Clutch Company, Racine, Wis. Clutch. 2,001,395; May 14.
Pearson, Carl, Pawtucket, R. I., assignor to J. & L. Tool Company, Attleboro, Mass. Finding for a clasp. 2,001,213; May 14.
Pearson, Gustav C., assignor to Gardner-Denver Company, Denver, Colo. Drill sharpener. 2,001,689; May 14.
Pecker, Joseph S., assignor to Autogiro Company of America, Philadelphia, Pa. Rotary-winged aircraft. 2,000,904; May 14.
Pelzer, Harry L., Houston, Tex., assignor to Sinclair Refining Company, New York, N. Y. Coking hydrocarbons. 2,001,214; May 14.
Pelzer, Harry L., Highland, Ind., assignor to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 2,001,313; May 14.
Pelzer, Harry L., Houston, Tex., assignor to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 2,001,314; May 14.

Pepper, Percy, Fort Wayne, Ind. Brake. 2,001,630; May 14.
Perillat, Charles D., assignor to Haselton-De Bevoise Inc., Worcester, Mass. Garment. 2,001,283; May 14.
Peters, Peter N., New York, N. Y. Razor blade. 2,001,155; May 14.
Petersen, Karl W., assignor of one-half to Iowa Fiber Box Company, Keokuk, Iowa, and one-half to South West Box Company, Sand Springs, Okla. Reenforced fiber board box. 2,000,982; May 14.
Petrie, Carlton J., Montour Falls, N. Y. Fish line float. 2,001,109; May 14.
Pfeil, Roy C. (See Bloss, R. R., and Pfeil.)
Phillips, Harold P., Maplewood, Mo. Antipiston slap means. 2,001,544; May 14.
Photostat Corporation. (See Caps, A. W., and Landrock, assignors.)
Pioneer Instrument Company. (See Urfer, Adolf, assignor.)
Plastix Corporation. (See Megis, Joseph V., assignor.)
Plato, Gerhardt, Chicago, Ill. Rotary fluid driven motor. 2,000,984; May 14.
Plessey Company Limited, The. (See Packman, Percival J., assignor.)
Podolsky, Jacob, Dorchester, Mass. Valve. 2,001,545; May 14.
Poe, Fred M., Suffern, assignor to The American Brake Shoe and Foundry Company, New York, N. Y. Casting mold. 2,001,583; May 14.
Polhemus, Charles B. (See Smith, F. T., and Polhemus.)
Poole, Richard S. (See Adams, R. T., Poole, and Raymer.)
Pourtier, Gaston, Romainville, France. Machine for covering electrical wires or tapes. 2,001,546; May 14.
Powell, William B. (See Cundall, R. M., and Powell.)
Powell, William, Company, The. (See Noll, Elmer R., assignor.)
Prahl, Milton A. (See Henke, C. O., and Prahl.)
Prahl, Walter, and W. Mathes, assignors to Dr. F. Raschig, G. m. b. H., Ludwigshafen-on-the-Rhine, Germany. Manufacture of aniline from chlorobenzene and ammonia. 2,001,284; May 14.
Pratt, Lucy F. (See Carlson, Johan A., assignor.)
Prince, David C., Swarthmore, Pa., assignor to General Electric Company. Mixing device and the like. 2,001,036; May 14.
Principotta, Emanuel, Grosse Pointe, Mich. Cooking utensil. 2,001,352; May 14.
Proctor, Robert V., and C. B. Cushwa, assignors to The Commercial Shearing & Stamping Company, Youngstown, Ohio. Conduit. 2,001,315; May 14.
Productive Equipment Corporation. (See Soldan, Lewis E., assignor.)
Products Protection Corporation. (See Olving, Bror G., assignor.)
Prosperity Company, The. (See Davis, Ernest, assignor.)
Public, Free use of the. (See Busch, Thomas N.)
Public, Free use of the. (See Thelen, Rolf, assignor.)
Pullen, Rodney S., Akron, Ohio, assignor to Pullenlite Company, Philadelphia, Pa. Match holder. 2,001,264; May 14.
Pullenlite Company. (See Pullen, Rodney S., assignor.)
Pumphrey, Harry E., Pasadena, Calif. Headrest for motor vehicles. 2,001,396; May 14.
Quasso, Alfred D., San Antonio, Tex., assignor of one-fourth to S. P. Daily, Jr., New York, N. Y. Garment supporter. 2,001,629; May 14.
Quinlan, Ann R. (See Quinlan, Eldridge W., and A. R.)
Quinlan, Eldridge W., and A. R., Chicago, Ill. Light modifying device. 2,000,985; May 14.
Quisling, Sverre, Madison, Wis., assignor to Hookless Fastener Company, Meadville, Pa. Closure fastening means. 2,000,983; May 14.
Rabald, Erich. (See Müller, R., and Rabald.)
Rabkin, William, New York, N. Y. Bulk dispensing device. 2,001,110; May 14.
Radio Corporation of America. (See Farnham, Paul O., assignor.)
Radio Corporation of America. (See Grimes, David, assignor.)
Radio Corporation of America. (See Hansell, Clarence W., assignor.)
Radio Corporation of America. (See Lewis, Harold M., assignor.)
Radio Corporation of America. (See Miessner, Benjamin F., assignor.)
Radio Corporation of America. (See Scofield, Theodore J., assignor.)
Rasch, William T., assignor to American Gas Products Corporation, New York, N. Y. Burner for gas heated radiators. 2,001,397; May 14.
Raschig, Dr. F., G. m. b. H. (See Prahl, W., and Mathes, assignors.)
Ravening, Alfred W., West Springfield, Mass. Air deflector and water circulator. 2,001,398; May 14.
Raymer, Morris. (See Adams, R. T., Poole, and Raymer.)
Rea, Wilson T., Flushing, N. Y., and T. C. Henneberger, Caldwell, N. J., assignors to American Telephone and Telegraph Company. Voltage compensation in signaling circuits. 2,001,037; May 14.
Reda Pump Company. (See Arutunoff, Armais, assignor.)
Rechnitzer, Rudolf, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Rectifier and filter circuit. 2,000,986; May 14.

Reed, Marion C., Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Substituted morpholines and making the same. 2,001,584; May 14.
Reed, Roy H., assignor of one-half to Loyal J. Miller, Oklahoma City, Okla. Vehicle jack. 2,001,265; May 14.
Reihm, William C., assignor to Manning, Bowman & Co., Meriden, Conn. Electric cooker. 2,001,285; May 14.
Reid, George H., London, England. Gyroscopic indicator for use with air and other craft. 2,001,038; May 14.
Reilly, Alfred F., North Attleboro, Mass. Vanity case construction. 2,001,691; May 14.
Reilly, Alfred F., assignor to Evans Case Company, North Attleboro, Mass. Vanity case. 2,001,690; May 14.
Reinforced Paper Bottle Corporation. (See Bodor, Andrew, assignor.)
Reith, George C., Revere, Mass. Cold handle stove cover lifter. 2,001,286; May 14.
Reitner, Josef et al. (See Monchein, Carl, assignor.)
Remington Arms Company. (See Brün, Willi, assignor.)
Remington Arms Company. (See Loomis, Crawford C., assignor.)
Replogle, John R. (See Gilbert, H. H., and Replogle.)
Research Corporation. (See Gilbert, Chester G., assignor.)
Research Foundation, Inc. (See Tornsjo, Gustaf E., assignor.)
Retana, Thomas R., et al. (See Laugier, Carlos, assignor.)
Reynolds Gas Regulator Co. (See Hughes, Ralph C., assignor.)
Reynolds, Harry H. (See Downing, F. B., Clarkson, and Reynolds.)
Reynolds Metals Company et al. (See Moody, Virginius W., assignor.)
Rhodes, M. H., Inc. (See Rhodes, Marcus H., assignor.)
Rhodes, Marcus H., Hartford, assignor to M. H. Rhodes, Inc., Hartford, Conn. Time controlled switch. 2,001,264; May 14.
Rhodes, Omer E., Aberdeen, and F. L. Rockwell, Cosmopolis, Wash. Motor mounting. 2,001,111; May 14.
Rice, Harry B., assignor to Vacuum Bolting Cloth Cleaner Corporation, Houston, Tex. Sieve liner. 2,001,631; May 14.
Rich, Donald U., Teaneck, N. J., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 2,001,692; May 14.
Richards, Willard F., Depew, assignor to The Gould Coupler Company, New York, N. Y. Coupler operating mechanism. 2,000,987; May 14.
Richardson, Andrew T. (See Kruse, J. F. W., Dawson, and Richardson.)
Ricker, Norman H., assignor to Hughes Tool Company, Houston, Tex. Operating plunger lift apparatus. 2,001,547; May 14.
Ritter, Julius, Jr., assignor to Hartmann Trunk Company, Racine, Wis. Wardrobe suitcase. 2,001,156; May 14.
Ritter, Julius, Jr., assignor to Hartmann Trunk Company, Racine, Wis. Closure guide. 2,001,157; May 14.
Robertshaw Thermostat Company et al. (See Moody, Virginius W., assignor.)
Robinson, Joseph E., Sr. (See Ware, Mack, assignor.)
Robinson, Joseph, New York, N. Y. Electrical vaporizer. 2,000,988; May 14.
Rockefeller, John W., Jr., New York, N. Y. Helical spring. 2,000,905; May 14.
Rockwell, Frank L. (See Rhodes, O. E., and Rockwell.)
Rockwood, Aaron W., Winchester, assignor to Haley, Cate, Rockwood Company, Everett, Mass. Manufacturing piping, welting or the like. 2,001,693; May 14.
Roeder, Clyde A., Omaha, Nebr. Hydraulic brake. 2,001,585; May 14.
Römhild, Edgar, Berlin-Steglitz, Germany, assignor to General Electric Company. Cathode for electric discharge devices. 2,001,548; May 14.
Ross, Albert S., Ada, Okla. Rubber band gun. 2,001,267; May 14.
Ross, James W., Washington, Pa., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Leer loader. 2,001,332; May 14.
Rothen, Charles J., New York, N. Y. Game device. 2,001,500; May 14.
Royal, Thomas M., Philadelphia, Pa. Manufacture of bags. 2,000,989; May 14.
Rubber Service Laboratories Company, The. (See Sibley, Robert L., assignor.)
Rue, John D. (See Hooker, P., Lyster and Rue.)
Rue, John D., Niagara Falls, assignor to Hooker Electrochemical Company, New York, N. Y. Pulp treating process. 2,001,268; May 14.
Ruesenberg, Carl A., Rockford, assignor, by mesne assignments, to Borg-Warner Corporation, Chicago, Ill. Circulating pump. 2,001,369; May 14.
Ruppel, Frederick H., Pasadena, Calif. Structure. 2,001,215; May 14.
Rupple, Harry W., Shaker Heights, assignor to The Cleveland Automatic Machine Company, Cleveland, Ohio. Head slide for automatic machine tools. 2,001,586; May 14.
Rustless Iron Corporation of America. (See Feild, Alexander L., assignor.)
Ruthsaccumulator Aktiebolag. (See Föhl, Carl, assignor.)
Rüttenauer, Alfred, Berlin-Halensee, and O. Fritze, Berlin, Germany, assignors to General Electric Company. Gaseous electric discharge device. 2,001,501; May 14.
Ryan, Commodore D., assignor to National Postal Meter Company, Los Angeles, Calif. Hand operated postal machine. 2,001,287; May 14.
SKF Industries, Inc. (See Brunner, Harold E., assignor.)
Safety Car Heating & Lighting Company, The. (See Von Ohlsen, Louis H., assignor.)
Salnikoff, Wadim, Berlin, Germany, assignor to N. V. Machinerieen-en Apparaten Fabrieken "Meaf", Utrecht, Netherlands. Transfer of liquefied gases. 2,001,353; May 14.
Samuel, Arthur L., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,000,990; May 14.
Sand, John, Newark, N. J., assignor to Gemex Company. Bracelet buckle. 2,001,216; May 14.
Sandy, Thomas, Goderich, Ontario, Canada. Screening apparatus. 2,001,549; May 14.
Sanford, Hugh W., Knoxville, Tenn. Latch for automatic dumping vehicles. 2,001,471; May 14.
Sanitary Public Service Corporation. (See Schaefer, George, Jr., assignor.)
Sapp, John P. (See Haren, U. C., and Sapp.)
Sargent, C. G., Sons Corporation. (See Forty, Albert G., assignor.)
Satre, Hilmar E., Chicago, Ill., assignor, by mesne assignments, to Spencer, White & Prentis, Incorporated, New York, N. Y. Excavating, hoisting, dumping, and conveying apparatus. 2,001,502; May 14.
Satre, Hilmar E., Chicago, Ill., assignor, by mesne assignments, to Spencer, White & Prentis, Incorporated, New York, N. Y. Excavating and conveying machine. 2,001,503; May 14.
Sauer, Henry J., assignor to The Kilborn-Sauer Company, Fairfield, Conn. Lamp. 2,001,472; May 14.
Schadek, E. W. (See Jones, Sam P., assignor.)
Schaefer, George, Jr., Flushing, assignor to Sanitary Public Service Corporation, New York, N. Y. Dual purpose seat cover and towel forming machine. 2,001,112; May 14.
Schaefer, George, Jr., Flushing, assignor to Sanitary Public Service Corporation, New York, N. Y. Machine for handling strip material. 2,001,113; May 14.
Scharwath, John A., Jersey City, N. J. Machine for making shingles. 2,001,399; May 14.
Schaum, Fletcher, assignor to Fletcher Works, Incorporated, Philadelphia, Pa. Centrifugal. 2,001,550; May 14.
Scherling-Kahlbaum A. G. (See Langecker, Hedwig, assignor.)
Schettler, Gustav A., Leeds, England, assignor to The Turner Tanning Machinery Company, Portland, Maine. Drying of sheet material. 2,000,991; May 14.
Schindler, Robert B., Spring City, Pa. Stocking toe. 2,001,370; May 14.
Schlichting, Otto, Berlin-Steglitz, Germany. Insulation against losses of heat and cold. 2,001,632; May 14.
Schlitt, Joseph L., Stamford, Conn., assignor to Air Reduction Company, Incorporated, New York, N. Y. Separation of constituents of gaseous mixtures. 2,000,992; May 14.
Schmidt, Edwin X., Whitefish Bay, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Method of and apparatus for ascertaining the proportional value of a combustible constituent of a flowing fluid. 2,001,114; May 14.
Schmidt, Michael, Junction City, Kans., assignor of one-half to C. W. Wilson, Kansas City, Mo. Axle and wheel aligner. 2,000,993; May 14.
Schmidt, Rudolf, Weisswasser, Germany, assignor to General Electric Company, New York, N. Y. Gaseous electric discharge lamp device. 2,001,504; May 14.
Schorr, Max, Houston, Tex. Insulated staple. 2,001,288; May 14.
Schottenfels, Henry, deceased; M. Schottenfels and F. A. Mack, executors, assignors to Monroe Schottenfels, West New York, N. J. Brassière back connections for evening attire. 2,001,505; May 14.
Schottenfels, Monroe. (See Schottenfels, Henry, assignor.)
Schottenfels, Monroe, executors, et al. (See Schottenfels, Henry, assignor.)
Schrauben- und Schmiede-Waarenfabriks-Actiengesellschaft Breviller & Co. und A. Urban & Soehne. (See Heller, Julius, assignor.)
Schranuth, Walther, Berlin-Germany, assignor, by mesne assignments, to "Unichem" Chemikalien Handels A.-G., Zurich, Switzerland. Sulphonated naphthenic alcohol and preparing the same. 2,000,994; May 14.
Schubert, Hermann J., Hackensack, N. J. Combination weather-strip and window frame. 2,001,433; May 14.
Schuler, Karl. (See Barth, K., Schuler and Wanger.)
Schülze, Albert, Neustadt on the Tafelfichte, Czechoslovakia. Safety closure for letters. 2,001,434; May 14.
Schunk, Joseph, assignor to National Lock Washer Company, Newark, N. J. Bur or car window construction. 2,001,435; May 14.
Schutz, Harold R., Ottawa Hills, assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Machine for flaring glass articles. 2,001,436; May 14.
Scofield, Theodore J., Jackson, Mich., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Compensating for temperature changes in piezo-electric crystal devices. 2,001,217; May 14.
Scott, Clarence N., Houston, Tex. Plunger lift apparatus. 2,001,551; May 14.

Scott, Clarence N., Houston, Tex. Plunger lift control device. 2,001,552; May 14.
Scott Paper Company. (See Howell, C. M., and Clark, assignors.)
Sears, Richard W., 2d, and J. F. Koca, Woodstock, Ill.; said Koca assignor to said Sears. Flying machine. 2,001,158; May 14.
Seavey, Frederick R. (See Olsen, F., Seavey, and Kerone.)
Seavey, Frederick R., and E. B. W. Kerone, Alton, assignors to Western Cartridge Company, East Alton, Ill. Handling sensitive materials. 2,000,995; May 14.
Seely, Thomas H., Melrose, and M. H. Ballard, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Heel breasting machine. 2,000,996; May 14.
Segal, Hyman R., New York, N. Y. Safety razor. 2,001,218; May 14.
Segovia, Crispin B., New York, N. Y. Geographical clock. 2,001,633; May 14.
Seguy, Jean D., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oil. 2,001,150; May 14.
Seillière, Serge R., Paris, France. Hydraulic compressor. 2,001,269; May 14.
Semon, Waldo L., Silver Lake Village, and T. F. Ford, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Manufacture of mercapto aryl thiazoles. 2,001,587; May 14.
Senft, Willibald. (See Weigner, O., and Senft.)
Servel, Inc. (See Clarke, James M., assignor.)
Shamberger, George A., Shaw, Oregon. Aeroplane. 2,001,400; May 14.
Shankweiler, Fred K., Newport, and W. E. Gloor, Wilmington, Del., assignors to Hercules Powder Company, Wilmington, Del. Nitrocellulose gel and method of producing. 2,001,070; May 14.
Sharpe, Peter F., Atlantic City, N. J. Universal shaft connection. 2,000,997; May 14.
Shaw, Harold N., Erie, Pa. Heating device. 2,001,219; May 14.
Shaw, Lester C., Alameda, assignor of one-half to Cyril M. McKee, Oakland, Calif. Changeable sign device. 2,001,115; May 14.
Sheffield, Cyril C., and G. Clarke, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,001,289; May 14.
Shipley, Roy A., assignor to National Fireproofing Corporation, Pittsburgh, Pa. Conduit and making the same. 2,001,316; May 14.
Shoe Form Co. (See DeWitt, William J., assignor.)
Shore Corporation. (See Smith, Walter S., assignor.)
Sibley, Robert L., Nitro, W. Va., assignor to The Rubber Service Laboratories Company, Akron, Ohio. Rubber composition and method of preserving rubber. 2,001,071; May 14.
Sidney, Philip, Jersey City, N. J. Fastening device. 2,001,401; May 14.
Sinclair Refining Company. (See Pelzer, Harry L., assignor.)
Sipp-Eastwood Corporation. (See Klein, Frederick, assignor.)
Slady, Frank W., assignor to Leviton Manufacturing Company, Brooklyn, N. Y. Electric lamp socket. 2,001,317; May 14.
Slaughenhop, George E., Vernon, Tex. Combined rod guide, rod check and paraffin swab. 2,001,270; May 14.
Smidth, F. L., & Co. (See Lindhard, Povl T., assignor.)
Smidth, F. L., & Co. (See Vogel-Jorgensen, Mikael, assignor.)
Smith, Francis T., and C. B. Polhemus, San Jose, Calif. Lock sealing means. 2,001,354; May 14.
Smith, John F., assignor to Knapp-Monarch Company, Belleville, Ill. Percolator construction. 2,001,160; May 14.
Smith, Joseph R., Cumberland, Md. Tube sheet for boilers. 2,001,337; May 14.
Smith, Leonard G., Miami, Fla. Barbecuing stove. 2,001,116; May 14.
Smith, Mark E., assignor to Union Iron Works, Erie, Pa. Steam generator. 2,001,437; May 14.
Smith, Richard C., Seattle, Wash. Card dealing device. 2,001,220; May 14.
Smith, Wallace W., assignor to Inland Steel Company, Chicago, Ill. Double wall structure. 2,001,473; May 14.
Smith, Walter G. E., Portland, Oreg. Gate valve. 2,001,271; May 14.
Smith, Walter S., Quincy, Mass., assignor to Shore Corporation, Dover, Del. Manifold. 2,001,669; May 14.
Smith, Walter S., Quincy, Mass., assignor to Shore Corporation, Dover, Del. Intake system for multicylinder internal combustion engines. 2,001,670; May 14.
Smitt, Göta J. J., Vasteras, Sweden, assignor to Bolidens Gruvaktiebolag, Stockholm, Sweden. Arsenic-containing cement. 2,001,506; May 14.
Snyder, Francis H., Niagara Falls, N. Y., and S. F. M. Maclaren, Niagara Falls, Ontario, Canada, assignors to Industrial Research, Limited, Niagara Falls, Ontario, Canada. Tin plating. 2,001,474; May 14.
Snyder, Harry D., New York, and E. Kern, Flushing, N. Y. Perforating device. 2,001,161; May 14.
Societe d'Inventions Aeronautiques et Mechaniques S. I. A. M. (See Lévy, René L., assignor.)
Société du Caoutchouc Manufacturé. (See Laurain, Alfred, assignor.)
Société Parisienne pour l'Industrie des Chemins de Fer et des Tramways Electriques. (See Guignard, Edouard, assignor.)
Soldan, Lewis E., assignor to Productive Equipment Corporation, Chicago, Ill. Screening apparatus. 2,000,998; May 14.
South West Box Company, et al. (See Petersen, Karl W., assignor.)
Spence, Paulsen, East Orange, N. J. Valve. 2,001,318; May 14.
Spencer, John A., Newtonville, assignor, by mesne assignments, to General Plate Company, Attleboro, Mass. Manufacturing radially corrugated disks. 2,001,553; May 14.
Spencer, White & Prentis, Incorporated. (See Satre, Hilmar E., assignor.)
Spiller, William R., assignor to The White Motor Company, Cleveland, Ohio. Mechanism for changing and governing the speed of engines. 2,001,590; May 14.
Sprague, Frank J., assignor to General Railway Signal Company, New York, N. Y. Train-control apparatus. 2,001,163; May 14.
Sprague, Philip T., Long Beach, Ind. Portable testing instrument. 2,001,588; May 14.
Squibb, E. R., & Sons. (See Christiansen, W. G., and Harris, assignors.)
Stacks, Howard R. (See Turner, H. C., and Stacks.)
Stahl, Frank E., Tonawanda, assignor to Columbus McKinnon Chain Corporation, Tonawanda, N. Y. Buckle. 2,001,072; May 14.
Standard Computing Scale Company, The. (See Kelley, Leonard D., assignor.)
Standard Oil Company of California. (See MacGregor, J. R., and Edwards, assignors.)
Standard Oil Company of California. (See Parker, Charles K., assignor.)
Stanley, George J., assignor to Aluminum Company of America, Pittsburgh, Pa. Cable. 2,001,319; May 14.
Staples, Elliot M., Hohokus, N. J., assignor to American Telephone and Telegraph Company. Telephone signaling system. 2,001,039; May 14.
Stein, Berthold, Mannheim, and F. Baumann, Leverkusen, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Production of 1,4-diamino-2-aryloxyanthraquinone-3-sulphonic acid. 2,001,221; May 14.
Stein, Jacob, Brooklyn, N. Y. Coupler for jointed dolls. 2,001,334; May 14.
Steiner, Anna, New York, N. Y. Artificial eyebrow. 2,001,589; May 14.
Stensgaard, William L., Chicago, Ill. Supporting apparatus. 2,001,222; May 14.
Stevens, Donald R., Pittsburgh, and W. A. Gruse, Wilkinsburg, assignors to Gulf Refining Company, Pittsburgh, Pa. Petroleum product. 2,001,634; May 14.
Stivers, Jake M., Carthage, Mo. Hone. 2,001,073; May 14.
Stöbe, Robert. (See von Grüber-Rehenburg, R., and Stöbe.)
Stodghill, Howard W., et al. (See Marten, Otto, assignor.)
Stout, Oscar M., Garden City, and H. Hoyer, Woodhaven, N. Y., assignors to Sweets Company of America, Inc., New York, N. Y. Wrapping machine. 2,001,074; May 14.
Strauss, Joseph B., Chicago, Ill. System of building construction. 2,001,162; May 14.
Streun, John A., assignor to Hardwicke-Etter Company, Sherman, Tex. Cotton machine. 2,001,223; May 14.
Stribling, John W., assignor to G. Hunt, Detroit, Mich. Latch mechanism. 2,001,507; May 14.
Stuber & Kuck Co. (See Abele, Theodore J., assignor.)
Stuck, William R., Los Angeles, Calif. Tray. 2,001,438; May 14.
Sturgis, Charles E., Rochester, N. Y. Reaming tool. 2,001,635; May 14.
Sublette, Reyborn R. (See Bear, J. W., and Sublette.)
Suehland, John C., Lincoln Park, Mich. Trailer. 2,000,999; May 14.
Sundback, Gideon, assignor to Hookless Fastener Company, Meadville, Pa. Method and machine for making fasteners. 2,001,591; May 14.
Sundstrand, Carl A., Rockford, Ill. Nut chopper. 2,001,075; May 14.
Süssmuth, Karl W., Langenau, near Ulm, Germany. Beverage product. 2,001,554; May 14.
Sutton Tool Co. (See Lundgren, William E., assignor.)
Swan, Andrew, and W. Helmore, Hampshire, England. Induction system for internal combustion engines. 2,001,164; May 14.
Sward, Cecil W., assignor to G. & W. Electric Specialty Co., Chicago, Ill. Terminal for electrical conductors and the like. 2,001,636; May 15.
Sweeney, David, Maywood, Ill. Beer dispensing equipment. 2,001,040; May 14.
Sweets Company of America, Inc. (See Stout, O. M., and Hoyer, assignors.)
Swennes, Benjamin A., Rockford, assignor, by mesne assignments, to Borg-Warner Corporation, Chicago, Ill. Propeller shaft. 2,001,165; May 14.
Swennes, Benjamin A., Rockford, assignor, by mesne assignments, to Borg-Warner Corporation, Chicago, Ill. Propeller shaft. 2,001,166; May 14.
Swennes, Benjamin A., Rockford, assignor, by mesne assignments, to Borg-Warner Corporation, Chicago, Ill. Propeller shaft. 2,001,167; May 14.

Talbot, Howard H., assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Rolling mill feeding apparatus. 2,001,637; May 14.
Tamés, Joseph E., Mixcoac, Mexico. Automobile top. 2,001,224; May 14.
Tarsian, Barkes, Bryn Mawr, assignor to Atwater Kent Manufacturing Company, Philadelphia, Pa. Radio tuning apparatus. 2,001,076; May 14.
Taylor, Charles W. (See Parkhill, M. S., and Taylor.)
Taylor, William I., and L. B. Gibbins, Spondon near Derby, England, assignors to Celanese Corporation of America. Production of artificial filaments, yarns, or thread. 2,001,000; May 14.
Technik & Investment A.-G. (See Ipold, Victor, assignor.)
Teetor, Macy O., Newcastle, Ind. Ventilator attachment for toilet seats. 2,001,592; May 14.
Teetor, Macy O., Newcastle, Ind. Air purifying ventilator for toilet bowls. 2,001,593; May 14.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Rechnitzer, Rudolf, assignor.)
Texas Company, The. (See de Flores, Luis, assignor.)
Textile Machine Works. (See Gastrich, Gustav, assignor.)
Thelen, Rolf, Madison, Wis., dedicated to the free use of the public. Reversible circulation internal fan kiln. 2,001,001; May 14.
Thoke, Rudolph G., La Grange, assignor to Hydrox Corporation, Chicago, Ill. Confection. 2,001,371; May 14.
Thomann, Frederick A., East Moline, assignor to Deere & Company, Moline, Ill. Harvester. 2,001,077; May 14.
Thomas, William D., Lynnfield, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cement sole-attaching machine. 2,001,002; May 14.
Thompson, Harry F. (See Boals, Eli R., assignor.)
Thompson, Joseph S., assignor to Pacific Electric Manufacturing Corporation, San Francisco, Calif. Electrical switch. 2,001,080; May 14.
Thompson, Milton E., Ridgway, Pa. Synchronous motor. 2,001,439; May 14.
Thomson, Robert, Arlington, N. J., assignor to Dardelet Threadlock Corporation, New York, N. Y. Forming a fluid-tight joint. 2,001,290; May 14.
Thuras, Albert L., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Acoustic device. 2,001,081; May 14.
Tielking, John W. (See Mueller, O. B., Hill, Tielking, and Jones.)
Timken-Detroit Axle Company, The. (See Buckendale, Laurence R., assignor.)
Tobias, Werner, Berlin-Sudende, Germany, assignor to Aktiebolaget Tonsor, Gottenburg, Sweden. Razor blade grinding machine. 2,001,117; May 14.
Tobin, Claude R., St. Louis, Mo. Protecting device for baseball umpires. 2,001,508; May 14.
Tonko, Josef C., Detroit, Mich. Supporting device. 2,001,291; May 14.
Tornsjo, Gustaf E., assignor to Research Foundation, Inc., Columbia, Mo. Surgical needle. 2,001,638; May 14.
Trafton, William M. (See Loepsinger, A. J., and Trafton.)
Trebler, Henning A., Baltimore, Md., assignor to Hanovia Chemical and Manufacturing Company, Newark, N. J. Device for the irradiation of milk with ultra-violet rays. 2,001,555; May 14.
Tritt, Forest G., Barberton, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Partitioned hollow rubber article and making the same. 2,001,594; May 14.
Trobridge, Geoffrey W. (See Gorham, W. G., and Trobridge.)
Tubise Chatillon Corporation. (See Epps, Carl, assignor.)
Tuft, Miles H., Rock Island, assignor to Deere & Company, Moline, Ill. Planter and fertilizer distributor. 2,001,043; May 14.
Turner, Charles A., assignor to Electric Controller Corporation, Chicago, Ill. Flow indicator. 2,001,168; May 14.
Turner, Charles S., Detroit, Mich. Method of and apparatus for superheating. 2,000,906; May 14.
Turner, Charles S., Detroit, Mich. Fluid cooled superheater construction. 2,001,556; May 14.
Turner, Charles S., Detroit, Mich. Superheater assembly. 2,000,907; May 14.
Turner, Harold, Sheffield, assignor to Johnson Matthey & Company Limited, London, England. Silver solder. 2,001,639; May 14.
Turner, Hughes C., New York, N. Y., and H. R. Stacks, Detroit, Mich., said Stacks assignor to said Turner. Display appurtenance to weighing mechanism. 2,001,372; May 14.
Turner Tanning Machinery Company, The. (See Schettler, Gustav A., assignor.)
Twin Disc Clutch Company. (See Pearmain, William J., assignor.)
Uber, Edmond. (See von Vágó, P., and Uber.)
Ukropina, Bosidar J., Los Angeles, Calif. Reenforced concrete pipe joint. 2,001,041; May 14.
Ukropina, Bosidar J., Los Angeles, Calif. Concrete pipe construction. 2,001,042; May 14.
Ukropina, Bosidar J., Los Angeles, Calif. Concrete pipe joint. 2,001,043; May 14.
"Unichem" Chemikalien Handels A.-G. (See Schrauth, Walther, assignor.)
Union Bank of Chicago, as trustee. (See Cowles, Irving, assignor.)
Union Iron Works. (See Smith, Mark E., assignor.)
Union Special Machine Company. (See Kucera, Frank A., assignor.)
Union Switch & Signal Company, The. (See Witmer, Harold G., assignor.)
United Autographic Register Co. (See Winter, Charles L., assignor.)
United Engineering & Foundry Company. (See Talbot, Howard H., assignor.)
United Engineers and Constructors, Inc. (See Haug, John S., assignor.)
United Research Corporation. (See Carpenter, Arthur W., assignor.)
United Research Corporation. (See Law, Duff C., assignor.)
United Shoe Machinery Corporation. (See Bates, Arthur, assignor.)
United Shoe Machinery Corporation. (See Bradbury, A. W., and Hood, assignors.)
United Shoe Machinery Corporation. (See Choice, Frank C., assignor.)
United Shoe Machinery Corporation. (See Duplessis, René E., assignor.)
United Shoe Machinery Corporation. (See Fossa, Joseph, assignor.)
United Shoe Machinery Corporation. (See Hoppe, Otto F., assignor.)
United Shoe Machinery Corporation. (See Keall, Frank B., assignor.)
United Shoe Machinery Corporation. (See Lawson, Axel A., assignor.)
United Shoe Machinery Corporation. (See Seely, T. H., and Ballard, assignors.)
United Shoe Machinery Corporation. (See Sheffield, C. C., and Clarke, assignors.)
United Shoe Machinery Corporation. (See Thomas, William D., assignor.)
Universal Oil Products Company. (See Day, Roland B., assignor.)
Universal Oil Products Company. (See Dubbs, Carbon P., assignor.)
Universal Oil Products Company. (See Nelson, Edwin F., assignor.)
Universal Oil Products Company. (See Seguy, Jean D., assignor.)
Universal Oven Company. (See Elliott, Irwin, assignor.)
Urfer, Adolf, assignor to Pioneer Instrument Company, Incorporated, Brooklyn, N. Y. Apparatus for marking dials of instruments. 2,001,335; May 14.
Utsch, Hermann. (See Weinand, K., Bamberger, and Utsch.)
Uyterhoeven, Willem, Eindhoven, Netherlands, assignor to General Electric Company. Electric discharge apparatus. 2,001,509; May 14.
Uyterhoeven, Willem, and M. J. Druyvesteyn, Eindhoven, Netherlands, assignors to General Electric Company. Gaseous electric discharge lamp device. 2,001,511; May 14.
Uyterhoeven, Willem, and C. Verburg, Eindhoven, Netherlands, assignors to General Electric Company, New York, N. Y. Lamp unit. 2,001,510; May 14.
Vacuum Bolting Cloth Cleaner Corporation. (See Rice, Harry B., assignor.)
Van Hoefen, Harry S., St. Louis, Mo. Lettering guide. 2,001,640; May 14.
Verburg, Cornelis. (See Uyterhoeven, W., and Verburg.)
Victaulic Company Limited. (See Johnson, Percy G., assignor.)
Victor, John H., Evanston, assignor to Victor Manufacturing & Gasket Company, Chicago, Ill. Skeleton metal-backed gasket. 2,001,225; May 14.
Victor Manufacturing & Gasket Company. (See Victor, John H., assignor.)
Viewegh, Heinrich, Vienna, Austria. Hot water central heating system for a plurality of consumer units with indirect measurement of the heat consumed. 2,001,226; May 14.
Villanyi, Charles M., Bayside, assignor to L. Mundet & Son, Inc., New York, N. Y. Closure. 2,001,086; May 14.
Villa, John, assignor to M. W. Bieberbach, Jr., Philadelphia, Pa. Portable electric current tap device. 2,001,671; May 14.
Visking Corporation, The. (See Hewitt, Alfred G., assignor.)
Visser, John, assignor to Grand Rapids Metalcraft Corporation, Grand Rapids, Mich. Receptacle. 2,001,272; May 14.
Vogel-Jorgensen, Mikael, Frederiksberg, near Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Rotary kiln and cooler. 2,001,227; May 14.
Vogt, Clarence W., assignor, by mesne assignments, to Vogt Processes, Incorporated, Louisville, Ky. Packaging and handling frozen comestibles or the like. 2,001,475; May 14.
Vogt, Clarence W., assignor, by mesne assignments, to Vogt Processes, Incorporated, Louisville, Ky. Package and container for ice cream and the like. 2,001,476; May 14.
Vogt, Clarence W., assignor, by mesne assignments, to Vogt Processes Incorporated, Louisville, Ky. Frozen comestible package. 2,001,477; May 14.
Vogt, Clarence W., assignor, by mesne assignments, to Vogt Processes Incorporated, Louisville, Ky. Shipping package. 2,001,478; May 14.

Vogt Processes Incorporated. (See Vogt, Clarence W., assignor.)
Von Grüber-Rehenbürg, Rudolf, and R. Stöbe, assignors to Dr. Alexander Wacker Gesellschaft für Elektrochemische Industrie G. m. b. H., Munich, Germany. Process and apparatus for reducing solvent losses in fabric cleaning. 2,001,656; May 14.
Von Ohlsen, Louis H., New Haven, Conn, assignor to The Safety Car Heating & Lighting Company. Electric regulation. 2,001,557; May 14.
Von Soden-Fraunhofen, A. Graf, and A. Maier, assignors to Zahnradfabrik Friedrichshafen Aktiengesellschaft, Friedrichshafen, Germany. Clutch device for motor vehicles. 2,001,292; May 14.
Von Vágó, Paul, and E. Uber, Budapest, Hungary. Said Uber assignor to said von Vágó. Hydraulic device. 2,001,336; May 14.
Wack, Henry K., assignor to John I. Paulding, Inc., New Bedford, Mass. Electric lamp receptacle. 2,001,657; May 14.
Wacker, Dr. Alexander, Gesellschaft für Elektrochemische Industrie G. m. b. H. (See von Grüber-Rehenbürg, R., and Stöbe, assignors.)
Wagner, Max, Stuttgart, assignor to Daimler-Benz Aktiengesellschaft, Stuttgart-Unterturkheim, Germany. Change speed gear mechanism for motor vehicles. 2,001,082; May 14.
Walkem Corporation. (See Davis, Joseph, and D. J., assignors.)
Wallace, Oscar R., New York, N. Y. Building structure. 2,001,169; May 14.
Walter, Bertha B., executrix. (See Walter, Raymond A.)
Walter, Charles T., assignor to Industrial Patents Corporation, Chicago, Ill. Chilling device. 2,001,083; May 14.
Walter, Charles T., assignor to Industrial Patents Corporation, Chicago, Ill. Heat exchange device. 2,001,084; May 14.
Walter, Charles T., assignor to Industrial Patents Corporation, Chicago, Ill. Heat exchange device. 2,001,085; May 14.
Walter, Charles T., assignor to Industrial Patents Corporation, Chicago, Ill. Slicing machine. 2,001,512; May 14.
Walter, Felix. (See Weiberzahn, K., and Walter.)
Walter, Raymond A., New York, N. Y., deceased, B. B. Walter, executrix, assignor to Goodman Manufacturing Company, Chicago, Ill. Driving mechanism. 2,001,228; May 14.
Wanger, Jullus. (See Barth, K., Schuler, and Wanger.)
Wantz, Julius B., Oak Park, assignor to General Electric X-Ray Corporation, Chicago, Ill. X-Ray tube holder. 2,001,604; May 14.
Ware, Mack, assignor of one-half to J. E. Robinson, Sr., Houston, Tex. Car brake. 2,001,229; May 14.
Warner Bros. Pictures, Inc. (See Gelb, Robert L., assignor.)
Warner Bros. Pictures, Inc. (See Jackman, Fred W., assignor.)
Waters-Genter Company. (See Ireland, Murray, assignor.)
Watson, Ernest A., Birmingham, England, assignor to Eclipse Machine Company, Elmira, N. Y. Automatic starting mechanism for internal combustion engines. 2,001,479; May 14.
Watson, Richard M., Detroit, Mich. Loose leaf binder metal. 2,001,170; May 14.
Wayne, Herbert N., Santa Monica, Calif. Drain pipe cleaning device. 2,001,230; May 14.
Weiberzahn, Karl, and F. Walter, Knapsack near Cologne-on-the-Rhine, assignors to Aktiengesellschaft für Stickstoffdünger, Knapsack, near Cologne-on-the-Rhine, Germany. Preparing acetic acid from acetaldehyde. 2,001,171; May 14.
Weigner, Otto, Vienna, and W. Senft, Weiz, Styria, assignors to "Elin" Aktiengesellschaft für Electrische Industrie, Vienna, Austria. Apparatus for automatic electric arc welding. 2,001,231; May 14.
Weinand, Klaus, Leverkusen-I. G. Werk, C. Bamberger, Cologne-Mulheim, and H. Utsch, Leverkusen-Wiesdorf, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Nitrogen containing anthranquinone derivatives. 2,001,044; May 14.
Weise, Erwin. (See Meyer, W., and Weise.)
Weiss, Abraham, assignor to E. Weiss, New York, N. Y. Registering means for taximeters. 2,001,373; May 14.
Weiss, Edward. (See Weiss, Abraham, assignor.)
Weiss, Sidney, Brooklyn, N. Y. Egg packaging device. 2,001,045; May 14.
Weitzel, Paul R., Newtown, Pa. Floor board. 2,001,402; May 14.
Welch, Ralph J., et al. (See Bagley, William H., Jr., assignor.)
Welch, William E., Dayton, Ohio, assignor to B. J. Baker & Company, Inc., Boston, Mass., and International Proprietaries Incorporated, Dayton, Ohio. Medicinal preparation. 2,001,046; May 14.
Welding Service, Inc. (See Frickey, Royal E., assignor.)
West, Ethra C., Rochester, N. Y. Traffic signaling system. 2,001,440; May 14.
West, Frank W., Bellefonte, Pa. Meat tenderer. 2,001,641; May 14.
Western Cartridge Company. (See Olsen, F., Seavey, and Kerone, assignors.)
Western Cartridge Company. (See Seavey, F. R., and Kerone, assignors.)
Western Electric Company. (See Deakin, Gerald, assignor.)
Western Electric Company. (See Osawa, Juichi, assignor.)
Westinghouse Electric & Manufacturing Company. (See Boddie, Clarence A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Davis, Robert L.)
Wheeler, Oscar J., Jersey City, N. J. Temporarily plugging condenser leaks. 2,001,558; May 14.
Whitaker, Alfred, West Drayton, and C. O. Browne, London, assignors to Electric and Musical Industries Limited, Middlesex, England. Recording sound. 2,001,005; May 14.
White, Franklin R., assignor to The Patent Button Company, Waterbury, Conn. Die or anchor for tack buttons. 2,001,355; May 14.
White Motor Company, The. (See Spiller, William R., assignor.)
Whitehead, William. (See Dreyfus, C., and Whitehead.)
Whitin Machine Works. (See Moss, Joseph, assignor.)
Whitley, Walter R., Methuen, Mass. Manifolding sheet. 2,001,642; May 14.
Whitney, Leslie D., Palo Alto, Calif. Powder dispenser. 2,001,441; May 14.
Wiedmaier, Arthur A., Detroit, Mich. Transmission operating and controlling apparatus. 2,001,337; May 14.
Wikstrom, Frank G., Brooklyn, assignor to Arkell & Smith, Canajoharie, N. Y. Machine for and method of manufacturing bag tubes. 2,001,442; May 14.
Wilcox, Hallie M., Geneva, assignor to The American Fork & Hoe Company, Cleveland, Ohio. Forming golf shafts and the like. 2,001,643; May 14.
Williams, Harry, Detroit, Mich. Automobile doorlock. 2,001,443; May 14.
Williams, John J., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Combination cap and spreader. 2,001,644; May 14.
Williams, Leroy E., assignor to Highway Trailer Company, Edgerton, Wis. Refrigerator doorlock. 2,001,403; May 14.
Williams, William H., assignor to The Dow Chemical Company, Midland, Mich. Drying para-hydroxydiphenyl. 2,001,658; May 14.
Williamson, James E., Maplewood, N. J. Control apparatus. 2,001,320; May 14.
Wilms, Gustav O., assignor, by mesne assignments, to Allen-Bradley Company, Milwaukee, Wis. Circuit breaker. 2,001,559; May 14.
Wilson, C. W. (See Schmidt, Michael, assignor.)
Wilson, Harold F., Los Angeles, Calif. Folding boat. 2,001,006; May 14.
Wilson, John A., South Pasadena, Calif. Knife. 2,001,232; May 14.
Wilson, Thomas J., Pittsburgh, Pa. Cable equalizer. 2,001,007; May 14.
Wilson, Wallace, Philadelphia, Pa. Knitted stocking foot protector. 2,001,293; May 14.
Winter, Charles L., assignor to United Autographic Register Co., Chicago, Ill. Typewriter attachment. 2,001,480; May 14.
Wintroath, John A., Los Angeles, assignor to Wintroath Pumps, Ltd., Alhambra, Calif. Submersible motor driven pump. 2,001,172; May 14.
Wintroath Pumps, Ltd. (See Wintroath, John A., assignor.)
Wiseman, John F., Dorchester, Mass. Device for spraying an antifreeze solution onto windshields. 2,001,338; May 14.
Witmer, Harold G., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway track circuit apparatus. 2,001,047; May 14.
Wood, Joseph H., Chicago, Ill. Coating paper. 2,001,339; May 14.
Woodhouse, John C., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of formic acid. 2,001,659; May 14.
Woodings-Verona Tool Works. (See Kruse, J. F. W., Dawson and Richardson, assignors.)
World Bestos Corporation. (See Nanfeldt, William, assignor.)
X-Ray Shoe Fitter, Inc. (See Fischer, H. G., and Osborn, assignors.)
Yancey, Elliott S., Houston, Tex. Card holder and display stand. 2,001,404; May 14.
Zahnradfabrik Friedrichshafen Aktiengesellschaft. (See Maier, Albert, assignor.)
Zahnradfabrik Friedrichshafen Aktiengesellschaft. (See von Soden-Fraunhofen, A. G. and Maier, assignors.)
Zeitz, Edwin R., New Haven, and S. W. Dennison, Branford, Conn. Reamer grinder. 2,001,173; May 14.
Ziegler, George J., assignor of one-half to C. J. Heyler, Los Angeles, Calif. Clutch mechanism. 2,001,048; May 14.
Zimmerman, Herbert L., assignor to Globe-Union Mfg. Co., Milwaukee, Wis. Skate wheel. 2,001,174; May 14.
Zotos, Georg, Charlottenburg, Germany. Refining oils and the like by steam treatment. 2,001,444; May 14.
Zurcher, Ernest, Schenectady, N. Y., assignor to General Electric Company. Circuit breaker. 2,001,513; May 14.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Anesthetic composition. S. D. Goldberg. 19,569; May 14.

Garments, Manufacturing. F. A. Schmidt and H. H. Kramer. 19,571; May 14.

Petroleum hydrocarbons, Treating. R. Cross. 19,568; May 14.

Wells, Method and apparatus for cementing. E. P. Halliburton. 19,570; May 14.

LIST OF DESIGN INVENTIONS

Airplane. I. I. Sikorsky. 95,619; May 14.
Bottle. G. M. Brenner. 95,576; May 14.
Bottle. E. T. Kessler. 95,589; May 14.
Bottle. S. Kessler. 95,590; May 14.
Bottle. F. N. Lewis. 95,596; May 14.
Bottle. F. Plunkett. 95,609; May 14.
Bottle. C. Sakier. 95,617; May 14.
Brassière, Crocheted. M. E. Blood. 95,575; May 14.
Cabinet for telephone equipment. H. Koch. 95,591; May 14.
Casing for vacuum cleaners. J. R. Morgan. 95,603-4; May 14.
Casket handle. P. L. Parsons. 95,606; May 14.
Console heater. P. Brinckerhoff. 95,577; May 14.
Dish. N. Bel Geddes. 95,573; May 14.
Dispenser for cups or the like. P. A. Lobel. 95,597; May 14.
Doll house and yard, Combined folding. E. E. Saxton. 95,618; May 14.
Game apparatus. L. M. Gibbs. 95,584; May 14.
Goblet or similar article. A. L. Kramer. 95,594; May 14.
Jar. P. Smith. 95,620; May 14.
Jar, Glass. F. J. Petty. 95,607; May 14.
Kettle. E. R. Zettler. 95,621; May 14.
Knit fabric. W. A. Neaves. 95,605; May 14.
Lamp. C. T. Andrews. 95,571; May 14.
Liner for sink strainers. H. C. Harvey. 95,586; May 14.
Mounting for a hand telephone. G. R. Lum. 95,598; May 14.
Pastry cup. U. A. Kreidler. 95,595; May 14.
Plate or article of similar nature, Glass. G. S. Dunbar. 95,579; May 14.
Plate or similar article. A. L. Kramer. 95,592; May 14.
Radioreceivers, Combined controlling and indicating device for. E. Harmon. 95,585; May 14.
Ring or the like, Finger. N. Hershau. 95,587; May 14.
Saw, Band. W. J. Merrigan. 95,601; May 14.
Saw, Bench. W. J. Merrigan. 95,600; May 14.
Saw, Jig. W. J. Merrigan. 95,602; May 14.
Shaving machine. M. Annick. 95,572; May 14.
Shoe. J. A. Galway. 95,583; May 14.
Sign or similar article, Illuminated advertising. I. Holsman. 95,588; May 14.
Spectacle temple. O. B. Carson. 95,578; May 14.
Storage battery case. O. O. Rieser. 95,610-15; May 14.
Tape measure. H. F. Ritter. 95,616; May 14.
Textile fabric. C. vE. Forstmann. 95,581; May 14.
Tray. L. Marder. 95,599; May 14.
Tumbler or similar article. A. L. Kramer. 95,593; May 14
Utensil, Grill. J. L. Bennett and S. A. Platt. 95,574; May 14.
Vending machine casing. B. W. Fry. 95,582; May 14.
Wagon, Coaster. J. B. Eck. 95,580; May 14.
Window silencer. A. P. Pfeil. 95,608; May 14.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 14TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Accumulating system. C. Föhl. 2,001,304; May 14.
Acid anhydrides, Production of fatty. R. Müller and E. Rabald. 2,001,211; May 14.
Acid from acetaldehyde, Preparing acetic. K. Weibezahn and F. Walter. 2,001,171; May 14.
Acid or oleum, Making concentrated sulphuric. I. Hechenbleikner. 2,001,359; May 14.
Acid, Preparation of formic. J. C. Woodhouse. 2,001,659; May 14.
Acid, Preparation of phthalic. L. C. Daniels and A. O. Jaeger. 2,001,053; May 14.
Acoustic device. A. L. Thuras. 2,001,081; May 14.
Actuator for fire protection systems. H. E. Heigis. 2,001,680; May 14.
Adjustable cravat holder. B. B. Manaster. 2,001,261; May 14.
Aeroplane. G. A. Shamberger. 2,001,400; May 14.
Aeroplane sign. B. Knapp. 2,001,200; May 14.
Aeroplane wings, Construction and arrangement of. J. Martin. 2,001,260; May 14.
Air conditioner. C. P. Kelly. 2,001,309; May 14.
Air conditioning apparatus. C. B. Cook. 2,001,410; May 14.
Aircraft, Rotary-winged. J. S. Pecker. 2,000,904; May 14.
Air deflector and water circulator. A. W. Ravening. 2,001,398; May 14.
Air motor. De Nagy. 2,000,930; May 14.
Alarm switch. R. M. Hopkins. 2,001,137; May 14.
Alcohol and preparing the same, Sulphonated naphthenic. W. Schrauth. 2,000,994; May 14.
Alloy, Stable chromium-nickel-iron. V. B. Browne. 2,001,123; May 14.
Alloys, Production of iron-chromium. A. L. Feild. 2,001,015-16; May 14.
Alumina hydrate, Manufacture of. A. Fleischer. 2,00,939; May 14.
Alumina hydrate, Manufacture of. A. Fleischer. 2,000,939; May 14.
Aluminum articles, Coloring. J. F. Leahy. 2,001,427; May 14.
Angle indicator. T. C. Burrows. 2,001,654; May 14.
Aniline from chlorobenzene and ammonia, Manufacture of. W. Prahl and W. Mathes. 2,001,284; May 14.
Anthraquinone derivatives, Nitrogen containing. K. Weinand, C. Bamberger, and H. Utsch. 2,001,044; May 14.
Antipiston slap means. H. P. Phillips. 2,001,544; May 14.
Arch support. A. Kushinsky. 2,001,203; May 14.
Articles of plastic material, Method and mechanism for forming. I. Elliott. 2,001,243; May 14.
Automobile doorlock. H. Williams. 2,001,443; May 14.
Automobile top. J. E. Tamés. 2,001,224; May 14.
Axle and wheel aligner. M. Schmidt. 2,000,993; May 14.
Bag: *See*—
Garment bag. Hand bag.
Bag and making same. R. N. Cundall and W. B. Powell. 2,000,928; May 14.
Bags, Manufacture of. T. M. Royal. 2,000,989; May 14.
Bait clip. A. E. Hopkins. 2,000,954; May 14.
Bait, Fish. W. J. DeWitt. 2,001,055; May 14.
Bait or minnow box. E. E. Moutoux. 2,001,468; May 14.
Basket. W. H. Grinfin. 2,001,571; May 14.
Battery separator. C. F. Haunz. 2,001,421; May 14.
Beaches, Method of and apparatus for cleaning, sterilizing, and smoothing. F. B. Hunter. 2,000,956; May 14.
Beam hanger. W. J. Gourley and F. H. Barney. 2,001,247; May 14.
Bearing: *See*—
Needle bearing. Self-aligning bearing.
Bee feeder. A. C. Kehrle. 2,001,463; May 14.
Beer dispensing equipment. D. Sweeney. 2,001,040; May 14.
Beer wort, Apparatus for aerating. K. Barth, K. Schuler, and J. Wanger. 2,001,564; May 14.
Belt or the like, Safety. E. V. Myers. 2,000,980; May 14.
Belt, Pneumatic life. J. D. Garvey. 2,001,384; May 14.
Belt treatment. L. R. Parker. 2,001,582; May 14.
Belt, Wire. F. M. Gore. 2,001,677; May 14.
Beverage product. K. W. Slissmuth. 2,001,554; May 14.
Blade supporting means for road scrapers. F. E. Arndt. 2,001,648; May 14.
Blowtorch, Dental. E. J. Franwick. 2,001,665; May 14.
Blower, Centrifugal. T. Chester. 2,001,522; May 14.
Board: *See*—
Floor board.
Boat, Folding. H. F. Wilson. 2,001,006; May 14.
Boat, Miniature or toy. F. L. Lindstrom. 2,001,365; May 14.
Bobbin. W. E. Kiefer. 2,001,569; May 14.
Bobbin supporting device. R. G. Lackey. 2,001,667; May 14.
Boiler feed system, Water lock. W. D. Nore. 2,000,431; May 14.
Book holder. W. V. Johnson. 2,001,139; May 14.
Bookmark. J. N. Bane. 2,001,650; May 14.
Bottle closure. F. J. Kaps. 2,001,426; May 14.
Bottling, Method and apparatus for. E. L. Moberg. 2,001,209; May 14.
Bow, Archer's. Y. J. Nyvall. 2,001,470; May 14.
Box: *See*—
Bait or minnow box. Fiber board box.
Brake: *See*—
Car brake. Hydraulic brake.
Brake. P. Pepper. 2,001,830; May 14.
Brakelining and impregnating compound for same, Treating. O. T. Hodnefield. 2,001,194; May 14.
Brake lining with metallic lubrication. W. Nanfeldt. 2,001,539; May 14.
Braking apparatus. A. Cohen. 2,001,599; May 14.
Braking mechanism. F. A. Jimerson. 2,000,959; May 14.
Brassière back connections for evening attire. H. Schottenfels. 2,001,505; May 14.
Bubbler and glass filler, Combination. J. M. Clarke. 2,001,341; May 14.
Buckle. A. Laurain. 2,001,618; May 14.
Buckle. F. E. Stahl. 2,001,072; May 14.
Buckle, Bracelet. J. Sand. 2,001,216; May 14.
Buffer, Traffic. A. W. Mead. 2,000,974; May 14.
Building construction. F. H. Alcott. 2,000,897; May 14.
Building construction. T. J. Foster. 2,001,605; May 14.
Building construction, System of. J. B. Strauss. 2,001,162; May 14.
Building structure. O. R. Wallace. 2,001,169; May 14.
Bulk dispensing device. W. Rabkin. 2,001,110; May 14.
Bumper mechanism. P. N. Cherpes and C. E. Kollias. 2,001,093; May 14.
Burner: *See*—
Trash burner.
Burner for gas heated radiators. W. T. Rasch. 2,001,397; May 14.
Burner for liquid fuel. V. Ipold. 2,001,611; May 14.
Bzl, bzl'-dibenzanthronyl, Manufacture of. E. T. Howell. 2,001,063; May 14.
Cabinet, Kitchen. C. B. Parsons. 2,000,981; May 14.
Cable, G. J. Stanley. 2,001,319; May 14.
Cable equalizer. T. J. Wilson. 2,001,007; May 14.
Cables, Manufacture of electric. M. Klein. 2,001,065; May 14.
Calcium sulphates, Manufacture of. O. P. Gephart. 2,001,245; May 14.
Calk for horseshoes, Resilient. C. G. Akerburg. 2,001,118; May 14.
Camera. A. W. Caps and P. Landrock. 2,001,596-7; May 14.
Camera, Submarine. F. W. Jackman. 2,001,682-3; May 14.
Can dump for ice machines. W. H. Aubrey. 2,001,008; May 14.
Cap and spreader, Combination. J. J. Williams. 2,001,644; May 14.
Car brake. M. Ware. 2,001,229; May 14.
Car, Mine. D. U. Rich. 2,001,692; May 14.
Car with trailer for camping, Motor. A. M. L. Levoyer. 2,001,639; May 14.
Card dealing device. R. C. Smith. 2,001,220; May 14.
Card holder and display stand. E. S. Yancey. 2,001,404; May 14.
Cards, containers, and the like with raised figures, Manufacture of display. C. C. Church. 2,000,922; May 14.
Carrier for laundry assorting machines. A. F. Hanney. 2,001,386; May 14.
Case: *See*—
File case. Vanity case.
Show case.
Casting mold. F. M. Poe. 2,001,583; May 14.
Cathode for electric discharge devices. E. Römhild. 2,001,548; May 14.
Cellulose esters, Treatment of. C. Dreyfus and L. N. Lee. 2,000,934; May 14.
Cellulose unit and making same, Laminated. I. F. Laucks. 2,001,276; May 14.
Cement, Arsenic-containing. G. J. J. Smitt. 2,001,506; May 14.
Cement product, Portland. C. G. Gilbert. 2,001,608; May 14.
Cement sole-attaching machine. W. D. Thomas. 2,001,002; May 14.
Centrifugal. F. Schaum. 2,001,550; May 14.
Chain link. P. K. Dewar. 2,000,932; May 14.

Chains, Making jewelry. F. W. Bopp. 2,001,483; May 14.
Chair: *See*—
Foldable chair.
Chilling device. C. T. Walter. 2,001,083; May 14.
Chopper, Nut. C. A. Sundstrand. 2,001,075; May 14.
Chord finder for tenor banjos. R. L. Golden. 2,001,191; May 14.
Circuit breaker. G. O. Wilms. 2,001,559; May 14.
Circuit breaker. E. Zurcher. 2,001,513; May 14.
Circuit breakers, Control of. H. Bany. 2,001,563; May 14.
Circuit controlling and indicating device. B. G. Olving. 2,001,432; May 14.
Circuit, Electric valve translating. B. A. Case. 2,001,567; May 14.
Circuit, Oscillator. P. O. Farnham. 2,001,694–5; May 14.
Circuit rectifier and filter. R. Rechnitzer. 2,000,986; May 14.
Circuit, Transmitting. C. A. Boddie. 2,001,450; May 14.
Circulating pump. C. A. Ruesenberg. 2,001,369; May 14.
Clasp, Bracelet. C. A. Domler. 2,000,056; May 14.
Classifier. H. A. Cuppy. 2,001,184; May 14.
Clay products, Making cellular. H. D. Foster. 2,001,664; May 14.
Cleaner: *See*—
Gear case cleaner. Suction cleaner.
Portable suction cleaner.
Clip: *See*—
Bait clip.
Clock. N. G. Horwitt and M. Katcher. 2,001,195; May 14.
Clock, Geographical. C. B. Segovia. 2,001,633; May 14.
Closure. C. M. Villanyi. 2,001,086; May 14.
Closure fastening means. S. Quisling. 2,000,983; May 14.
Closure for dispensing containers. W. C. Nenstiehl. 2,001,627; May 14.
Closure for letters, Safety. A. Schülze. 2,001,434; May 14.
Closure guide. J. Ritter, Jr. 2,001,157; May 14.
Clutch: *See*—
Freewheeling clutch.
Clutch. W. J. Pearmain. 2,001,395; May 14.
Clutch device for motor vehicles. A. G. von Soden-Fraunhofen and A. Maier. 2,001,292; May 14.
Clutch mechanism. G. J. Ziegler. 2,001,048; May 14.
Clutching device. W. Brase. 2,001,120; May 14.
Coating composition, Liquid. H. Heckel. 2,001,422; May 14.
Coating device. F. P. Carlson. 2,001,091; May 14.
Collar protecting device. W. J. Lanyon. 2,001,617; May 14.
Collector for fuller's earth. B. Manross. 2,000,971; May 14.
Composite reaction product. C. Ellis. 2,000,937; May 14.
Compressor, Hydraulic. S. R. Seillière. 2,001,269; May 14.
Concrete pipe construction. B. J. Ukropina. 2,001,042; May 14.
Concrete pipe joint. B. J. Ukropina. 2,001,043; May 14.
Concrete pipe joint, Reinforced. B. J. Ukropina. 2,001,041; May 14.
Concrete pumping system. C. F. Ball. 2,001,661; May 14.
Condenser: *See*—
Electrical condenser. Variable condenser.
Multiple unit condenser.
Condenser leaks, Temporarily plugging. O. J. Wheeler. 2,001,558; May 14.
Condenser winding machine. J. Q. Holmes. 2,001,347; May 14.
Conduit. R. V. Proctor and C. B. Cushwa. 2,001,315; May 14.
Conduit and making the same. R. A. Shipley. 2,001,316; May 14.
Confection. R. G. Thoke. 2,001,371; May 14.
Connecter: *See*—
Thrust screw connecter
Connecter for electric conducting cables, Solderless. H. C. Guhl. 2,001,131; May 14.
Connection, Resilient. C. Lecler. 2,001,257; May 14.
Contacts, Making self-cleaning. A. Alsaker. 2,000,909; May 14.
Container: *See*—
Vacuum container.
Container. I. N. Jordan. 2,001,140; May 14.
Container. M. D. Kerr. 2,001,464; May 14.
Container for fruit and the like, Retailing. C. Monschein. 2,001,149; May 14.
Control apparatus. J. E. Williamson. 2,001,320; May 14.
Control mechanism, Automatic. H. E. Balsiger. 2,001,447; May 14.
Control mechanism, Automatic. G. P. E. Howard. 2,001,348; May 14.
Control mechanism for electric motors, Automatic. A. C. Durdin, Jr. 2,000,899; May 14.
Control mechanism for warping machines and the like. F. Klein. 2,001,064; May 14.
Control system. J. H. Payne. 2,001,543; May 14.
Cooker, Electric. W. C. Rehm. 2,001,285; May 14.
Cordage, Lubricated. W. D. Hodson. 2,000,951; May 14.
Cord material, Coating. J. V. James. 2,001,575; May 14.
Corn cutting machine. F. W. Douthitt. 2,001,457; May 14.
Corn husker. A. Nuttelman. 2,001,351; May 14.
Cotton machine. J. A. Streun. 2,001,223; May 14.
Counterbalancing device. R. R. Bloss and R. C. Pfeil. 2,001,662; May 14.
Coupler. E. P. Kinne. 2,001,197; May 14.
Coupler for jointed dolls. J. Stein. 2,001,334; May 14.
Coupler operating mechanism. W. F. Richards. 2,000,987; May 14.
Coupling. F. H. Exell. 2,001,244; May 14.
Cover and towel forming machine, Dual purpose seat. G. Schaefer, Jr. 2,001,112; May 14.
Crane and wire rack. L. E. Mosher. 2,001,034; May 14.
Crossing gate, Automatic railway. A. E. McClaren. 2,001,147; May 14.
Current tap device, Portable electric. J. Villa. 2,001,671; May 14.
Cylinder paper machine. S. V. Minskey, L. T. Foley, and H. Leopold. 2,001,208; May 14.
Cylindrical articles and method and apparatus for manufacturing the same. G. E. Landt. 2,001,031; May 14.
Defrosting system. W. R. Kitzmiller. 2,001,027–8; May 14.
Demountable wheel. W. K. Dodge. 2,001,242; May 14.
Device for spraying an antifreeze solution onto windshields. J. F. Wiseman. 2,001,338; May 14.
Dials of instruments, Apparatus for marking. A. Urfer. 2,001,335; May 14.
Die or anchor for tack buttons. F. R. White. 2,001,355; May 14.
Diesel engine. W. Lehmann. 2,000,903; May 14.
Dishwashing machine. M. J. Kehoe. 2,001,328; May 14.
Disks, Manufacturing radially corrugated. J. A. Spencer. 2,001,553; May 14.
Dispenser: *See*—
Powder dispenser.
Dispensing attachment for cans. S. M. Abbott. 2,001,481; May 14.
Display appurtenance to weighing mechanism. H. C. Turner and H. R. Stacks. 2,001,372; May 14.
Display device. R. E. Paige. 2,001,499; May 14.
Display sign. L. J. Huggett. 2,001,424; May 14.
Doorlock, Refrigerator. L. E. Williams. 2,001,403; May 14.
Doors, Actuating folding. E. G. Mathauer. 2,001,103; May 14.
Dough divider. W. G. Kirchoff. 2,001,026; May 14.
Dowel pin. R. Krnansky. 2,001,144; May 14.
Drawbar, Automatic extensible. R. N. Burton. 2,001,408; May 14.
Drier: *See*—
Line drier.
Drier. A. G. Forty. 2,001,345; May 14.
Drill boxing. L. J. Fellay. 2,001,057; May 14.
Drilling apparatus, Underwater. A. F. Johnson. 2,001,576; May 14.
Drilling machine. L. J. Fellay. 2,001,058; May 14.
Drilling machine, Rotary. W. J. Mitchell. 2,000,976; May 14.
Drive for machine tools, Hydraulic. W. Ferris. 2,001,059; May 14.
Driving mechanism. R. A. Walter. 2,001,228; May 14.
Duplex stand. G. Abitsch. 2,001,646; May 14.
Dyes and their preparation production, Azo. M. A. Dahlen. 2,001,526; May 14.
Dyes, Ortho-hydroxyazo. W. Benade. 2,001,010; May 14.
Dyestuff, Anthraquinone acridone vat. I. Gubelmann, R. J. Goodrich, and W. Dettwyler. 2,001,419; May 14.
Dyestuffs and their production, Acridone dianthrimide vat. I. Gubelmann, R. J. Goodrich, and W. Dettwyler. 2,001,418; May 14.
Edging machine. J. Fossa. 2,000,940; May 14.
Egg packaging device. S. Weiss. 2,001,045; May 14.
Electric compensator, Binaural. R. B. Colton and H. C. Mabbott. 2,000,924; May 14.
Electric discharge apparatus. W. Uyterhoeven. 2,001,509; May 14.
Electric discharge device and operating same. L. J. Buttolph. 2,001,519; May 14.
Electric discharge device, Gaseous. C. Bol. 2,001,516; May 14.
Electric discharge device, Gaseous. W. de Groot and M. H. Druyvesteyn. 2,001,528; May 14.
Electric discharge device, Gaseous. G. Gaidies. 2,001,490; May 14.
Electric discharge device, Gaseous. A. Rüttenauer and O. Fritze. 2,001,501; May 14.
Electric discharge device system. G. W. Garman. 2,000,530; May 14.
Electric discharge devices, Method of and apparatus for starting. L. J. Buttolph. 2,001,517; May 14.
Electric flasher. L. Ludwig. 2,001,580; May 14.
Electric lamp, Portable. J. W. Akers. 2,001,406; May 14.
Electric motor, Submergible. A. Arutunoff. 2,001,649; May 14.
Electric regulation. L. H. von Ohlsen. 2,001,557; May 14.
Electric starting motor. J. Bohli. 2,001,178; May 14.
Electric translating device. W. Meyer and E. Welse. 2,001,498; May 14.
Electrical condenser. P. J. Packman. 2,001,153; May 14.
Electrical contact for articulated vehicles. A. W. Mollnare. 2,001,393; May 14.
Electrical device. A. Nyman. 2,001,282; May 14.
Electrical distribution, System of. H. Hintze. 2,001,532; May 14.
Electrical disturbances, Reducing. D. G. McCan. 2,001,622; May 14.
Electrical resistance unit. C. H. Boyles. 2,001,297; May 14.

Electrical switch. J. S. Thompson. 2,001,080; May 14.
Electron discharge device. C. E. Fay. 2,000,938; May 14.
Electron discharge device. A. L. Samuel. 2,000,990; May 14.
Elevator safety apparatus. F. Hymans. 2,001,361; May 14.
Elevator signaling system. R. H. Gaylord. 2,000,942; May 14.
Engine: *See*—
Diesel engine. Reciprocating engine.
Internal combustion engine.
Engine control for hoists, Automatic gas. E. Erickson. 2,001,674; May 14.
Engine support for automobiles. F. and E. L. Kulick. 2,001,629; May 14.
Envelope. J. W. Bear and R. R. Sublette. 2,001,340; May 14.
Envelope. Combined mailing and return. H. Elbaum. 2,001,489; May 14.
Envelope stuffing machine. H. C. Baker. 2,001,009; May 14.
Equalizing attachment for trucks. I. E. Blair. 2,000,914; May 14.
Escutcheon plate and handle assembly. H. F. Keil. 2,001,666; May 14.
Ether of hydroabietyl alcohol. C. O. Kenke and M. A. Prahl. 2,001,275; May 14.
Ethers of cellulose, Production of arakyl. E. J. Lorand. 2,001,102; May 14.
Evaporator for refrigerating systems. D. F. Newman. 2,001,540; May 14.
Excavating and conveying machine. H. E. Satre. 2,001,503; May 14.
Excavating, hoisting, dumping, and conveying apparatus. H. E. Satre. 2,001,502; May 14.
Expansion joint, Fluid sealing. F. L. Haushalter. 2,001,573; May 14.
Exterminator, Insect. W. F. Folmer and H. L. Chapin. 2,001,414; May 14.
Extractor: *See*—
Vacuum extractor.
Eyebrow, Artificial. A. Steiner. 2,001,589; May 14.
Fabric: *See*—
Semiabrasive fabric.
Fabrics, Apparatus for coating. A. W. Drobile. 2,001,488; May 14.
Fastener-applying implement. A. H. Maynard. 2,001,104; May 14.
Fasteners, Method and machine for making. G. Sundback. 2,001,591; May 14.
Fastening device. P. Sidney. 2,001,401; May 14.
Feeder: *See*—
Bee feeder. Toothbrush paste feeder.
Feeding device. F. C. Haren and J. P. Sapp. 2,001,572; May 14.
Fiber board box, Reenforced. K. W. Petersen. 2,000,982; May 14.
Fibrous material, Treatment of artificial. L. Lilienfeld. 2,001,621; May 14.
Filaments, yarns or threads, Production artificial. W. I. Taylor and L. B. Gibbins. 2,001,000; May 14.
File case, Transfer. H. J. Anglin. 2,001,561; May 14.
Film handling device, Multiple. B. Burns and H. B. Lewis. 2,001,322; May 14.
Film material, Making transparent. E. M. Kratz. 2,001,389; May 14.
Film printing machine, Stereoscopic moving picture. K. F. Marx. 2,001,280; May 14.
Filter. C. W. Hansell. 2,001,387; May 14.
Finding for a clasp. C. Pearson. 2,001,213; May 14.
Finishing machine. F. B. Krall. 2,000,961; May 14.

Mounting, Motor. W. R. Griswold. 2,001,020; May 14.
Mounting, Motor. O. E. Rhodes and F. L. Rockwell. 2,001,111; May 14.
Multiple unit gang condenser. S. Cohen. 2,001,600; May 14.
Music, Apparatus for the production of. B. F. Miessner. 2,001,301; May 14.
Music, Method and apparatus for the production of. B. F. Miessner. 2,001,392; May 14.
Needle bearing, Closed removable. G. Eisgruber. 2,001,675; May 14.
Needle, Surgical. G. E. Tornsjo. 2,001,638; May 14.
Nickel from nickel salt solutions, Electrolytic deposition of. A. M. Grönningsæter. 2,001,585; May 14.

Oil conversion, Hydrocarbon. E. F. Nelson. 2,001,150; May 14.
Oil, Stabilized hydrocarbon. C. K. Parker. 2,001,108; May 14.
Oil, Treatment of hydrocarbon. J. D. Seguy. 2,001,159; May 14.
Oils and the like by steam treatment, Refining. G. Zotos. 2,001,444; May 14.
Oils, Converting hydrocarbon. L. de Florez. 2,001,301; May 14.
Oils, Cracking hydrocarbon. H. L. Pelzer. 2,001,313–14; May 24.
Oils, Process and apparatus for the treatment of heavy. A. Joseph. 2,000,960; May 14.
1,4-diamino-2-aryloxyanthraquinone-3-sulphonic acid, Production of. B. Stein and F. Baumann. 2,001,221; May 14.
Opener, Automatic garage door. J. Frezzolini. 2,001,416; May 14.
Opener, Can. P. H. Farrell. 2,001,303; May 14.
Opener, Can or jar. F. K. Krag. 2,000,962; May 14.
Ores with sulphuric acid, Treating. N. C. Christensen. 2,001,409; May 14.
Ortho-dihydroxy compounds of the benzene series, Preparing. F. B. Downing, R. G. Clarkson, and H. H. Reynolds. 2,001,014; May 14.
Oscillation generation. C. W. Hansell. 2,001,132; May 14.
Oscillator, High frequency. C. W. Hansell. 2,001,133; May 14.
Oscillator, Vacuum tube. P. O. Farnham. 2,001,413; May 14.
Outsole removing machine. A. A. Lawson. 2,000,963; May 14.
Package and container for ice cream and the like. C. W. Vogt. 2,001,476; May 14.
Package, Shipping. C. W. Vogt. 2,001,478; May 14.
Packages, Frozen comestible. C. W. Vogt. 2,001,477; May 14.
Packaging and handling frozen comestibles or the like. C. W. Vogt. 2,001,475; May 14.
Packaging machine. R. T. Adams, R. S. Poole, and M. Raymer. 2,001,175; May 14.
Packing for pipe joints. P. G. Johnson. 2,001,614; May 14.
Packing plate with screen lining and manufacturing same. K. Klinger. 2,001,616; May 14.
Pad: *See*—
Furniture pad.
Pan for combustible gas generators, Jointed ash. J. S. Haug. 2,001,274; May 14.
Paper and method of preparing, Gummed. G. R. Alden. 2,001,049; May 14.
Paper, Coating. J. H. Wood. 2,001,339; May 14.
Paper, Creped. C. M. Howell and J. d'A. Clark. 2,001,023; May 14.
Paper, Manufacture of. O. P. Gephart. 2,001,246; May 14.
Para hydroxydiphenyl, Drying. W. H. Williams. 2,001,658; May 14.
Partition, Metal. L. G. Jacobson. 2,001,574; May 14.
Pavement, Resurfacing concrete. W. H. Moseley. 2,000,977; May 14.
Pen and filler, Fountain. G. H. Osterhout. 2,001,263; May 14.
Pen filling device, Self filling fountain. H. C. Hitt. 2,000,950; May 14.
Perambulator. M. Fehre. 2,001,343; May 14.
Percolator construction. J. E. Smith. 2,001,160; May 14.
Perforating device. H. D. Snyder and E. Kern. 2,001,161; May 14.
Petroleum product. D. R. Stevens and W. A. Gruse. 2,001,634; May 14.
Phase modulating system. J. Osawa. 2,001,107; May 14.
Phenols of tars and similar mixtures, Extracting the. R. M. Jarry. 2,001,613; May 14.
Photographic copy conveyer. A. W. Caps and P. Landrock. 2,001,598; May 14.
Photographic enlarger. A. Grant. 2,001,062; May 14.
Phototube. D. C. Law. 2,001,685; May 14.
Picker. J. Moss. 2,001,687; May 14.
Pictures, Producing cinematographic three- and multicolor. G. Heymer. 2,001,250; May 14.
Pin: *See*—
Dowel pin.
Pipe cleaning device, Drain. H. N. Wayne. 2,001,230; May 14.
Pipe for smoking. M. C. H. Jacquemin. 2,001,612; May 14.
Pipette, Gas absorption. M. P. Matuszak. 2,001,581; May 14.
Piping, welding or the like, Manufacturing. A. W. Rockwood. 2,001,693; May 14.
Piston assembly. R. C. McAllister. 2,000,970; May 14.
Piston lift for pumping of liquids. E. K. Burgher. 2,001,012; May 14.
Piston ring. H. F. Bedwell. 2,001,119; May 14.
Pitch propeller, Controllable. H. A. Fletcher. 2,001,189; May 14.
Plant support. W. F. Balousek. 2,000,911; May 14.
Planter and fertilizer distributor. M. H. Tuft. 2,001,003; May 14.
Planter, Lister. H. E. Altzelt. 2,001,560; May 14.
Plaster composition. M. Omahsky. 2,001,311; May 14.
Plaster composition and working the same. K. H. Crutchfield. 2,000,927; May 14.
Plates, Apparatus for forming. G. R. Hanb. 2,001,460; May 14.
Plating, Reverse. J. H. and H. Booton. 2,001,653; May 14.
Plug: *See*—
Safety plug.
Plunger lift apparatus. C. N. Scott. 2,001,551; May 14.
Plunger lift apparatus, Operating. N. H. Ricker. 2,001,547; May 14.
Plunger lift control device. C. N. Scott. 2,001,552; May 14.
Polishing machine, Alternating action. B. De Nagy. 2,000,931; May 14.
Pop safety valve. H. S. Baker. 2,001,375; May 14.
Portable heater. J. R. MacGregor and E. E. Edwards. 2,001,068; May 14.
Portable suction cleaner. A. A. Breuer. 2,001,121; May 14.
Postal machine, Hand operated. C. D. Ryan. 2,001,287; May 14.
Powder dispenser. L. D. Whitney. 2,001,441; May 14.
Powder, Metal. C. Hardy. 2,001,134; May 14.
Press: *See*—
Garment or ironing press.
Pressure head for oil wells. E. A. Johnson. 2,001,654; May 14.
Pressure measuring system. P. B. Flanders. 2,001,096; May 14.
Priming composition. F. Olsen, F. R. Seavey, and E. B. W. Kerone. 2,001,212; May 14.
Printing machine. J. A. Carlson. 2,001,520; May 14.
Propeller shaft. B. A. Swennes. 2,001,165–7; May 14.
Protecting device for baseball umpires. C. R. Tobin. 2,001,508; May 14.
Protective system, Undervoltage. J. W. Owens. 2,001,542; May 14.
Protective systems, Time delay undervoltage. B. W. Jones. 2,001,494; May 14.
Protector: *See*—
Stocking foot protector.
Protector for covers of loose leaf binders. F. C. Bingham. 2,001,651; May 14.
Protractor. L. G. Cox. 2,000,926; May 14.
Pulp treating process. J. D. Rue. 2,001,268; May 14.
Pump: *See*—
Circulating pump. Motor driven pump.
Pump and distributing apparatus for internal combustion engines, Fuel. C. L. Cummins. 2,001,126; May 14.
Pump operating mechanism. A. M. Matherne. 2,001,033; May 14.
Pump or engine. S. B. Brown. 2,001,011; May 14.
Puzzle. L. R. Lane. 2,001,067; May 14.
Pyridine compounds and their production. M. A. Kunz, G. Kochendoerfer, and K. Koeberle. 2,001,201; May 14.
Rack: *See*—
Crane and wire rack.
Radioreceiver and producing same, Pretuned. H. M. Lewis. 2,001,146; May 14.
Radio tuning apparatus. S. Tarzian. 2,001,076; May 14.
Range, Electric. R. John. 2,001,326; May 14.
Razor blade. P. N. Peters. 2,001,155; May 14.
Razor blade grinding machine. W. Tobias. 2,001,117; May 14.
Razor blade sharpening device. R. L. Gardner and R. D. Lloyd. 2,000,941; May 14.
Razor, Safety. C. S. Klegman. 2,001,198; May 14.
Razor, Safety. H. R. Segal. 2,001,218; May 14.
Reaming tool. C. E. Sturgis. 2,001,635; May 14.
Receiver detector control. D. Grimes. 2,000,945; May 14.
Receptacle: *See*—
Lamp receptacle.
Refrigerator article receptacle.
Receptacle. T. J. Abele. 2,001,445; May 14.
Receptacle. J. Visser. 2,001,272; May 14.
Reciprocating engine. J. H. Johnson. 2,001,577; May 14.
Reel: *See*—
Fishing reel.
Regulator: *See*—
Fluid pressure regulator.
Refrigerating apparatus. H. J. Dick. 2,001,323; May 14.
Refrigerating apparatus, Intermittent absorption. D. B. Knight. 2,001,143; May 14.
Refrigerating apparatus and method, Intermittent absorption. D. B. Knight. 2,001,142; May 14.
Refrigerating system. C. E. L. Lipman. 2,000,965; May 14.
Refrigerator. H. W. Kleist. 2,001,199; May 14.
Refrigerator and temperature control device. V. W. Moody. 2,001,105; May 14.
Refrigerator article receptacle. H. H. Gilbert and J. R. Replogle. 2,000,944; May 14.
Regulating valve. C. E. Lucke. 2,000,966; May 14.
Resinous and varnish composition and preparation thereof. R. E. Coleman. 2,001,525; May 14.
Resinous product and making same. J. V. Meigs. 2,001,430; May 14.
Revetment. J. R. Fordyce. 2,001,130; May 14.
Revivifier. B. Manross. 2,000,972; May 16.
Rig for rotary drills. W. J. Mitchell. 2,000,975; May 14.
Ring: *See*—
Piston ring.
Rings in turbine rotors, Assembling packing. F. Herrlinger. 2,001,492; May 14.

Riveting. A. L. Lambert and W. J. Meinel. 2,001,145; May 14.
Road structures, Resurfacing and widening. W. H. Moseley. 2,000,978; May 14.
Rock drill. J. C. Curtis. 2,001,127; May 14.
Rod guide, rod check and paraffin swab, Combined. G. E. Slaughenhop. 2,001,270; May 14.
Rope, Wire. W. D. Hodson. 2,000,952; May 14.
Rotor for helicopters. C. Dornier. 2,001,529; May 14.
Rubber article and making the same, Partitioned hollow. F. G. Tritt. 2,001,594; May 14.
Rubber composition and making the same. F. H. Bergeim. 2,001,176; May 14.
Rubber composition and preserving rubber. R. L. Sibley. 2,001,071; May 14.
Rubber latex of rubber articles carrying imprints, Manufacture from. J. B. Crockett. 2,001,125; May 14.
Rugs of pile fabrics, Construction of. C. H. Davison. 2,001,351; May 14.
Rugs of pile fabrics, Construction of. C. H. Davison. 2,001,527; May 14.
Sacking and weighing apparatus, Automatic. R. Jarrier. 2,000,938; May 14.
Safety device, Fusible. R. H. Moore and R. B. Allen. 2,001,636; May 14.
Safety plug. I. L. Dunn. 2,001,458; May 14.
Salts of diaso amino tetrazole, Manufacture of copper ammonium. W. Brün. 2,001,299; May 14.
Salts of keto aromatic acids. L. C. Daniels and A. O. Jaeger. 2,001,380; May 14.
Scale, Coin operated weighing. L. O. Kelley. 2,001,388; May 14.
Scale strip to a scale bar, Securing a. C. A. Fuchs. 2,001,009; May 14.
Screen corner construction. E. G. Huff. 2,001,681; May 14.
Screening apparatus. T. Sandy. 2,001,549; May 14.
Screening apparatus. L. E. Soldan. 2,000,998; May 14.
Screw cap and forming same, Double. M. A. Greene. 2,001,248; May 14.
Sealing means. H. E. Johnson. 2,001,138; May 14.
Self-aligning bearing. E. A. Freed. 2,001,383; May 14.
Self-starting synchronous motor. C. Finch. 2,001,604; May 14.
Semiabrasive fabric. D. J. Mayer. 2,001,281; May 14.
Sensitive materials, Handling. F. R. Seavey and E. B. W. Kerone. 2,000,995; May 14.
Separator: *See*—
Battery separator.
Sewing machine. A. W. Bradbury and R. E. Hood. 2,001,298; May 14.
Sewing machine, Shoe. O. F. Hoppe. 2,001,308; May 14.
Sewing machine, Shoe. C. C. Sheffield and G. Clarke. 2,001,289; May 14.
Sewing machines, Binder support for. F. A. Kucera. 2,001,446; May 14.
Sewing machines, Work supporting means for. C. A. Dearborn. 2,000,929; May 14.
Shade fixture, Window. W. H. Dollinger. 2,001,603; May 14.
Shaft connection, Universal. P. F. Sharpe. 2,000,997; May 14.
Sharpener, Drill. G. C. Pearson. 2,001,689; May 14.
Sheet delivery mechanism for printing presses. H. M. Barber. 2,001,295–6; May 14.
Sheet material, Drying of. G. A. Schettler. 2,000,991; May 14.
Shelf, Telephone. E. L. Early. 2,001,324; May 14.
Shock absorber. E. L. Kunze. 2,001,202; May 14.
Shoe marking machine. B. W. Freeman. 2,001,019; May 14.
Shoe parts, Method of and machine for performing operations upon. R. E. Duplessis. 2,000,936; May 14.
Shoes having stiffened parts, Manufacture of. S. P. Lovell. 2,001,632; May 14.
Shoes, Treating. H. Metz and R. H. Brown. 2,001,069; May 14.
Show case. J. E. Mullen. 2,001,106; May 14.
Sieve liner. H. B. Rice. 2,001,631; May 14.
Sign: *See*—

Toaster. M. Ireland. 2,001,362; May 14.
Tool: *See*—
Heating tool. Wire gripping tool.
Reaming tool.
Tools, Head slide for automatic machine. H. W. Rupple. 2,001,586; May 14.
Toothbrush paste feeder, Automatic. H. A. Appel and E. Le Blanc. 2,000,910; May 14.
Toy, Animated. M. Beerline. 2,001,482; May 14.
Toy looping wheel. O. Marten. 2,001,205; May 14.
Toy mechanism, Flying. W. Kroelling. 2,001,496; May 14.
Toy pistol. E. H. Bergstrom. 2,001,449; May 14.
Toy, Walking. J. and D. J. Davis. 2,001,013; May 14.
Toy, Wheeled. H. Müller. 2,001,625; May 14.
Track circuit apparatus, Railway. H. G. Witmer. 2,001,047; May 14.
Traction, Electric. E. Guignard. 2,001,357; May 14.
Traffic signaling system. E. C. West. 2,001,440; May 14.
Trailer. J. C. Suchland. 2,000,999; May 14.
Trailer hitch. F. J. Boehler. 2,001,451; May 14.
Train-control apparatus. F. J. Sprague. 2,001,163; May 14.
Train control system. T. Bodle. 2,000,917; May 14.
Transformer for the conversion of polyphase currents. H. A. W. Klinkhamer. 2,001,465; May 14.
Transformer, Three-phase rectifier. R. L. Davis. 2,001,454; May 14.
Transmission control in two-way signaling systems. B. G. Bjornson. 2,001,088; May 14.
Transmission for transmitting power at different speed ratios from a driver shaft to a driven shaft. C. Klttilsen. 2,001,141; May 14.
Transmission, Hydraulic. C. E. Ives. 2,001,325; May 14.
Transmission networks. H. W. Bode. 2,001,090; May 14.
Transmission operating and controlling apparatus. A. A. Wiedmaier. 2,001,337; May 14.
Transmission system for railways, High frequency. E. F. W. Alexanderson. 2,001,514; May 14.
Trash burner. H. H. Heuston. 2,001,360; May 14.
Tray. W. R. Stuck. 2,001,438; May 14.
Tray and the like, Ash. A. S. Bloom. 2,000,916; May 14.
Tube sheet for boilers. J. R. Smith. 2,001,333; May 14.
Tubing and preparing the same, Shirred. A. G. Hewitt. 2,001,461; May 14.
Turpentine-face scribe. T. N. Busch. 2,001,655; May 14.
Typewriter attachment. C. L. Winter. 2,001,480; May 14.
Umbrellas, Insert for. H. W. Montgomery. 2,001,623; May 14.
Utensil, Cooking. E. Princiotta. 2,001,352; Mar. 14.
Vacuum container, Double-walled. A. H. Payson. 2,001,154; May 14.
Vacuum extractor. D. Gessner. 2,001,417; May 14.
Valve: *See*—
Gate valve. Regulating valve.
Pop safety valve. Throttle valve.
Valve. P. L. Irving. 2,001,251; May 14.
Valve. E. R. Noll. 2,001,035; May 14.
Valve. J. Podolsky. 2,001,545; May 14.
Valve. P. Spence. 2,001,318; May 14.
Valve control. R. W. Crossen, Jr. 2,001,453; May 14.
Valve for force feed lubricating systems, Lubricant discharge. I. Cowles. 2,000,925; May 14.
Valve mechanism, Flushing. W. A. Lester. 2,001,390; May 14.
Vanity case. A. F. Reilly. 2,001,690; May 14.
Vanity case construction. A. F. Reilly. 2,001,691; May 14.
Vaporizer, Electrical. J. Robinson. 2,000,988; May 14.
Variable condenser, Electric. P. Grassmann. 2,001,459; May 14.
Vault, Burial. C. O. A. Brunk. 2,000,919; May 14.
Vehicle jack. J. M. Madigan. 2,001,467; May 14.
Vehicle jack. R. H. Reed. 2,001,265; May 14.
Ventilator attachment for toilet seats. M. O. Teetor. 2,001,592; May 14.
Ventilator for toilet bowls, Air purifying. M. O. Teetor. 2,001,593; May 14.
Vessel, Baking. W. T. Karten. 2,001,615; May 14.
Voltage compensation in signaling circuits. W. T. Rea and T. C. Henneberger. 2,001,037; May 14.
Votive light. T. M. O'Connell. 2,001,312; May 12.
Wall, Building. L. S. Munson. 2,001,469; May 14.
Wall-fluing, Removable. G. Holderbach. 2,001,136; May 14.
Wall structure, Double. W. W. Smith. 2,001,473; May 14.
Warp-beaming machine. V. J. Diefenderfer and A. C. Lova. 2,001,486; May 14.
Washboard. C. T. Gilbert. 2,000,943; May 14.
Water heater. J. T. Barrow. 2,001,515; May 14.
Water in storage batteries, Automatic regulation of. S. Morse. 2,001,210; May 14.
Wave converter, Short. H. M. Lewis. 2,001,277; May 14.
Weather-strip and window frame, Combination. H. J. Schubert. 2,001,433; May 14.
Weather stripping, Means and method for. F. S. Dietz. 2,001,602; May 14.
Weft replenishing loom. W. E. Lundgren. 2,000,968; May 14.
Welding. J. J. Paugh. 2,001,688; May 14.
Welding, Apparatus for automatic electric arc. O. Weigner and W. Senft. 2,001,231; May 14.
Welding, Electric arc. B. J. Brugge. 2,001,179; May 14.
Wells, Treating oil and gas. R. Van A. Mills. 2,001,350; May 14.
Wheel: *See*—
Demountable wheel. Toy looping wheel.
Skate wheel.
Wheel and axle assembly. W. C. Hedgcock. 2,001,193; May 14.
Wheel support for harvesters, Resilient. W. J. Coultas. 2,001,183; May 14.
Wick, Candle. A. T. Candy, Jr. 2,001,377; May 14.
Winding mechanism for paper bottles. A. Bodor. 2,001,177; May 14.
Window jack. M. Neinhouse. 2,001,626; May 14.
Window construction, Bus or car. J. Schunk. 2,001,435; May 14.
Windshield for motor cars, Auxiliary. L. M. Harvey. 2,001,420; May 14.
Wire bending machine. F. W. Greer. 2,001,273; May 14.
Wire gripping tool. L. O'Russa. 2,001,541; May 14.
Wrapping machine. O. M. Stout and H. Hoyer. 2,001,074; May 14.
X-ray tube holder. J. B. Wantz. 2,0001,004; May 14.
Yarn support. C. Epps. 2,000,900; May 14.

CLASSIFICATION OF PATENTS

ISSUED MAY 14, 1935

NOTE.—First number—class, second number—subclass, third number—patent number

1— 3: 2,001,104
49: 2,001,092
2— 2: 2,001,508
30: 2,001,263
42: 2,001,505
150: 2,001,452
226: 2,000,898
243: R. 19,571
4— 56: 2,001,545
67: 2,001,390
172: 2,000,956
189: 2,001,423
213: 2,001,502
2,001,503
256: 2,001,230
6— 5: 2,001,403
8— 2: 2,001,268
20: 2,001,621
2,000,935
9— 2: 2,001,005
6: 2,001,365
17: 2,001,394
12— 1: 2,000,963
4: 2,000,912
33: 2,001,002
47: 2,000,996
61: 2,000,936
78: 2,000,961
142: 2,001,069
145: 2,001,032
13— 8: 2,000,955
49: 2,000,931
104.16: 2,001,635
137: 2,000,910
16— 125: 2,001,666
164: 2,001,356
17— 1: 2,001,232
26: 2,001,641
45: 2,001,461
18— 8: 2,001,000
13: 2,001,491
26: 2,001,305
50: 2,001,071
57: 2,000,927
2,001,389
58: 2,001,594
19— 37: 2,001,223
156: 2,001,687
20— 1: 2,000,897
1.123: 2,001,678
6: 2,001,402
40.5: 2,001,338
45: 2,001,433
56.5: 2,001,199
71: 2,001,181
91: 2,001,276
92: 2,001,144
22— 125: 2,001,583
23— 125: 2,001,409
143: 2,000,939
175: 2,001,359
292: 2,001,581
24— 3: 2,001,291
15: 2,000,923
19: 2,001,034
49: 2,001,261
71: 2,001,056
2,001,216
73: 2,001,629
112: 2,001,401
134: 2,001,541
191: 2,001,618
193: 2,001,072
205: 2,000,983
252: 2,001,213
25— 131: 2,001,052
156: 2,001,316
2,001,664
28— 1: 2,001,381
2,001,527
37: 2,001,486
51: 2,001,064
29— 34: 2,001,578
57: 2,001,586
148.2: 2,001,204
155.55: 2,000,909
156: 2,001,643
29—156.8: 2,001,492

Babcock & Wilcox Company, The. See Kerr, H. J., and Langvand, assignors.)
Bacon, Willard M., Jr., Miami, Fla., assignor to J. H. Ellis and E. J. O'Hare, Chicago, Ill. Electrically driven lure carriage and trackage therefor. 2,002,427; May 21.
Baer, Lawrence E., Attleboro, Mass., assignor to The Baer & Wilde Company. Necktie holder. 2,002,231; May 21.
Baer & Wilde Company, The. (See Baer, Lawrence E., assignor.)
Bailey, Ervin G., Easton, Pa., H. J. Kerr and R. M. Hardgrove, Westfield, N. J., assignors to Fuller Lehigh Company, Fullerton, Pa. Steam boiler. 2,002,463; May 21.
Bailey, Ervin G., Easton, Pa., H. J. Kerr, Westfield, N. J., and R. M. Hardgrove, Bethlehem, assignors to Fuller Lehigh Company, Fullerton, Pa. Boiler furnace. 2,002,464; May 21.
Bailey, Ervin G., Easton, Pa., and H. J. Kerr, Westfield, N. J., assignors to The Babcock & Wilcox Company, Bayonne, N. J. Slag drip and screen. 2,002,465; May 21.
Bailey, Samuel J., Nicholson, Pa. Folding ironing table. 2,002,283; May 21.
Baj, Alessandro, Milan, Italy. Fuel spray injection for internal combustion engines. 2,002,134; May 21.
Baker, Alvah L. (See McFall, Frank H., assignor.)
Baker, David B. (See Johnston, E. A., and Baker.)
Baker, Hallis, Golden, assignor to J. F. Vanderpool and W. H. Baker, Golden, Idaho. Miners fuse cutter. 2,002,050; May 21.
Baker-McMillen Company, The. (See Belden, Don A., assignor.)
Baker, William H., et al. (See Baker, Hallis, assignor.)
Baldwin, James H. (See Gruver, J. H., and Baldwin.)
Baldwin-Southwark Corporation. (See Dinzl, Richard W., assignor.)
Bandes, Joseph. (See Bandes, Julius, and J.)
Bandes, Julius, and J. Bandes, Brooklyn, N. Y. Playing card cabinet. 2,002,166; May 21.
Bandurski, Walter, Chicago, Ill. Air conditioner. 2,001,932; May 21.
Bannister, Clyde E., Akron, Ohio. Drilling apparatus. 2,002,385; May 21.
Bannister, Clyde E., Akron, Ohio. Double piston fluid motor. 2,002,386; May 21.
Bannister, Clyde E., Houston, Tex. Well drilling apparatus. 2,002,387; May 21.
Bannister, Clyde E., Akron, Ohio. Rocker blade bit. 2,002,388; May 21.
Banta, George D., Ypsilanti, assignor to Chrysler Corporation, Detroit, Mich. Oscillatory connection. 2,002,284; May 21.
Bardet, George A., and G. V. Bardet, Berkeley, Calif., assignors to M. J. B. Company. Key attaching mechanism. 2,002,105; May 21.

Bardet, George V. (See Bardet, George A., and G. V.)
Barker, Edwin H., Moylan, assignor to A. H. Wirz, Inc., Chester, Pa. Method and machine for processing collapsible tubes. 2,001,760; May 21.
Barker, Jesse W. (See Ammerman, J. W., Barker, Klopfer, and Manss.)
Barnard, Randolph H., Toledo, Ohio, assignor to Owens-Illinois Glass Company. Stenciling or decorating apparatus. 2,002,335; May 21.
Barnes, Eugene L., Buffalo, N. Y. Refrigeration apparatus. 2,002,389; May 21.
Barnes, Wallace, Company. (See Cook, Raymond W., assignor.)
Barozzi, Guido E., Woodcliff, N. J. Drying apparatus. 2,002,170; May 21.
Bart, Blasius, East Orange, N. J. Forming high pressure tanks. 2,001,998; May 21.
Barth, Elmer W. (See Rash, Frank J., assignor.)
Barthel, Hans, Cologne-Dellbruck, Germany, assignor, by mesne assignments, to Carrier Engineering Corporation, New York, N. Y. Humidification process and apparatus employing electrical attractive forces. 2,001,700; May 21.
Bartlett, C. O., & Snow Company. (See McKinnon, H. L., and First, assignors.)
Barton, Chauncey C. (See Hall, G. W., and Barton.)
Barton, Raymond L., San Diego, Calif. Electric fishing lure. 2,002,135; May 21.
Basson, Joseph D., Brooklyn, N. Y. Film guiding mechanism. 2,002,074; May 21.
Bates, Arthur, and F. C. Choice, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,002,136; May 21.
Battey, Alexander J. (See Rabezzana, H., and Battey.)
Battey, Edith C., New York, N. Y. Facial tissue support. 2,001,862; May 21.
Baumann, Paul. (See Eisenhut, O., Schilling, and Baumann.)
Baumhover, Louis B., Carroll, Iowa. Apparatus for separating oats from hulls. 2,002,133; May 21.
Baylis, Albert W., Scarsdale, N. Y. Printed fabric. 2,002,359; May 21.
Bean, Barton A., Jr., Williamsville, assignor to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 2,002,336; May 21.
Bear, Velma M., assignor to Schulze Baking Company, Kansas City, Mo. Packaging of loaf-like bakery goods. 2,001,791; May 21.
Beard, Anna M. (See Beard, Earl C., assignor.)
Beard, Earl C., assignor of one-half to A. M. Beard, Mishawaka, Ind. Clothes hanger. 2,002,001; May 21.
Beard, Earl E., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. 1-nitroanthraquinone-6-acyl amino compounds and their preparation. 2,001,701; May 21.
Beard, Earl E., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Acylaminoanthraquinone-6-acyl amino compounds and their preparation. 2,001,701; May 21.
Beaver Manufacturing Company. (See Strongson, Herman L., assignor.)
Bechmann, Rudolf, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Quartz crystal oscillator. 2,002,167; May 21.
Bechman, William O., Chicago, Ill., assignor to International Harvester Company. Driving disk for clutches. 2,002,285; May 21.
Becker, George H., et al. (See Lambourne, Herbert D., assignor.)
Bedaux, Charles E., Monts, France. Automobile door. 2,001,833; May 21.
Belden, Don A., assignor to The Baker-McMillen Company, Akron, Ohio. Knob or handle construction. 2,002,466; May 21.
Bell Telephone Laboratories, Incorporated. (See Bode, Hendrik W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Bowne, Langford J., assignor.)
Bell Telephone Laboratories, Incorporated. (See Dimond, Thomas L., assignor.)
Bell Telephone Laboratories, Incorporated. (See Ingmanson, J. H., and Mueller, assignors.)
Bell Telephone Laboratories, Incorporated. (See Ives, Herbert E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Nordahl, John G., assignor.)
Bell Telephone Laboratories, Incorporated. (See Toomey, J. F., and Hogan, assignors.)
Belshaw, Charles F., Indianapolis, Ind. Refrigerator. 2,002,305; May 21.
Bendix Aviation Corporation. (See Hall, Percy E., assignor.)
Bendix Aviation Corporation. (See McConkey, Montgomery W., assignor.)
Bendix Aviation Corporation. (See Seward, Clarence L., Jr., assignor.)
Bendix Brake Company. (See La Brie, Ludger E., assignor.)
Bendix Brake Company. (See McCann, George K., assignor.)
Bendix Brake Company. (See Parker, Humphrey F., assignor.)
Bendix Brake Company. (See Taylor, Cecil H., assignor.)
Bendix Brake Company. (See Wells, Franklin H., assignor.)
Bendix Products Corporation. (See Gunn, Earl G., assignor.)
Bendix Research Corporation. (See Gregg, David, assignor.)
Benedek, Elek K. (See Ferris, Walter and J. P., Fobian and Benedek.)
Benjinsohn, Samuel, assignor to S. Benson, New York, N. Y. Hinge bracket. 2,001,864; May 21.
Benoit, Leon. (See Coyle, Joseph L., assignor.)
Benson, Benjamin H. (See Harris, George S., jr., assignor.)
Benson, Sarah. (See Benjinsohn, Samuel, assignor.)
Berger, Samuel L., Newark, N. J. Typewriting machine. 2,002,075; May 21.
Berkner, Arthur, Passaic, N. J. Fastening and buttoning means for garments, and the like. 2,002,360; May 21.
Berlin, Benjamin and I. Herman, New York, N. Y. Concealed garment fastener. 2,002,306; May 21.
Berning, Theodore J., Dayton, and M. P. Hoover, near Dayton, Ohio. Slit ball game. 2,001,811; May 21.
Berry, William A., Knutsford, assignor to Ilford Limited, Ilford, England. Photographic printing emulsion and its production. 2,001,951; May 21.
Bevin, Allister S., Wangarei, New Zealand. Harrow. 2,002,255; May 21.
Biasi, Angelo, Hazleton, Pa. Alarm device for safes. 2,001,812; May 21.
Birchall, Henry J., Shirley, England. Lenses and their combination and arrangement in various instruments and apparatus. 2,001,952; May 21.
Bishop, Stanley K., Binghamton, assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Seat adjuster. 2,001,950; May 21.
Bissell Carpet Sweeper Co. (See Pullen, Fred W., assignor.)
Black, Benjamin, Brooklyn, N. Y. Automotive jack. 2,002,428; May 21.
Blackmore, Norman L., Wilkinsburg, assignor to Automatic Gas-Steam Radiator Company, Pittsburgh, Pa. Heating apparatus. 2,001,953; May 21.
Blair, Frank O., Laramie, Wyo., assignor to Standrd Oil Compny, Chicago, Ill. Process and apparatus for acid treating light mineral oil. 2,001,899; May 21.
Blaw-Knox Company. (See Strong, Basil P., assignor.)
Blitz, Otto, Oakland, Calif. Folding container. 2,002,215; May 21.
Blogett, Edwin O., assignor to General Railway Signal Company, Rochester, N. Y. Snap acting thermal device. 2,002,467; May 21.
Blood, Howard E., Detroit, Mich., assignor by mesne assignments to Free Wheeling Patents Corporation, South Bend, Ind. Automobile transmission mechanism. 2,001,762; May 21.
Boaler, William H. (See Welch, S. A., Guyler, Boaler and Ashby.)
Blodgett, Edwin O., assignor to General Railway Signal Company, Rochester, N. Y. Signaling system for railroads. 2,002,468; May 21.
Blumlein, Alan D., London, England, assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Telephone and like transmission system. 2,001,900; May 21.
Bode, Hendrik W., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Wave filter. 2,002,216; May 21.
Bodmer, Albert, and Ernst Weiss, Wattwil, Switzerland, assignors, to Heberlein Patent Corporation, New York, N. Y. Treating vegetable fibers. 2,002,106; May 21.
Boisselier, Earl D., Glen Ellyn, assignor to American Flyer Manufacturing Company, Chicago, Ill. Motor mounting for toy locomotives. 2,002,256; May 21.
Bommer, Max. (See Hauser, H. and Bommer.)
Bondbright, John M., Detroit, Mich. Ventilating the interior of automobile bodies. 2,001,763; May 21.
Bone, Herbert L., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway track skate. 2,002,217; May 21.
Bornmann, Carl, and B. C. Roehrl, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Photographic camera. 2,002,076; May 21.
Botteese, Shearman, Washington, D. C. Convertible child's vehicle. 2,001,929; May 21.
Bouda, Bohumil, assignor to The Collis Company, Clinton, Iowa. Mechanism and method for scalding fowls. 2,001,813; May 21.
Bourret, Clyde E., Morrisonville, assignor of one-half to R. A. Hellman, Madison, Wis. Illuminated hose nozzle. 2,002,107; May 21.
Boutillon, Edward F., Woodside, N. Y. Match package. 2,002,051. May 21.
Bowne, Langford J., Howard Beach, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Tie trunk line. 2,002,218; May 21.
Boyce, Harold A., assignor of one-half to Jas. Truscott & Son, Limited, London, England. Safety guard for shearing presses. 2,002,257; May 21.
Bradley, Leonard, assignor to H. W. Stepp, Whittier, Calif. Core drill and valve therefor. 2,001,764; May 21.
Brady, Lester C., Burlington, N. C., assignor of twenty-four and one-half per cent to G. W. Morris, and twenty-four and one-half per cent to S. Webster. Stop motion control for jacquard looms. 2,002,420; May 21.
Brandl, Johann, Vienna, Austria, assignor to the firm Compagnie pour la Fabrication des Compteurs et Matériel d'Usines à Gaz, Montrouge (Seine), France. Gas density meter. 2,001,865; May 21.

Brallier, Paul S., assignor to Niagara Smelting Corporation, Niagara Falls, N. Y. Stabilizing carbon tetrachloride. 2,002,168; May 21.
Brandtjen and Kluge, Inc. (See Kluge, Abel and E., assignors.)
Bratring, Kurt, Berlin-Charlottenburg, Germany. Manufacture of hollow articles from plastic materials. 2,001,765; May 21.
Brelt, Charles A., Houston, Tex. Vehicle door control. 2,002,025; May 21.
Brewer Titchener Corporation, The. (See Bishop, Stanley K., assignor.)
Brier, Henry, and J. H., Dartford, England. Compression refrigerating system for low temperature purposes. 2,002,307; May 21.
Brier, John H. (See Brier, Henry and J. H.)
Broome, John E., Market Harborough, Leicester, England, assignor to O. J. Taylor, Dundee, Scotland. Busk fastening means for corsets and similar garments. 2,002,052; May 21.
Brown, Banks D., assignor to Capstan Glass Company, Connellsville, Pa. Glass furnace. 2,001,766; May 21.
Brown, Newman T., Seattle, Wash., assignor to A. P. Grommesch, Seattle, Wash., deceased, now by decree of distribution to K. H. Grommesch. Heating means for treating vegetables or fruit. 2,001,703; May 21.
Brown, Theophilus, and L. A. Murray, assignors to Deere & Company, Moline, Ill. Tractor. 2,002,002; May 21.
Bruenn, Alexander, New York, N. Y. Warping creel thread stop. 2,002,137; May 21.
Bruson, Herman A., Germantown, and O. Stein, Drexel Hill, assignors to Rohn & Haas Company, Philadelphia, Pa. Octylsalicylic acid. 2,001,767; May 21.
Bunas Mejerimaskinfabrikker, Afdeling Af Aktieselskabet Frederiksberg Metalvarefabrik. (See Olsen, Johannes, assignor.)
Buckminster, Ira C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Article-transferring mechanism. 2,001,814; May 21.
Budd, Edward G., Manufacturing Company. (See Hanson, Arthur F., assignor.)
Budd Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)
Budd Wheel Company. (See Siviter, Arthur T., assignor.)
Bühnle, Carl. (See Gauthier, A., and Bühnle.)
Bulkeley, Claude A., assignor to Niagara Blower Company, New York, N. Y. Apparatus for cooling and ventilating buildings. 2,001,704; May 21.
Bullum, Stephen, Overton, assignor of one-half to J. R. Long, Fort Worth, and one-half to W. Davis, Houston, Tex. Feeding device. 2,002,337; May 21.
Bundy, James A. (See Krieg, A., and Bundy.)
Burchfield, Leslie B., Houston, Tex. Automatic fire extinguisher. 2,002,308; May 21.
Burdick Corporation, The. (See Maxson, Rolland H., assignor.)
Buschbeck, Werner, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Bridge arrangement. 2,002,338; May 21.
Butterworth, H. W., & Sons Company. (See Sippel, John J., assignor.)
Buxton, Warner R., Longmeadow, Mass. Flexible receptacle. 2,001,954; May 21.
Byrd, Ruddell J., Irving, Tex. Air conditioning apparatus. 2,001,833; May 21.
Byron, Thomas F., Cleveland, Ohio. Window curtain. 2,002,171; May 21.
Cabaniss, Jelks H., Executors et al. (See McWane, James R., assignor).
Cahoon, Ernest L. (See Kryszewski, S. W., and Cahoon.)
Callan, Earl F. (See Smith, Earle R., assignor.)
Callan, Thomas J. (See Clark, M., and Callan.)
Caminez, Harold, Indianapolis, Ind., assignor to General Motors Corporation, Detroit, Mich. Accessory device housing for internal combustion engines. 2,001,866; May 21.
Campbell, James H., Somerville, assignor to J. D. Moore, Dorchester, Mass. Method and apparatus for impregnating material. 2,001,768; May 21.
Campbell, William J., Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill. Slicing machine. 2,001,769; May 21.
Campbell, William J., Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill. Slicing machine. 2,001,770; May 21.
Campbell, William J., Indianapolis, Ind., assignor to American Slicing Machine Company, Chicago, Ill. Slicing machine. 2,001,771; May 21.
Canfield, Earl L. (See Doane, Leroy C., assignor.)
Caponi, Patsy, assignor of one-half to C. Peroni, Philadelphia, Pa. Safety turn stop light. 2,001,705; May 21.
Caprio, Americo F. (See Walsh, J. F., and Caprio.)
Capstan Glass Company. (See Brown, Banks D., assignor.)
Carborundum Company, The. (See Melton, Romie L., assignor.)
Carborundum Company, The. (See Wooddell, C. E., Nelson and Lincoln, assignors.)
Carlson, Elof L., assignor to The E. Ingraham Company, Bristol, Conn. Alternating current motor and the like. 2,001,772; May 21.
Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Clamping mechanism for radial drills. 2,002,446; May 21.
Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Column clamp for radial drills. 2,002,469; May 21.
Carlton Machine Tool Company, The. (See Carlton, Jack C., assignor.)
Carpenter, Walter E., Belmar, N. J., assignor to McCabe Maier Corporation, Brooklyn, N. Y. Refrigerating apparatus and method. 2,002,369; May 21.
Carrier Engineering Corporation. (See Barthel, Hans, assignor.)
Carson, Clifford C., Chicago, Ill. Vertical unit heater. 2,001,834; May 21.
Cartlidge, Frank, assignor to Goodman Manufacturing Company, Chicago, Ill. Loading machine. 2,002,199; May 21.
Cash, A. W., Company. (See Temple, Paul C., assignor.)
Caterpillar Tractor Co. (See Grothe, Walter, assignor.)
Celanese Corporation of America. (See Dickie, William A., assignor.)
Celanese Corporation of America. (See Dickie, W. A., and Greenwood, assignors.)
Celanese Corporation of America. (See Jabouley, Joanny, assignor.)
Celanese Corporation of America. (See Taylor, William I., assignor.)
Celanese Corporation of America. (See Welch, S. A., Guyler, Boaler and Ashby, assignors.)
Celluloid Corporation. (See Walsh, J. F., and Caprio, assignors.)
Centervall, Hugo, Brooklyn, assignor to Manly Corporation, New York, N. Y. Variable capacity pump. 2,001,706; May 21.
Chalmers, George W., Summit, Ill., assignor to International Patents Development Company, Wilmington, Del. Automatic expanding machine. 2,001,867; May 21.
Chase Companies, The. (See Wood, Maurice L., assignor.)
Chemische Werke Marienfelde Aktiengesellschaft. (See Jakob, Gottfried, assignor.)
Chicago Flexible Shaft Company. (See McArdle, M. W., and Jeppson, assignors.)
Chicago Flexible Shaft Company. (See Strauss, Hermann M. Alfred, assignor.)
Chicago North Shore & Milwaukee Railroad Company. (See Otis, Harold A., assignor.)
Child, Hal G., Oswego, Oreg. Exercising device. 2,002,108; May 21.
Chilton, Ralph H., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Refrigerator freezing tray. 2,002,232; May 21.
Choice, Frank C. (See Bates, A., and Choice.)
Christian, Raymond A., assignor to The National Cash Register Company, Dayton, Ohio. Carriage for accounting machines. 2,002,361; May 21.
Christian, Raymond A., assignor to The National Cash Register Company, Dayton, Ohio. Tabulating mechanism for accounting machines. 2,002,362; May 21.
Christman, John M., assignor to Packard Motor Car Company, Detroit, Mich. Transmission mechanism. 2,002,310; May 21.
Chromy, Ben J., Hopkins, Minn. Radio receiving system. 2,002,430; May 21.
Chrysler Corporation. (See Banta, George D., assignor.)
Chrysler Corporation. (See Lee, Roger K., assignor.)
Chrysler Corporation. (See Lind, Frederick A., assignor.)
Chrysler Corporation. (See Ryan, Frank P., assignor.)
Church, Omer F., assignor to Road Supply Co., Arthur, Ill. Road machine. 2,002,431; May 21.
City Auto Stamping Company, The. (See Peterson, Peter, assignor.)
Clark, Melburn, and T. J. Callan, Vallejo, Calif. Kitchen utensil. 2,001,815; May 21.
Clark Metal Products, Inc. (See Jordan, Daniel L., assignor.)
Clemens, Fred J., East Haven, Conn., assignor to K-D Manufacturing Company, Lancaster, Pa. Hand tool. 2,001,707; May 21.
Clement, Sylvester F., assignor to The Visking Corporation, Chicago, Ill. Producing tubing. 2,002,258; May 21.
Cobb, Charles C. (See Murdock, C. I., and Cobb.)
Cody, Barney. (See Shafer, George J., assignor.)
Colburn, Ernest A., Jr., Congress, Ariz., assignor to Denver Patent Company, Denver, Colo. Mixing apparatus. 2,002,000; May 21.
Cole, Florent S., Omro, Wis. Animal den. 2,002,259; May 21.
Collar, Linus R., Chicago, Ill., assignor to The Lamson Company, Syracuse, N. Y. Conveyer curve. 2,001,773; May 21.
Collis Company, The. (See Bouda, Bohumil, assignor.)
Columbia Phonograph Company. (See Blumlein, A. D., assignor.)
Commercial Shearing & Stamping Company. (See Stephens, William T., assignor.)
Comoy, Léon L., Paris, France. Automatic machine for making serum phials. 2,002,432; May 21.
Compagnie pour la Fabrication des Compteurs et Matériel d'Usines à Gaz. (See Brandl, Johann, assignor.)
Conover Company, The. (See Stoddard, Edgar S., assignor.)
Container Fitments Inc. (See Gruver, J. H., and Baldwin, assignors.)
Continental Motors Corporation. (See Kinnucan, James W., assignor.)

Continental Motors Corporation. (See Timian, Harold H., assignor.)

Cook, Raymond W., assignor to Wallace Barnes Company, Bristol, Conn. Spring connecter. 2,001,835; May 21.

Cooper-Bessemer Corporation. (See Gebres, Hewitt A., assignor.)

Copeman, Lloyd G., Flint, Mich. Refrigerator structure. 2,002,339; May 21.

Cornell, Edward S., Jr., Larchmont, assignor to American Radiator & Standard Sanitary Corporation, New York, N. Y. Making elbow pipe fittings of integral tubular metal. 2,002,470; May 21.

Corrall, Herbert, Helensburgh, and J. Heggie, Clydebank, Scotland, assignors to The Singer Manufacturing Company, Elizabeth, N. J. Lock-stitch sewing machine. 2,002,172; May 21.

Corwin, David S., Greenport, N. Y. Hollow cement block. 2,002,311; May 21.

Cotnareanu, Ionel. (See Tisseyre, L., and Cotnareanu.)

Couch, Forrest J., Rochester, N. Y., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Lot or bundle assorter for ironing machines. 2,002,138; May 21.

Coursen, George L., East Orange, assignor of one-half to H. T. Sorg, Newark, N. J. Photographic shutter. 2,002,109; May 21.

Cowles, George P. (See Tisseyre, L., and Cotnareanu, assignors.)

Cowles, George P., Waterbury, Conn. Electrical actuating means for clocks and instruments. 2,002,433; May 21.

Cox, Edwin R., Los Angeles, Calif., assignor to The Texas Company, New York, N. Y. Recovery of stable gasoline from natural gas. 2,002,340; May 21.

Coyle, Joseph L., London, Ontario, Canada, assignor to L. Benoit, New York, N. Y. Filler package. 2,001,816; May 21.

Craig, Palmer H., Cincinnati, Ohio, assignor to Invex Corporation. Power control circuits. 2,001,836; May 21.

Craig, Palmer H., Cincinnati, Ohio, assignor to Invex Corporation. Power control circuits. 2,001,837; May 21.

Craig, Palmer H., Cincinnati, Ohio, assignor to Invex Corporation. Power control circuits. 2,001,838; May 21.

Crandall, Merton L., Jackson, Mich. Hammer. 2,001,868; May 21.

Crane, George H., Muskegon, Mich. Brake adjusting gauge. 2,002,296; May 21.

Crosley, Powel, Jr., and H. Gest, assignors to The Crosley Radio Corporation, Cincinnati, Ohio. Acoustic device. 2,002,380; May 21.

Crosley Radio Corporation, The. (See Crosley, P., Jr., and Gest, assignors.)

Crouse-Hinds Company. (See Hastings, Harold P., assignor.)

Cunningham, Brant A., Akron, Ohio. Odor-sealing valve for combination sewer drains. 2,001,901; May 21.

Curl, Charles C., Helena, Ark. Locking cap. 2,002,260; May 21

Curran, Frank M. (See Meyercord, G. R., and Curran.)

Curtis, Westley F., Washington, D. C. Production of music. 2,001,708; May 21.

Cutler-Hammer, Inc. (See Lassen, E. U., and Seeger, assignors.

Cutler-Hammer, Inc. (See Schmidt, Edwin X., assignor.)

Cutler-Hammer, Inc. (See Stansbury, Carroll, assignor.)

Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)

D. C. E. Development Company. (See Kasley, Alexander T., assignor.)

Dabney, R. Winston, et al. (See Timberlake, Journey F., assignor.)

Dall, Ernest I., assignor to Dall Steel Products Company, Lansing, Mich. Furnace and air conditioner. 2,002,318; May 21.

Dall Steel Products Company. (See Dall, Ernest I., assignor.)

Dall Steel Products Company. (See Murdock, C. I., and Cobb, assignors.)

Daisy Manufacturing Company. (See Lefever, Charles F., assignor.)

Daller, Adrian O., Dennisport, Mass., assignor to Daller Carton Company, Inc., New York, N. Y. Dispensing container and making the same. 2,002,363; May 21.

Daller, Adrian O., Dennisport, Mass., assignor to Daller Carton Co., Inc., New York, N. Y. Container. 2,002,364; May 21.

Daller Carton Company. (See Daller, Adrian O., assignor.)

Darányi, Stephan C., Hamburg, Germany. Process and apparatus for the fermentation of carbohydrates. 2,001,930; May 21.

Darling, Thomas H., and W. Maccabee, Rockville Centre, N. Y. Magnetic puzzle. 2,002,077; May 21.

Darsey, Van M. (See Thompson, J. S., and Darsey.)

Davidson, Glenn, Bloomington, Ill. Cigarette mouthpiece or the like. 2,001,709; May 21.

Davis, Wallace, et al. (See Bullum, Stephen, assignor.)

Davis, William A., Milwaukee, Wis. Trench excavator. 2,002,230; May 21.

Day, Salisbury M., assignor to General Railway Signal Company, Rochester, N. Y. Light signal. 2,002,471; May 21.

De Bou, Herbert G., and C. S. Thicke, Vancouver, British Columbia, Canada. Log trailer. 2,001,839; May 21.

Decker, James W., New York, N. Y. Stock quotation projecting machine. 2,001,710; May 21.

Deere & Company. (See Brown, T., and Murray, assignors.)

Dees, Charlie M. (See Gurley, Robert L., assignor.)

Delchsel, Stanislaus, Wuppertal-Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Halogen alkenyl phenols and manufacture thereof. 2,002,447; May 21.

Dell, Frank C., assignor to Autopoint Company, Chicago, Ill. Desk pad holder. 2,001,774; May 21.

Delling, Richard E., Erfenschlag, near Chemnitz, assignor of one-half to E. Freytag, Zwickau, Germany. Atomizing device. 2,001,817; May 21.

De Martin, Peter, Passaic, N. J., assignor to National Rubber Machinery Company, Akron, Ohio. Vulcanizing mold for inner tubes and the like. 2,002,110; May 21.

Deniston, Albert J., Jr., Chicago, Ill. Making lead-headed screw-threaded nails. 2,001,869; May 21.

Denver Patent Company. (See Colburn, Ernest A., Jr., assignor.)

Despard, Victor R., assignor to Pass & Seymour, Inc., Syracuse, N. Y. Convenience outlet. 2,002,434; May 21.

Des Rosiers, John B., Providence, R. I. Automatic brake adjusting and indicating mechanism. 2,002,139; May 21.

Detroit Hydrostatic Brake Corporation. (See Sauzedde, Claude, assignor.)

Detroit Lubricator Company. (See Weber, Walter H., assignor.)

De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 2,001,775; May 21.

Diascope Corporation Ltd. (See Forde, Thomas H., assignor.)

Dickie, William A., and E. L. Greenwood, Spondon, near Derby, England, assignors to Celanese Corporation of America. Textile apparatus. 2,002,078; May 21.

Dickie, William A., Spondon, near Derby, England, assignor to Celanese Corporation of America. Card clothing for textile machinery. 2,002,079; May 21.

Dietrich, Charles, Cleveland, Ohio, assignor to The Owen Silent Spring Company, Inc., Bridgeport, Conn. Fastening springs together. 2,002,080; May 21.

Diller, Alvin L., Belmont, and L. H. L'Hollier, Waltham, assignors to Hood Rubber Company, Inc., Watertown, Mass. Making ornamental rubber articles. 2,002,391; May 21.

Dillon, Stephen V., Tulsa, Okla. Well equipment. 2,002,140; May 21.

Dimond, Thomas L., Rocston, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,002,219; May 21.

Dinzl, Richard W., Philadelphia, Pa., assignor, by mesne assignments, to Baldwin-Southwark Corporation. Portable testing machine. 2,001,711; May 21.

Dinzl, Richard W., Philadelphia, Pa., assignor, by mesne assignments, to Baldwin-Southwark Corporation. Press mechanism. 2,001,712; May 21.

Doane, Leroy C., Meriden, Conn., assignor to E. L. Canfield, Hillside, N. J. Lighting appliance. 2,002,313; May 21.

Dock, Webster R. (See Kieckhefer, H. M., and Dock.)

Dodge, Harry H., Williamsport, Pa. Atmospheric gas burner. 2,002,448; May 21.

Dohm, Elizabeth, assignor of one-half to F. R. Seyfried, Toledo, Ohio. Dermatold mask. 2,002,449; May 21.

Dole Valve Company, The. (See Morrison, Willard L., assignor.)

Dominion Engineering Works Limited. (See Russell, A. N., and Ulmann, assignors.)

Domm, Elgin C., Niles, Mich., assignor to National Standard Company. Rubber coated steel object and making the same. 2,002,261; May 21.

Domm, Elgin C., assignor to National Standard Company, Niles, Mich. Rubber coated object. 2,002,262; May 21.

Domm, Elgin C., assignor to National Standard Company, Niles, Mich. Rubber coated steel object. 2,002,263; May 21.

Doolin, Charles E., San Antonio, Tex. Corn product and making the same. 2,002,053; May 21.

Dossey, Trannon, Aruba, Dutch West Indies. Clothesline ring. 2,002,435; May 21.

Dougherty, Bernard E., Seattle, Wash. Can punch. 2,002,173; May 21.

Douglas, Harry A., Bronson, Mich. Swaging means. 2,002,220; May 21.

Dow, Richard F., assignor to The Whitney Mfg. Co., Hartford, Conn. Hydraulic slack take-up device. 2,002,081; May 21.

Downs, Laurence E. (See Gibson, C. H., Downs, and Fuse.)

Dreyfus, Camille, New York, N. Y. Ultra-violet light transparent glass and making the same. 2,002,082; May 21.

Dreyfus, Henry, London, England. Treatment of fabrics. 2,002,083; May 21.

Dreyfus, Henry, London, England. Manufacture of aliphatic anhydrides. 2,002,084; May 21.

Dreyfus, Henry, London, England. Manufacture of aliphatic anhydrides. 2,002,085; May 21.

Duda, Oswald, assignor to American Well & Prospecting Company, Corsicana, Tex. Valve mechanism. 2,001,818; May 21.

Duff-Norton Manufacturing Company, The. (See Schwerin, Frank H., assignor.)

Dumke, William C., Chicago, Ill. Clamp. 2,002,141; May 21.

Dunlop Tire & Rubber Corporation. (See Twiss, D. F., Neale, and Wilson, assignors.)

Du Pont, E. I., de Nemours & Company. (See Beard, Earl E., assignor.)

Du Pont, E. I., de Nemours & Company. (See Hinegardner, Wilbie S., assignor.)

Du Pont, E. I., de Nemours & Company. (See Lulek, Ralph N., assignor.)

Dylewski, Wladyslaw, Camden, N. J. Automatic ball cock valve. 2,002,086; May 21.

Earle, Francis, Montclair, assignor to Metal & Thermit Corporation, Carteret, N. J. Welding metal parts. 2,002,222; May 21.

Earle, Francis, Montclair, assignor to Metal & Thermit Corporation, Carteret, N. J. Welding rail joints. 2,002,223; May 21.

Eastwood, David S., Los Angeles, Calif. Grinding machine. 2,002,224; May 21.

Eclipse Aviation Corporation. (See Gregg, David, assignor.)

Eclipse Aviation Corporation. (See Lansing, Raymond P., assignor.)

Eclipse Aviation Corporation. (See Mock, Frank C., assignor.)

Eclipse Aviation Corporation. (See Nardone, Romeo M., assignor.)

Eclipse Aviation Corporation. (See Waselge, Charles R., assignor.)

Eddy, Harold C., assignor to Petroleum Rectifying Company of California, Los Angeles, Calif. Method and apparatus for electrically treating emulsions. 2,001,776; May 21.

Eger, Ernst, Grosse Pointe Park, Mich., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Tube inflating machine. 2,001,777; May 21.

Ehret, Clement, White Plains, N. Y. Stove. 2,001,713; May 21.

Ehret, Clement, White Plains, N. Y. Rotatable top stove. 2,001,714; May 21.

Ehrling, Gunnar E. (See Shoemaker, F. G., and Ehrling.)

Elchwede, Heinz, Frankfort-on-the-Main-Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Colored rubber products and preparing it. 2,002,174; May 21.

Elmecke, Robert, Pforzheim, Germany, assignor to Gemex Company, Newark, N. J. Band element for ornamental and useful purposes. 2,002,233; May 21.

Elsenhut, Otto, Heidelberg, H. Schilling and P. Baumann, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of acetylene and carbon black. 2,002,003; May 21.

Eklind, Carl E., Chicago, Ill., assignor, by mesne assignments, to The Youngstown Steel Door Company, Cleveland, Ohio. Car door. 2,002,392; May 21.

Electrical Research Products, Inc. (See Albersheim, Walter J., assignor.)

Electrolux Servel Corporation. (See Ryden, Eric H., assignor.)

Elle, Eugen, and M. Wetzler, Frankfort-on-the Main, Germany, assignors to R. Wetzler, New York, N. Y. Receptacle for pastes. 2,001,819; May 21.

Ellis, Bertie, New York, N. Y. Corn cure package. 2,002,341; May 21.

Ellis, J. Homer, et al. (See Bacon, Willard M., Jr., assignor.)

Emery, William M., Lansdowne, Pa. Ironing press. 2,002,240; May 21.

Emmens, Hendrik. (See van Geel, W. C., and Emmens.)

Enderli, Max, assignor to firm Rudolph Koepp & Co., Chemische Fabrik A. G., Oestrich, Germany. Production of caustic potash and oxalic acid. 2,002,342; May 21.

Engel, Arthur C., Haverhill, Mass. Shoe counter. 2,002,093; May 21.

Engel, Francis H., New York, N. Y., assignor to Radio Corporation of America. Power circuits. 2,002,343; May 21.

Engelbertz, William H., Pittsburgh, Pa. Apparatus for the manufacture of seamless hollow bodies. 2,001,902; May 21.

England, Frank W., assignor to Illinois Tool Works, Chicago, Ill. Lock washer and making same. 2,001,956; May 21.

English, Lester L., Spring Hill, assignor to Alabama Polytechnic Institute, Auburn, Ala. Orchard heater. 2,002,054; May 21.

Esterson, Jack F., Baltimore, Md. Shoe heel. 2,002,087; May 21.

Etablissements E. & M. Lamort Fils. (See Lamort, Marcel, assignor.)

Eto, Hiroshi, Tokyo, Japan, assignor to General Electric Company. Metallic cabinet structure. 2,002,366; May 21.

Everston, Joseph H., Milwaukee, Wis. Shoe. 2,001,821; May 21.

Evinrude, Ole, assignor to Outboard Motors Corporation, Milwaukee, Wis. Combination sander and jointer. 2,001,955; May 21.

Explorator A. G. (See Silbermann, Eugen, assignor.)

Eymann, Constanz, Essen-Ruhr, Germany, assignor, by mesne assignments, to The Koppers Company of Delaware, Pittsburgh, Pa. Removing hydrogen sulphide from gases containing ammonia and hydrogen sulphide. 2,002,365; May 21.

Fahrney, Emery H., Oak Park, Ill. Hydraulic clutch. 2,002,367; May 21.

Fairgrieve, Albert D., Vancouver, British Columbia, Canada. Fighting toy. 2,002,026; May 21.

Fancher, Charles L., Cleveland, Ohio. Diaper pad. 2,002,368; May 21.

Fantone, Charles B., Lyndhurst, and R. M. Jameson, Teaneck, assignors to Synco Machine Company, Arlington, N. J. Serving head. 2,002,225; May 21.

Farrel-Birmingham Company. (See Sykes, William E., assignor.)

Farwell Ozmun Kirk & Co. (See Marzolf, George B., assignor.)

Faus, Harold T. (See Arey, R. G., and Faus.)

Federal Telegraph Company. (See Reinken, Louis W., assignor.)

Fehrle, Alfred. (See Streitwolf, K., Fehrle, Herrmann, Fritzsche, and Schnitzer.)

Ferris, John P. (See Ferris, Walter and J. P., Foblan, and Benedek.)

Ferris, Walter and J. P., G. H. Foblan, and E. K. Benedek, assignors to The Oilgear Company, Milwaukee, Wis. Pump. 2,001,957; May 21.

Fibreboard Products Inc. (See Patterson, David H., Jr., assignor.)

Field, Herbert C., Windsor, Ontario, Canada, assignor to Ternstedt Manufacturing Company, Detroit, Mich. Window assembly for an automotive vehicle. 2,001,778; May 21.

Floroni, Walter. (See Moser, W., and Floroni.)

First, Mahlon E. (See McKinnon, H. L., and First.)

Fischer, Ernst, Berlin-Lichterfelde/West, and Hans Gantzckow, Berlin-Weissensee, Germany, assignors to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Communication cable with reduced magnetic coupling. 2,002,344; May 21.

Fischer, Herbert G. M., Westfield, N. J., assignor to Standard Oil Development Company. Preparing organic disulphides. 2,001,715; May 21.

Flettner, Anton, Berlin, Germany. Flying machine. 2,002,287; May 21.

Flogaus, Howard A., Ferndale, assignor to General Motors Truck Corporation, Pontiac, Mich. Motor vehicle driving mechanism. 2,001,870; May 21.

Florida Fruit Canners, Inc. (See Keenan, Edward T., assignor.)

Foblan, John P. (See Ferris, Walter and J. P., Foblan, and Benedek.)

Food Machinery Corporation. (See Van Wyk, P., and Acheson, assignors.)

Forde, Thomas H., assignor to Diascope Corporation Ltd., San Francisco, Calif. Electric furnace muffle construction. 2,002,241; May 21.

Foster, Clarence B. (See Terwilliger, S. M., and Sevener, assignors.)

Foster, Claud H., South Euclid, Ohio. Massaging device. 2,001,871; May 21.

Foster Wheeler Corporation. (See Kryszewski, S. W., and Cahoon, assignors.)

Frank, John P., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 2,001,779; May 21.

Franklin, Albert W., New York, N. Y. Safety razor blade structure and holder for same. 2,002,436; May 21.

Free Wheeling Patents Corporation. (See Blood, Howard E., assignor.)

Free Wheeling Patents Corporation. (See Hecks, H. J., and Simpson, assignors.)

Freed, Harvey H., Belleville, and H. B. Mann, Newark, N. J. Automatic pantograph machine. 2,002,393; May 21.

Frehner, Carl, Evansville, Wis. Making cheese. 2,002,345; May 21.

Frey, Frederick E., Bartlesville, Okla., assignor to Phillips Petroleum Company. Converting hydrocarbons. 2,002,394; May 21.

Friedrich & Dimmock. (See Friedrich, Paul O. E., assignor.)

French, Charles A., Riverside, Ill. Liquid fuel burner. 2,002,288; May 21.

Freytag, Emil. (See Delling, Richard E., assignor.)

Friedrich, Paul O. E., Millville, N. J., assignor to firm Friedrich & Dimmock, New York, N. Y. Method and apparatus for producing curled or crimped glass wool. 2,002,314; May 21.

Fritzsche, Paul. (See Streitwolf, K., Fehrle, Herrmann, Fritzsche, and Schnitzer.)

Frohmer, Claus, Berlin-Charlottenburg, Germany, assignor to General Electric Company. Electric control means. 2,002,369; May 21.

Frost, Clinton E., Youngstown, assignor to The Osborn Manufacturing Company, Cleveland, Ohio. Brush. 2,002,370; May 21.

Fry, Francis H., Gravesend, England, assignor to W. T. Henley's Telegraph Works Company, Limited, London, England. Controlling the tension on strips of flexible material drawn from flat coils. 2,001,780; May 21.

Fuel Development Corporation. (See Kimball, Leo B., assignor.)

Fuller Lehigh Company. (See Bailey, E. G., Kerr, and Hardgrove, assignors.)

Furgason, Claude E., assignor to Reo Motor Car Company, Lansing, Mich. Hydraulic clutch release. 2,002,315; May 21.

Fürrer, Carl, assignor to Landis & Gyr, A.-G., Zug, Switzerland. Ticket dispensing means. 2,001,903; May 21.

Fuse, Christian J. (See Gibson, C. H., Downs, and Fuse.)

Gallimore, Keith F., assignor to Giddings & Lewis Machine Tool Co., Fond du Lac, Wis. Drive for machine tool elements. 2,002,480; May 21.

Gammeter, John R., Akron, Ohio, assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Apparatus for making rubber thread. 2,001,780; May 2.

Gantz, Jack I., Los Angeles, Calif. Fluid pressure dispensing machine. 2,002,175; May 21.

Gantzckow, Hans. (See Fischer, E., and Gantzckow.)

Gard, Earle W., Palos Verdes Estates, assignor to Union Oil Company of California, Los Angeles, Calif. Treating oil. 2,002,004; May 21.

Garman, George W., Scotia, N. Y., assignor to General Electric Company, Regulating system. 2,002,371; May 21.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock drill. 2,001,716; May 21.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricating device. 2,001,717; May 21.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock drilling motor. 2,001,718; May 21.

Gauthier, Alfred, Calmbach-Enz, and K. Bührle, Holen-Enz, Germany. Lens shutter with combined exposure meter, view finder and distance meter. 2,001,840; May 21.

Gebres, Hewitt A., assignor to Cooper-Bessemer Corporation, Mount Vernon, Ohio. Engine compressor assembly. 2,002,200; May 21.

Geist, Walter, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Power transmitting mechanism. 2,002,055; May 21.

Gemex Company. (See Einsele, Robert, assignor.)

General Aniline Works, Inc. (See Eichwede, Heinz, assignor.)

General Aniline Works, Inc. (See Nocken, T., and Neelmeier, assignors.)

General Aniline Works, Inc. (See Wagner, H., Krzikalla, and Kirsch, assignors.)

General Electric Company. (See Arey, R. G., and Faus, assignors.)

General Electric Company. (See Eto, Hiroshi, assignor.)

General Electric Company. (See Frohmer, Claus, assignor.)

General Electric Company. (See Garman, George W., assignor.)

General Electric Company. (See Greentree, C. D., and Mead, assignors.)

General Electric Company. (See King, William R., assignor.)

General Electric Company. (See Westendorp, Willem F., assignor.)

General Electric Company. (See Woodruff, Henry S., assignor.)

General Motors Corporation. (See Almen, John O., assignor.)

General Motors Corporation. (See Caminez, Harold, assignor.)

General Motors Corporation. (See Chilton, Ralph H., assignor.)

General Motors Corporation. (See McPherson, Hal W., assignor.)

General Motors Corporation. (See Rabezzana, H., and Battey, assignors.)

General Motors Corporation. (See Randolph, Donald W., assignor.)

General Motors Corporation. (See Shoemaker, F. G., and Ehrling, assignors.)

General Motors Corporation. (See Thomson, Bernard, assignor.)

General Motors Corporation. (See Watson, James B., assignor.)

General Motors Truck Corporation. (See Flogaus, Howard A., assignor.)

General Railway Signal Company. (See Blodgett, Edwin O., assignor.)

General Railway Signal Company. (See Bodde, Theodore, assignor.)

General Railway Signal Company. (See Day, Salisbury M., assignor.)

General Railway Signal Company. (See Merkel, Joseph F., assignor.)

General Steel Castings Corporation. (See Sheehan, William M., assignor.)

George Manufacturing Company. (See George, Robert H., assignor.)

George, Robert H., assignor to George Manufacturing Company, Inc., Philadelphia, Pa. Cylinder cock. 2,002,450; May 21.

Gerlinger, Carl F., Dallas, Oreg. Engine spark extinguisher. 2,002,027; May 21.

Gerlinger, Carl F., Dallas, Oreg. Fire box of oil burning locomotives. 2,002,028; May 21.

Gerlinger, Carl F., Dallas, Oreg. Door for fireboxes of oil burning locomotives. 2,002,029; May 21.

Gest, Henry. (See Crosley, P., Jr., and Gest.)

Gibson, Charles H., L. E. Downs, and C. J. Fuse, Richmond, Va., assignors to The American Tobacco Company, New York, N. Y. Cigarette wrapper cutting machine. 2,002,142; May 21.

Gibson, William, & Son, Limited. (See Simpson, Harold W., assignor.)

Giddings & Lewis Machine Tool Co. (See Gallimore, Keith F., assignor.)

Gietmann, Anton, assignor to Rheinische Metallwaaren- und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Automatic fuze setting apparatus. 2,002,056; May 21.

Girard Model Works, Inc., The. (See Smith, Anthony N., assignor.)

Goodman Manufacturing Company. (See Cartlidge, Frank, assignor.)

Goodrich, B. F. Company, The. See Mayne, Robert, assignor.)

Goodstein, Joseph, New York, N. Y. Filler for quilts or the like. 2,001,782; May 21.

Goodwillie, David H., and E. L. Walters, assignors, by mesne assignments, to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Cut-off mechanism for sheet material. 2,002,346; May 21.

Gordon, Beirne, Jr., and H. J. V. Michel, assignors to Skenandoa Rayon Corporation, Utica, N. Y. Artificial silk manufacture. 2,002,481; May 21.

Goriup, Frank J., McKees Rocks, assignor to Wolverine Supply and Manufacturing Company, Pittsburgh, Pa. Toy washing machine. 2,001,822; May 21.

Gorman-Rupp Company. (See Rupp, Herbert E., assignor.)

Gossiau, Fritz, Berlin-Charlottenburg, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Machine set composed of two engines and a driven machine. 2,002,316; May 21.

Goth, Imre, Berlin, Germany. Shoe with elastic rubber insert. 2,001,841; May 21.

Gottlieb, Stella A., New York, N. Y. Carton or container. 2,002,005; May 21.

Gray, Wallace M., Cincinnati, Ohio. Water hammer eliminator. 2,002,451; May 21.

Greene, Curtis, San Diego, Calif. Anchor post. 2,001,719; May 21.

Greelle, Otto W., Elyria, Ohio, assignor to The Pfaudler Co., Rochester, N. Y. Fluid nozzle. 2,002,242; May 21.

Greentree, Charles D., and M. S. Mead, Jr., Schenectady, N. Y., assignors to General Electric Company. Vibration velocity measuring device. 2,002,372; May 21.

Greenwald, Harold A., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Cooling unit. 2,001,872; May 21.

Greenwood, Ernest L. (See Dickie, W. A., and Greenwood.)

Gregg, David, Caldwell, assignor to Bendix Research Corporation, East Orange, N. J. Aircraft. 2,002,057; May 21.

Gregg, David, Caldwell, assignor, by mesne assignments, to Eclipse Aviation Corporation, East Orange, N. J. Fluid clutch. 2,002,058; May 21.

Gregoire, Gedeon, Southbridge, Mass. Shoe channeling and grooving machine. 2,001,720; May 21.

Griesel, Heinrich, Berlin, Germany. Structure for building. 2,002,347; May 21.

Griess, Pfleger & Company. (See Hartt, Robert A., assignor.)

Griggs, Stephen A. (See Higbee, James F., assignor.)

Grommesch, Albert P. (See Brown, Newman T., assignor.)

Grommesch, Katherine H. (See Brown, Newman T.)

Grothe, Walter, Alameda, assignor to Caterpillar Tractor Company, San Leandro, Calif. Furnace. 2,002,030; May 21.

Gruver, Joseph H., Catonsville, Md., and J. H. Baldwin, New Milford, Conn., assignors to Container Fitments Inc., New York, N. Y. Nonrefillable bottle stopper. 2,002,143; May 21.

Gulf Refining Company. (See Payne, C. R., and Stevens, assignors.)

Gunn, Earl G., Racine, Wis., assignor, by mesne assignments, to Bendix Products Corporation, South Bend, Ind. Brake. 2,001,958; May 21.

Gurley, Robert L., assignor of one-half to C. M. Dees, Oakfield, Tenn. Plow. 2,002,039; May 21.

Gustafson, Joseph G., Midland, Calif., assignor to United States Gypsum Company, Chicago, Ill. Gypsum plaster and manufacturing same. 2,002,176; May 21.

Guyler, Albert F. (See Welch, S. A., Guyler, Boaler, and Ashby.)

Gyro Process Company. (See Throckmorton, John W., assignor.)

Halls, Edward T., Montgomery, Ala. Towel cabinet. 2,002,088; May 21.

Hall, George W., Moodus, and C. C. Barton, Wethersfield, Conn. Hook. 2,001,959; May 21.

Hall, Mora S., Baltimore, Md., assignor to May Oil Burner Corporation. Combustion-chamber heating device. 2,001,721; May 21.

Hall, Percy E., Birmingham, England, assignor to Bendix Aviation Corporation, South Bend, Ind. Brake. 2,002,006; May 21.

Hammond, John H., Jr., Gloucester, Mass. Musical instrument. 2,001,722; May 21.

Hammond, John H., Jr., Gloucester, Mass. Regenerative piano. 2,001,723; May 21.

Hammond, John H., Jr., Gloucester, Mass. Piano recording. 2,001,724; May 21.

Hancock, William H., Okmulgee, Okla. Nut cracking machine. 2,002,289; May 21.

Hano, Edward, Holyoke, Mass. Transfer sheet. 2,001,960; May 21.

Hansen, Edmund H., Los Angeles, Calif. System for synchronizing sound with motion pictures. 2,002,111; May 21.

Hanson, Arthur E., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Sheet flash welder. 2,002,007; May 21.

Hansson, Bror, Stockholm, assignor to Allmanna Svenska Elektriska Aktiebolaget, Vasterns, Sweden. Electrical condenser. 2,001,873; May 21.

Hardgrove, Ralph M. (See Bailey, E. G., Kerr, and Hardgrove.)

Harmon, Dewey E., Dallas Center, Iowa. Combination hair curling instrument. 2,001,904; May 21.

Harrington, Leonard E., Long Beach, assignor to Perkins Cementing, Inc., Los Angeles, Calif. Dumping apparatus for oil wells. 2,002,112; May 21.

Harris, George S., Jr., Boston, assignor to B. H. Benson, Brookline, Mass. Apparatus for blood transfusion. 2,002,008; May 21.

Harris, Gordon D., Sound Beach, assignor to The Industrial Dryer Corporation, Stamford, Conn. Treatment of tobacco and similar materials. 2,002,000; May 21.

Harris, Henry H., Champaign, Ill. Ornamental panel and the like of rustless steel and vitreous enamel. 2,001,725; May 21.

Hart, Simeon T., and W. A. Marcy, assignors to The Lamson Company, Syracuse, N. Y. Conveyer system. 2,002,009; May 21.

Hartt, Robert A., Lynn, Mass. assignor, by mesne assignments, to Griess, Pfleger & Company, Inc., Cincinnati, Ohio. Method of and machine for applying reenforcing strip material. 2,002,452; May 21.

Hastings, Harold P., assignor to Crouse-Hinds Company, Syracuse, N. Y. Electric plug and socket. 2,002,177; May 21.

Hatala, John. (See Sera, S., and Hatala.)

Hauser, Hermann, Basel, and M. Bommer, Riehen, near Basel, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Anthraquinone derivative and making same. 2,002,264; May 21.

Haynes Stellite Company. (See Wissler, William A., assignor.)

Haynes Stellite Company. (See Woods, Gorham W., assignor.)

Hazeltine Corporation. (See Wheeler, Harold A., assignor.)

Heany, John A., and H. St. Laurent, New Haven, Conn., assignor, by direct and mesne assignments, to Radio Research Laboratories Inc. Regenerative system and operating the same. 2,002,201; May 21.

Heaton, Wilma O., Oakland, Calif. Applicator. 2,002,144; May 21.

Heberlein Patent Corporation. (See Bodmer, A., and Weiss, assignors.)

Heck, Harry J., and J. M. Simpson, Muncie, assignors, by mesne assignments, to Free Wheeling Patents Corporation, South Bend, Ind. Free wheeling transmission and control therefor. 2,001,783; May 21.

Heggie, James. (See Corrall, H., and Heggie.)

Heilman, Roman A. (See Bourret, Clyde E., assignor.)

Hein, John, Ridgewood, N. Y. Brush holder. 2,002,202; May 21.

Heise, Arthur C., and M. W. Jacobi, Baltimore, Md. Teething and feeding nipple. 2,001,842; May 21.

Heitman, Edward, assignor to Kelvinator Corporation, Detroit, Mich. Compressing unit. 2,001,874; May 21.

Hem, Halvor O., assignor to Toledo Scale Manufacturing Company, Toledo, Ohio. Weighing scale. 2,001,905; May 21.

Henley's, W. T. Telegraph Works Company. (See Fry, Francis H., assignor.)

Henry, Henry L., assignor of one-half to F. S. Warring, La, Calif. Sprinkler. 2,002,178; May 21.

Henwood, Lloyd S., Merchantville, assignor to C. Howard Hunt Pen Company, Camden, N. J. Writing pen. 2,001,726; May 21.

Herman, Isidor. (See Berlin, B., and Herman.)

Herrmann, Walter. (See Streitwolf, K., Fehrle, Herrmann, Fritzsche, and Schnitzer.)

Hess, Edward B., Orlando, Fla., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 2,002,395; May 21.

Higbee, James F., assignor of one-half to S. A. Griggs, Detroit, Mich. Brake. 2,001,875; May 21.

Hilliard, Glenn E., Brackenridge, Pa. Method of and apparatus for treating metals. 2,002,010; May 21.

Hinegardner, Wilbie S., Prince Bay, Staten Island, N. Y., assignor to E. I. du Pont de Nemours & Company, Inc., Wilmington, Del. Formaldehyde solution. 2,002,243; May 21.

Hitchcock, Charles A., Pana, Ill. Tractor attachment for broadcast seeders. 2,002,179; May 21.

Hite, Rollie B., Nevada, Ohio. Grass trimmer. 2,002,396; May 21.

Hodgkin, Edward E., W. W. Wodell, and H. Lange, assignors to Quincy Stove Manufacturing Co., Quincy, Ill. Valve organization for gas ranges. 2,002,080; May 21.

Hoe, R., & Co. (See Horton, Albert J., assignor.)

Hoehn, John J. (See Larson, I. J., and Hoehn.)

Hofmann, Wilhelm, Bitterfeld, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Apparatus for utilizing heat of condensates. 2,001,784; May 21.

Hogan, Walter E. (See Toomey, J. F., and Hogan.)

Hoke, William E., Baltimore, Md. Taper roller lapping device and method. 2,002,317; May 21.

Holden, Artemas F., New Haven, Conn. Case hardening composition. 2,002,180; May 21.

Holman, Arthur J., Brookline, Mass. Automatic razor edging machine. 2,001,727; May 21.

Höme, Hugo, Essen, Germany. Hydraulic shock absorber for automobiles. 2,002,397; May 21.

Höme, Hugo, Essen, Germany. Stabilizer for vehicles. 2,002,398; May 21.

Hood Rubber Company. (See Diller, A. L., and L'Hollier, assignors.)

Hood Rubber Company. (See L'Hollier, Leslie H., assignor.)

Hoover Company, The. (See Altenkirch, Edmund, assignor.)

Hoover, Melvin P. (See Berning, T. J., and Hoover.)

Horton, Albert J., White Plains, assignor to R. Hoe & Co., Inc., New York, N. Y., Irving Trust Company, permanent trustee. Web roll controlling mechanism. 2,002,011; May 21.

Horton, Erwin C. (See Hueber, E. C., and Hueber.)

Hosmer, F. H. (See Nyborg, Marinus, J. C., assignor.)

House, Samuel G., and A. B. Small, Miami, Fla. Combined refrigerating and advertising display device. 2,002,061; May 21.

Howard, James H., Houston, Tex., assignor to J. H. McEvoy & Company. Stuffing box for polish rods. 2,002,012; May 21.

Howard, James H., assignor to J. H. McEvoy & Company, Houston, Tex. Well production apparatus. 2,002,062; May 21.

Hueber, Henry, Buffalo, and E. C. Horton, Hamburg, assignors to Trico Products Corporation, Buffalo, N. Y. Vacuum stabilizer. 2,002,318; May 21.

Hueber, Henry, assignor to Trico Products Corporation, Buffalo, N. Y. Motor vehicle cooling system. 2,002,319; May 21.

Huffman, Mervin C., Claremont, N. H., assignor to Sullivan Machinery Company. Rock drilling motor. 2,001,728; May 21.

Huffman, Mervin C., Claremont, N. H., assignor to Sullivan Machinery Company. Drilling apparatus. 2,001,729; May 21.

Huggett, Martin C., Chicago, Ill., assignor, by mesne assignments, to Research Inc. Thermal insulation. 2,001,912; May 21.

Hultquist, Charles A., Los Angeles, Calif., assignor to Independent Pneumatic Tool Company, Chicago, Ill. Rock drill chuck. 2,002,203; May 21.

Hunt, C. Howard, Pen Company. (See Henwood, Lloyd S., assignor.)

Hunt, Roland E., Cincinnati, Ohio. Garbage disposal receptacle. 2,002,113; May 21.

Hupp Motor Car Corporation. (See Johnson, Hugh A., assignor.)

Hurt, Samuel N., assignor to Toledo Scale Manufacturing Company, Toledo, Ohio. Coin controlled indicating device. 2,002,373; May 21.

Hurt, Victor H., Naugatuck, Conn., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Making inflatable articles. 2,001,785; May 21.

Hvoslef, Fredrik W. Kohler, Wis. Sheath for radiators and the like. 2,001,876; May 21.

I. G. Farbenindustrie Aktiengesellschaft. (See Eisenhut, O., Schilling, and Baumann, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Hofmann, Wilhelm, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Irion, W., and Mahn, assignors.)

Ilberg, Waldemar, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Transmitter. 2,002,181; May 21.

Illinois Tool Works. (See England, Frank W., assignor.)

Illinois Watch Case Company. (See Ireland, E. S., and Krabbe, assignors.)

Independent Pneumatic Tool Company. See Hultquist, Charles A., assignor.)

Industrial Dryer Corporation, The. (See Harris, Gordon D., assignor.)

Industrial Patents Corporation. (See Jenson, Lloyd B., assignor.)

Ingmanson, John H., Rahway, N. J., and G. S. Mueller, Richmond Hill, N. Y., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Treating gutta percha. 2,002,204; May 21.

Ingraham, E., Company, The. (See Carlson, Elef L., assignor.)
Ilford Limited. (See Berry, William A., assignor.)
Inside Tray Company. (See Mitchell, Orville, assignor.)
International Check Endorser Co., The. (See Rix, Edward G., assignor.)
International Harvester Company. (See Bechman, William O., assignor.)
International Harvester Company. (See Johnston, E. A., Raney and Johnson, assignors.)
International Harvester Company. (See Johnston, E. A., and Bater, assignors.)
International Harvester Company. (See Johnston, Edward A., assignor.)
International Harvester Company. (See Krieg, A., and Bundy, assignors.)
International Harvester Company. (See Mowry, Edward, assignor.)
International Harvester Company. (See Panzegrau, Norman O., assignor.)
International Harvester Company. (See Pearson, Charles, assignor.)
International Motor Company. (See Ucko, Bernard, assignor.)
International Patents Development Company. (See Chalmers, George W., assignor.)
Invex Corporation. (See Craig, Palmer H., assignor.)
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,001,906; May 21.
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Treatment of motor fuel. 2,001,907; May 21.
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 2,001,908; May 21.
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 2,001,909; May 21.
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,001,910; May 21.
Irelan, Ellison S. and R. J. Krabbe, assignors to Illinois Watch Case Company, Elgin, Ill. Display case. 2,001,820; May 21.
Irion, Wilhelm, and H. Mahn, Dessau-In-Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of fibroin solutions. 2,002,063; May 21.
Irving Trust Company, Permanent trustee. (See Horton, Albert J.)
Ives, Herbert E., Montclair, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electrooptical system. 2,001,730; May 21.
Ives, Herbert E., Montclair, N. J., assignor to The Perser Corporation, New York, N. Y. Making parallax panoramagrams. 2,002,090; May 21.
Jabouley, Joanny, London, England, assignor, by mesne assignments, to Celanese Corporation of America. Guiding or spacing of yarns in warp form. 2,002,091; May 21.
Jacobi, Millard W. (See Helse, A. C. and Jacobi.)
Jaffe, Harry. (See Parker, W. H. and Jaffe.)
Jakob, Gottfried, Perlach, near Munich, assignor to Chemische Werke Marienfelde Aktiengesellschaft, Berlin-Marienfelde, Germany. Clearing the contents of fermentation and storage containers. 2,002,145; May 21.
Jameson, Reuben M. (See Fantone, C. B., and Jameson.)
Jeneson, George R., Cincinnati, Ohio, assignor to American Can Company, New York, N. Y. Blank shearing apparatus. 2,001,731; May 21.
Jensen, James A., assignor to Quaker City Iron Works, Philadelphia, Pa. Hose coupling. 2,002,472; May 21.
Jensen, Karl E., Danville, Ill., assignor to E. F. Kemp, Washington, D. C. Hand protector. 2,001,961; May 21.
Jensen, Lloyd B., assignor to Industrial Patents Corporation, Chicago, Ill. Meat treating method. 2,002,146; May 21.
Jeppsson, Irar. (See McArdle, M. W., and Jeppsson.)
Jessop Steel Company. (See Trembour, M. R. and Wilson, assignors.)
Johns-Manville Corporation. (See Kellogg, George D., assignor.)
Johnson, Albin, Belding, Mich. Chair. 2,002,118; May 21.
Johnson, Arnold E. W. (See Johnston, E. A., Raney and Johnson.)
Johnson, Hugh A., assignor to Hupp Motor Car Corporation, Detroit, Mich. Vehicle body construction. 2,001,877; May 21.
Johnson, Hugh A., assignor to Hupp Motor Car Company, Detroit, Mich. Motor vehicle. 2,001,878; May 21.
Johnson, John M., Kansas City, Mo. Thermostat. 2,002,031; May 21.
Johnston, Edward A., Chicago, C. R. Raney, Riverside, and A. E. W. Johnson, assignors to International Harvester Company, Chicago, Ill. Harvester thresher. 2,002,205; May 21.
Johnston, Edward A., Chicago, Ill., assignor to International Harvester Company. Combined grain and transport wheel for harvester threshers. 2,002,473; May 21.
Johnston, Edward A., Chicago, and D. B. Baker, Riverside, Ill., assignors to International Harvester Company. Frame for track type tractors. 2,002,474; May 21.
Jones, Fred A., Los Angeles, Calif. Toothbrush. 2,002,320; May 21.
Jones & Lamson Machine Company. (See Lovely, John E., assignor.)
Jordan, Daniel L., assignor to Clark Metal Products, Inc., Bridgeport, Conn. Apparatus for arranging and feeding irregular shaped articles. 2,002,147; May 21.
Jorgensen, Jacob C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for shaping shoe uppers. 2,001,732; May 21.
June, Ralph S., assignor of one-half to G. A. Anderson, Seattle, Wash. Ignition system. 2,002,114; May 21.
Juster, Louis H., St. Lambert, Quebec, Canada, assignors to L. E. Waterman Company, New York, N. Y. Ink well. 2,002,092; May 21.
K-D Manufacturing Company. (See Clemens, Fred J., assignor.)
Kaden, Karl Muhlbach Bez. Chemnitz, Germany. Flat spring and making the same. 2,002,399; May 21.
Kahn, Adolph R. (See Amezcua, Heriberto, assignor.)
Kamper, Andrew M., Surbiton, assignor to No-Nail Cases Proprietary Limited, London, England. Apparatus for attaching metal strips to sheets of wood, composition boarding, or the like. 2,002,265; May 21.
Kantrow, Joseph W., Long Island City, N. Y. Ornamental material and making the same. 2,001,962; May 21.
Karnaghan, Clyde H., Memphis, Tenn. Bottle dispensing apparatus. 2,001,786; May 21.
Kasley, Alexander T., Prospect Park, Pa., assignor to D. C. E. Development Company, Wilmington, Del. Fuel injection system for internal combustion engines. 2,001,843; May 21.
Kauffman, Edmund J., Girard, assignor to Valley Mould & Iron Corporation, Hubbard, Ohio. Ingot mold. 2,001,879; May 21.
Kearfott Engineering Company. (See Kraemer, Waldo L., assignor.)
Keenan, Edward T., assignor of one-half to Florida Fruit Canners Inc., Frostproof, Fla. Fertilizer. 2,002,400; May 21.
Keller, George J., Detroit, Mich. True bite attachment. 2,001,963; May 21.
Kellogg, George D., Pelham Manor, assignor to Johns-Manville Corporation, New York, N. Y. Sound deadening structure. 2,001,733; May 21.
Kelsey-Hayes Wheel Company, The. (See Le Jeune, Frank H., assignor.)
Kelvinator Corporation. (See Greenwald, Harold A., assignor.)
Kelvinator Corporation. (See Heitmann, Edward, assignor.)
Kelvinator Corporation. (See Ohmart, Grayston R., assignor.)
Kemp, Archie R. (See Williams, R. R. and Kemp.)
Kemp, Charles and L., New York, N. Y. Lock. 2,002,014; May 21.
Kemp, Ervin F. (See Jensen, Karl E., assignor.)
Kemp, Irving. (See Kemp, Charles and I.)
Ken-Crip Corporation. (See Kennedy, Guy L., assignor.)
Kennedy, Guy L., assignor to Ken-Crip Corporation, New York, N. Y. Valve. 2,002,182; May 21.
Kerr, Howard J. (See Bailey, E. G., Kerr and Hardgrove.)
Kerr, Howard J., Westfield, N. J., and I. L. Langvand, Barberton, Ohio, assignors to The Babcock & Wilcox Company, Bayonne, N. J. Boiler. 2,001,734; May 21.
Kerr, Howard J., Westfield, N. J., and I. L. Langvand, Barberton, Ohio, assignors to The Babcock & Wilcox Company, Bayonne, N. J. Boiler. 2,001,735; May 21.
Kleckhefer Container Company. (See Kleckhefer, H. M., and Dock, assignors.)
Kleckhefer, Herbert M., Riverton, N. J., and W. R. Dock, assignors to Kleckhefer Container Company, Milwaukee, Wis. Handle construction for baskets. 2,002,013; May 21.
Kimball, Leo B., New Haven, Conn., assignor to Fuel Development Corporation. Automatic control of antiknock liquids. 2,002,482; May 21.
Kimball, Leo B., New Haven, Conn., assignor to Fuel Development Corporation. Automatic control of antiknock liquids. 2,002,483; May 21.
Kimbrig, Louis, Brooklyn, N. Y. Furniture spring. 2,001,964; May 21.
King, William R., Schenectady, N. Y., assignor to General Electric Company, a Control system. 2,002,374; May 21.
Kinmucan, James W., assignor to Continental Motors Corporation, Detroit, Mich. Engine. 2,001,913; May 21.
Kirby, James B., West Richfield, assignor, by mesne assignments, to The Apex Electrical Manufacturing Company, Trustee, Cleveland, Ohio. Laundry machine. 2,001,965; May 21.
Kirsch, Alfred. (See Wagner, H., Krzikalla, and Kirsch.)
Kjaer, Viggo A., Copenhagen, Denmark. Resilient coupling. 2,002,115; May 21.
Klinkert, Leonard, Eindhoven, Netherlands, assignor to Radio Corporation of America. Making grid electrodes. 2,002,148; May 21.
Klopfer, William H. (See Ammerman, J. W., Barker, Klopfer and Manss.)
Kluge, Abel and E., St. Paul, assignors to Brandtjen and Kluge, Inc., St. Paul, Minn. Inking mechanism for printing presses. 2,002,032; May 21.
Kluge, Eneval. (See Kluge, Abel and E.)
Kluitmann, Leo, Dusseldorf, Germany. Rotary duplicator. 2,002,321; May 21.

Kneeland, Herbert D., Dundalk, Md. Dish or pan lifter. 2,002,149; May 21.
Knorr-Bremse Aktiengesellschaft. (See Möller, Ernst, assignor.)
Knowlton, Norwood H., Rockport, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lubrication of bearings. 2,001,823; May 21.
Kobe, Thomas R., Los Angeles, Calif. Roofing tile fastener. 2,002,206; May 21.
Koepp, Rudolph & Co. Chemische Fabrik A. G. (See Enderli, Max, assignor.)
Kohanek, Herman, Portland, Oreg. Rug-hooking device. 2,002,401; May 21.
Kohl, Thomas, Wilkes-Barre, Pa. Socket for artificial limbs. 2,002,064; May 21.
Konopka, Joseph, Detroit, Mich. Combined shock absorbing and stabilizing structure. 2,002,402; May 21.
Koppers Company of Delaware, The. (See Eymann, Constanz, assignor.)
Koppers Company of Delaware, The. (See Shoeld, Mark, assignor.)
Kopsa, Julius F., Chicago, Ill. Refrigerating system. 2,002,033; May 21.
Kosma, Gustav, assignor to Ocean City Manufacturing Company, Philadelphia, Pa. Fishing reel construction. 2,002,403; May 21.
Kosten, Johannes and J. J. Verwys, Grand Rapids, Mich. Reflector. 2,002,015; May 21.
Krabbe, Roy J. (See Irelan, E. S., and Krabbe.)
Kraemer, Waldo L., Brooklyn, N. Y., assignor to Kearfott Engineering Company, Inc. Window regulator mechanism. 2,002,322; May 21.
Kral, Charles A., Steubenville, Ohio. Rolling strip material. 2,002,266; May 21.
Kreighbaum, Herbert S. (See Roberts, Harold P., assignor.)
Kremper, Julius, Oakland, Calif. Roofing tile. 2,002,244; May 21.
Krieg, Alfred, and J. A. Bundy, Fort Wayne, Ind., assignors to International Harvester Company. Dual wheel mounting. 2,002,290; May 21.
Kruta, Erich. (See Sedlmayr, R., and Kruta.)
Kryszewski, Stanley W., Carteret, and E. L. Cahoon, Westfield, N. J., assignors to Foster Wheeler Corporation, New York, N. Y. Cooling tower. 2,002,065; May 21.
Krzikalla, Hans. (See Wagner, H., Krzikalla, and Kirsch.)
Kulka, Eugene R., assignor to C. D. Wood Electric Co. Inc., New York, N. Y. Connecter element. 2,002,291; May 21.
Kumm, Arthur, Dearborn, Mich. Fishing bait. 2,001,844; May 21.
Kurz, Arthur L., assignor to Kurz Company, Chicago, Ill. Mixing device. 2,002,323; May 21.
Kurz Company. (See Kurz, Arthur L., assignor.)
Kyle, George L., assignor to U S L Battery Corporation, Niagara Falls, N. Y. Storage battery construction. 2,002,267; May 21.
Kyser, Smith, Philadelphia, Pa., assignor to Aircraft Specialties, Inc. Tool for inserting valve lock washers or keepers. 2,002,016; May 21.
La Brie, Ludger E., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,002,017; May 21.
Lakin, John W., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Latch. 2,001,787; May 21.
Lambach, Fritz, assignor to Robert Reiner, Inc., Weehawken, N. J. Knitting machinery. 2,002,116; May 21.
Lambourne, Herbert D., assignor of forty-five per cent to J. G. Onnen, and twenty per cent to J. W. Simpson, and ten per cent to S. E. Simpson, and five per cent to G. H. Becker, Baltimore, Md. Advertising device. 2,001,886; May 21.
Lamort, Marcel, assignor to Etablissements E. & M. Lamort Fils, Vitry-le-Francois, France. Pulp strainer. 2,002,404; May 21.
Lamson Company, The. (See Collar, Linus R., assignor.)
Lamson Company, The. (See Hart, S. T., and Marcy, assignors.)
Landis & Gyr, A.-G. (See Fürrer, Carl, assignor.)
Landis & Gyr, A.-G. (See Ogurkowski, Georg, assignor.)
Lange, Henry. (See Hodgkin, E. E., Wodell, and Lange.)
Langvand, Ivar L. (See Kerr, H. J., and Langvand.)
Lansing, Raymond P., Montclair, assignor, by mesne assignments, to Eclipse Aviation Corporation, East Orange, N. J. Engine starting mechanism. 2,002,405; May 21.
Lantz, Robert, assignor of one-half to Societe Anonyme des Matieres Colorantes & Produits Chimiques de Saint-Denis, Paris, France. Dyeing. 2,002,406; May 21.
Larason, John E., Dayton, Ohio. Power transmission device. 2,001,736; May 21.
Larson, Iner J., Oaklyn, and J. J. Hoehn, Camden, N. J., assignors to Radio Corporation of America. Speed regulator. 2,002,150; May 21.
Larsson, Lars I. H., Snopptorp, Eskilstuna, Sweden. Perforated queen-excluder in beehives. 2,001,845; May 21.
Laser, Glenn A., Mansfield, Ohio. Electrical outlet and connecter for railway tracks. 2,002,034; May 21.
Lassen, Elvind V., West Allis, and E. W. Seeger, Wauwatosa, Wis., assignors to Cutler-Hammer, Inc., Milwaukee, Wis. Electric motor control system. 2,002,268; May 21.
Lavitt, James E., assignor to J. B. Watson, Everett, Wash. Artificial bait. 2,002,117; May 21.
Lawson, Albert R., Hamilton, Ontario, assignor, by mesne assignments, to American Sales Book Company, Limited, Toronto, Ontario, Canada. Triplicate manifolding book. 2,002,226; May 21.
Leaper, Percy J., Naugatuck, Conn., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Stabilization of aldehyde products. 2,001,788; May 21.
Leavock, Michael J., Detroit, Mich. Adjustable wrench. 2,001,789; May 21.
Lecarpentier, George H., Chicago, assignor to A. G. McCaleb, Evanston, Ill. Combination thermometer and hydrometer. 2,002,183; May 21.
Lecarpentier, George H., Chicago, assignor to A. G. McCaleb, Evanston, Ill. Antifreeze indicator. 2,002,184; May 21.
Ledbetter, James C., Jackson Heights, assignor to The Prosperity Company, Inc., Syracuse, N. Y. Garment or ironing press. 2,002,185; May 21.
Ledwinka, Joseph, Philadelphia, assignor to E. G. Budd Manufacturing Company, Philadelphia, Pa. Vehicle frame. 2,001,846; May 21.
Lee, Roger K., Highland Park, assignor to Chrysler Corporation, Detroit, Mich. Motor mounting. 2,002,269; May 21.
Lefever, Charles F., assignor to Daisy Manufacturing Company, Plymouth, Mich. Gun sight. 2,002,324; May 21.
Lefevre-Utile, Michel M. J., Paris, France. Container for the transportation of goods. 2,002,422; May 21.
Le Jeune, Frank H., assignor, by mesne assignments, to The Kelsey-Hayes Wheel Company, Detroit, Mich. Wheel. 2,002,292; May 21.
Leland, Ragnvald G., New York, N. Y. Finger hair wave pincer. 2,002,325; May 21.
Lemke, Hugo C., Reedsville, Wis. Fuel storage tank. 2,002,407; May 21.
LeMoon, Axel R., assignor to Nelson-LeMoon Truck Company, Chicago, Ill. Axle mounting. 2,002,152; May 21.
Lenehan, Bernard E., Bloomfield, N. J., assignor to Westinghouse Electric & Manufacturing Company. Non-self-starting clock-motor. 2,001,914; May 21.
L'Hollier, Leslie H. (See Diller, A. L., and L'Hollier.)
L'Hollier, Leslie H., Waltham, assignor to Hood Rubber Company, Inc., Watertown, Mass. Making ornamented rubber articles. 2,002,375; May 21.
Libbey-Owens-Ford Glass Company. (See Goodwillie, D. H., and Walters, assignors.)
Libbey-Owens-Ford Glass Company. (See Louviaux, Raoul J., assignor.)
Liebeskind, Bernhard, Berlin-Zehlendorf, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Pack of photographic plates. 2,002,035; May 21.
Lilienfeld, Julius E., Winchester, Mass. Asymmetric condenser and operating the same. 2,001,790; May 21.
Lincoln, Roy. (See Wooddell, C. E., Nelson, and Lincoln.)
Lind, Frederick A., assignor to Chrysler Corporation, Detroit, Mich. Valve mechanism. 2,002,270; May 21.
Linscott, Chester E., Saugus, Mass., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Treating latex and product obtained thereby. 2,001,791; May 21.
Lintern, Alfred R. (See Wernicke, G., and Lintern.)
List, Raymond F., assignor to National Sewing Machine Company, Belvidere, Ill. Electrically lighted sewing machine head. 2,001,966; May 21.
Lockrow, Laurice L., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. System for the neutralization of inductive interference. 2,001,847; May 21.
Lofstrand, Albin P., Chicago, Ill. Shock compressing attachment for grain shockers. 2,002,408; May 21.
Lombardi, Vincent, Garden City, N. Y. Knitted fabric. 2,002,271; May 21.
Lombi, Louis G., Teaneck, N. J. Ravioli machine. 2,001,792; May 21.
Long, Jon R., et al. (See Bullum, Stephen, assignor.)
Loose Leaf Metals Company. (See Newman, George W., assignor.)
Lorenz, William, and L. W. Pollack, New York, N. Y.; said Pollack assignor to said Lorenz. Doll eye mechanism. 2,002,326; May 21.
Louviaux, Raoul J., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Cutting table. 2,002,348; May 21.
Lovely, John E., assignor to Jones & Lamson Machine Company, Springfield, Vt. End facing and centering machine. 2,002,186; May 21.
Lowensohn, Rose, New York, N. Y. Making proofs. 2,002,293; May 21.
Lulek, Ralph N., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Anthraquinone derivatives. 2,001,737; May 21.
Lulek, Ralph N., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Anthrathiazole-anthraquinone carbonyl imides and preparing them. 2,001,738; May 21.
Lundeen, Edward F., Rock Island, Ill. Adjustable table. 2,002,349; May 21.
Lunsford, Errell C., Shreveport, La. Railway brake beam and bottom rod emergency support. 2,002,350; May 21.
Lyman, Kenneth E., Rockford, Ill. Automatic clutch. 2,001,931; May 21.
Lyon Incorporated. (See Lyon, George A., assignor.)

Lyon, George A., Allenhurst, assignor to Lyon Incorporated, Asbury Park, N. J. Unitary tire cover. 2,001,967; May 21.

Lyon, George A., Allenhurst, assignor to Lyon, Incorporated, Asbury Park, N. J. Shove down molded tire cover. 2,001,968; May 21.

Lyon, George A., Allenhurst, assignor to Lyon Incorporated, Asbury Park, N. J. One piece arcuate tire cover. 2,001,969; May 21.

M. J. B. Company. (See Bardet, George A. and G. V., assignors.)

Mable, Maria S., San Francisco, Calif. Hair waving apparatus. 2,001,915; May 21.

Maccabee, William. (See Darling, T. H., and Maccabee.)

MacGregor, R., Albany, assignor to Standard Oil Company of California, San Francisco, Calif. Gas burner. 2,001,739; May 21.

MacLaren, Fred B., Clifton, N. J., assignor, by mesne assignments, to Revelation Patents Holding Company. Electron device. 2,002,207; May 21.

MacMichael, Hugh R., El Paso, Tex., assignor to American Smelting & Refining Company, New York, N. Y. Retort clean-out machine. 2,001,881; May 21.

Maede, Leland S., Brooklyn, N. Y. Apparatus for roasting coffee. 2,002,094; May 21.

Mahn, Herbert. (See Irion, W., and Mahn.)

Malerie, George, Detroit, Mich. Lock. 2,001,824; May 21.

Manly Corporation. (See Centervall, Hugo, assignor.)

Mann, Harold B. (See Freed, H. H., and Mann.)

Mannheimer, Manfred, Berlin-Charlottenburg, Germany. Searchlight reflector. 2,002,376; May 21.

Manss, Frederick C. (See Ammerman, J. W., Barker, Klopfer, and Manss.)

Marcy, Willard A. (See Hart, S. T., and Marcy.)

Martin, Joseph, New York, assignor to United States Cabinet Bed Co., Brooklyn, N. Y. Edge supporting device. 2,001,882; May 21.

Martoccio, Frank A., Minneapolis, Minn. Method of and apparatus for applying nuts to candy bars. 2,002,018; May 21.

Marzolf, George B., assignor to Farwell Ozmun Kirk & Co., St. Paul, Minn. Air conditioning apparatus. 2,002,019; May 21.

Maul, Michael, Berlin-Johannesthal, Germany. Mechanical method of preparing statements, bills, and the like. 2,002,437; May 21.

Maurer, John A., Jr., New York, N. Y., assignor to Radio Corporation of America. Photographic printing apparatus and method for endless sound films. 2,002,151; May 21.

Maxson, Holland H., assignor to The Burdick Corporation, Milton, Wis. Electrosurgical apparatus. 2,002,116; May 21.

Maxwell, Charles G., Louisville, Ky., assignor, by mesne assignments, to The American Tobacco Company. Method of and apparatus for conditioning cigar wrapper leaf tobacco. 2,002,120; May 21.

May Oil Burner Corporation. (See Hall, Mora S., assignor.)

Mayne, Robert, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Resilient connecter. 2,002,377; May 21.

Maze, Hamilton, assignor to W. H. Maze Company, Peru, Ill. Roll roofing fastener. 2,001,932; May 21.

Maze, W. H., Company. (See Maze, Hamilton, assignor.)

Mazer, Jacob, Stonehurst, Pa. Sound absorbing material. 2,001,916; May 21.

Mazer, Jacob, Stonehurst, Upper Darby Township, Delaware County, Pa. Sound-absorbing unit and making the same. 2,001,970; May 21.

McAlister, Alexander, Darlinghurst, near Sydney, New South Wales, Australia. Bag-sewing apparatus. 2,002,227; May 21.

McArdle, Michael W., and I. Jeppson, assignors to Chicago Flexible Shaft Company, Chicago, Ill. Safety device for food choppers and the like. 2,001,793; May 21.

McBee Company, The. (See Welk, Nelson S., assignor.)

McCabe Mailer Corporation. (See Carpenter, Walter E., assignor.

McCabe, Ota A. (See McCabe, William R., assignor.)

McCabe, William R., assignor to O. A. McCabe, Seattle, Wash. Animal trap. 2,002,095; May 21.

McCaleb, Albert G. (See Lecarpentier, George H., assignor.)

McCann, George K., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,933; May 21.

McCann, John J., Jr., Lowell, Mass. Fabric expander for textile industry. 2,002,096; May 21.

McConkey, Montgomery W., assignor to Bendix Aviation Corporation, South Bend, Ind. Brake. 2,001,971; May 21.

McDaniel, Donald J., Chicago, Ill. Dental instrument for removing impacted teeth. 2,002,245; May 21.

McEvoy, J. H., & Company. (See Howard, James H., assignor.

McFall, Frank H., assignor of one-half to A. L. Baker, Alliance, Ohio. Gas burner attachment. 2,001,972; May 21.

McFarlane, Maynard D., New York, N. Y. Method and apparatus for transmission of pictures. 2,002,208; May 21.

McGavock, Ephraim, Max Meadows, Va. Shot concentrator. 2,002,036; May 21.

McKenna, Charles J., assignor to Atlas Supply Company, Newark, N. J. Support for electric batteries undergoing charging. 2,002,037; May 21.

McKeon, Frank P., Branford, Conn. Radiator fitting. 2,002,038; May 21.

McKinnon, Herbert L., and M. E. First, assignors to C. O. Bartlett & Snow Company, Cleveland, Ohio. Apparatus for blending sand and like materials. 2,001,973; May 21.

McKittrick, Ralph. (See Norris, Paul, assignor.)

McMaster, Carlos L., Cleveland Heights, Ohio. Hose coupling. 2,002,121; May 21.

McMath, Robert R., Detroit, Mich. Humidifying apparatus or the like. 2,002,294; May 21.

McNirol, James T. D., assignor of three-fourths to David & John Anderson, Limited, Glasgow, Scotland. Collar for personal wear. 2,001,883; May 21.

McPhee, Harold L., Chicago, Ill. Condiment measuring and dispensing device. 2,002,039; May 21.

McPherson, Hal W., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Refrigerator latch. 2,001,740; May 21.

McRae, Randolph J., New York, N. Y., assignor to Radial Hydrocarbon Processes, Inc. Treating hydrocarbon oils. 2,001,741; May 21.

McWane, William, et al., executors. (See McWane, James R.)

McWane Cast Iron Pipe Company. (See McWane, James R., assignor.)

McWane, James R., deceased, Birmingham, A. T. and W. McWane and J. H. Calaniss, executors, assignors to McWane Cast Iron Pipe Co., Birmingham, Ala. Forming metal fortified packer gaskets. 2,002,122; May 21.

McWane, A. T., et al., executors. (See McWane, James R.)

Meacham, Benjamin E., Lorain, Ohio, assignor to American Stove Company, St. Louis, Mo. Combined thermostatic and flame heat control for stove ovens. 2,002,409; May 21.

Mead, Milton S., Jr. (See Greentree, C. D., and Mead.)

Melton, Romie L., assignor to The Carborundum Company, Niagara Falls, N. Y. Apparatus and method of determining the tenacity of bonded granular bodies. 2,001,794; May 21.

Mendel, William, Beverly, N. J., assignor to Sylvania Industrial Corporation, Fredericksburg, Va. Artificial filament and its production. 2,002,153; May 21.

Merkel, Joseph F., assignor to General Railway Signal Company, Rochester, N. Y. Tractive type relay. 2,002,475; May 21.

Merkel, Joseph F., assignor to General Railway Signal Company, Rochester, N. Y. Tractive type relay. 2,002,476.

Merkel, Joseph F., assignor to General Railway Signal Company, Rochester, N. Y. Light signal for railroads. 2,002,477; May 21.

Metal Finishing Research Corporation. (See Tanner, R. R., and Thompson, assignors.)

Metal Finishing Research Corporation. (See Thompson, J. S., and Darsey, assignors.)

Metal & Thermit Corporation. (See Earle, Francis, assignor.)

Meyercord, George R., Chicago, Ill., and F. M. Curran, Grand Rapids, Mich., assignors, by mesne assignments, to Reconstruction Finance Corporation. Corner construction for furniture or the like. 2,002,228; May 21.

Michel, Harold J. V. (See Gordon, B., Jr., and Michel.)

Michelsen, William O., Long Island, assignor to Royal Typewriter Company Inc., New York, N. Y. Typewriting machine. 2,002,410; May 21.

Miller, Elliot A., New York, N. Y. Clothing container. 2,002,246; May 21.

Miller, Frank W., assignor to Yarnall-Waring Company, Philadelphia, Pa. Alarm water column. 2,002,327; May 21.

Miller, Herbert E., assignor to Utilities Service Company, Inc., Allentown, Pa. Strain device. 2,001,917; May 21.

Miller, John G., Baltimore, Md. Coin controlled mechanism. 2,002,123; May 21.

Mitchell, John E., Dallas, Tex. Cotton cleaning and reclaiming machine. 2,001,974; May 21.

Mitchell, Orville, assignor to Inside Tray Company, Dallas, Tex. Serving tray. 2,002,328; May 21.

Mock, Frank C., Montclair, assignor, by mesne assignments, to Eclipse Aviation Corporation, East Orange, N. J. Fuel feed control. 2,002,040; May 21.

Möller, Ernst, Karlshorst, assignor to Knorr-Bremse Aktiengesellschaft, Berlin, Germany. Pressure medium conduit. 2,002,329; May 21.

Moore, James D. (See Campbell, James H., assignor.)

Moritz, Adrian J. L., assignor to American Enka Corporation, Enka, N. C. Manufacture of artificial silk. 2,001,742; May 21.

Morris, George W., et al. (See Brady, Lester C., assignor.)

Morrison, Willard L., Lake Forest, Ill. Air cooling and circulating device and process. 2,002,234; May 21.

Morrison, Willard L., Lake Forest, Ill. Air cooling and circulating device. 2,002,235; May 21.

Morrison, Willard L., assignor to The Dole Valve Company, Chicago, Ill. Mirror device. 2,001,743; May 21.

Morse, Bowen B., Manitowoc, Wis. Grain door. 2,002,154; May 21.

Moser, Wilhelm, Riehen, near Basel, and W. Floroni, Binningen, near Basel, assignors to firm Society of Chemical Industry in Basle, Basel, Switzerland. Anthraquinone derivative and making the same. 2,002,247; May 21.

Motor Jack Corporation. (See Wolf, August M., assignor.)

Mowry, Edward, Rock Falls, Ill., assignor to International Harvester Company. Disk harrow. 2,002,272; May 21.

Moxley, Stephen D., assignor to American Cast Iron Pipe Company, Birmingham, Ala. Apparatus for relieving shocks on scales. 2,002,411; May 21.

Muehleisen, George H., Canton, Ohio. Traffic sign. 2,002,248; May 21.

Mueller, George S. (See Ingmanson, J. H., and Mueller.)

Munson Bag Company, The. (See Munson, John M., assignor.)

Munson, John M., Lakewood, assignor to The Munson Bag Company, Cleveland, Ohio. Bag and making same. 2,001,934; May 21.

Murchie, Jack. (See Murchie, John T., Jr., assignor.)

Murchie, John T., Jr., assignor to J. Murchie, Portsmouth, Ohio. Spool holder. 2,002,412; May 21.

Murdock, Charles L., Ann Arbor, and C. C. Cobb, Lansing, assignors to Dail Steel Products Company, Lansing, Mich. Hot air heating furnace. 2,002,295; May 21.

Murray, Linwood A. (See Brown, T., and Murray.)

N. V. Philips, Gloielampenfabrieken. (See van Geel, W. C., and Emmens, assignors.)

Nardone, Romeo M., assignor to Eclipse Aviation Corporation, East Orange, N. J. Engine starting mechanism. 2,002,413; May 21.

National Cash Register Company, The. (See Christian, Raymond A., assignor.)

National Cash Register Company, The. (See Frank, John P., assignor.)

National Lock Co. (See North, Edwin W., assignor.)

National Rubber Machinery Company. (See De Mattia, Peter, assignor.)

National Sewing Machine Company. (See List, Raymond F., assignor.)

National Standard Company. (See Domm, Elgin C., assignor.)

Neal, Albert E. T. (See Twiss, D. F., Neale, and Wilson.)

Neelmeier, Wilhelm. (See Nocken, T., and Neelmeier.)

Nelson, Charles S. (See Wooddell, C. E., Nelson, and Lincoln.)

Nelson, James R., Cambridge, assignor to Raytheon Production Corporation, Newton, Mass. Automatic volume control. 2,001,825; May 21.

Nelson-LeMoon Truck Company. (See LeMoon, Axel R., assignor.)

Neuenschwander, Otto, Kilchberg, Switzerland. Electric driving device. 2,002,124; May 21.

Nevius, Wilford J., Washington, D. C. Card table top. 2,001,918; May 21.

Newman, George W., St. Louis, Mo., assignor to Loose Leaf Metals Company, Post binder. 2,002,155; May 21.

Niagara Smelting Corporation. (See Brallier, Paul S., assignor.)

Niagara Blower Company. (See Bulkeley, Claude A., assignor.)

Nilsson, Nils T. A., Elma, Wash. Flea beetle catcher. 2,002,041; May 21.

Nocken, Elisabeth, administratrix. (See Nocken T. and Neelmeier.)

Nocken, Theodor, deceased, Leverkusen-I. G. Werk, Germany, by E. Nocken, Frankfort-on-the-Main, administratrix, and W. Neelmeier, Leverkusen-I. G. Werk, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Dyestuffs of the naphthophenazine series. 2,001,975; May 21.

Nolte, John J., Los Angeles, Calif. Preparing, packaging, and serving frozen confections. 2,001,919; May 21.

No-Nail Cases Proprietary Limited. (See Kamper, Andrew M., assignor.)

Nordahl, John G., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Modulating system. 2,002,209; May 21.

Norris, Paul, Ardmore, assignor of forty-five one-hundredths to R. McKittrick, Villanova, Pa. Container closure. 2,002,125; May 21.

North, Edwin, W., assignor to National Lock Co., Rockford, Ill. Lock. 2,002,453; May 21.

North, Mortimer S. (See Schreiber, Louis H., assignor.)

North American Holding Corporation. (See Avery, Alfred H., assignor.)

Northern Maine Plywood Company. (See Winchell, Thomas R., assignor.)

Nyborg, Marinus J. C., Columbia Heights, assignor of two-fifths to F. H. Hosmer, Minneapolis, Minn. Heat retarder. 2,002,020; May 21.

Nyquist, August R., Roseau, Minn. Electrode for arc welding. 2,001,848; May 21.

Ocean City Manufacturing Company. (See Kosma, Gustav, assignor.)

Ogurkowski, Georg, assignor to Landis & Gyr, A.-G., Zug, Switzerland. Motor driven switch mechanism. 2,001,920; May 21.

O'Hare, E. J., et al. (See Bacon, Willard M., Jr., assignor.)

Ohmart, Grayston R., assignor to Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 2,001,885; May 21.

Ohmsorge, Otto, Bochum, Germany. Friction drive. 2,002,126; May 21.

O'Horn, John B. (See Sensiba, Frederick H. and C. W., assignors.)

Oilgear Company, The. (See Ferris, Walter and J. P., Fobinn, and Benedek, assignors.)

Olshei, John R., and E. V. Schaal, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield storm screen. 2,002,438; May 21.

Ollendorff, Jacques, assignor to Anciens Etablissements R. Cornely & Cie., Société Anonyme, Paris, France. Machine for drawing threads from fabrics. 2,002,414; May 21.

Olsen, Johannes, assignor to Bnaas Mejerimaskinfabrikker, Afdeling Af Aktieselskabet Frederiksberg Metalvarefabrik, Aalborg, Denmark. Regenerative pasteurization apparatus. 2,001,849; May 21.

O'Neal, Nathaniel P., Hope, Ark. Manhole and cistern construction. 2,002,127; May 21.

Onnen, John G., et al. (See Lambourne, Herbert D., assignor.)

Osborn Manufacturing Company, The. (See Frost, Clinton E., assignor.)

Ostrander, Allen E. (See Wasberg, Axel, assignor.)

Otis, Harold A., Glen Ellyn, assignor to Chicago North Shore & Milwaukee Railroad Company, Chicago, Ill. Transportation means. 2,001,935; May 21.

Otto, Peter, Dusseldorf-Oberkassel, Germany. Producing seamless drawn tubes and other tubular articles. 2,002,415; May 21.

Outboard Motors Corporation. (See Evinrude, Ole, assignor.)

Owen Silent Spring Company, The. (See Dietrich, Charles, assignor.)

Owens, Freeman H., New York, N. Y. Sound film apparatus. 2,002,351; May 21.

Owens, Freeman H., New York, N. Y. Sound film apparatus. 2,002,352; May 21.

Owens-Illinois Glass Company. (See Barnard, Randolph H., assignor.)

Owens, Samuel H., Altoona, Pa. Movable abutment for container vehicles. 2,002,439; May 21.

Owens, Samuel H., Altoona, Pa. Movable abutments for container vehicles. 2,002,440; May 21.

Oyston, William R., Melbourne, Victoria, Australia. Apparatus for controlling excessive movements in sprung bodies on motor driven road vehicles. 2,002,249; May 21.

Packard Motor Car Company. (See Christman, John M., assignor.)

Palmer, Mary L. (See Palmer, William A., assignor.)

Palmer, William A., deceased, Muhlenberg Township, Berks County, Pa., W. S. Palmer, administrator, assignor to M. L. Palmer. Collapsible mold for concrete burial vaults. 2,001,795; May 21.

Palmer, Willard S., administrator. (See Palmer, William A.)

Panzegrau, Norman O., Chicago, Ill. assignor to International Harvester Company. Track type tractor. 2,002,274; May 21.

Parker, Arthur H. (See Sebell, Harry, assignor.)

Parker, Humphrey F., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,926; May 21.

Parker, Humphrey F., assignor to Bendix Brake company, South Bend, Ind. Brake. 2,001,927; May 21.

Parker, Humphrey F., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,928; May 21.

Parker, Humphrey F., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,929; May 21.

Parker, William H., and H. Jaffe, Chicago, Ill., assignors, by mesne assignments, to Sears, Roebuck and Co. Humidifier. 2,002,273; May 21.

Pass & Seymour, Inc. (See Despart, Victor R., assignor.)

Pathescope Limited. (See Newman, Arthur S., assignor.)

Patterson, David H., Jr., assignor to Fibreboard Products Inc., San Francisco Calif. Carton. 2,001,850; May 21.

Patterson, James M., San Antonio, Tex. Lifting jack. 2,001,744; May 21.

Paulus, Nickolaus, Brooklyn, N. Y. Adjustable window seat. 2,001,796; May 21.

Payne, Claron R., and D. R. Stevens, assignors to Gulf Refining Company, Pittsburgh, Pa. Refining gasoline produced by cracking. 2,002,250; May 21.

Pearson, Charles, Waverly, Fla., assignor to International Harvester Company. Tilting mechanism for mowers. 2,002,275; May 21.

Peik, Louis D. (See Wean, R. J., and Peik.)

Perkins Cementing, Inc. (See Harrington, Leonard E., assignor.)

Peroni, Carmela. (See Caroni, Patsy, assignor.)

Perser Corporation, The. (See Ives, Herbert E., assignor.)

Peterson, Adolphe C., Minneapolis, Minn. Drive and suspension means. 2,002,210; May 21.

Peterson, Levander, assignor to James H. Rhodes & Company, Chicago, Ill. Machine for making metal wool. 2,001,940; May 21.

Peterson, Peter, assignor to The City Auto Stamping Company, Toledo, Ohio. Method and apparatus for making sheet metal articles. 2,002,097; May 21.

Petroleum Rectifying Company of California. (See Eddy, Harold C., assignor.)

Petroleum Rectifying Company of California. (See Worthington, John T., assignor.)
Petteys, Howard L., Perrysburg, Ohio. Lawn edger. 2,001,921; May 21.
Pfaudler Co., The. (See Greene, Otto W., assignor.)
Phillips Petroleum Company. (See Frey, Frederick E., assignor.)
Pittman, Ralph R., Pine Bluff, Ark. Excess-voltage protective structure. 2,002,042; May 21.
Pollack, Lazurus W. (See Lorenz, W., and Pollack.)
Pope, Arthur J., New York, N. Y. Support for awnings or sunshades. 2,002,296; May 21.
Posthumus, Klaas, Eindhoven, Netherlands, assignor to Radio Corporation of America. High frequency coupling transformer. 2,002,187; May 21.
Preston, Herbert E., assignor to American Engineering Company, Philadelphia, Pa. Furnace wall. 2,002,276; May 21.
Pribble, Emerson W., Oklahoma City, Okla. Apparatus for sampling liquids. 2,001,922; May 21.
Price, Owen A., Kilmarnock, Scotland. Producing artificial waves. 2,002,043; May 21.
Price, William K., Yakima, Wash. Eye shield. 2,002,098; May 21.
Prosperity Company, The. (See Ledbetter, James C., assignor.)
Prosser, De Leon A., et al. (See Timberlake, Journey F., assignor.)
Public, Free use of the. (See Thurber, Francis H.)
Pullen, Fred W., assignor to Bissell Carpet Sweeper Co., Grand Rapids, Mich. Bumper for carpet sweepers. 2,001,745; May 21.
Purdy, George H. (See Robertson, J., and Purdy.)
Quaker City Iron Works. (See Jensen, James A., assignor.)
Quincy Stove Manufacturing Co. (See Hodgkin, E. E., Wodell, and Lange, assignors.)
Rabezzana, Hector, and A. J. Battey, Flint, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Spark plug cleaning device. 2,001,886; May 21.
Rabezzana, Hector, and A. J. Battey, Flint, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Spark plug cleaning device. 2,001,887; May 21.
Radial Hydrocarbon Processes, Inc. (See McRae, Randolph L., assignor.)
Radio Corporation of America. (See Engel, Francis H., assignor.)
Radio Corporation of America. (See Klinkert, Leonard, assignor.)
Radio Corporation of America. (See Larson, I. J., and Hoehn, assignors.)
Radio Corporation of America. (See Maurer, John A., Jr., assignor.)
Radio Corporation of America. (See Posthumus, Klaas, assignor.)
Radio Corporation of America. (See Round, Henry J., assignor.)
Radio Corporation of America. (See Round, H. J., and Rust, assignors.)
Radio Corporation of America. (See Rust, Nöel M., assignor.
Radio Corporation of America. (See Tellegen, Bernardus D. H., assignor.)
Radio Corporation of America. (See Wells, Norman, assignor.
Radio Research Laboratories Inc. (See Heany, J. A., and St. Laurent, assignors.)
Randolph, Donald W., Flint, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Spark plug electrode. 2,001,888; May 21.
Raney, Clemma R. (See Johnston, E. A., Raney, and Johnson.)
Rash, Frank J., assignor of one-half to E. W. Barth, Chicago, Ill. Nozzle. 2,001,889; May 21.
Rawson, Emanuel, North Bergen, N. J., assignor to The Superheater Company, New York, N. Y. Exhaust steam injector. 2,002,156; May 21.
Raytheon Production Corporation. (See Nelson, James R., assignor.)
Reconstruction Finance Corporation. (See Meyercord, G. R., and Curran, assignors.)
Reed, Clair S., assignor to Reynolds Spring Company, Jackson, Mich. Spring structure. 2,002,157; May 21.
Reed, Clair S., assignor to Reynolds Spring Company, Jackson, Mich. Spring structure. 2,002,158; May 21.
Reidenbaugh, Ray A., Marion, Ohio. Display rack. 2,002,128; May 21.
Reilly, John L., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricator. 2,001,746; May 21.
Reiner, Robert, Inc. (See Lambach, Fritz, assignor.)
Reinken, Louis W., Brooklyn, N. Y., assignor, by mesne assignments to Federal Telegraph Company, Newark, N. J. Remote control device. 2,002,353; May 21.
Rensselaer Valve Company. (See Rowe, E. L., and Taylor, assignors.)
Reo Motor Car Company. (See Furgason, Claude E., assignor.)
Research Inc. (See Huggett, Martin C., assignor.)
Revelation Patents Holding Company. (See MacLaren, Fred B., assignor.)
Revere Copper and Brass Incorporated. (See Wilkins, Richard A., assignor.)
Reynolds Spring Company. (See Reed, Clair S., assignor.)
Rheinische Metallwaaren- und Machinenfabrik. (See Gletmann, Anton, assignor.)
Rhodes, James H., & Company. (See Peterson, Levander, assignor.)
Richardson, Walter G., South Gardner, Mass. Bird bath. 2,002,378; May 21.
Riddell, John T., Evanston, Ill. Baseball shoe cleat. 2,001,976; May 21.
Riddell, John T., Chicago, Ill. Making shoe cleats or similar articles. 2,001,977; May 21.
Riley, Edward J., assignor to Smith Separator Corporation, Tulsa, Okla. Oil and gas separator. 2,001,851; May 21.
Rix, Edward G., assignor to The International Check Endorser Co., Chicago, Ill. Type cylinder printing device. 2,001,890; May 21.
Road Supply Co. (See Church, Omer F., assignor.)
Roberts, Eugene, Hastings, N. Y., assignor to The Western States Machine Company, Salt Lake City, Utah. Transmission clutch. 2,002,478; May 21.
Roberts, Harold P., Nitro, W. Va., assignor, by mesne assignments, to H. S. Kreighbaum, Akron, Ohio. Making phosphorus oxychloride. 2,002,277; May 21.
Robertson, James, and G. H. Purdy, San Francisco, Calif. Liquid cooler. 2,001,923; May 21.
Rock, Ida R., Brooklyn, N. Y. Silhouette form. 2,002,441; May 21.
Roehrl, Bruno C. (See Bornmann, C., and Roehrl.)
Rohm & Haas Company. (See Bruson, H. A., and Stein, assignors.)
Roland, Esten U., Shiloh, Ohio. Frying pan cover. 2,002,237; May 21.
Römer, Raoul, Biel, Switzerland. Illuminating element. 2,001,852; May 21.
Roosenstein, Hans O., assignor to Telefunken Gesellschaft für Drahtlose Telegraphie, m. b. H., Berlin, Germany. Modulation. 2,001,891; May 21.
Rose, Herbert A. (See West, H. C., and Rose.)
Ross, Oscar A., New York, N. Y. Method and apparatus for forming sound motion picture records. 2,002,188; May 21.
Rothenstein, Otto, Chicago, Ill. Structural element. 2,002,044; May 21.
Round, Henry J., London, and N. M. Rust, Chelmsford, England, assignors to Radio Corporation of America. Acoustic device. 2,002,189; May 21.
Round, Henry J., London, England, assignor to Radio Corporation of America. Acoustic device. 2,002,190; May 21.
Rouse, Howard, Lewiston, Idaho. Surgical fracture extension appliance. 2,002,021; May 21.
Rowe, Ellis L., Round Lake, and S. Taylor, assignor to Rensselaer Valve Company, Cohoes, N. Y. Check valve operating device. 2,001,941; May 21.
Royal Typewriter Company. (See Hess, Edward B., assignor.)
Royal Typewriter Company. (See Michelsen, William O., assignor.)
Ruan, Felix F., Deptford, London, England. Cigarette making machinery. 2,002,045; May 21.
Ruben, Samuel, New Rochelle, N. Y. Voltaic couple. 2,001,978; May 21.
Runge, Wilhelm, Berlin, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Receiving apparatus. 2,001,747; May 21.
Runze, Wilhelm, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Oscillation generator. 2,002,191; May 21.
Rupp, Herbert E., assignor to Gorman-Rupp Company, Mansfield, Ohio. Centrifugal self priming pump. 2,002,454; May 21.
Russell, Andrew N., and H. Ulmann, Montreal, Quebec, assignors to Dominion Engineering Works, Limited, Lachine, Quebec, Canada. Machine for balancing heavy bodies. 2,001,826; May 21.
Rust, Nöel M. (See Round, H. J., and Rust.)
Rust, Nöel M., Chelmsford, England, assignor to Radio Corporation of America. Electrical circuit arrangement. 2,002,192; May 21.
Ruth Company, The. (See Ruth, J. P., and Woelbing, assignors.)
Ruth, Joseph P., and G. H. Woelbing, assignors to The Ruth Company, Denver, Colo. Clutch with synchronizing means. 2,001,892; May 21.
Ryalls, John H., et al. (See Timberlake, Journey F., assignor.)
Ryan, Frank P., assignor to Chrysler Corporation, Detroit, Mich. Striping device. 2,002,278; May 21.
Ryden, Eric H., assignor to Electrolux Servel Corporation, New York, N. Y. Refrigeration. 2,001,797; May 21.
Ryerson, Creighton W., assignor to Ryerson & Haynes, Inc., Jackson, Mich. Hub cap. 2,002,159; May 21.
Ryerson & Haynes, Inc. (See Ryerson, Creighton W., assignor.)
Saalbach, Arthur A., East Orange, N. J., assignor to American Can Company, New York, N. Y. Container closure. 2,001,748; May 21.
Sabins, George G., Glendale, assignor to Samuels-Kleiner, Ltd., Los Angeles, Calif. Separable fastener. 2,001,942; May 21.
St. Laurent, Herbert. (See Heany, J. A., and St. Laurent.)

Samuels-Kleiner, Ltd. (See Sabins, George G., assignor.)
Sauzedde, Claude, assignor to Detroit Hydrostatic Brake Corporation, Detroit, Mich. Valve assembly for compensators. 2,001,749; May 21.
Scanlon, John F., Edgewood, R. I. Advertising device. 2,001,979; May 21.
Schaal, Earl V. (See Olshel, J. R., and Schaal.)
Schering-Kahlbaum A. G. (See Schoeller, W., and von Schickh, assignors.)
Schilke, Edward, Middletown, Conn. Battery terminal. 2,002,099; May 21.
Schilling, Heinrich. (See Elsenhut, O., Schilling, and Baumann.)
Schmidt, Edwin X., Whitefish Bay, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Colorimetric method and apparatus adapted for gas mixing control. 2,002,279; May 21.
Schnitzer, Robert. (See Streitwolf, K., Pehrle, Herrmann, Fritzsche, and Schnitzer.)
Schoeller, Walter, Berlin-Westend and O. von Schickh, Berlin, assignors to Schering-Kahlbaum A. G., Berlin, Germany. Amino anthyridines and making same. 2,002,280; May 21.
Scholtes, Albert J., Baltimore, Md. Polycycle propulsion means. 2,002,046; May 21.
Schoenky, August R., Beverly, Mass., assignor to United Shoe Machinery Corporation, Peterson, N. J. Shoe-conveying system. 2,001,750; May 21.
Schreiber, Louis H., assignor of one-half to M. S. North, Chicago, Ill. Display device. 2,001,798; May 21.
Schroeder, Emil F., Weyauwega, Wis. Rodent trap. 2,002,129; May 21.
Schulze Baking Company. (See Bear, Velma M., assignor.)
Schwerin, Frank H., Bellevue, assignor to The Duff-Norton Manufacturing Company, Pittsburgh, Pa. Shipping container with mechanical jack. 2,002,455; May 21.
Sears, Roebuck and Co. (See Parker, W. H., and Jaffe, assignors.)
Sebell, Harry, Boston, assignor of one-half to A. H. Parker, Lexington, Mass. Method of and apparatus for making a can. 2,002,456; May 21.
Sebell, Harry, Boston, assignor of one-half to A. H. Parker, Lexington, Mass. Can. 2,002,457; May 21.
Sebell, Harry, Boston, assignor of one-half to A. H. Parker, Lexington, Mass. Can. 2,002,458; May 21.
Seco Manufacturing Company. (See Signor, William E., assignor.)
Sedlmayr, Robert, and E. Krutak, Aussig, Czechoslovakia. Fluoranthene dyestuff and making same. 2,002,130; May 21.
Seeger, Edwin W. (See Lassen, P. J., and Seeger.)
Seelye, Howard P., Royal Oak, Mich. Car wire guard. 2,001,892; May 21.
Segal, Hyman R., New York, N. Y. Safety razor and blade. 2,002,297; May 21.
Segal, Hyman R., New York, N. Y. Safety razor and blade. 2,002,298; May 21.
Seghers, Emiel P., Chicago, Ill. Top for percolators and the like. 2,002,354; May 21.
Seghers, Emiel P., Chicago, Ill. Percolator top. 2,002,355; May 21.
Self-Locking Carton Co. (See Stone, Raymond, assignor.)
Sensiba, Claude W. (See Sensiba, Frederick H. and C. W.)
Sensiba, Frederick H. and C. W., Crystal Falls, Mich., assignors of one-third to J. B. O'Hora, Green Bay, Wis. Defective light signal. 2,002,251; May 21.
Sera, Samuel, and J. Hatala, Erie, Pa. Airplane. 2,002,299; May 21.
Sevener, William T. (See Terwilliger, S. M., and Sevener.)
Seward, Clarence L., Jr., Washington, D. C., assignor to Bendix Aviation Corporation, South Bend, Ind. Liquid level indicator. 2,001,853; May 21.
Sexton, Isaac E., Winchester, Mass. Closure. 2,001,980; May 21.
Seyfried, Arthur W., Cleveland Heights, assignor to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Electric motor. 2,001,799; May 21.
Seyfried, Florence R. (See Dohm, Elizabeth, assignor.)
Shafer, George J., assignor of one-third to R. Cody, Jacksonville, Oreg. Trailer hitch. 2,002,416; May 21.
Sheehan, William M., Merion, Pa., assignor to General Steel Castings Corporation, Granite City, Ill. Vehicle. 2,001,751; May 21.
Sheehan, William M., Merion, Pa., assignor to General Steel Castings Corporation, Granite City, Ill. Vehicle. 2,002,356; May 21.
Shoe Form Co. (See De Witt, William J., assignor.)
Sheeld, Mark, Mount Lebanon Township, Allegheny County, Pa., assignor to The Koppers Company of Delaware. Purification and separation of gaseous mixtures. 2,002,357; May 21.
Shoemaker, Fred G., Ferndale, and G. B. Ehrling, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Engine cylinder block. 2,001,854; May 21.
Siemens & Halske Aktiengesellschaft. (See Fischer, E., and Gantzekow, assignors.)
Siemens & Halske Aktiengesellschaft. (See Gosslau, Fritz, assignor.)
Signor, William E., assignor, by mesne assignments, to Seco Manufacturing Company, Gettysburg, Pa. Wigwag signal. 2,002,330; May 21.
Signor, William E., assignor, by mesne assignments, to Seco Manufacturing Company, Gettysburg, Pa. Signal lens means. 2,002,331; May 21.
Signor, William E., assignor, by mesne assignments, to Seco Manufacturing Company, Gettysburg, Pa. Signal structure. 2,002,332; May 21.
Silbermann, Eugen, Oradeamare, Rumania, assignor to Explorotor A. G., Glarus, Switzerland. Rotor for rotary engines. 2,001,800; May 21.
Simpson, Harold W., Long Eaton, near Nottingham, assignor to William Gibson & Son, Limited, Nottingham, England. Knitting machine. 2,002,417; May 21.
Simpson, John M. (See Heck, H. J. and Simpson.)
Simpson, John W., et al. (See Lambourne, Herbert D., assignor.)
Simpson, Stanley E., et al. (See Lambourne, Herbert D., assignor.)
Sinclair, Frank E., Claremont, N. H., assignor to Sullivan Machinery Company. Securing device. 2,001,752; May 21.
Singer Manufacturing Company, The. (See Corrall, H., and Heggie, assignors.)
Sippel, John J., Upper Darby, assignor to H. W. Butterworth & Sons Company, Philadelphia, Pa. Cake washing and conditioning machine. 2,002,418; May 21.
Skyter, Arthur T., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Cold heading. 2,001,981; May 21.
Skenandoa Rayon Corporation. (See Gordon, B., Jr., and Michel, assignors.)
Small, Alfred B. (See House, S. G., and Small.)
Smith, Anthony N., assignor to The Girard Model Works, Inc., Girard, Pa. Electrically lighted toy. 2,002,358; May 21.
Smith, Arthur, Pasadena, Calif. Scrub bucket dolly. 2,001,894; May 21.
Smith, Earle R., Alhambra, Calif., assignor, by mesne assignments, to E. F. Callan. Comb attachment for carpet sweepers. 2,001,982; May 21.
Smith, Earle S., assignor to The Toledo Porcelain Enamel Products Company, Toledo, Ohio. Odor eliminating device. 2,001,828; May 21.
Smith, Horace L., Jr., assignor to Thermal Engineering Corporation, Richmond, Va. Air distribution. 2,001,801; May 21.
Smith, L. C., & Corona Typewriters Inc. (See Avery, Henry A., assignor.)
Smith Separator Corporation. (See Riley, Edward J., assignor.)
Smith, Sheffield, North Providence, R. I. Shock absorber. 2,002,400; May 21.
Societe Anonyme des Matieres Colorantes & Produits Chimiques de Saint-Denis. (See Lantz, Robert, assignor.)
Society of Chemical Industry in Basle. (See Hauser, H., and Rommer, assignors.)
Society of Chemical Industry in Basle. (See Moser, W., and Floroni, assignors.)
Sorg, H. Theodore. (See Coursen, George L., assignor.)
Spencer, Alexander, Westminster, London, England. India-rubber spring. 2,001,855; May 21.
Spencer, Phillip L., assignor to Watson-Williams Manufacturing Company, Millbury, Mass. Shuttle eye. 2,002,131; May 21.
Spettel, George F., St. Paul, Minn. Combination doorstep. 2,001,802; May 21.
Spiros, Sam, Chicago, Ill. Paste dispensing device. 2,001,983; May 21.
Stam, Martinus J., The Hague, Netherlands. Apparatus for the converting of milky liquids, solutions, dispersions, and emulsions into powder form by drying. 2,002,252; May 21.
Standard Oil Company. (See Blair, Frank O., assignor.)
Standard Oil Company. (See Wheeler, Russell C., assignor.)
Standard Oil Company. (See Whitman, Walter G., assignor.)
Standard Oil Company of California. (See MacGregor, John R., assignor.)
Standard Oil Development Company. (See Fischer, Herbert G. M., assignor.)
Standidge, Harry W., Chicago, Ill. Game apparatus. 2,001,829; May 21.
Stansbury, Carroll, Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Electronic current regulator. 2,002,281; May 21.
Steeple, Reginald C., San Mateo, Calif. Glass holding construction. 2,001,943; May 21.
Stein, Otto. (See Bruson, H. A., and Stein.)
Stephens, William T., assignor to The Commercial Shearing & Stamping Company, Youngstown, Ohio. Earth handling device. 2,001,803; May 21.
Stepp, Howard W. (See Bradley, Leonard, assignor.)
Stevens, Donald R. (See Payne, C. R., and Stevens.)
Stevenson, Holland N. (See Wright, Gilbert, assignor.)
Stoddard, Edgar S., Berwyn, assignor to The Conover Company, Chicago, Ill. Dishwashing machine. 2,002,300; May 21.
Stogsdill, Earl W., Lynwood, Calif. Oil well cement mixer. 2,002,419; May 21.

Stone, Raymond, New York, N. Y., assignor to Self-Locking Carton Co., Chicago, Ill. Carton. 2,001,984; May 21.
Storms, Mark C., Fort Madison, Iowa. Culvert. 2,002,301; May 21.
Strauss, Hermann M. A., Western Springs, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Portable household mixer and juice extractor. 2,002,333; May 21.
Strebler, George L., St. Louis, Mo. Two stroke cycle internal combustion engine. 2,001,985; May 21.
Streitwolf, Karl, Frankfort-on-the-Main, A. Fehrle, Bad Soden on Taunus, W. Herrmann, P. Fritzsche, and R. Schnitzer, Frankfort-on-the-Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Bismutho-benzene-aronic-etibonic acid compounds and making them. 2,001,986; May 21.
Strong, Basil P., Atwater Village, Ohio, assignor to Blaw-Knox Company, Pittsburgh, Pa. Excavating bucket. 2,001,924; May 21.
Strongson, Herman L., New York, N. Y., assignor to Beaver Manufacturing Company, Newark, N. J. Electric connecter plug. 2,002,302; May 21.
Strosk, Mark, Berkeley, Calif. Coffee preserver. 2,002,420; May 21.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Huffman, Mervin C., assignor.)
Sullivan Machinery Company. (See Reilly, John L., assignor.)
Sullivan Machinery Company. (See Sinclair, Frank E., assignor.)
Sundstrand Machine Tool Co. (See Swanson, Fred R., assignor.)
Superheater Company, The. (See Rawson, Emanuel, assignor.)
Swanson, Fred R., assignor to Sundstrand Machine Tool Co., Rockford, Ill. Rotatable work table. 2,002,442; May 21.
Sykes, William E., assignor to Farrel-Birmingham Company, Inc., Buffalo, N. Y. Feed mechanism for metal cutting machines. 2,001,987; May 21.
Sylvania Industrial Corporation. (See Mendel, William, assignor.)
Synero Machine Company. (See Fantone, C. B., and Jamesson, assignors.)
Tanner, Robert R., Highland Park, and J. S. Thompson, assignors to Metal Finishing Research Corporation, Detroit, Mich. Coated copper article and making the same. 2,001,753; May 21.
Taylor, Cecil H., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,944; May 21.
Taylor, John D., Glasgow, Scotland. Lock switch. 2,002,047; May 21.
Taylor, Ormond J. (See Broome, John E., assignor.)
Taylor, Stanley. (See Rowe, E. L., and Taylor.)
Taylor, William I., Spondon, near Derby, England, assignor to Celanese Corporation of America. Production of artificial filaments, threads, ribbons, films, and similar materials. 2,002,066; May 21.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Bechmann, Rudolf, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Buschbeck, Werner, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Ilberg, Waldemar, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Rosenstein, Hans O., assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Runge, Wilhelm, assignor.)
Tellegen, Barnardus D. H., Eindhoven, Netherlands, assignor to Radio Corporation of America. High frequency network. 2,002,193; May 21.
Temple, Paul C., assignor to A. W. Cash Company, Decatur, Ill. Control mechanism. 2,001,988; May 21.
Ternstedt Manufacturing Company. (See Lakin, John W., assignor.)
Terwilliger, Seely M., and W. T. Sevener, Los Angeles, Calif., assignor of one-fourth to C. B. Foster, Glendale, Calif. Direction signal. 2,002,022; May 21.
Tessky, Karl, Esslingen-on-the-Neckar, Germany. Work piece guide for machine tools. 2,002,282; May 21.
Texas Company, The. (See Cox, Edwin R., assignor.)
Thayer, Howard P., Evanston, Ill. Cigarette holder. 2,001,827; May 21.
Thermal Engineering Corporation. (See Smith, Horace L., Jr., assignor.)
Theuerkauf, Friedrich, Nowawes/Potsdam, Germany. Apparatus and method of transporting live fishes. 2,001,989; May 21.
Thicke, Claude S. (See De Bou, H. G. and Thicke.)
Thomas, Adolph A., New York, N. Y. Remote control device for radioreceivers. 2,002,443; May 21.
Thomas, Cecil A., Lawrenceville, Va. Extensible temporary bridge. 2,002,048; May 21.
Thomas, Edward G., assignor to Toledo Scale Manufacturing Company, Toledo, Ohio. Controlling device. 2,002,379; May 21.
Thompson, Herbert A., Benton, Northumberland, England. Separator for liquids having different specific gravities. 2,002,253; May 21.
Thompson, John S. (See Tanner, R. R. and Thompson.)
Thompson, John S., and V. M. Darsey, assignors to Metal Finishing Research Corporation, Detroit, Mich. Method and material for producing phosphate coating. 2,001,754; May 21.
Thomson, Bernard, Combe Close, Woldingham, England, assignor to General Motors Corporation, Detroit, Mich. Synchronizing clutch. 2,001,856; May 21.
Thousand, Adolph, Cedar Rapids, Iowa. Air conditioning device. 2,002,023; May 21.
Throckmorton, John W., New York, N. Y., assignor to Gyro Process Company, Detroit, Mich. Process and apparatus for converting hydrocarbon oils. 2,002,160; May 21.
Thurber, Francis H., Washington, D. C., Dedicated to the Free use of the Public. Manufacture of starches. 2,001,925; May 21.
Timberlake, Journey F., Charlottesville, assignor of twelve and one-fourth per cent to D. A. Prosser, Petersburg, twelve and one-fourth per cent to J. H. Ryalls, twelve and one-fourth per cent to L. G. Wolff, and twelve and one-fourth per cent to R. Winston Dabney, Richmond, Va. Shuttle motion for looms. 2,002,194; May 21.
Timian, Harold H., assignor to Continental Motors Corporation, Detroit, Mich. Engine. 2,001,895; May 21.
Tisseyre, Louis, and I. Cotnareanu, Paris, France, assignors to G. P. Cowles, Waterbury, Conn. Electric timepiece. 2,002,421; May 21.
Toledo Porcelain Enamel Products Company, The. (See Smith, Earle S., assignor.)
Toledo Scale Manufacturing Company. (See Hem, Halvor O., assignor.)
Toledo Scale Manufacturing Company. (See Hurt, Samuel N., assignor.)
Toledo Scale Manufacturing Company. (See Thomas, Edward G., assignor.)
Toomey, John F., New York, N. Y., and W. E. Hogan, South Boston, Mass., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,002,212; May 21.
Torney, Franklin L., Quincy, Mass. Motor crank case or the like. 2,002,211; May 21.
Török, Gábor, Budapest, Hungary. Esterification of organic acids, with separation of the esters in highly concentrated form. 2,001,926; May 21.
Tregoning, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Attachment plug receptacle. 2,001,990; May 21.
Treloar, James, Hamilton, New Zealand. Steam generator. 2,002,254; May 21.
Trembour, Max R., Beaver, and H. Wilson, Jr., assignors to Jessop Steel Company, Washington, Pa. Manufacturing composite metal articles. 2,002,229; May 21.
Trico Products Corporation. (See Bean, Barton A., Jr., assignor.)
Trico Products Corporation. (See Hueber, Henry, assignor.)
Trico Products Corporation. (See Hueber, H., and Horton, assignors.)
Trico Products Corporation. (See Olshel, J. R., and Schaal, assignors.)
Triplett, Ray L., Bluffton, Ohio. Audion tube tester. 2,001,945; May 21.
Trout, Charles L., New York, N. Y., assignor to C. L. Trout, trustee. Scarf pin and holder. 2,002,195; May 21.
Trout, Charles L., trustee. (See Trout, Charles L., assignor.)
Truscott, Jas., & Son, Limited. (See Boyce, Harold A., assignor.)
Tschappat, Sheridan P., Tulsa, Okla. Tubing head. 2,001,946; May 21.
Turnstedt Manufacturing Company. (See Field, Herbert C., assignor.)
Twiss, Douglas F., Wylde Green, A. E. T. Neale, Ward End, and J. A. Wilson, Erdington, England, assignors to Dunlop Tire & Rubber Corporation, Buffalo, N. Y. Cold vulcanization of rubber. 2,002,067; May 21.
U S L Battery Corporation. (See Kyle, George L., assignor.)
Ucko, Bernard, North Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Engine brake. 2,002,196; May 21.
Ulmann, Hans. (See Russell, A. N., and Ulmann.)
Union Oil Company of California. (See Gard, Earle W., assignor.)
Union Switch & Signal Company, The. (See Bone, Herbert L., assignor.)
United Shoe Machinery Corporation. (See Bates, A., and Choice, assignors.)
United Shoe Machinery Corporation. (See Buckminster, Ira C., assignor.)
United Shoe Machinery Corporation. (See Jorgensen, Jacob C., assignor.)
United Shoe Machinery Corporation. (See Knowlton, Norwood H., assignor.)
United Shoe Machinery Corporation. (See Schoenky, August R., assignor.)
United States Cabinet Bed Co. (See Martin, Joseph, assignor.)
United States Gypsum Company. (See Gustafson, Joseph G., assignor.)
United States Rubber Company. See Eger, Ernst, assignor.)
United States Rubber Company. (See Gammeter, John R., assignor.)

United States Rubber Company. (See Hurt, Victor H., assignor.)
United States Rubber Company. (See Leaper, Percy J., assignor.)
United States Rubber Company. (See Linscott, Chester E., assignor.)
Universal Oil Products Company. (See Ipatieff, Vladimir, assignor.)
Upham, George F., Bronxville, N. Y. Attachment for containers. 2,001,947; May 21.
Urschel, William E., Valparaiso, Ind. Cherry stemmer. 2,002,161; May 21.
Utilities Service Company. (See Miller, Herbert E., assignor.)
Uyematsu, Miyosaku, Montebello, Calif. Developing ornamental plants from ordinary vegetable plants. 2,002,164; May 21.
Valby, Edgar P., and M. L. Arnold, Long Beach, Calif. Method and apparatus for continuously determining vapor pressure. 2,002,101; May 21.
Valley Mould & Iron Corporation. (See Kauffman, Edmund J., assignor.)
Vanden Brande, Peter, Freeport, N. Y. Hanger device for storm windows. 2,002,160; May 21.
Vanderpool, John F., et al. (See Baker, Hallis, assignor.)
Vandervoort, Milford T., assignor to E. A. Wedemeier, Grand Rapids, Mich. Self-closing detachable theater seat. 2,001,991; May 21.
Van Geel, Willem C., and H. Emmens, assignors to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Dry rectifier. 2,002,221; May 21.
Van Wyk, Paul, and I. R. Acheson, Portland, Oreg., assignors to Food Machinery Corporation, San Jose, Calif. Package diverting device. 2,001,927; May 21.
Veaux, William M., Seattle, Wash. Apple box. 2,002,102; May 21.
Verlinden, Edmond, Milwaukee, Wis. Musical instrument controlling means. 2,002,162; May 21.
Verlinden, Edmond, Milwaukee, Wis. Rerolling speed control for musical instruments. 2,002,163; May 21.
Verwys, John J. (See Kosten, J., and Verwys.)
Visking Corporation, The. (See Clement, Sylvester, assignor.)
Viviano, Philip, St. Louis, Mo. Vehicle spring suspension. 2,002,459; May 21.
Von Schickh, Otto. (See Schoeller, W., and von Schickh.)
Wade, Thomas G., Greensboro, N. C. Rural free delivery letter box. 2,002,423; May 21.
Wadsworth, Frank L. O. (See Angell, R. C., and Wadsworth.)
Wagner, Heinrich, H. Krzikalla, and A. Kirsch, Mannheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Dyeing animal fibers. 2,001,992; May 21.
Wainford, Richard H., Trenton, N. J. Mechanical movement. 2,001,755; May 21.
Walsh, James F., East Orange, and A. F. Caprio, Newark, N. J., assignors to Celluloid Corporation. Solvent for acetyl cellulose. 2,002,069; May 21.
Walker, Curry O. (See Walper, Gordon R., assignor.)
Walker, Hervey S., Ardmore, Pa. Underfloor duct system. 2,002,068; May 21.
Walper, Gordon R., Detroit, assignor to C. O. Walper, Royal Oak, Mich. Wall and ceiling construction. 2,002,303; May 21.
Walters, Emmett L. (See Goodwillie, D. H., and Walters.)
Ward, Charles J., Grassmere, Staten Island, N. Y. Ship propeller. 2,001,896; May 21.
Warring, Floyd S. (See Henry, Henry L., assignor.)
Wasberg, Axel, Chicago, Ill., assignor to A. E. Ostrander, Larchmont, N. Y. Refrigerator car doorlock. 2,002,304; May 21.
Wasegg, Charles R., Ruell, France, assignor to Eclipse Aviation Corporation, East Orange, N. J. Internal combustion engine. 2,002,049; May 21.
Waterman, L. E., Company. (See Juster, Louis H., assignor.)
Watson, J. Bruce. (See Lavitt, James E., assignor.)
Watson, James B., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Lubricating system. 2,001,857; May 21.
Watson, James B., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Lubricating system with initial splash. 2,001,858; May 21.
Watson-Williams Manufacturing Company. (See Spencer, Philip L., assignor.)
Wean Engineering Company, The. (See Wean, R. J., and Peik, assignors.)
Wean, Raymond J., and L. D. Peik, assignors to The Wean Engineering Company, Inc., Warren, Ohio. Metal treating apparatus. 2,001,948; May 21.
Weaver, Edward G., Butte, Mont. Casting reel. 2,002,424; May 21.
Weber, Walter H., assignor to Detroit Lubricator Company, Detroit, Mich. Carburetor. 2,001,993; May 21.
Webster, Shirley, et al. (See Brady, Lester C., assignor.)
Wedemeier, Ernest A. (See Vandervoort, Milford T., assignor.)
Weir, James, Canton, Ill. Repair valve seat. 2,001,830; May 21.
Weiss, Ernst. (See Bodmer, A., and Weiss.)
Welch, S. A., Guyler, Boaler, and Ashby, Spondon, near Derby, England, assignors to Celanese Corporation of America. Knitting machine. 2,002,070; May 21.
Welk, Nelson S., assignor to The McBee Company, Athens, Ohio. Loose leaf binder. 2,002,071; May 21.
Wells, Franklin H., assignor to Bendix Brake Company, South Bend, Ind. Brake. 2,001,994; May 21.
Wells, Norman, Sheen, London, England, assignor to Radio Corporation of America. Directional aerial system. 2,002,197; May 21.
Wemp, Ernest E., Detroit, Mich. Overrunning drive construction. 2,001,804; May 21.
Wernicke, Gilbert, and A. R. Lintern, Cleveland, Ohio. Plant propagator, etc., or aquarium. 2,002,380; May 21.
West, Donald C., and H. A. Rose, Forest Hills, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit interrupter. 2,001,89, May 21.
Westendorp, Willem F., Schenectady, N. Y., assignor to General Electric Company. Electric discharge device. 2,002,381; May 21.
Western Electric Company. (See Williams, R. R., and Kemp, assignors.)
Western States Machine Company. (See Roberts, Eugene, assignor.)
Westinghouse Electric & Manufacturing Company. (See Austin, Walter M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lenehan, Bernard E., assignor.)
Westinghouse Electric & Manufacturing Company. (See West, D. C., and Rose, assignors.)
Weston, William S., Douglaston, N. Y. Adjustable curve ruler. 2,001,949; May 21.
Wetzler, Max. (See Elle, E., and Wetzler.)
Wetzler, Rudi. (See Elle, E., and Wetzler, assignors.)
Wheary, George H., assignor to Wheary Trunk Company, Racine, Wis. Latch lock. 2,001,805; May 21.
Wheary, George H., assignor to Wheary Trunk Company, Racine, Wis. Hand luggage. 2,001,806; May 21.
Wheary, George H., assignor to Wheary Trunk Company, Racine, Wis. Hand luggage. 2,001,807; May 21.
Wheary Trunk Company. (See Wheary, George H., assignor.)
Wheeler, Harold A., Great Neck, N. Y., assignor to Hazeltine Corporation. Automatic volume control. 2,001,950; May 21.
Wheeler, Russell C., Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill. Pipe anchor. 2,002,103; May 21.
White, S. S., Dental Manufacturing Company, The. (See Angell, R. C., and Wadsworth, assignors.)
Whitman, Walter G., Whiting, Ind., assignor to Standard Oil Company, Chicago, Ill. Storage of volatile hydrocarbons, particularly butanes. 2,001,996; May 21.
Whitney Mfg. Co., The. (See Dow, Richard F., assignor.)
Wiegand, Edwin L., Pittsburgh, Pa. Electric resistance heating element. 2,001,995; May 21.
Wilcox, Russell I., Bellwood, Ill., assignor, by mesne assignments, to Rudolph Wurlitzer Manufacturing Company, North Tonawanda, N. Y. Automatic phonograph. 2,002,236; May 21.
Wilkins, Richard A., assignor to Revere Copper and Brass Incorporated, Rome, N. Y. Alloy. 2,002,460; May 21.
Williams, Jewell R., assignor to Apparatus Design Company, Little Rock, Ark. Vacuum tube tester. 2,002,425; May 21.
Williams, Robert R., Roselle, and A. R. Kemp, East Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Rubber insulation for submarine cables. 2,002,461; May 21.
Wilson, Alexander M., Cincinnati, Ohio. Single phase motor. 2,002,382; May 21.
Wilson, Harry, Jr. (See Trembour, M. R., and Wilson.)
Wilson, John A. (See Twiss, D. F., Neale, and Wilson.)
Winchell, Thomas R., West Newton, Mass., assignor to Northern Maine Plywood Company, Portland, Maine. Barrel. 2,001,859; May 21.
Winslow, Charles A., Oakland, Calif. Air cleaner. 2,002,165; May 21.
Winthrop Chemical Company. (See Delchsel, Stanislaus, assignor.)
Winthrop Chemical Company. (See Streitwolf, K., Fehrle, Herrmann, Fritzsche, and Schnitzer, assignors.)
Wirz, A. H., Inc. (See Barker, Edwin H., assignor.)
Wissler, William A., Flushing, N. Y., assignor to Haynes Stellite Company. Surface hardening metal articles. 2,002,198; May 21.
Witt, Irwin H., Evanston, Ill. Stopping gas flow through pipes. 2,002,383; May 21.
Wodell, William W. (See Hodgkin, E. E., Wodell, and Lange.)
Woelbing, George H. (See Ruth, J. P., and Woelbing.)
Wolf, August M., Plainfield, N. J., assignor to Motor Jack Corporation, New York, N. Y. Jacking apparatus for automotive vehicles. 2,001,860; May 21.
Wolfe, Homer H., assignor to Automobile Side-Drive Corporation, Little Rock, Ark. Parking or deparking mechanism. 2,002,132; May 21.
Wolff, L. G., et al. (See Timberlake, Journey F., assignor.)
Wolverine Supply and Manufacturing Company. (See Gorlup, Frank J., assignor.)
Woock, Walter R. J., Auburn, Calif. Mineral separator. 2,001,756; May 21.
Wood, C. D., Electric Co., Inc. (See Kulka, Eugene R., assignor.)

Wood, Frank L., Lynden, Wash. Syringe. 2,002,024; May 21.
Wood, Maurice L., assignor to The Chase Companies, Incorporated, Waterbury, Conn. Furnace for producing purified metals. 2,001,808; May 21.
Wooddell, Charles E., C. S. Nelson, Niagara Falls, and R. Lincoln, Buffalo, N. Y., assignors to The Carborundum Company, Niagara Falls, N. Y. Abrasive articles. 2,001,911; May 21.
Woodman, Albert G., Grand Rapids, Mich. Honey extractor construction. 2,001,997; May 21.
Woodruff, Henry S., Schenectady, N. Y., assignor to General Electric Company. Refrigerator evaporator. 2,002,444; May 21.
Woods, Gorham W., Houston, Tex., assignor, by mesne assignments, to Haynes Stellite Company, Kokomo, Ind. Welding rod. 2,002,462; May 21.
Worthington, John T., Long Beach, assignor to Petroleum Rectifying Company of California, Los Angeles, Calif. Method and apparatus for settling. 2,001,809; May 21.
Wright, Gilbert, Granville Center, Mass., assignor of one-half to H. N. Stevenson, Pelham, N. Y. Internal combustion motor. 2,002,230; May 21.
Wurlitzer, Rudolph, Manufacturing Company. (See Wilcox, Russell I., assignor.)
Yarnall-Waring Company. (See Miller, Frank W., assignor.)
Yoder, Carl M., assignor of one-half to H. O. Yoder, Lakewood, Ohio. Apparatus for and process of making cylindrical bodies. 2,001,757; May 21.
Yoder, Harvey O. (See Yoder, Carl M., assignor.)
Yonkers, Edward H., Jr., Chicago, Ill. Negative resistance. 2,002,238; May 21.
Yotta, Jean R., Los Angeles, Calif. Safety razor. 2,002,104; May 21.
Youngstown Steel Door Company. (See Eklind, Carl E., assignor.)
Zimmerman, Walter B., Winnipeg, Manitoba, Canada. Garden rake tooth cleaning appliance. 2,002,484; May 21.
Zwald, Adolph, Torrance, Calif. One way brake. 2,001,810; May 21.
Zwierzina, Alois J., assignor to Ackerman-Blaesser Fezzey, Inc., Detroit, Mich. Clutch mechanism. 2,001,758; May 21.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21ST DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Car, Sleeping. T. De Roode. 19,585–6; May 21.
Fuel feeding device and safety mechanism in connection therewith, Liquid. W. W. Williams. 19,573; May 21.
Fuse device, Safety. J. Stone. 19,584; May 21.
Image broadcasting system. W. G. H. Finch. 19,575; May 21.
Projection screen. T. F. Yagle. 19,574; May 21.
Sewage and other liquids, Purification of. W. Jones. 19,577; May 21.
Sound reproducing apparatus for advertising purposes. F. G. Salcedo. 19,583; May 21.
Stock quotation projection machine and feeding tape therethrough. J. W. Decker. 19,572; May 21.
Tire cover, All metal. L. Ricci. 19,582; May 21.
Truck, Plate glass transporting. L. Rothholz. 19,580; May 21.
Tube finishing and advancing machine, Automatic. W. Prussing. 19,578; May 21.
Umbrella, Telescopic. H. Haupt. 19,576; May 21.
Venturi tube. C. I. Justheim. 19,581; May 21.
Window control mechanism. J. H. Roethel. 19,579; May 21.

LIST OF DESIGN INVENTIONS

Air circulator. M. Weber. 95,720; May 21.
Automobile body. A. E. Voigt. 95,718; May 21.
Bag or similar article, Laundry. I. F. Silverstein. 95,712; May 21.
Bottle. B. D. Fuerst. 95,672; May 21.
Bottle. C. J. Howel. 95,686; May 21.
Bottle. R. P. Richardson. 95,705; May 21.
Bottle closure. E. W. Fuerst. 95,675; May 21.
Bottle or similar article. H. H. Harris. 95,682; May 21.
Blouse. I. Geist. 95,677; May 21.
Buckle. H. G. Whitehouse. 95,721; May 21.
Cabinet, Amusement game. F. C. McClellan. 95,697; May 21.
Cabinet, Recipe. C. E. Bisbey. 95,627; May 21.
Candle. M. H. Gastel. 95,676; May 21.
Casing for a combined washing machine and drier. W. D. Teague. 95,716; May 21.
Casket. H. A. Neff. 95,700–1; May 21.
Chaise longue. P. T. Frankl. 95,671; May 21.
Clip for a fountain pen or similar article. B. W. Hanle. 95,681; May 21.
Coat, Lady's. A. Sisselman. 95,714; May 21.
Curtain. F. Gentner. 95,678; May 21.
Curtain. S. Libou. 95,695–6; May 21.
Dress. I. A. Winter. 95,722; May 21.
Dress, Ensemble. L. Baum. 95,626; May 21.
Game board. E. L. Crawford. 95,666; May 21.
Glove. M. Crandall. 95,665; May 21.
Glove. I. K. Hessberg. 95,684; May 21.
Guard, Push. F. L. Vernon. 95,717; May 21.
Jar. E. W. Fuerst. 95,674; May 21.
Lace. J. M. Golding. 95,679; May 21.
Lamp. B. A. Dickerson. 95,667–8; May 21.
Leather. S. Shapiro. 95,711; May 21.
Mat, Floor. E. E. Paine and F. D. Adams. 95,702; May 21.
Microscope. G. Fassin. 95,670; May 21.
Mirror frame and support therefor, Adjustable. V. D. Milliken. 95,698; May 21.
Negligee. P. Schnittman. 95,709; May 21.
Plate or similar article. Y. Buma. 95,631–2; May 21.
Plate or similar article. B. N. Kane. 95,689; May 21.
Pocketbook. F. N. Lewis. 95,694; May 21.
Sandal. C. B. Carrier. 95,664; May 21.
Sandal. L. Goodkind. 95,680; May 21.
Sandal. H. Koomrulan. 95,690; May 21.
Shoe. E. Bradley. 95,628; May 21.
Shoe. A. M. Bressler. 95,629; May 21.
Shoe. A. Hurtig. 95,688; May 21.
Shoe. C. Kosta. 95,691; May 21.
Shoe. D. Levin. 95,693; May 21.
Shoe. L. A. Morrill. 95,699; May 21.
Shoe or article of analogous nature. S. Brietman. 95,630; May 21.
Siphon head. E. W. Fuerst. 95,673; May 21.
Speed power unit, Electrically driven variable. D. Heyer. 95,685; May 21.
Spoon or other article of flatware. L. V. M. Helander. 95,683; May 21.
Spray gun. F. Wahlin. 95,719; May 21.
Stand and holder, Combined flower. I. G. Scott and M. C. Fox. 95,710; May 21.
Storage battery case. O. O. Rieser. 95,704–8; May 21.
Stove, Heating. M. L. Hunker. 95,687; May 21.
Tire. A. Balthazar and J. E. Allen. 95,622–5; May 21.
Toy model ships hull. W. Kramer. 95,692; May 21.
Transformer casing. R. A. Dicksen. 95,669; May 21.
Wheel. C. W. Sinclair. 95,713; May 21.
Wringer and casing for domestic washing machines, Combined. W. D. Teague. 95,715; May 21.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 21st DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive articles. C. E. Wooddell, C. S. Nelson, and R. Lincoln. 2,001,911; May 21.
Abutment for container vehicles, Movable. S. H. Owens. 2,002,439–40; May 21.
Acetylene and carbon black, Production of. O. Eisenhut, H. Schilling, and P. Baumann. 2,002,003; May 21.
Acid: *See*—
Octylsalicylic acid.
Acids, with separation of the esters in highly concentrated form, Esterification of organic. G. Török. 2,001,926; May 21.
Acid compounds and making them, Bismutho-benzene-arsonic-sulfonic. K. Streitwolf, A. Fehrle, W. Herrmann, P. Fritzsche, and R. Schnitzer. 2,001,986; May 21.
Acoustic device. P. Crosley, Jr., and H. Gest. 2,002,390; May 21.
Acoustic device. H. J. Round and N. M. Rust. 2,002,189; May 21.
Acoustic device. H. J. Round. 2,002,190; May 21.
Acylamino-anthraquinones and their preparation. E. E. Beard. 2,001,702; May 21.
Adjustable table. E. F. Lundeen. 2,002,349; May 21.
Adjustable window seat. N. Paulus. 2,001,796; May 21.
Adjustable wrench. M. J. Leaveck. 2,001,789; May 21.
Advertising device. H. D. Lambourne. 2,001,880; May 21.
Advertising device. J. F. Scanlon. 2,001,979; May 21.
Air cleaner. C. A. Winslow. 2,002,165; May 21.
Air conditioner. W. Bandurski. 2,001,832; May 21.
Air conditioning apparatus. R. J. Byrd. 2,001,833; May 21.
Air conditioning apparatus. G. B. Marzolff. 2,002,019; May 21.
Air conditioning device. A. Thousand. 2,002,023; May 21
Air cooling and circulating device and process. W. L. Morrison. 2,002,234; May 21.
Air cooling and circulating device. W. L. Morrison. 2,002,235; May 21.
Aircraft. D. Gregg. 2,002,057; May 21.
Air distribution. H. L. Smith, Jr. 2,001,801; May 21.
Airplane. S. Sera and J. Hatala. 2,002,290; May 21.
Alarm device for safes. A. Biasi. 2,001,812; May 21.
Alarm water column. F. W. Miller. 2,002,327; May 21.
Aldehyde products, Stabilization of. P. J. Leaper. 2,001,788; May 21.
Aliphatic anhydrides, Manufacture of. H. Dreyfus. 2,002,084–5; May 21.
Alloy. R. A. Wilkins. 2,002,460; May 21.
Amino anthyridines and making same. W. Schoeller and O. von Schickh. 2,002,280; May 21.
Anchor, Pipe. R. C. Wheeler. 2,002,103; May 21.
Anchor post. C. Greene. 2,001,719; May 21.
Animal trap. W. R. McCabe. 2,002,095; May 21.
Animal fibers, Dyeing. H. Wagner, H. Krzikalla, and A. Kirsch. 2,001,902; May 21.
Antifreeze indicator. G. H. Lecarpentier. 2,002,184; May 21.
Anthraquinone derivative and making same. H. Hauser and M. Bommer. 2,002,264; May 21.
Anthraquinone derivative and making the same. W. Moser and W. Fioroni. 2,002,247; May 21.
Anthraquinone derivatives. R. N. Lulek. 2,001,737; May 21.
Anthrathiazole-anthraquinone carbonyl imides and preparing them. R. N. Lulek. 2,001,738; May 21.
Apple box. W. M. Veaux. 2,002,102; May 21.
Applicator. W. O. Heaton. 2,002,144; May 21.
Article transferring mechanism. I. C. Buckminster. 2,001,814; May 21.
Articles, Apparatus for arranging and feeding irregular shaped. D. L. Jordan. 2,002,147; May 21.
Atomizing device. R. E. Delling. 2,001,817; May 21.
Automatic clutch. K. E. Lyman. 2,001,931; May 21.
Automobile bodies, Ventilating the interior. J. M. Bondbright. 2,001,763; May 21.
Automobile transmission mechanism. H. E. Blood. 2,001,782; May 21.
Automotive jack. B. Black. 2,002,428; May 21.
Bag and making same. J. M. Munson. 2,001,934; May 21.
Bag-sewing apparatus. A. McAlister. 2,002,227; May 21.
Bait, Artificial. J. E. Lavitt. 2,002,117; May 21.
Bakery goods, Packaging of loaf-like. V. M. Bear. 2,001,761; May 21.
Ball cock valve, Automatic. W. Dylewski. 2,002,086; May 21.
Band element for ornamental and useful purposes. R. Einsele. 2,002,233; May 21.
Barrel. T. R. Winchell. 2,001,859; May 21.
Battery construction, Storage. G. L. Kyle. 2,002,267; May 21.
Battery terminal. E. Schilke. 2,002,099; May 21.
Bearing lubrication. N. H. Knowlton. 2,001,823; May 21.
Binder, Loose leaf. N. S. Welk. 2,002,071; May 21.
Binder, Post. G. W. Newman. 2,002,155; May 21.
Bird bath. W. G. Richardson. 2,002,378; May 21.
Bit: *See*—
Rocker blade bit.
Bite attachment, True. G. J. Keller. 2,001,963; May 21.
Blank shearing apparatus. G. R. Jeneson. 2,001,751; May 21.
Block: *See*—
Cylinder block. Hollow cement block.
Blood transfusion, Apparatus for. G. S. Harris, Jr. 2,002,008; May 21.
Boiler: *See*—
Steam boiler.
Boiler. H. J. Kerr and I. L. Langvand. 2,001,734–5; May 21.
Boiler furnace. E. G. Bailey, H. J. Kerr, and R. M. Hardgrove. 2,002,464; May 21.
Bottle dispensing apparatus. C. H. Karnaghan. 2,001,786; May 21.
Box: *See*—
Apple box. Letter box.
Box for polish rods, Stuffing. J. H. Howard. 2,002,012; May 21.
Box or charger, Film. A. S. Newman. 2,001,884; May 21.
Bracket: *See*
Hinge bracket.
Brake: *See*—
Engine brake. One way brake.
Brake. E. G. Gunn. 2,001,958; May 21.
Brake. P. E. Hall. 2,002,006; May 21.
Brake. J. F. Higbee. 2,001,875; May 21.
Brake. L. E. La Brie. 2,002,017; May 21.
Brake. G. K. McCann. 2,001,933; May 21.
Brake. M. W. McConkey. 2,001,971; May 21.
Brake. H. F. Parker. 2,001,936–9; May 21.
Brake. C. H. Taylor. 2,001,944; May 21.
Brake. F. H. Wells. 2,001,994; May 21.
Brake adjusting and indicating mechanism, Automatic. J. B. Des Rosiers. 2,002,139; May 21.
Brake adjusting gauge. G. H. Crane. 2,002,286; May 21.
Brake beam and bottom rod emergency support, Railway. E. C. Lunsford. 2,002,350; May 21.
Bridge arrangement. W. Buschbeck. 2,002,338; May 21.
Bridge, Extensible temporary. C. A. Thomas. 2,002,018; May 21.
Brush. C. E. Frost. 2,002,370; May 21.
Brush holder. J. Heim. 2,002,202; May 21.
Bucket, Excavating. R. P. Strong. 2,001,924; May 21
Buildings, Apparatus for cooling and ventilating. C. A. Bulkeley. 2,001,704; May 21.
Bumper for carpet sweepers. F. W. Pullen. 2,001,745; May 21.
Burner: *See*—
Gas burner. Liquid fuel burner.
Burner attachment, Gas. F. H. McFall. 2,001,972; May 21.
Busk fastening means for corsets and similar garments. J. E. Broome. 2,002,052; May 21.
Cabinet, Playing card. Julius Bandes and J. Bandes. 2,002,166; May 21.
Cabinet structure, Metallic. H. Eto. 2,002,366; May 21
Cabinet, Towel. E. T. Hells. 2,002,088; May 21.
Cable with reduced magnetic coupling, Communication. E. Fischer and H. Gantzkow. 2,002,344; May 21.
Calipering device. A. H. Avery. 2,002,334; May 21.
Camera, Photographic. C. Bornmann and R. C. Roehrl. 2,002,076; May 21.
Can. J. M. Abrams. 2,002,072; May 21.
Can. H. Sebell. 2,002,457–8; May 21.
Can, Method of and apparatus for making a. H. Sebell. 2,002,456; May 21.
Car doorlock, Refrigerator. A. Wasberg. 2,002,304; May 21.
Carbohydrates, Process and apparatus for the fermentation of. S. C. Daranyi. 2,001,930; May 21.
Carbon tetrachloride, Stabilizing. P. S. Braillier. 2,002,168; May 21.
Carburetor. W. H. Weber. 2,001,993; May 21
Card clothing for textile machinery. W. A. Dickie. 2,002,079; May 21.
Carriage and trackage therefor, Electrically driven lure. W. M. Bacon, Jr. 2,002,427; May 21
Carriage for accounting machines. R. A. Curistion. 2,002,361; May 21.

Carton. D. H. Patterson, Jr. 2,001,850; May 21.
Carton. R. Stone. 2,001,984; May 21.
Carton or container. S. A. Gottlieb. 2,002,005; May 21.
Case: *See*—
Display case.
Case hardening composition. A. F. Holden. 2,002,180; May 21.
Cash register. J. P. Frank. 2,001,779; May 21.
Casting reel. E. G. Weaver. 2,002,424; May 21.
Cement mixer, Oil well. E. W. Stogsdill. 2,002,419; May 21.
Chair. A. Johnson. 2,002,118; May 21.
Cheese, Making. C. Frehner. 2,002,345; May 21.
Cherry stemmer. W. E. Urschel. 2,002,161; May 21.
Cigar wrapper leaf tobacco, Method of and apparatus for conditioning. C. G. Maxwell. 2,002,120; May 21.
Cigarette holder. H. P. Thayer. 2,001,827; May 21.
Cigarette making machinery. F. F. Rusu. 2,002,045; May 21.
Cigarette wrapper cutting machine. C. H. Gibson, L. E. Downs and C. J. Fuse. 2,002,142; May 21.
Circuit arrangement, Electrical. N. M. Rust. 2,002,192; May 21.
Circuit interrupter. W. M. Austin. 2,001,898; May 21.
Circuit interrupter. D. C. West and H. A. Rose. 2,001,897; May 21.
Circuits, Power. F. H. Engel. 2,002,343; May 21.
Circuits, Power control. P. H. Craig. 2,001,836–8; May 21.
Clamp. W. C. Domke. 2,002,141; May 21.
Clamp for radial drills, Column. J. C. Carlton. 2,002,469; May 21.
Clamping mechanism for radial drills. J. C. Carlton. 2,002,446; May 21.
Cleaner: *See*—
Air cleaner. Windshield cleaner.
Cleat, Baseball Shoe. J. T. Riddell. 2,001,976; May 21.
Cleats or similar articles, Making shoe. J. T. Riddell. 2,001,977; May 21.
Clock-motor, Non-self starting. R. E. Lenehan. 2,001,914; May 21.
Closure. I. E. Sexton. 2,001,980; May 21.
Clothes hanger. E. C. Beard. 2,002,001; May 21.
Clothesline ring. T. Dossey. 2,002,435; May 21.
Clothing container. E. A. Miller. 2,002,246; May 21.
Clutch: *See*—
Automatic clutch. Synchronizing clutch.
Fluid clutch. Transmission clutch.
Hydraulic clutch.
Clutch mechanism. A. J. Zwierzina. 2,001,758; May 21.
Clutch release, Hydraulic. C. E. Furgason. 2,002,315; May 21.
Clutch with synchronizing means. J. P. Ruth and G. H. Woelbing. 2,001,892; May 21.
Coffee, Apparatus for roasting. L. S. Maede. 2,002,094; May 21.
Coffee preserver. M. Strosk. 2,002,420; May 21.
Coin controlled mechanism. J. G. Miller. 2,002,123; May 21.
Cold heading, Method of. A. T. Sivlter. 2,001,981; May 21.
Collar for personal wear. J. T. D. McNicol. 2,001,883; May 21.
Colorimetric method and apparatus adapted for gas mixing control. E. X. Schmidt. 2,002,279; May 21.
Comb attachment for carpet sweepers. E. R. Smith. 2,001,982; May 21.
Compressing unit. E. Heltman. 2,001,874; May 21.
Concrete building construction. H. Amezcua. 2,001,696; May 21.
Condenser: *See*—
Electrical condenser.
Condenser and operating the same, Asymmetric. J. E. Lilienfeld. 2,001,790; May 21.
Condiment measuring and dispensing device. H. L. McPhee. 2,002,039; May 21.
Conduit, Pressure medium. E. Müller. 2,002,329; May 21.
Confections, Preparing, packaging, and serving frozen. J. J. Nolte. 2,001,919; May 21.
Connecter: *See*—
Resilient connecter. Spring connecter.
Connecter element. E. R. Kulka. 2,002,291; May 21.
Connection, Oscillatory. G. D. Banta. 2,002,284; May 21
Container: *See*—
Clothing container. Folding container.
Container. A. O. Daller. 2,002,364; May 21.
Container and making the same, Dispensing. A. O. Daller. 2,002,363; May 21.
Container closure. P. Norris. 2,002,125; May 21.
Container closure. A. A. Saalbach. 2,001,748; May 21.
Container for the transportation of goods. M. M. J. Lefevre-Utile. 2,002,422; May 21.
Container with mechanical jack, Shipping. F. H. Schwerin. 2,002,455; May 21.
Containers, Attachment for. G. F. Upham. 2,001,947; May 21.
Contents of fermentation and storage containers, Clearing the. G. Jakob. 2,002,145; May 21.
Control device for radioreceivers, Remote. A. A. Thomas. 2,002,443; May 21.
Control for jacquard looms, Stop motion. L. C. Brady. 2,002,429; May 21.
Control mechanism. P. C. Temple. 2,001,988; May 21.
Control system. W. R. King. 2,002,374; May 21.
Controlling device. E. G. Thomas. 2,002,379; May 21.
Conveyer curve. L. R. Collar. 2,001,773; May 21.
Conveyer system. S. T. Hart and W. A. Marcy. 2,002,009; May 21.
Cooler: *See*—
Liquid cooler.
Cooling unit. H. A. Greenwald. 2,001,872; May 21.
Copper article and making the same, Coated. R. R. Tanner and J. S. Thompson. 2,001,753; May 21.
Core drill and valve therefor. L. Bradley. 2,001,764; May 21.
Corn cure package. B. Ellis. 2,002,341; May 21.
Corn product and making the same. C. E. Doolin. 2,002,053; May 21.
Corner construction for furniture or the like. G. R. Meyercord and F. M. Curran. 2,002,228; May 21.
Cotton cleaning and reclaiming machine. J. E. Mitchell. 2,001,974; May 21.
Coupling: *See*—
Hose coupling. Resilient coupling.
Cover: *See*—
Frying pan cover. Tire cover.
Culvert. M. C. Storms. 2,002,301; May 21.
Cup dropping machine. C. F. Adams. 2,002,213; May 21.
Curtain, Window. T. F. Byron. 2,002,171; May 21.
Cut-off mechanism for sheet material. D. H. Goodwillie and E. L. Walters. 2,002,346; May 21.
Cutter: *See*—
Fuse cutter.
Cutting table. R. J. Louviaux. 2,002,348; May 21.
Cylinder block, Engine. F. G. Shoemaker and G. E. Ehrling. 2,001,854; May 21.
Cylinder cock. R. H. George. 2,002,450; May 21.
Cylindrical bodies, Apparatus for and process of making. C. M. Yoder. 2,001,757; May 21.
Defective light signal. F. H. Sensiba and C. W. Sensiba. 2,002,251; May 21.
Den, Animal. F. S. Cole. 2,002,259; May 21.
Dental instrument for removing impacted teeth. D. J. McDaniels. 2,002,245; May 21.
Desk pad holder. F. C. Dell. 2,001,774; May 21.
Diaper pad. C. L. Fancher. 2,002,368; May 21.
Direction signal. S. McC. Terwilliger and W. T. Sevener. 2,002,022; May 21.
Directional aerial system. N. Wells. 2,002,197; May 21.
Dish or pan lifter. H. De L. Kneeland. 2,002,149; May 21.
Dishwashing machine. E. S. Stoddard. 2,002,300; May 21.
Disk harrow. E. Mowry. 2,002,272; May 21.
Display case. E. S. Irelan and R. J. Krabbe. 2,001,820; May 21.
Display device. L. H. Schreiber. 2,001,798; May 21.
Display rack. R. A. Reidenbaugh. 2,002,128; May 21.
Disulphides, Preparing organic. H. G. M. Fischer. 2,001,715; May 21.
Doll eye mechanism. W. Lorenz, and L. W. Pollack. 2,002,326; May 21.
Dolly, Srub bucket. A. Smith. 2,001,894; May 21.
Door, Automobile. C. E. Bedaux. 2,001,863; May 21.
Door, Car. C. E. Eklind. 2,002,392; May 21.
Door control, Vehicle. C. A. Breit. 2,002,025; May 21.
Door for fireboxes of oil burning locomotives. C. F. Gerlinger. 2,002,029; May 21.
Door, Grain. B. B. Morse. 2,002,154; May 21.
Door step, Combination. G. F. Spettel. 2,001,802; May 21.
Drill: *See*—
Rock drill.
Drill chuck, Rock. C. A. Hultquist. 2,002,203; May 21.
Drilling apparatus. C. E. Bannister. 2,002,385; May 21.
Drilling apparatus. M. C. Huffman. 2,001,729; May 21.
Drive and suspension means. A. C. Peterson. 2,002,210; May 21.
Drive for machine tool elements. K. F. Gallimore. 2,002,480; May 21.
Driving device, Electric. O. Neuenschwander. 2,002,124; May 21.
Driving disk for clutches. W. O. Bechman. 2,002,285; May 21.
Driving mechanism, Motor vehicle. H. A. Flogaus. 2,001,870; May 21.
Drive construction, Overrunning. E. E. Wemp. 2,001,804; May 21.
Drive, Friction. O. Ohnesorge. 2,002,126; May 21.
Drying apparatus G. E. Barozzi. 2,002,170; May 21.
Dumping apparatus for oil wells. L. E. Harrington. 2,002,112; May 21.
Duplicator, Rotary. L. Kinitman. 2,002,321; May 21.
Dyeing. R. Lantz. 2,002,406; May 21.
Dyestuff and making same, Fluoranthene. R. Sedlmayr and E. Kruta. 2,002,130; May 21.
Dyestuffs of the naphthophenazine series. T. Nocken and W. Neelmeier. 2,001,975; May 21.
Earth handling device. W. T. Stephens. 2,001,803; May 21.
Edge supporting device. J. Martin. 2,001,882; May 21.
Electric connecter plug. H. L. Strongson. 2,002,302; May 21.
Electric control means. C. Frohmer. 2,002,369; May 21.
Electric discharge device. W. F. Westendorp. 2,002,381; May 21.
Electric motor. A. W. Seyfried. 2,001,799; May 21.

Electrical actuating means for clocks and instruments. G. P. Cowles. 2,002,433; May 21.
Electrical condenser. B. Hansson. 2,001,873; May 21.
Electrical outlet and connecter for railway tracks. G. A. Laser. 2,002,034; May 21.
Electrode for arc welding. A. R. Nyquist. 2,001,848; May 21.
Electrode, Spark plug. D. W. Randolph. 2,001,888; May 21.
Electrodes, Making grid. L. Klinkert. 2,002,148; May 21.
Electron device. F. B. MacLaren. 2,002,207; May 21.
Electronic current regulator. C. Stansbury. 2,002,281; May 21.
Electrooptical system. H. E. Ives. 2,001,730; May 21.

Hydrocarbons, particularly butanes, Storage of volatile. W. G. Whitman. 2,001,996; May 21.
Hydrocarbons, Treatment of. V. Ipatieff. 2,001,908–9; May 21.
Hydrogen sulphide from gases containing ammonia and hydrogen sulphide, Removing. C. Eymann. 2,002,305; May 21.
Ignition system. R. S. June. 2,002,114; May 21.
Illuminating element. R. Römer. 2,001,852; May 21.
India-rubber spring. A. Spencer. 2,001,855; May 21.
Indicating device, Coin controlled. S. N. Hurt. 2,002,373; May 21.
Indicator: *See*—
Antifreeze indicator. Liquid level indicator.
Inflatable articles, Making. V. H. Hurt. 2,001,785; May 21.
Ingot mold. E. J. Kauffman. 2,001,879; May 21.
Inking mechanism for printing presses. A. and E. Kluge. 2,002,032; May 21.
Inkwell. L. H. Juster. 2,002,092; May 21.
Insulation, Thermal. M. C. Huggett. 2,001,912; May 21.
Interference, System for the neutralization of inductive. L. L. Lockrow. 2,001,847; May 21.
Internal combustion engine. C. R. Waselge. 2,002,049; May 21.
Internal combustion engine, Two stroke cycle. G. L. Streb-ler. 2,001,985; May 21.
Internal combustion motor. G. Wright. 2,002,230; May 21.
Ironing machines, Lot or bundle assorter for. F. J. Couch. 2,002,138; May 21.
Ironing press. W. M. Emery. 2,002,240; May 21.
Jack: *See*—
Automotive jack. Lifting jack.
Jacking apparatus for automotive vehicles. A. M. Wolf. 2,001,860; May 21.
Key attaching mechanism. G. A. and G. V. Bardet. 2,002,105; May 21.
Knitted fabric. V. Lombardi. 2,002,271; May 21.
Knitting machine. H. W. Simpson. 2,002,417; May 21.
Knitting machine. S. A. Welch, A. F. Guyler, W. H. Boaler, and J. T. Ashby. 2,002,070; May 21.
Knitting machinery. F. Lambach. 2,002,116; May 21.
Knob or handle construction. D. A. Belden. 2,002,466; May 21.
Latch: *See*—
Refrigerator latch.
Latch. J. W. Lakin. 2,001,787; May 21.
Latch lock. G. H. Wheary. 2,001,805; May 21.
Latex and product obtained thereby, Treating. C. E. Linscott. 2,001,791; May 21.
Laundry machine. J. B. Kirby. 2,001,965; May 21.
Lawn edger. H. L. Petteys. 2,001,921; May 21.
Lens shutter with combined exposure meter, view finder and distance meter. A. Gautbier and K. Bühnle. 2,001,840; May 21.
Lenses and their combination and arrangement in various instruments and apparatus. H. J. Birchall. 2,001,952; May 21.
Letter box, Rural free delivery. T. G. Wade. 2,002,423; May 21.
Lifter: *See*—
Dish or pan lifter.
Lifting jack. J. M. Patterson. 2,001,744; May 21.
Light: *See*—
Safety turn stop light.
Light signal. S. M. Day. 2,002,471; May 21.
Lighting appliance. L. C. Doane. 2,002,313; May 21.
Liquid cooler. J. Robertson and G. H. Purdy. 2,001,923; May 21.
Liquid fuel burner. C. A. French. 2,002,388; May 21.
Liquid level indicator. C. L. Seward, Jr. 2,001,853; May 21.
Liquids, Apparatus for sampling. E. W. Pribble. 2,001,922; May 21.
Liquids, Automatic control of antiknock. L. B. Kimball. 2,002,482–3; May 21.
Liquids, solutions, dispersions and emulsions into powder form by drying, Apparatus for the converting of milky. M. J. Stam. 2,002,252; May 21.
Loading machine. F. Cartlidge. 2,002,199; May 21.
Lock: *See*—
Latch lock.
Lock. C. and I. Kemp. 2,002,014; May 21.
Lock. G. Maierle. 2,001,824; May 21.
Lock. E. W. Worth. 2,002,453; May 21.
Lock switch. J. D. Taylor. 2,002,047; May 21.
Locking cap. C. C. Curl. 2,002,260; May 21.
Locomotives, Fire box of oil burning. C. F. Gerlinger. 2,002,028; May 21.
Looms, Shuttle motion for. J. F. Timberlake. 2,002,194; May 21.
Lubricants, Testing. J. O. Almen. 2,001,861; May 21.
Lubricating device. E. G. Gartin. 2,001,717; May 21.
Lubricating system. J. B. Watson. 2,001,857; May 21.
Lubricating system with initial splash. J. B. Watson. 2,001,858; May 21.
Lubricator. J. L. Reilly. 2,001,746; May 21.
Luggage, Hand. G. H. Wheary. 2,001,806–7; May 21.
Machine for balancing heavy bodies. A. N. Russell and H. Ulmann. 2,001,826; May 21.
Machine for drawing threads from fabrics. J. Ollendorff. 2,002,414; May 21.
Machine for making metal wool. L. Peterson. 2,001,940; May 21.
Machine for making serum phials, Automatic. L. L. Comoy. 2,002,432; May 21.
Machine for shaping shoe uppers. J. C. Jorgensen. 2,001,732; May 21.
Machine set composed of two engines and a driven machine. F. Gosslau. 2,002,316; May 21.
Manhole and cistern construction. N. P. O'Neal. 2,002,127; May 21.
Manifolding book, Triplicate. A. R. Lawson. 2,002,226; May 21.
Mask, Dermatoid. E. Dohm. 2,002,449; May 21.
Massaging device. C. H. Foster. 2,001,871; May 21.
Match package. E. F. Boutillon. 2,002,051; May 21.
Material, Method and apparatus for impregnating. J. H. Campbell. 2,001,768; May 21.
Measuring device, Vibration velocity. C. D. Greentree and M. S. Mead, Jr. 2,002,372; May 21.
Meat treating method. L. B. Jensen. 2,002,146; May 21.
Mechanical movement. R. H. Wainford. 2,001,755; May 21.
Metal articles, Manufacturing composite. M. R. Trembour and H. Wilson, Jr. 2,002,229; May 21.
Metal articles, Method and apparatus for making sheet. P. Peterson. 2,002,097; May 21.
Metal articles, Surfacing hardening. W. A. Wissler. 2,002,198; May 21.
Metal parts, Welding. F. Earle. 2,002,222; May 21.
Metal strips to sheets of wood, composition boarding or the like, Apparatus for attaching. A. M. Kamper. 2,002,265; May 21.
Metal treating apparatus. R. J. Wenn and L. D. Peik. 2,001,948; May 21.
Metals, Method of and apparatus for treating. G. E. Hilliard. 2,002,010; May 21.
Meter: *See*—
Gas density meter.
Mineral separator. W. R. J. Woock. 2,001,756; May 21.
Mirror device. W. L. Morrison. 2,001,743; May 21.
Mixer: *See*—
Cement mixer.
Mixer and juice extractor, Portable household. H. M. A. Strauss. 2,002,333; May 21.
Mixing apparatus. E. A. Colburn, Jr. 2,002,000; May 21.
Mixing device. A. L. Kurz. 2,002,323; May 21.
Modulation. H. O. Roosenstein. 2,001,891; May 21.
Modulating system. W. J. Albersheim. 2,002,214; May 21.
Modulating system. J. G. Nordahl. 2,002,209; May 21.
Mold: *See*—
Ingot mold.
Mold for concrete burial vaults, Collapsible. W. A. Palmer. 2,001,795; May 21.
Mold for inner tubes and the like, Vulcanizing. P. De Mattia. 2,002,110; May 21.
Motor: *See*—
Clock-motor. Internal combustion motor.
Electric motor. Rock drilling motor.
Fluid motor. Single phase motor.
Motor and the like, Alternating current. E. L. Carlson. 2,001,772; May 21.
Motor control system, Electric. E. U. Lassen and E. W. Seeger. 2,002,268; May 21.
Motor crank case or the like. F. L. Torney. 2,002,211; May 21.
Mounting, Axle. A. R. LeMoon. 2,002,152; May 21.
Mounting, Dual wheel. A. Krieg and J. A. Bundy. 2,002,290; May 21.
Mounting for toy locomotives, Motor. E. D. Boisselier. 2,002,256; May 21.
Mounting, Motor. R. K. Lee. 2,002,269; May 21.
Mouthpiece or the like, Cigarette. G. Davidson. 2,001,709; May 21.
Mowers, Tilting mechanism for. C. Pearson. 2,002,275; May 21.
Music, Production of. W. F. Curtis. 2,001,708; May 21.
Musical instrument. J. H. Hammond, Jr. 2,001,722; May 21.
Musical instrument controlling means. E. Verlinden. 2,002,162; May 21.

Nails, Making lead-headed screw-threaded. A. J. Denaston, Jr. 2,001,869; May 21.
Necktie holder. L. E. Baer. 2,002,231; May 21.
Negative resistance. E. H. Yonkers, Jr. 2,002,238; May 21.
Nipple, Teething and feeding. A. C. Heise and M. W. Jacobi. 2,001,842; May 21.
Nozzle. F. J. Rash. 2,001,889; May 21.
Nozzle, Fluid. O. W. Greene. 2,002,242; May 21.
Nozzle, Illuminated hose. C. E. Bourret. 2,002,107; May 21.
Nut cracking machine. W. H. Hancock. 2,002,289; May 21.
Nuts to candy bars, Method of and apparatus for applying. F. A. Martoccio. 2,002,018; May 21.
Oats from hulls, Apparatus for separating. L. B. Baumhover. 2,002,133; May 21.
Octylsalicylic acid. H. A. Bruson and O. Stein. 2,001,767; May 21.
Odor eliminating device. E. S. Smith. 2,001,828; May 21.
Oil and gas separator. E. J. Riley. 2,001,851; May 21.
Oil, Process and apparatus for acid treating light mineral. F. O. Blair. 2,001,899; May 21.
Oil, Treating. E. W. Gard. 2,002,004; May 21.
Oils, Process and apparatus for converting hydrocarbon. J. W. Throckmorton. 2,002,160; May 21.
Oils, Treatment of hydrocarbon. V. Ipatieff. 2,001,906; May 21.
Oils, Treatment of hydrocarbon. V. Ipatieff. 2,001,910; May 21.
Oils, Treating hydrocarbon. R. J. McRae. 2,001,741; May 21.
1-nitro-anthraquinone-6-acyl amino compounds and their preparation. E. B. Beard. 2,001,701; May 21.
One way brake. A. Zwald. 2,001,810; May 21.
Orchard heater. L. L. English. 2,002,054; May 21.
Ornamental material and making the same. J. W. Kantrow. 2,001,962; May 21.
Oscillation generator. W. Runge. 2,002,191; May 21.
Outlet, Convenience. V. R. Despard. 2,002,434; May 21.
Package diverting device. P. Van Wyk and I. R. Acheson. 2,001,927; May 21.
Pad: *See*—
Diaper pad.
Panel and the like of rustless steel and vitreous enamel, Ornamental. H. H. Harris. 2,001,725; May 21.
Pantograph machine, Automatic. H. H. Freed and H. B. Mann. 2,002,393; May 21.
Parallax panoramagrams, Making. H. E. Ives. 2,002,090; May 21.
Parking or deparking mechanism. H. H. Wolfe. 2,002,132; May 21.
Paste dispensing device. S. Spiros. 2,001,983; May 21.
Pasteurization apparatus, Regenerative. J. Olsen. 2,001,849; May 21.
Pen, Writing. L. S. Henwood. 2,001,726; May 21.
Percolator top. E. P. Seghers. 2,002,355; May 21.
Phonograph, Automatic. R. I. Wilcox. 2,002,236; May 21.
Phosphate coating, Method and material for producing. J. S. Thompson and V. M. Darsey. 2,001,754; May 21.
Phosphorus oxychloride, Making. H. P. Roberts. 2,002,277; May 21.
Photographic plates, Pack of. B. Liebeskind. 2,002,035; May 21.
Photographic printing apparatus and method for endless sound films. J. A. Maurer, Jr. 2,002,151; May 21.
Photographic printing emulsion and its production. W. A. Berry. 2,001,951; May 21.
Photographic shutter. G. L. Coursen. 2,002,109; May 21.
Piano recording. J. H. Hammond, Jr. 2,001,724; May 21.
Piano, Regenerative. J. H. Hammond, Jr. 2,001,723; May 21.
Picture records, Method and apparatus for forming sound motion. O. A. Ross. 2,002,188; May 21.
Pictures, Method and apparatus for transmission of. M. D. McFarlane. 2,002,208; May 21.
Pin and holder, Scarf. C. L. Trout. 2,002,195; May 21.
Pincer, Finger hair wave. R. G. Leland. 2,002,325; May 21.
Pipe fittings of integral tubular metal, Making elbow. E. S. Cornell, Jr. 2,002,470; May 21.
Placard. A. Alfano. 2,001,928; May 21.
Plant propagator, etc., or aquarium. G. Wernicke and A. R. Listern. 2,002,380; May 21.
Plants from ordinary vegetable plants, Developing ornamental. M. Uyematsu. 2,002,164; May 21.
Plow. R. L. Gurley. 2,002,059; May 21.
Plug: *See*—
Electric connecter plug.
Plug and socket, Electric. H. P. Hastings. 2,002,177; May 21.
Plug cleaning device, Spark. H. Rabezzana and A. J. Battey. 2,001,886–7; May 21.
Plug receptacle, Attachment. W. C. Tregoning. 2,001,990; May 21.
Polycycle propulsion means. A. J. Scholtes. 2,002,046; May 21.
Post: *See*—
Anchor post.
Potash and oxalic acid, Production of caustic. M. Enderli. 2,002,342; May 21.
Power transmission device. J. E. Larason. 2,001,736; May 21.
Power transmitting mechanism. W. Geist. 2,002,055; May 21.

Shock absorbing and stabilizing structure, Combined. J. Konopka. 2,002,402; May 21.
Shock compressing attachment for grain shockers. A. P. Lotstrand. 2,002,408; May 21.
Shoe. J. H. Eversdon. 2,001,821; May 21.
Shoe channeling and grooving machine. G. Gregoire. 2,001,720; May 21.
Shoe conveying system. A. R. Schoenky. 2,001,750; May 21.
Shoe counter. A. C. Engel. 2,002,093; May 21.
Shoe with elastic rubber insert. I. Goth. 2,001,841; May 21.
Shot concentrator. E. McGavock. 2,002,036; May 21.
Shuttle eye. P. L. Spencer. 2,002,131; May 21.
Sign: *See*—
Traffic sign.
Signal: *See*—
Defective light signal. Light signal.
Direction signal. Wigwag signal.
Signal lens means. W. E. Signor. 2,002,331; May 21.
Signal structure. W. E. Signor. 2,002,332; May 21.
Signaling system for railroads. T. Bodde. 2,002,468; May 21.
Signals for railroads, Light. J. F. Merkel. 2,002,477; May 21.
Silk manufacture, Artificial. B. Gordon, Jr., and H. J. V. Michel. 2,002,481; May 21.
Silk, Manufacture of artificial. A. J. L. Mortiz. 2,001,742; May 21.
Single phase motor. A. M. Wilson. 2,002,382; May 21.
Skate, Railway track. H. L. Rone. 2,002,217; May 21.
Slag drip and screen. E. G. Bailey and H. J. Kerr. 2,002,465; May 21.
Slicing machine. W. J. Campbell. 2,001,769–71; May 21.
Socket for artificial limbs. T. Kohl. 2,002,064; May 21.
Solvent for acetyl cellulose. J. F. Walsh and A. F. Caprio. 2,002,049; May 21.
Sound absorbing material. J. Mazer. 2,001,916; May 21.
Sound-absorbing unit and making the same. J. Mazer. 2,001,970; May 21.
Sound deadening structure. G. D. Kellogg. 2,001,733; May 21.
Sound with motion pictures, System for synchronizing. E. H. Hansen. 2,002,111; May 21.
Spark extinguisher, Engine. C. F. Gerlinger. 2,002,027; May 21.
Speed regulator. I. J. Larson and J. J. Hochn. 2,002,150; May 21.
Spool holder. J. T. Murchie, Jr. 2,002,412; May 21.
Spring: *See*—
Furniture spring. India-rubber spring.
Spring and making the same, Flat. K. Kaden. 2,002,399; May 21.
Spring connecter. R. W. Cook. 2,001,835; May 21.
Spring structure. C. S. Reed. 2,002,157–8; May 21.
Springs together, Fastening. C. Dietrich. 2,002,080; May 21.
Sprinkler. H. L. Henry. 2,002,178; May 21.
Stabilizer for vehicles. H. Hëme. 2,002,398; May 21.
Starches, Manufacture of. F. H. Thurber. 2,001,925; May 21.
Statements, bills, and the like, Mechanical method of preparing. M. Maul. 2,002,437; May 21.
Steam boiler. E. G. Bailey, H. J. Kerr, and R. M. Hardgrove. 2,002,463; May 21.
Steam generator. J. Treloar. 2,002,254; May 21.
Steam injector, Exhaust. E. Rawson. 2,002,156; May 21.
Steel object and making the same, Rubber coated. E. C. Domm. 2,002,261; May 21.
Steel object, Rubber coated. E. C. Domm. 2,002,263; May 21.
Stenciling or decorating apparatus. R. H. Barnard. 2,002,335; May 21.
Stock quotation projecting machine. J. W. Decker. 2,001,710; May 21.
Stop, Warping creel thread. A. Brucun. 2,002,137; May 21.
Stopper, Nonrefillable bottle. J. H. Gruver and J. H. Baldwin. 2,002,143; May 21.
Stove. C. Ehret. 2,001,713; May 21.
Stove, Rotatable top. C. Ehret. 2,001,714; May 21.
Strain device. H. E. Miller. 2,001,917; May 21.
Strainer, Pulp. M. Lamort. 2,002,404; May 21.
Strip material, Method of and machine for applying reenforcing. R. A. Hartt. 2,002,452; May 21.
Strip material, Rolling. C. A. Kral. 2,002,266; May 21.
Striping device. F. P. Ryan. 2,002,278; May 21.
Structural element. O. Rothenstein. 2,002,044; May 21.
Structure for buildings. H. Griesel. 2,002,347; May 21.
Support: *See*—
Tissue support.
Support for awnings or sunshades. A. J. Popes. 2,002,296; May 21.
Support for electric batteries undergoing charging. C. J. McKenna. 2,002,037; May 21.
Surgical fracture extension appliance. H. Rouse. 2,002,021; May 21.
Swaging means. H. A. Douglas. 2,002,220; May 21.
Switch: *See*—
Lock switch.
Switch mechanism, Motor driven. G. Ogurkowski. 2,001,920; May 21.
Synchronizing clutch. R. Thomson. 2,001,856; May 21.
Syringe. F. L. Wood. 2,002,024; May 21.
Table: *See*—
Adjustable table. Folding ironing table.
Cutting table. Work tabl
Table top, Card. W. J. Nevius. 2,001,9 ; May 21.
Tabulating mechanism for accounting machines. R. A. Christian. 2,002,362; May 21.
Tank: *See*—
Fuel storage tank.
Tanks, Forming high pressure. B. Hart. 2,001,998; May 21.
Taper roller lapping device and method. W. E. Hoke. 2,002,317; May 21.
Telephone and like transmission systems. A. D. Blumlein. 2,001,900; May 21.
Telephone system. T. L. Dimond. 2,002,219; May 21.
Telephone system. J. F. Toomey, and W. E. Hogan. 2,002,212; May 21.
Template. J. L. Anderson. 2,002,073; May 21.
Tension on strips of flexible material drawn from flat coils, Controlling the. F. H. Fry. 2,001,780; May 21.
Testing machine, Portable. R. W. Dinzl. 2,001,711; May 21.
Textile apparatus. W. A. Pickie and E. L. Greenwood. 2,002,078; May 21.
Theater seat, Self-closing detachable. M. T. Vandervoort. 2,001,991; May 21.
Thermal device, Snap acting. E. O. Blodgett. 2,002,467; May 21.
Thermometer and hydrometer, Combination. G. H. Lecarpentier. 2,002,183; May 21.
Thermostat. J. M. Johnson. 2,002,031; May 21.
Thermostatic and time heat control for stove ovens, Combined. B. E. Meacham. 2,002,409; May 21.
Thread, Apparatus for making rubber. J. R. Gammeter. 2,001,781; May 21.
Thresher, Harvester. E. A. Johnston, C. R. Raney, and A. E. W. Johnson. 2,002,205; May 21.
Ticket dispensing means. C. Fürrer. 2,001,903; May 21.
Tie trunk line. L. J. Bowne. 2,002,218; May 21.
Tile, Roofing. J. Kremper. 2,002,244; May 21.
Time indicating system. E. N. Anderson. 2,001,831; May 21.
Timepiece, Electric. L. Tisseyre and I. Cotnareanu. 2,002,421; May 21.
Tire cover, One piece arcuate. G. A. Lyon. 2,001,969; May 21.

Tire cover, Shove down molded. G. A. Lyon. 2,001,968; May 21.
Tire cover, Unitary. G. A. Lyon. 2,001,967; May 21.
Tissue support, Facial. E. C. Battey. 2,001,862; May 21.
Tobacco and similar materials, Treatment of. G. D. Harris. 2,002,060; May 21.
Tool: *See*—
Hand tool.
Tool for inserting valve lock washers or keepers. S. Kyser. 2,002,016; May 21.
Tools, Work piece guide for machine. K. Tessky. 2,002,282; May 21.
Toothbrush. F. A. Jones. 2,002,320; May 21.
Top for percolators and the like. E. P. Seghers. 2,002,354; May 21.
Tower, Cooling. S. W. Kryssewski and E. L. Cahoon. 2,002,065; May 21.
Toy, Electrically lighted. A. N. Smith. 2,002,358; May 21.
Toy, Fighting. A. D. Fairgrieve. 2,002,026; May 21.
Toy washing machine. F. J. Goriup. 2,001,822; May 21.
Tractor. T. Brown and L. A. Murray. 2,002,002; May 21.
Tractor attachment for broadcast seeders. C. A. Hitchcock. 2,002,179; May 21.
Tractor, Track type. N. O. Pansegrau. 2,002,274; May 21.
Traffic sign. G. H. Muehleisen. 2,022,248; May 21.
Trailer hitch. G. J. Shafer. 2,002,416; May 21.
Trailer, Log. H. G. De Bou and C. S. Thicke. 2,001,839; May 21.
Transformer, High frequency coupling. K. Posthumus. 2,002,187; May 21.
Transmission and control therefor, Free wheeling. H. J. Heck and J. M. Simpson. 2,001,783; May 21.
Transmission clutch. E. Roberts. 2,002,478; May 21.
Transmission mechanism. J. M. Christman. 2,002,310; May 21.
Transmitter. W. Ilberg. 2,002,181; May 21.
Transportation means. H. A. Otis. 2,001,935; May 21.
Trap: *See*—
Animal trap. Rodent trap.
Tray, Refrigerator freezing. R. H. Chilton. 2,002,232; May 21.
Tray, Serving. O. Mitchell. 2,002,328; May 21.
Trench excavator. W. A. Davis. 2,002,239; May 21.
Trimmer, Grass. R. B. Hite. 2,001,396; May 21.
Tube: *See*—
Venturi tube.
Tube inflating machine. E. Eger. 2,001,777; May 21.
Tube tester, Audion. R. L. Triplett. 2,001,945; May 21.
Tubes and other tubular articles, Producing seamless drawn. P. Otto. 2,002,415; May 21.
Tubes, Method and machine for processing collapsible. E. H. Barker. 2,001,760; May 21.
Tubing head. S. P. Tschappat. 2,001,946; May 21.
Tubing, Producing. S. F. Clement. 2,002,258; May 21.
Typewriting machine. H. A. Avery. 2,001,759; May 21.
Typewriting machine. S. I. Berger. 2,002,075; May 21.
Typewriting machine E. B. Hess. 2,002,395; May 21.
Typewriting machine. W. O. Michelsen. 2,002,410; May 21.
Underfloor duct system. H. S. Walker. 2,002,068; May 21.
Utensil, Kitchen. M. Clark and T. J. Callan. 2,000,815; May 21.
Vacuum stabilizer. H. Hueber and E. C. Horton. 2,002,318; May 21.
Vacuum tube tester. J. R. Williams. 2,002,425; May 21.
Valve: *See*—
Ball cock valve.
Valve. G. L. Kennedy. 2,002,182; May 21
Valve assembly for compensators. C. Sauzedde. 2,001,749; May 21.
Valve for combination sewer drains, Odor-sealing. B. A. Cunningham. 2,001,901; May 21.
Valve mechanism. O. Duda. 2,001,818; May 21.
Valve mechanism. F. A. Lind. 2,002,270; May 21.
Valve operating device, Check. E. L. Rowe and S. Taylor. 2,001,941; May 21.
Valve organization for gas ranges. E. E. Hodgkin, W. W. Wodell, and H. Lange. 2,002,089; May 21.
Valve seat, Repair. J. Weir. 2,001,830; May 21.
Vane instrument, Transversely magnetized. R. G. Arey and H. T. Faus. 2,002,445; May 21.
Vapor pressure, Method and apparatus for continuously determining. E. P. Valby and M. L. Arnold. 2,002,101; May 21.
Variable capacity pump. H. Centervall. 2,001,706; May 21.
Vegetable fibers, Treating. A. Bodmer and E. Weiss. 2,002,106; May 21.
Vehicle. W. M. Sheehan. 2,001,751; May 21.
Vehicle. W. M. Sheehan. 2,002,350; May 21.
Vehicle body construction. H. A. Johnson. 2,001,877; May 21.
Vehicle, Convertible child's. S. Botteese. 2,001,929; May 21.
Vehicle cooling system, Motor. H. Hueber. 2,002,310; May 21.
Vehicle frame. J. Ledwinka. 2,001,846; May 21.
Vehicle, Motor. H. A. Johnson. 2,001,878; May 21.
Vehicle spring suspension. P. Viviano. 2,002,459; May 21.
Vehicles, Apparatus for controlling excessive movements in sprung bodies of motor driven road. W. R. Oyston. 2,002,249; May 21.
Vertical unit heater. C. C. Carson. 2,001,834; May 21.
Voltaic couple. S. Ruben. 2,001,978; May 21.
Volume control, Automatic. J. R. Nelson. 2,001,825; May 21.
Volume control, Automatic. H. A. Wheeler. 2,001,950; May 21.
Wall and ceiling construction. G. R. Walper. 2,002,303; May 21.
Washer and making same, Lock. F. W. England. 2,001,956; May 21.
Washing and conditioning machine, Cake. J. J. Sippel. 2,002,418; May 21.
Water hammer eliminator W. M. Gray. 2,002,451; May 21.
Water filter. H. W. Bode. 2,002,216; May 21.
Waves, Producing artificial. O. A. Price. 2,002,043; May 21.
Welder, Sheet flash. A. F. Hanson. 2,002,007; May 21.
Welding rod. G. W. Woods. 2,002,402; May 21.
Well drilling apparatus. C. E. Bannister. 2,002,387; May 8.
Well equipment. S. V. Dillon. 2,002,140; May 21.
Well production apparatus. J. H. Howard. 2,002,062; May 21.
Wheel. F. H. Le Jeune. 2,002,292; May 21.
Wheel for harvester threshers, combined grain and transport. E. A. Johnston. 2,002,473; May 21.
Wigwag signal. W. E. Signor. 2,002,330; May 21.
Window assembly for an automotive vehicle. H. C. Field 2,001,778; May 21.
Window regulator mechanism. W. L. Kraemer. 2,002,322; May 21.
Windshield cleaner. R. A. Bean, Jr. 2,002,336; May 21.
Windshield storm screen. J. R Olshei and E V. Schaal 2,002,438; May 21.
Work table, Rotatable. F. R. Swanson. 2,002,442; May 21.
Wrench: *See*—
Adjustable wrench.

CLASSIFICATION OF PATENTS

ISSUED MAY 21, 1935

NOTE.—First number = class, second number = subclass, third number = patent number

1—	12:	2,002,265	29—148.5:	2,002,121	62—	108.5:	2,002,232	101—	132:	2,002,321	126—	110:	2,001,953	158—	113:	2,001,972
2—	12:	2,002,098	156:	2,002,415		115:	2,002,033		211:	2,002,293		113:	2,002,312	159—	4:	2,002,252

Apple, Herbert F., et al., executors. (See Apple, Vincent G.)
Apple, Vincent G., deceased, by H. F. and E. M. Apple, and G. Darroch, executors, Dayton, Ohio. Tool for making dynamo electric machine elements. 2,002,562; May 28.
Armitage, Joseph B. (See Andrew, W. K., and Armitage.)
Armstrong, Charles E., assignor to Armstrong Heat Control Corporation, Corvallis, Oreg. Automatically controlled multiple valve for steam lines. 2,002,761; May 28.
Armstrong Heat Control Corporation. (See Armstrong, Charles E., assignor.)
Arnold, Arthur A. (See Gilbert, A. C., and Arnold.)
Aronson, Louis V., Newark, N. J., assignor to Art Metal Works, Inc. Cigar lighter. 2,002,845; May 28.
Aronson, Louis V., Newark, N. J. Pyrophoric lighting mechanism. 2,002,846; May 28.
Arpin, Leonard G., assignor of one-half to H. C. Jelks, Fort Lauderdale, Fla. Luggage bag. 2,003,099; May 28.
Arpin, Leonard G., assignor of one-half to H. C. Jelks, Fort Lauderdale, Fla. Luggage bag. 2,003,100; May 28.
Art Metal Works, Inc. (See Aronson, Louis V., assignor.)
Artcraft Silk Hosiery Mills, Inc. (See Strauch, G. A., Richter, and Garrett, assignors.)
Arter Grinding Machine Company. (See Arter, H., and Fraser, assignors.)
Arter, Harry, Worcester, and W. F. Fraser, Westboro, assignors to Arter Grinding Machine Company, Worcester, Mass. Automatic grinding machine. 2,003,269; May 28.
Artos Engineering Company. (See Andren, Karl H., assignor.)
Asman, Arthur W., Lombard, Ill. Flower holder. 2,003,101; May 28.
Associated Patents, Inc. (See De Vlieg, Charles B., assignor.)
Atti, Raphael, Union City, N. J. Golf ball printing machine. 2,002,847; May 28.
Automobile Ventilation, Inc. (See Crowell, William D., assignor.)
Autographic Register Company. (See Johnson, Arthur A., assignor.)
Automotive Maintenance Machinery Co. (See Zimmerman, Herman W., assignor.)
Aynsoe, Thorkild, Bellerose, assignor to International Cement Corporation, New York, N. Y. Apparatus for making Portland cement. 2,002,972; May 28.
Badeon, Eber W., assignor to Resilent Hammer, Inc., Seattle, Wash. Electric hammer. 2,002,762; May 28.
Baer, Emanuel H. (See Ernest, William, assignor.)
Baer, Julius, Munich, Germany. Traveling set. 2,003,102; May 28.
Bailes, Bob B., Stigley, Okla. Muzzle. 2,003,229; May 28.
Bair, Edward J., New Hartford, assignor to Utica Radiator Corporation, Utica, N. Y. Heating convector. 2,002,763; May 28.
Baisch, Carl F., and J. W. White; said Baisch assignor to Kelsey-Hayes Wheel Company, Detroit, Mich. Braking mechanism. 2,002,876; May 28.
Baker, John G., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Capacitor motor. 2,003,031; May 28.
Balduf, Bruno E., assignor to United States Gypsum Company, Chicago, Ill. Antivibration boat construction. 2,002,517; May 28.
Baldwin, Frank A., Yonkers, N. Y. Armature winding machine. 2,003,169; May 28.
Baldwin, James H., New Milford, Conn. Power driven vehicle. 2,002,518; May 28.
Balke, Hans. (See Kaiser, W., and Balke.)
Ball, Albert P., assignor to Square D Company, Detroit, Mich. Electrical switch. 2,002,623; May 28.
Ballard, Milton H. (See Seely, T. H., and Ballard.)

Barber, Homer M., Reno, Nev. High vapor expansion turbine. 2,002,497; May 28.

Barks, Frank S., St. Louis, and A. P. Fox, University City, assignors to Lincoln Engineering Company, St. Louis, Mo. Lubricating apparatus. 2,003,032; May 28.

Barrett, Arthur, Bellevue, Pa. Apparatus for softening water. 2,003,230; May 28.

Barrett Company, The. (See Miller, Stuart P., assignor.)

Barrington, William N., assignor to The American Cast Iron Pipe Company, Birmingham, Ala. Welding equipment and welding. 2,002,877; May 28.

Barrows, Donald S., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging. 2,003,231; May 28.

Bartholomew, Robert J., Germantown, assignor to Fletcher Works, Incorporated, Philadelphia, Pa. Shuttle motion. 2,002,973; May 28.

Bartling, Friedrich, deceased, Hugling, and H. Fricke, Munich, J. Bartling, Hugling, executrix, assignors to Alterum Kredit-Aktien-Gesellschaft, Berlin, Germany. Preparing potassium carbonate or potassium hydroxide. 2,002,684; May 28.

Bartling, Jenny, executrix. (See Bartling, F., and Fricke.)

Baselt, Walter H., assignor to American Steel Foundries, Chicago, Ill. Brake rigging. 2,002,930; May 28.

Basson, Joseph D., New York, N. Y. Projecting machine and the optical system therefor. 2,002,498; May 28.

Bates, Mortimer F., assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Follow-up system for magnetic compasses. 2,003,270; May 28.

Bath, Cyril J., Shaker Heights, Ohio. Bulldozer. 2,002,563; May 28.

Batle, Joseph E., assignor, by mesne assignments, to The Kelsey-Hayes Wheel Company, Detroit, Mich. Brake dum construction. 2,003,063; May 28.

Batson, Hatton N. (See Bryant, John R., assignor.)

Bauriedel, Gotthard. (See Hartmann, A., Hoefinghoff, Bauriedel, and Ostermann.)

Bauriedel, Gotthard, Barmen, and K. Meyer-Gaus, Wuppertal-Elberfeld, Germany, assignors to American Bemberg Corporation, New York, N. Y. Process of and apparatus for the production of artificial silk and the like. 2,003,170; May 28.

Bautista, Leonides S., San Francisco, Calif. "Nides" twin toy. 2,002,685; May 28.

Bayley, Colin H. (See Cambron, A., and Bayley.)

Beard, Leslie C., Jr. (See Rather, J. B., Beard, and Reiff.)

Beauchamp, Wilfred A., Chicago, Ill., assignor, by mesne assignments, to The Youngstown Steel Door Company, Cleveland, Ohio. Car door. 2,003,033; May 28.

Becker, Bernard C., York, Pa., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,002,624; May 28.

Bedell, Carl E., assignor to Mesta Machine Company, Pittsburgh, Pa. Control device for rolling mills. 2,003,129; May 28.

Beeson, Arthur W., Washington, Pa., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Cage for parison molds. 2,003,064; May 28.

Bedford, Arthur J., Littlestown, Pa. Machine for slitting welts. 2,002,486; May 28.

Beimann, Wilhelm, and J. Hagenbeck, Bochum, Germany. Hurdle washer. 2,003,271; May 28.

Belaef, Nikolai, assignor to E. Macleod, F. A. Morrison, C. Macleod, L. Soule, and S. A. Sargent, Jr., trustees, doing business as Mason-Neilan Regulator Company, Boston, Mass. Multiple pen recorder. 2,002,686; May 28.

Belber, Aaron S., Woodbury, N. J. Traveling bag. 2,002,878; May 28.

Bell Telephone Laboratories, Incorporated. (See Black, Harold S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Bozorth, R. M., and Dillinger, assignors.)

Bell Telephone Laboratories, Incorporated. (See Callahan, Vincent T., assignor.)

Bell Telephone Laboratories, Incorporated. (See Carr, James A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Kelsall, George A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Locke, George A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Norman, Nathaniel C., assignor.)

Bell Telephone Laboratories, Incorporated. (See Werring, W. W., and Hixham, assignors.)

Beloit Iron Works. (See Berry, Earl E., assignor.)

Bender, Robert C., Davenport, Iowa. Returnable shipping container. 2,002,625; May 28.

Bendix Aviation Corporation. (See Urfer, Adolf, assignor.)

Bendix Brake Company. (See Carroll, Eugene G., assignor.)

Benge, Frank H., Norristown, Pa., assignor to Continental-Diamond Fibre Company, Newark, Del. Hollow articles, such as pipe fittings and the like, and making the same. 2,003,232; May 28.

Benjafield, Walter O., New York, N. Y. Lady's hand bag. 2,003,130; May 28.

Benner, Raymond C., P. H. Walker, and W. G. Soley, assignors to The Carborundum Company, Niagara Falls, N. Y. Method and apparatus for manufacturing articles of bonded granules. 2,003,131; May 28.

Bennett, Charles A., Stoneville, Miss., and G. E. Gaus, Washington, D. C., dedicated to the free use of the Public. Fractionation device and method for employing the same. 2,002,974; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Manufacturing high viscosity index oils. 2,003,233; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Producing high viscosity index oils. 2,003,234; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Manufacturing high viscosity index oils. 2,003,235; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Producing high viscosity index oils. 2,003,236; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Treating mineral oils with selective solvents. 2,003,237; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Separating mineral oils. 2,003,238; May 28.

Bennett, Harry T., assignor to Mid-Continent Petroleum Corporation, Tulsa, Okla. Separating constituents of mineral oils. 2,003,239; May 28.

Bennett, John M., Joliet, Ill. Dredge hoisting apparatus. 2,002,599; May 28.

Benson, Arthur E., Indian Orchard, assignor to The Fisk Rubber Corporation, Chicopee Falls, Mass. Tire building drum. 2,002,687; May 28.

Bergman, Renold, Wausau, assignor to Marathon Paper Mills Company, Rothschild, Wis. Quick-opening can top. 2,002,564; May 28.

Berry, Earl E., assignor to Beloit Iron Works, Beloit, Wis. Stringing a Fourdrinier wire. 2,003,103; May 28.

Berkow, Bernhard M., Miami Beach, Fla. Hair waving appliance. 2,002,487; May 28.

Bethlehem Steel Company. (See Kinney, James A., assignor.)

Bethlehem Steel Company. (See Shimer, W. R. Kinney, and Kichline, assignors.)

Bethlehem Steel Company. (See Stevens, Richard H., assignor.)

Bethlehem Steel Company. (See Underwood, Charles E., assignor.)

Betz, William G., Hammond, Ind. Massaging device. 2,003,272; May 28.

Bickell, Charles H., trustee. (See Sparks, Stanley W., assignor.)

Bierbaum, Harry E., Long Beach, assignor to General Salt Company, Ltd., Los Angeles, Calif. Purification of halogen-containing solutions. 2,002,634; May 28.

Black, Harold S., Westfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Wave translation system. 2,002,490; May 28.

Blackhawk Manufacturing Co. (See Pfauser, Edward M., assignor.)

Blakeman, James, assignor of fifty percent to W. Kennedy, Vancouver, British Columbia, Canada. Fuel saver. 2,002,879; May 28.

Blank, Ralph R., Fremont, Nebr. Electrically controlled steam engine. 2,002,488; May 28.

Blaw-Knox Company. (See Dorfan, Morton L., assignor.)

Blaw-Knox Company. (See French, Alfred W., assignor.)

Bliss, John, assignor to C. C. Wakefield & Company, Limited, London, England. Air-line oiler. 2,003,132; May 28.

Block, Richard J., New York, N. Y., and G. R. Cowgill, Hamden, Conn., assignors to S. J. Dannenberg, New York, N. Y. Isolation of water-soluble vitamins. 2,002,519; May 28.

Brocksedt, Theophile E., San Francisco, Calif., assignor to Washington Institute of Technology, Inc. Method of and apparatus for radiodynamic steering control. 2,003,240; May 28.

Boehringer, C. F., & Soehne, G. m. b. H. (See Müller, R., Schenck, and Wirbatz, assignors.)

Brogdex Company. (See Brogden, Ernest M., assignor.)

Brogden, Ernest M., Pomona, Calif., assignor to Brogdex Company, Winter Haven, Fla. Method of and apparatus for treating fruit and other articles. 2,003,275; May 28.

Boiling, Robert P., Detroit, Mich. Bake oven. 2,002,655; May 28.

Bone, Herbert L., assignor to The Union Switch & Signal Company, Swissvale, Pa. Fluid pressure distribution system. 2,003,034; May 28.

Bone, Herbert L., Swissvale, and J. W. Logan, Jr., Wilkinsburg, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,003,035; May 28.

Bontrager, Daniel J., Portland, Oreg. Scooter. 2,002,520; May 28.

Booth, Clement and A. Strom, assignors to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machine. 2,002,489; May 28.

Booth, Ralph D., Brookline, Mass., assignor of one-half to Jackson & Moreland, and one-half to Standard Oil Development Company. Utilization of high pressure gas. 2,002,565; May 28.

Borberg, Adolf, Short Hills, N. J., assignor to Dortmund Hoerder Huetten-verein Aktiengesellschaft, Dortmund, Germany. Box piling. 2,002,521; May 28.

Borden Company, The. (See Green, Lee B., assignor.)

Bouwers, Albert, assignor to N. V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. High tension contact protection. 2,002,688; May 28.

Bowman, Henry V., Minneapolis, assignor to Bowman Products, Incorporated, St. Paul, Minn. Bottle crate. 2,003,133; May 28.

Bowman, Henry V., Minneapolis, assignor to Bowman Products, Incorporated, St. Paul, Minn. Bottle crate. 2,003,134; May 28.

Bowman, Henry V., Minneapolis, assignor to Bowman Products, Incorporated, St. Paul, Minn. Bottle crate. 2,003,135; May 28.

Bowman, Myrtle A., Rochester, Minn. Colostomy belt. 2,002,931; May 28.

Bowman Products, Incorporated. (See Bowman, Henry V., assignor.)

Boyce, Charles M., Cedar Rapids, Iowa, assignor to John R. Ditmars, New York, N. Y. Composition for coating sheets, fibrous stocks, and the like. 2,003,065; May 28.

Boyertown Burial Casket Company. (See Strunk, Lester N., assignor.)

Bozorth, Richard M., Short Hills, and J. F. Dillinger, East Orange, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Magnetic material and treating magnetic materials. 2,002,689; May 28.

Brace, Edwin T., assignor to The Buckeye Incubator Manufacturing Company, Springfield, Ohio. Humidifier. 2,002,880; May 28.

Bragg-Kliesrath Corporation. (See Sanford, Roy S., assignor.)

Brennan, Joseph B., Fort Wayne, Ind., assignor to The Magnavox Company, Chicago, Ill. Heat circulator for motor vehicles. 2,002,626; May 28.

Bretselmeider, Erich, Dresden, Germany. Track. 2,002,881; May 28.

Briggs & Stratton Corporation. (See Liss, Samuel A., assignor.)

Brillo Manufacturing Company. (See Field, Crosby, assignor.)

Brindby, Fridtjof N., Oslo, Norway. Firearm of the gas reloading type. 2,003,066; May 28.

Brooks, Winfred M., West Orange, N. J. Twisted strands and producing same. 2,002,975; May 28.

Brostrom, Charles G., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for roughing shoe parts. 2,002,522; May 28.

Brown, Alexander, New York, N. Y. Bed tray table. 2,003,241; May 28.

Brown, Charles E. (See Melott, John M., assignor.)

Brune, William H., Chicago Heights, Ill. Excavating dipper construction. 2,003,067; May 28.

Brunk, Harold J., Chicago, Ill., assignor to The C. F. Pease Company. Arc lamp. 2,003,104; May 28.

Bryant, John R., Springfield, Tenn., assignor of one-half to H. N. Batson, Bowling Green, Ky. Buckle. 2,002,490; May 28.

Buc, Hyym E., Roselle, N. J., assignor to Standard Oil Development Company. Preventing corrosion. 2,002,523; May 28.

Buchholtz, Herbert, Dortmund, assignor to the firm Vereinigte Stahlwerke Aktiengesellschaft, Dusseldorf, Germany. Steel for railroad rails, wheel tires, plank piles, and other objects. 2,002,932; May 28.

Buckeye Incubator Manufacturing Company, The. (See Brace, Edwin T., assignor.)

Bucklein, Frank P., Los Angeles, Calif., assignor to Bucklein Manufacturing Corporation, Ltd. Brake testing machine. 2,002,764; May 28.

Bucklein Manufacturing Corporation. (See Bucklein, Frank P., assignor.)

Budd Wheel Company. (See Farr, Warren H., assignor.)

Buell, Earl P. (See Robart, B. L., and Buell.)

Buell, Timothy B., assignor to Sundstrand Machine Tool Co., Rockford, Ill. Tool relief mechanism. 2,002,933; May 28.

Buffalo Bolt Company. (See McLaughlin, John J., assignor.)

Bull, James P., San Diego, Calif. Target. 2,002,600; May 28.

Burger, William J. (See Lange, M. E., and Burger.)

Burrell, Edward P., Shaker Heights, assignor to The Warner & Swasey Company, Cleveland, Ohio. Telescope. 2,003,171; May 28.

Burt, Carleton W., Philadelphia, Pa. Geometrical instrument. 2,003,172; May 28.

Butcher, Edwin G., Wahroonga, and W. E. Jupe, Eastwood, New South Wales, Australia. Railway and tramway rail and wheel flange lubrication. 2,003,242; May 28.

Byron, Ralph, assignor to J. O. Ross Engineering Corporation, New York, N. Y. Baking oven. 2,002,976; May 28.

Cabaniss, Jelks H., et al executors. (See McWane, James B.)

Callahan, Michael J., Parlin, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Protective finish. 2,003,068; May 28.

Callahan, Vincent T., Bergenfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Control circuit. 2,003,036; May 28.

Cambron, Adrien, and C. H. Bayley, Ottawa, Ontario, Canada. Thermal treatment of gases and vapors. 2,002,524; May 28.

Cambron, Adrien, and C. H. Bayley, Ottawa, Ontario, Canada. Thermal treatment of gases and vapors. 2,002,525; May 28.

Campbell, Lawrence W., and W. P. Watson; said Watson assignor to Ann Watson, Clarksburg, W. Va. Toothbrush. 2,003,243; May 28.

Canon, Frank A., New Brunswick, N. J., assignor to E. I. du Pont de Nemours and Company, Inc., Wilmington, Del. Oxidation process. 2,002,627; May 28.

Caplan, Benjamin, Philadelphia, Pa. Repair lining for shoes. 2,003,105; May 28.

Caputo, James V., Crafton, Pa. Frequency control system for electric welders. 2,003,136; May 28.

Carboni, Ralph J., New Orleans, La. Combined advertising and display device. 2,003,244; May 28.

Carborundum Company, The. (See Benner, R. C., Walker, and Soley, assignors.)

Carburetted Gas, Inc. (See Nagel, Theodore, assignor.)

Carey, Charles O., Miami, Fla. Device for restoring the lay to twisted textile lines. 2,003,245; May 28.

Carlotti, Charles F., Brussels, Belgium. Windscreen. 2,003,106; May 28.

Carlston, Henry F., Daly City, Calif. Pincushion advertising device. 2,002,766; May 28.

Caro, Nikodem, Berlin-Dahlem, A. R. Frank, Berlin-Halensee, and H. H. Franck, Berlin-Charlottenburg, Germany. Production of calcium carbamate. 2,002,656; May 28.

Carpenter, James W., assignor to The McKay Company, Pittsburgh, Pa. Chair. 2,002,765; May 28.

Carr, Charles W., Lancaster, N. H. Window fastener. 2,003,246; May 28.

Carr, James A., Maplewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Dynamometer. 2,002,977; May 28.

Carroll, Eugene G., Los Angeles, Calif., assignor, by mesne assignments, to Bendix Brake Company, South Bend, Ind. Hydraulic brake apparatus. 2,003,247; May 28.

Carter, Frederick S., Cardiff, Wales. Steam trap, and apparatus for controlling or maintaining the supply of water or other fluid. 2,003,069; May 28.

Carter, Herbert F., Roselle Park, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for treating moving matter. 2,002,690; May 28.

Catto, Albert R. (See Harper, G. W., and Catto.)

Celander, Philip A., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill. Refrigeration cabinet. 2,003,274; May 28.

Certain-Teed Products Corporation. (See Hoggatt, Gilbert A., assignor.)

Chalmers, James. (See Elliott, J., and Chalmers.)

Chambers, Isaac M., Altoona, Pa. Door operating mechanism. 2,003,037; May 28.

Chance, Albert B., Centralia, Mo. Earth anchor. 2,002,628; May 28.

Chant, Christopher W. (See French, H., and Welbeloved, assignors.)

Chappell, Marvin L., Watson, Calif. Producing motor fuels from hydrocarbon oils. 2,002,729; May 28.

Chemical Foundation, Inc., The. (See Osterberg, Arnold E., assignor.)

"Chemical Works formerly Sandoz". (See Kreis, Walter, assignor.)

Chilowsky, Constantin, Paris, France. Control of glare shields of vehicles. 2,003,248; May 28.

Christie, Hans L., Los Angeles, Calif. Floating fish trap. 2,002,882; May 28.

Chrysler Corporation. (See Spurr, Robert E., assignor.)

Ciba Products Corporation. (See Gams, A., and Frey, assignors.)

Cincinnati Grinders Incorporated. (See Booth, C., and Strom, assignors.)

Cincinnati Grinders Incorporated. (See Nenninger, Lester F., assignor.)

Cincinnati Milling Machine Company, The. (See Isler, Herman R., assignor.)

Cincinnati Milling Machine Company, The. (See Romaine, M., and Roehm, assignors.)

Clark, Jesse H., Cicero, assignor to Walker Dishwasher Corporation, Chicago, Ill. Fluid valve. 2,003,173; May 28.

Claude Neon Electrical Products Corporation. (See Erickson, Ellis O., assignor.)

Claude Neon Electrical Products Corporation. (See Hyde, R. C., and Erickson, assignors.)

Clay, Oscar, South Bend, Ind. Caster. 2,003,249; May 28.

Cleveland Cliffs Iron Company, The. (See Olson, Edgar T., assignor.)

Cline, Charles T. (See Melling, Joseph, assignor.)

Clutter, Bird C. (See Ginasner, Joseph J., assignor.)

Cobb, Henry Z., Providence, and R. S. Francis, Rumford, R. I., assignors, by mesne assignments, to United States Rubber Company, New York, N. Y. Spindle drive mechanism. 2,002,629; May 28.

Coberly, Clarence J. (See Mendenhall, E., Van Horn, and Coberly.)

Cofrin, Austin E., Green Bay, Wis. Folded napkin. 2,002,691; May 28.

Cohen, Harry, Gallon, assignor to The Perfection Steel Body Company, Gallon, Ohio. Producing finishes imitative of stone. 2,002,848; May 28.

Cohen, Harry, assignor to The Perfection Steel Body Company, Gallon, Ohio. Masking apparatus for finishing articles of manufacture. 2,002,849; May 28.

Cohen, Moses, et al. (See Wallace, Alexander, assignor.)

Collins, Carl F., Winterhaven, Fla. Truck. 2,003,038; May 28.
Collins, George R., Kansas City, Mo. Building construction. 2,002,934; May 28.
Colt, Samuel S., Orange, N. J. Concrete form holding means. 2,002,526; May 28.
Columbia Axle Company, The. (See Harper, G. W., and Catto, assignors.)
Conigrave, Mostyn R., Subiaco, Western Australia, Australia. Hanger for supporting towels, cloths, and other articles. 2,002,566; May 28.
Connecticut Telephone & Electric Corporation. (See Garrigues, Frederic L., assignor.)
Connor, Kirke W., assignor to Micromatic Hone Corporation, Detroit, Mich. Honing tool. 2,002,567; May 28.
Consolidated Safety Pin Company. (See Richter, George F., assignor.)
Continental-Diamond Fibre Company. (See Benge, Frank H., assignor.)
Continental Motors Corporation. (See Hartley, Alfred J., assignor.)
Cooper, Jesse E., assignor, by mesne assignments, to National Venetian Blind Co., Los Angeles, Calif. Venetian blind. 2,003,174; May 28.
Corning Glass Works. (See Leibig, Edward C., assignor.)
Corning Glass Works. (See Woods, William J., assignor.)
Correll, William K., Jackson, Miss. Windshield wiper. 2,002,657; May 28.
Coubrough, George B., Long Beach, Calif., assignor to The Lummus Company, New York, N. Y. Condensing petroleum fractions. 2,002,731; May 28.
Cowgill, George R., (See Block, R. J., and Cowgill.)
Creative Displays, Inc. (See Ferrill, Harve, assignor.)
Cross, Frank L., Port Washington, N. Y., assignor to Cross Paper Feeder Company, Boston, Mass. Paper feeding machine. 2,002,850; May 28.
Cross Paper Feeder Company. (See Cross, Frank L., assignor.)
Crossen, Robert W., Jr., Plainfield, assignor to Farrell Manufacturing Company, Joliet, Ill. Safety means for tanks. 2,002,935; May 28.
Crossley, Alfred, and H. E. Meinema, Chicago, Ill., assignor to Johnson Laboratories, Inc., Chicago, Ill. High-frequency coupling device. 2,002,500; May 28.
Crowell, William D., St. Louis, Mo., assignor to Automobile Ventilation, Inc., Detroit, Mich. Ventilating apparatus for vehicle bodies. 2,002,730; May 28.
Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Air chuck. 2,003,089; May 28.
Culp, Jay S., assignor to Monarch Governor Company, Detroit, Mich. Carburetor. 2,002,732; May 28.
Cummings, William P., Woodside, N. Y. Reenforced concrete construction slab. 2,003,251; May 28.
Curtiss Aerocar Company. (See Robinson, Harold H., assignor.)
Curtiss Aeroplane & Motor Company. (See Hathorn, Charles E., assignor.)
Curtiss Candy Company, The. (See Karasik, Samuel, assignor.)
Cutler-Hammer, Inc. (See Kollath, Francis C., assignor.)
Dahl, Edward T., Randolph, Mass., assignor by mesne assignments, to E. Macleod, Westwood, F. A. Morrison, Newton, Mass., C. Macleod, Berwyn, Pa., L. Soule, Dedham, S. A. Sargent, Jr., Needham, Mass., trustees, doing business as Mason-Neilan Regulator Company, Boston, Mass. Control mechanism. 2,002,692; May 28.
Dahl, Edward T., Randolph, Mass., assignor by mesne assignments, to E. Macleod, Westwood, F. A. Morrison, Newton, Mass., C. Macleod, Berwyn, Pa., L. Soule, Dedham, S. A. Sargent, Jr., Needham, Mass., trustees, doing business as Mason-Neilan Regulator Company, Boston, Mass. Draft control. 2,002,693; May 28.
Dales, Benton. (See Williams, I., and Dales.)
Daly, Loretta M., Pittsfield, Mass., assignor to General Eletric Company. Electric heater. 2,003,175; May 28.
Daly, Loretta M., Pittsfield, Mass., assignor to General Electric Company. Electric heater. 2,003,176; May 28.
Dannenberg, Simon J. (See Block, R. J., and Cowgill, assignors.)
Darman, Joseph, assignor to Utica Towel Cabinet Corp., Utica, N. Y. Towel vending cabinet. 2,002,568; May 28.
Darroch, Gourley, et al., executors. (See Apple, Vincent G.)
Davenport, Frank A. (See Willshaw, H., and Davenport.)
Davies, Charles, New York, N. Y. Filter. 2,002,936; May 28.
Davis, Edward W., Minneapolis, Minn. Apparatus for concentrating ores. 2,002,978; May 28.
Day, Leonard, New York, N. Y., assignor to Polytechnic Development Corporation. Producing uniform motion in a sound film. 2,003,276; May 28.
Dayton Rubber Manufacturing Company, The. (See Kremer, Edward H., assignor.)
Deere, John, Tractor Company. (See Lesser, Nathan, assignor.)
Defiance Spark Plugs, Inc. (See Dutterer, Rex J. L., assignor.)
De Flores, Luis, Pomfret, Conn., assignor to The Texas Company, New York, N. Y. Treatment of hydrocarbon oils. 2,003,137; May 28.
De Fries, Walter, assignor to The William B. Pollock Company, Youngstown, Ohio. Metallic structure and making the same. 2,003,138; May 28.
Dehn, George J., Chicago, Ill. Grease trap. 2,003,139; May 28.
Dehn, George J., Chicago, Ill., Grease trap. 2,003,140; May 28.
De Lange, Hendrik B. M., Nijmegen, Netherlands. Track shifting device. 2,003,252; May 28.
De Laval Separator Company, The. (See Lindgren, Hans O., assignor.)
Deming, George M., East Orange, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Seat leak indicator for pressure regulators. 2,002,883; May 28.
Deming, George M., East Orange, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Gas regulator. 2,002,884; May 28.
Denbow, Clarence E. (See Voke, C. E., and Denbow.)
Dennis, William J., Chicago, Ill. Weather strip. 2,002,569; May 28.
De Saint-Martin, Charles V., Paris, assignor to Michelin et Cie., Clermont-Ferrand, France. Plow for electrical signaling of railways. 2,003,209; May 28.
Despard, Victor R., assignor to Pass & Seymour, Inc., Syracuse, N. Y. Electric wiring apparatus. 2,002,491; May 28.
Dess, Ben, Chicago, Ill. Cigarette lighter. 2,002,492; May 28.
Detwiler, James G., New York, N. Y., T. C. Heisig, Bayonne, J. E. Rosnell, Bound Brook, N. J. and F. W. Hall, Port Arthur, Tex., assignors to The Texas Company, New York, N. Y. Textile fiber spraying oils. 2,002,885; May 28.
Deutsche Gold-und Silber-Scheideanstalt vormals Roessler. (See Quenfurth, Wilhelm, assignor.)
Deutsche Gold-und Silber-Scheideanstalt vormals Roessler. (See Wiesler, Karl, assignor.)
Deutsche Hydrierwerke Aktiengesellschaft. (See Schrauth, Walther, assignor.)
Deutsch, Joseph B., Boulder City, Nev. Pie cutter. 2,003,253; May 28.
De Vlieg, Charles B., Jackson, Mich. assignor to Associated Patents, Inc., Cincinnati, Ohio. Backlash remover. 2,002,991; May 28.
Diamond Match Company, The. (See Farrelly, Joseph, assignor.)
Dick, Burns, Ferguson, assignor to Wagner Electric Corporation, St. Louis, Mo. Piston. 2,003,071; May 28.
Dictaphone Corporation. (See Renholdt, John E., assignor.)
Dillinger, Joy F. (See Bozorth, R. M., and Dillinger.)
Dill Manufacturing Company, The. (See Crowley, John C., assignor.)
Dirkes, Robert F., Jamaica, assignor to The Western Union Telegraph Company, New York, N. Y. Shift control for telegraph printers. 2,003,177; May 28.
Ditchfield, Frank, assignor to The Youngstown Steel Door Company, Cleveland, Ohio. 2,003,040; May 28.
Ditmars, John R. (See Boyce, Charles M., assignor.)
Divney, Raymond P., assignor to The Perfection Steel Body Company, Galion, Ohio. Extension axle unit for trucks. 2,002,851; May 28.
Divney, Raymond P., assignor to The Perfection Steel Body Company, Galion, Ohio. Third axle unit for trucks. 2,002,852; May 28.
Dodge, Adiel Y., assignor to The Lubrication Corporation, South Bend, Ind. Lubricating device. 2,003,107; May 28.
Dodge, Adiel Y., South Bend, Ind. Variable speed transmission. 2,003,108; May 28.
Donahue, A. J., Corporation. (See Jacobs, Joseph, assignor.)
Donato, Giuseppe, Philadelphia, Pa. Combination writing implement. 2,002,501; May 28.
Donle, Harold P., Meriden, Conn., assignor to Radio Inventions, Inc., New York, N. Y. Television method and apparatus. 2,002,992; May 28.
Donovan, Joseph L., Duluth, Minn. Jar or bottle holder. 2,002,767; May 28.
Dorfan, Morton L., Pittsburgh, assignor to Blaw-Knox Company, Blawnox, Pa. Apparatus for separating granular material. 2,003,141; May 28.
Döring, Fritz. (See Müller, K., Döring, and Wantosch.)
Dorogi, István and L., assignors to Magyar Ruggyantaarugyár Részvénytársaság, Budapest, Hungary. Securing a preformed and continuous sheet of unvulcanized rubber to a portion of a fabric upper. 2,002,527; May 28.
Dorogi, Lajos. (See Dorogi, István, and L.)
Dorr Company, The. (See Lund, Nels B., assignor.)
Dortmund Hoerder Huettenverein Aktiengesellschaft. (See Borberg, Adolf, assignor.)
Douglas, Harry A., Bronson, Mich. Swaging machine. 2,002,502; May 28.
Douglas, Harry A., Bronson, Mich. Aeroplane steering mechanism. 2,002,528; May 28.
Dowsett, Harry M., Winchmore Hill, London, England, assignor to Radio Corporation of America. Television system. 2,002,937; May 28.
Drexel, Adolph E., Palatka, Fla. X-ray cassette. 2,003,254; May 28.
Driver, John M., Wynnewood, Pa. Container. 2,003,182; May 28.
Drug Products Co. Inc., The. (See Torigian, John, assignor.)
Duby, John F., Boston, Mass. Vehicle steering arm gauge. 2,003,178; May 28.

Duff, Elmo E., Jennings, Okla. Wire line shock absorber. 2,003,255; May 28.
Dumser, Leo A., and O. W. Floody, assignors to Sundstrand Machine Tool Co., Rockford, Ill. Machine tool. 2,002,938; May 28.
Duncan Electric Manufacturing Company. (See Green, Stanley S., assignor.)
Duplan Silk Corporation. (See Lewin, I., and Geier, assignors.)
Dunlop Tire and Rubber Corporation. (See Willshaw, H., and Davenport, assignors.)
Du Pont, E. I., de Nemours & Company. (See Callahan, Michael J., assignor.)
Du Pont, E. I., de Nemours and Company. (See Canon, Frank A., assignor.)
Du Pont, E. I., de Nemours & Company. (See Holt, Harold S., assignor.)
Du Pont, E. I., de Nemours & Company. (See Lubs, H. A., and Williams, assignors.)
Du Pont, E. I., de Nemours & Company. (See Spiegler, Louis, assignor.)
Du Pont, E. I., de Nemours & Company. (See Williams, I., and Dales, assignors.)
Durafer (Inc.). (See Sargent, William D., assignor.)
Duraloy Company, The. (See Menough, Paul S., assignor.)
Dutterer, Rex J. L., assignor to Defiance Spark Plugs, Inc., Toledo, Ohio. Spark plug. 2,002,529; May 28.
Eagle Foundry Company. (See Fischer, Henry L., assignor.)
Eames, William F., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control system. 2,003,041; May 28.
Earle, Francis, assignor to The Mearl Corporation, Montclair, N. J. Screen for receiving projected images. 2,002,733; May 28.
Eastwood-Nealley Corporation. (See Specht, Harry G., assignor.)
Eaton Detroit Metal Company. (See Halkett, James N., assignor.)
Eckhard, William K., Dunellen, N. J., assignor to R. Hoe & Co., Inc., New York, N. Y., Irving Trust Company, Permanent Trustee. Gripper mechanism. 2,002,853; May 28.
Eckhouse, Edgar A., Cleveland Heights, Ohio. Shampoo fixture. 2,002,630; May 28.
Edson, Frank H., Westfield, N. J., assignor to Standard Oil Development Company. Recycling process for cracking oil. 2,002,530; May 28.
Edwards, William F. M., London, and R. F. May, Middlesex, assignors to Filter Tips Limited, London, England. Apparatus for the production of cigarettes. 2,002,886; May 28.
Ehrick, William F., and R. A. Garverick, assignors to The Marion Steel Body Company, Marion, Ohio. Refuse-collection device. 2,002,993; May 28.
Elnson-Freeman Co. (See Elnson, Morris M., assignor.)
Elnson, Morris M., Yonkers, assignor to Elnson-Freeman Co., Inc., Long Island City, N. Y. Display container or receptacle. 2,002,493; May 28.
Elsenberg, William, Minneapolis, Minn. Cigarette holder. 2,002,494; May 28.
Electric Furnace, The. (See Vaughan, Arthur H., assignor.)
Electrical Research Products, Inc. (See Albersheim, Walter J., assignor.)
Electrolux Corporation. (See Lynger, Erik S., assignor.)
Electrolux Servel Corporation. (See Maluri, Guido, assignor.)
Elliett, E. Vernon, Pocahontas, Va., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Automatic reclosing circuit breaker system. 2,003,042; May 28.
Elliett, E. Vernon, Pocahontas, Va., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Automatic reclosing circuit breaker system. 2,003,043; May 28.
Ellington, Paul B. (See Potts, C. M., and Ellington.)
Elliott, Joseph, and J. Chalmers, Winnipeg, Manitoba, Canada. Coupler. 2,002,658; May 28.
Elster, Ernst, Vienna, Austria. Automatically acting ski fastening. 2,002,694; May 28.
Endowment Foundation. (See McLean, H. C., and Weber, assignors.)
Engle, George D., Logan, Ohio. Safety device. 2,003,256; May 28.
Erickson, Ellis, O. (See Hyde, R. C., and Erickson.)
Erickson, Ellis O., Pasadena, Calif., assignor to Claude Neon Electrical Products Corporation, Ltd., Wilmington, Del. Producing hot cathode tubes. 2,002,768; May 28.
Erickson, Ellis O., Pasadena, Calif., assignor to Claude Neon Electrical Products Corporation, Ltd., Wilmington, Del. Electrical control circuit. 2,002,769; May 28.
Ernest, William, Martinez, assignor of one-half to E. H. Boer, Associated, Calif. Stencil and marking ink. 2,002,939; May 28.
Esselen, Gustavus J. (See Parkhurst, F. A., and Esselen.)
Estate Stove Company, The. (See Kuhn, Bertrand B., assignor.)
Estey, J. Royden, et al. (See Fisher, Franklin C., assignor.)
Ewing, Hugh W., Chicago, Ill. Incinerator control. 2,002,659; May 28.
Eynon, Thomas A., Scranton, Pa. Puzzle frame. 2,003,072; May 28.
Faber, Guy S., assignor to General Regulator Corporation, Chicago, Ill. Propeller. 2,003,073; May 28.
Fageol, Frank R. and W. B., Kent, Ohio. Fare collection method and apparatus. 2,003,257; May 28.
Fageol, William B. (See Fageol, Frank R., and W. B.)
Fain, Jacob M. (See Hixson, A. W., and Fain.)
Fairbanks, Morse & Co. (See Lack, Arnold S., assignor.)
Fairbanks, Morse & Co. (See Straube, Raymond C., assignor.)
Falk, Stig L. E., Vasterns, Sweden. Apparatus for the determination of Brinell numbers. 2,002,495; May 28.
Faltlhauser, Willy. (See Remy, Rudolf, assignor.)
Faries, Robert, St. Davids, and J. B. McWilliams, Pittsburgh, Pa. Shipping container. 2,002,570; May 28.
Farnham, Paul O., Boonton, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Radio receiving system. 2,003,110; May 28.
Farr, Warren H., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Wheel structure. 2,003,109; May 28.
Farrell Manufacturing Company. (See Crossen, Robert W., Jr., assignor.)
Farrelly, Joseph, Pelham, assignor to The Diamond Match Company, New York, N. Y. Advertising book matches and the like. 2,002,571; May 28.
Faus, Harold T., Lynn, Mass., assignor to General Electric Company. Magnetic compass. 2,003,179; May 28.
Fedders Manufacturing Company. (See Przyborowski, Stanislaus, assignor.)
Fellows Gear Shaper Company, The. (See Miller, Edward W., assignor.)
Ferguson, Robert W., Trenton, and H. P. Sparkes, Newark, N. J., assignor of one-half to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., and one-half to The Star Porcelain Company, Trenton, N. J. Frangible seal. 2,003,183; May 28.
Ferrill, Harve, assignor to Creative Displays, Inc., Chicago, Ill. Display article and producing the same. 2,002,734; May 28.
Fiberloid Corporation, The. (See Parkhurst, F. A., and Esselen, assignors.)
Field, Crosby, Brooklyn, N. Y., assignor to Brillo Manufacturing Company, Inc. Wire testing machine and method. 2,002,770; May 28.
Filter Tips Limited. (See Edwards, W. F. M., and May, assignors.)
Fiondella, Jean A., East Haven, Conn. Game. 2,002,631; May 28.
Firth, Cyril. (See Mirfield, G. E., Lewis, Firth, and Neale.)
Fischer, Henry L., East St. Louis, assignor to Eagle Foundry Company, Belleville, Ill. Oil burner. 2,003,111; May 28.
Fisher, Franklin C., Los Angeles, assignor of twenty per cent to A. W. Knight, San Marino, twenty per cent to W. R. Freeman, twenty per cent to L. B. Girard, Los Angeles, and twenty per cent to J. R. Estey, South Pasadena, Calif. Clutch. 2,002,979; May 28.
Fisher, Joseph S., New York, N. Y. Advertising calendar. 2,003,142; May 28.
Fisk, Gustaf L., Pittsburgh, assignor to Mesta Machine Company, Homestead, Pa. Rolling mill. 2,002,531; May 28.
Fisk Rubber Corporation, The. (See Benson, Arthur E., assignor.)
Flatley, Richard E., Elizabeth, N. J., assignor to Standard Oil Development Company. Thermocouple. 2,002,532; May 28.
Fletcher Works, Incorporated. (See Bartholomew, Robert J., assignor.)
Floody, Oscar W. (See Dumser, L. A., and Floody.)
Flory, Tom W., Ottawa, Kans. Route file. 2,002,887; May 28.
Folmer Graflex Corporation. (See Hinelline, Edson S., assignor.)
Food Machinery Corporation. (See Sharma, Jagan N., assignor.)
Food Machinery Corporation. (See Vickery, George P., assignor.)
Foothorap, Harry A., Harrisburg, Pa., assignor, by mesne assignments, to Underwood Elliott Fisher Company, New York, N. Y. Control mechanism for typewriting machines. 2,002,695; May 28.
Forbes, Thomas C., Hopkins, and O. R. Hedberg, Minneapolis, Minn. Minnow pail. 2,002,572; May 28.
Ford Instrument Company. (See Rothwell, J. J., Jr., and Stuart, assignors.)
Foss, Benjamin Q. P., deceased, by C. G. Foss, executrix, San Francisco, said B. Q. P. Foss assignor of sixty per cent to L. McDonald, Bakersfield, Calif. Burner. 2,002,660; May 28.
Foss, Clarinda G., executrix. (See Foss, Benjamin Q. P.)
Foti, Charles, assignor of one-third to J. Speranza, and one-third to M. D. Achille, Arnold, Pa. Direction signal for automobiles. 2,002,503; May 28.
Fox, Alexander P. (See Barks, F. S., and Fox.)
Francis, Raymond S. (See Cobb, H. Z., and Francis.)
Franck, Hans Heinrich. (See Caro, N., Frank, and Franck.)

Frank, Albert R. (See Caro, N., Frank, and Franck.)
Fränkl, Mathias, Augsburg, Germany, assignor to American Oxythermic Corporation, New York, N. Y. Resolution of gas mixtures. 2,002,940; May 28.
Fränkl, Mathias, Augsburg, Germany, assignor to American Oxythermic Corporation, New York, N. Y. Separating gas mixtures. 2,002,941; May 28.
Fraser, Warren F. (See Arter, H., and Fraser.)
Freeman, Horace, Montreal, Quebec, Canada, assignor to Nichols Engineering & Research Corporation of Canada, Limited. Roasting sulphide ore. 2,002,496; May 28.
Freeman, Washington R., et al. (See Fisher, Franklin C., assignor.)
French, Alfred W., Chicago, Ill., assignor, by mesne assignments, to Blaw-Knox Company, Pittsburgh, Pa. Machine for paving highways. 2,002,661; May 28.
French, Hartly, and W. F. Welbelored, assignors to C. W. Chant, Toronto, Ontario, Canada. Sealing compound for pneumatic tires and making the same. 2,003,112; May 28.
Fricke, Hermann. (See Bartling, F., and Fricke.)
Friedberg, Leo, New Brunswick, N. J. Flashing. 2,002,810; May 28.
Friedrich, Wilhelm, Berlin-Lichterfelde, Germany. Producing foam for fire extinction. 2,003,184; May 28.
Frolich, Per K., Cambridge, Mass., and J. W. Pugh, Breckenridge, Tex., assignors to Standard Oil Development Company. Separation of hydrocarbons and their oxygen-containing derivatives. 2,002,533; May 28.
Frolich, Per K., Elizabeth, N. J., assignor to Standard Oil Development Company. Production of normally liquid hydrocarbons from gaseous or lower boiling hydrocarbon materials. 2,002,534; May 28.
Frey, Karl. (See Gams, A., and Frey.)
Fuchs, Carl, Mergelstetten, near Heidenheim-on-the-Brenz, Germany. Adjustable blade runner. 2,002,735; May 28.
Fulton Company, The. (See Grotenbuis, William J., assignor.)
Fulton Company, The. (See Thorp, Joel R., assignor.)
Gage, Benjamin E., assignor to Kellogg Huntington, Evanston, Ill. Golf playing field. 2,003,074; May 28.
Gagnier, George E., Detroit, Mich. Grip for handles. 2,002,535; May 28.
Galante, Antonio, Medford, Mass. Dispensing cabinet. 2,003,044; May 28.
Gams, Alphonse and K. Frey, Basel, Switzerland, assignors, by mesne assignments, to Ciba Products Corporation, Dover, Del. Synthetic resins and making same. 2,002,601; May 28.
Gardiner, Herman B., assignor of forty-nine per cent to Harry J. Lurie, Chicago, Ill. Operating mechanism for motion picture projectors and phonographs. 2,003,075; May 28.
Garverick, Ralph A. (See Ehrick, W. F., and Garverick.)
Gastrich, Gustav, assignor to Textile Machine Works, Wyomissing, Pa. Ornamental toe reenforcement for stockings. 2,002,888; May 28.
Gaus, George E. (See Bennett, C. A., and Gaus.)
Geer, Paul L., Bellevue, H. A. Moore, Wilkinsburg, and W. A. Morton, Pittsburgh, Pa. Suction glass gathering device. 2,002,889; May 28.
Geier, Conrad W. (See Lewin, I. and Geier.)
General Aniline Works, Inc. (See Neelmeier, W., and Meiser, assignors.)
General Aniline Works, Inc. (See Orthner, L., and Keppler, assignors.)
General Electric Company. (See Alexander, Peter P., assignor.)
General Electric Company. (See Daly, Loretta M., assignor.)
General Electric Company. (See Faus, Harold T., assignor.)
General Electric Company. (See Holm-Hansen, Osmund, assignor.)
General Electric Company Limited, The. (See Ryde, John W., assignor.)
General Plate Company. (See Spencer, John A., assignor.)
General Regulator Corporation. (See Faber, Guy S., assignor.)
General Salt Company. (See Bierbaum, Harry E., assignor.)
Gensecke, Wilhelm, Gonzenheim, near Frankfort-on-the-Main, Germany, assignor to American Lurgi Corporation, New York, N. Y. Heat treatment of oils and fats, more particularly for the purpose of bleaching and hardening same. 2,003,076; May 28.
George, Enoch, Jr. (See Regan, W. J., and George, Jr.)
Gerlich, Hermann E. G. T., Bexley, Kent, England. Riffling machine. 2,003,185; May 28.
Gibson Refrigerator Company. (See Smith, Russell T., assignor.)
Gieskieng, Marion W., Denver, Colo., assignor to Radio Corporation of America, New York, N. Y. Telephony. 2,002,942; May 28.
Gilbert, A. C., Company, The. (See Gilbert, Alfred C., assignor.)
Gilbert, A. C., Company, The. (See Gilbert, A. C., and Arnold, assignors.)
Gilbert, Alfred C., North Haven, assignor to The A. C. Gilbert Company, New Haven, Conn. Truck for toy locomotive. 2,003,258; May 28.
Gilbert, Alfred C., North Haven, and A. A. Arnold, New Haven, assignors to The A. C. Gilbert Company, New Haven, Conn. Kitchen utility device. 2,003,259; May 28.
Gilbert, William L., Clock Company. (See Jauch, Christian, assignor.)
Gilpin, Garth G., Riverside, Ill., assignor to Union Metal Products Company, Chicago, Ill. Buffer spring for railway passenger cars. 2,002,632; May 28.
Gilpin, Garth G., Riverside, Ill., assignor to P. H. Murphy Company, New Kensington, Pa. Gondola car roof. 2,003,113; May 28.
Girard, Louis B., et al. (See Fisher, Franklin C., assignor.)
Glassner, Joseph J., assignor of one-half to B. C. Clutter, Akron, Ohio. Scraper. 2,003,180; May 28.
Glezen, William M., Detroit, Mich. Shock absorber. 2,002,980; May 28.
Globe Brick Company, The. (See Porter, Sidney C., assignor.)
Globe Machinery & Supply Company. (See Johnston, Frank R., assignor.)
Goddemeyer, Eduard, Lippstadt, Germany. Suspensible clew holder for thread or the like. 2,003,143; May 28.
Goldsmith, Samuel J., Chicago, Ill. Garment protector. 2,003,114; May 28.
Gollwitzer, Walter T., assignor to Addressograph Company, Chicago, Ill. Printing machine. 2,002,771; May 28.
Gollwitzer, Walter T., assignor to Addressograph Company, Chicago, Ill. Printing machine. 2,002,772; May 28.
Gollwitzer, Walter T., assignor to Addressograph Company, Chicago, Ill. Printing machine. 2,002,773; May 28.
Good, Francis R., Wynnewood, assignor of fifty one-hundredths to F. H. Shaw, Glenside, Pa. Automobile radio device. 2,003,187; May 28.
Goodman Manufacturing Company. (See Lindgren, Frank A., assignor.)
Goodrich B. F., Company, The. (See Griffiths, Roy H., assignor.)
Gould Coupler Company, The. (See Richards, Willard F., assignor.)
Graham, Frank F., Jr., Cardiff, Md. Broaching tool. 2,003,144; May 28.
Graham, George A., and G. O. Tapper, Fort Monmouth, Oceanport, N. J. Telephone handset switch. 2,002,504; May 28.
Graubner, Herman G., New York, N. Y., assignor to National Carbon Company, Inc. Flash light of candle type. 2,002,602; May 28.
Grauer, John, Whitestone, N. Y. Game apparatus. 2,003,145; May 28.
Gray, George W. (See Levy, S. I., and Gray.)
Green, Estill I., East Orange, N. J., assignor to American Telephone and Telegraph Company. Program distribution system. 2,002,603; May 28.
Green, Lee B., Lakewood, assignor to The Borden Company, Warren, Ohio. Control for gyrator-type washing machines. 2,002,573; May 28.
Green, Stanley S., assignor to Duncan Electric Manufacturing Company, La Fayette, Ind. Circuit controller. 2,003,260; May 28.
Greenberg, Louis, Chicago, Ill. Mechanical movement. 2,002,890; May 28.
Greene, Thomas P., Obion, Tenn. Machine for papering houses, etc., and for washing windows. 2,002,633; May 28.
Griffith-Hope Company. (See Hope, Samuel N., assignor.)
Griffiths, Roy H., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Hot water heater for automobiles. 2,003,045; May 28.
Grohn, Henry P., Chicago, Ill. Load limiting device. 2,003,115; May 28.
Gross, Carl G. (See Stein, H., Gross, and Luck.)
Grotenbuis, William J., Chicago, Ill., assignor to The Fulton Company, West Allis, Wis. Windshield. 2,002,736; May 28.
Groth, Gustav C., Watertown, Wis. Scroll. 2,002,697; May 28.
Gruse, William A. (See Martin, S. M., Jr., and Gruse.)
Gubring, Eugen. (See Hagedorn, M., Reichert, and Gubring.)
Gulf Refining Company. (See Martin, S. M., Jr., and Gruse, assignors.)
Gurley, Thomas J. (See North, S. N., and Gurley.)
Gurney Elevator Co., The. (See Rubin, Samuel N., assignor.)
Gutberlett, Helmut, Wuppertal-Barmen, Germany. Apparatus for arranging the fastener members of sliding-clasp fasteners in rows. 2,003,146; May 28.
Hadley, Edwin J., Brooklyn, N. Y. Selective transmission for motion picture and sound projectors. 2,002,854; May 28.
Hagedorn, Max, Dessau in Anhalt, O. Reichert, Dessau-Ziebigk in Anhalt and E. Gubring, Dessau in Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Cellulose derivatives containing an inorganic substituent. 2,002,811; May 28.
Hagenbeck, Johann. (See Reimann, W., and Hagenbeck.)

Halkett, James N., Cleveland Heights, assignor, by mesne assignments, to Eaton Detroit Metal Company, Cleveland, Ohio. Closure. 2,003,046; May 28.
Hall, Everett J., H. L. Hall, executrix of said E. J. Hall, deceased, assignor to Metals Disintegrating Company, Inc., Elizabeth, N. J. Bronze, bronze powders, and making the same. 2,002,891; May 28.
Hall, Frank W. (See Detwiler, J. G., Heisig, Rosnell, and Hall.)
Hall, Harriet L., executrix. (See Hall, Everett J.)
Halladay, Joseph R., Alliance, Ohio, assignor to James R. Kearney Corporation, St. Louis, Mo. Wire connecter tool. 2,002,981; May 28.
Hammer, Sigwald M., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Power supply circuit. 2,002,774; May 28.
Hammond Clock Company, The. (See Hammond, Laurens, assignor.)
Hammond, Laurens, assignor to The Hammond Clock Company, Chicago, Ill. Electric clock motor. 2,003,116; May 28.
Hanna, Clinton R., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Photophone apparatus. 2,003,048; May 28.
Hansen, John, Bettendorf, Iowa. Producing cutter blades for slicing machines. 2,002,812; May 28.
Hardcastle, Jess, et al. (See King, Walter E., assignor.)
Harper, George W., and A. R. Catto, assignor to The Columbia Axle Company, Cleveland, Ohio. Brake for automotive vehicles. 2,002,813; May 28.
Harris-Seybold-Potter Company. (See Harrold, Charles W., assignor.)
Harrold, Charles W., assignor to Harris-Seybold-Potter Company, Cleveland, Ohio. Printing press. 2,002,814; May 28.
Harrold, Charles W., assignor to Harris-Seybold-Potter Company, Cleveland, Ohio. Dampening mechanism for printing-presses. 2,002,815; May 28.
Hart, George T., Jr., and E. E. Winkley, Lynn, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Area measuring machine. 2,002,574; May 28.
Hartley, Alfred J., assignor to Continental Motors Corporation, Detroit, Mich. Clutch. 2,002,943; May 28.
Hartley, Emmett C., Oak Park, Ill., assignor to Addressograph Company, Wilmington, Del. Printing machine. 2,002,737; May 28.
Hartmann, August. (See Hoefinghoff, W., and Hartmann, assignors.)
Hartmann, August, Berlin-Lichterfelde, W. Hoefinghoff, Hohenlimburg Obernahmer, and G. Bauriedel and W. Ostermann, Wuppertal-Barmen, Germany, assignors to American Bemberg Corporation, New York, N. Y. Continue process and apparatus. 2,002,994; May 28.
Hartmann, August, Berlin-Lichterfelde, W. Hoefinghoff, Hohenlimburg Obernahmer, and A. Luchtenberg and H. Kempf, Wuppertal-Barmen, Germany, assignors to American Bemberg Corporation, New York, N. Y. Continue process and apparatus. 2,002,995; May 28.
Hathorn, Charles E., Hempstead, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc. Access opening for use in aircraft construction. 2,002,944; May 28.
Hauer, Arthur W., Cicero, Ill. Toe protector. 2,002,662; May 28.
Haug, Richard J., Nashua, N. H. Storm window and screen hanger. 2,002,738; May 28.
Hazel-Atlas Glass Company. (See Beeson, Arthur W., assignor.)
Hazel-Atlast Glass Co. (See Stenhouse, Thomas, assignor.)
Heckert, Ernest L. (See Thomas, William S., assignor.)
Hedberg, Oscar R. (See Forbes, T. C., and Hedberg.)
Heid, Frank P., Erie, Pa. Gauge. 2,003,188; May 28.
Heideman, Frederick J., Rochester, N. Y. Compressor unit. 2,002,575; May 28.
Heinitz, Woldemar, assignor to Schubert & Salzer Maschinenfabrik Aktiengesellschaft, Chemnitz, Germany. Stocking made in a single operation and making same. 2,003,189; May 28.
Heisig, Theodore C. (See Detwiler, J. G., Heisig, Rosnell, and Hall.
Henninger, Andrew F., Jr., Chicago, Ill. Cathode glow-lamp. 2,002,775; May 28.
Henton, Stuart C., Akron, and M. B. Rankin, Cuyahoga Falls, Ohio. Control system. 2,003,047; May 28.
Heppenstall, Thomas E., Longview, Wash., assignor of one-half to The Long-Bell Lumber Company, Kansas City, Mo. Material testing apparatus. 2,003,077; May 28.
Hercules Powder Company. (See Rankin, Lanning P., assignor.)
Herkenberg, Karl, Oberbarmen-Heckinghausen, Germany. Extensible electric conductor. 2,002,739; May 28.
Herold, Paul, and H. Kaufmann, Leuna, Germany, assignors to Standard-I. G. Company, Linden, N. J. Destructive hydrogenation of carbonaceous material. 2,002,997; May 28.
Hewitt, Ellis E., Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Electropneumatic brake. 2,002,892; May 28.
Hickey, Henri J., Los Angeles, Calif. Internal combustion engine. 2,002,663; May 28.
Hild, Frederic W., Los Angeles, Calif. Drilling machine. 2,003,078; May 28.
Hild, Frederick W., Denver, Colo. Drilling machine. 2,003,079; May 28.
Hildenbrand, Glenn W. (See Parks, R. D., and Hildenbrand.)
Hiler, Edward E., Bloomfield, N. J. Electric wave amplifying system. 2,002,855; May 28.
Hineline, Edson S., assignor to Folmer Graflex Corporation, Rochester, N. Y. Apparatus for making contact prints or enlargements from developed negatives. 2,003,190; May 28.
Hinrichs, Wilhelm J. H., Hamburg, and H. Wittkowski, Lockstedt-Niendorf, near Hamburg, Germany. Preserving fruit. 2,003,191; May 28.
Hinrichs, Wilhelm J. H., Hamburg, and H. Wittkowski, Lockstedt-Niendorf, near Hamburg, Germany. Producing moistureproof and air tight coatings. 2,003,192; May 28.
Hirose, Yuzaburo, Los Angeles, Calif. Toy. 2,003,193; May 28.
Hixson, Arthur W., Leonia, N. J., and J. M. Fain, Brooklyn, N. Y. Preparation of emulsions of thermoplastic materials. 2,002,505; May 28.
Hochstetter, Frederick W., Pittsburgh, Pa., assignor to Treesdale Laboratories, Inc. Compounding flame and waterproofing compositions for aqueous cellulosic media. 2,003,148; May 28.
Hoe, R., & Co. (See Eckhard, William K., assignor.)
Hoefinghoff, Walter. (See Hartmann, A., Hoefinghoff, Bauriedel, and Ostermann.)
Hoefinghoff, Walter. (See Hartmann, A., Hoefinghoff, Luchtenberg, and Kempf.)
Hoefinghoff, Walter, Hohenlimburg, Obernahmer, and A. Hartmann, Berlin-Lichterfelde, Germany, assignors to American Bemberg Corporation, New York, N. Y. Continue process and apparatus. 2,002,996; May 28.
Hoffman Combustion Engineering Company. (See Hoffman, Jerome A., assignor.)
Hoffman, Jerome A., assignor to Hoffman Combustion Engineering Company, Detroit, Mich. Heat absorbing device for the protection of stokers. 2,003,194; May 28.
Hoggatt, Gilbert A., Buffalo, N. Y., assignor to Certain-Teed Products Corporation, New York, N. Y. Producing cementitious material. 2,002,945; May 28.
Hojnowski, Jakob, Nekoosa, Wis. Aeroplane. 2,002,740; May 28.
Holland, Alfred H. (See Holland, Robert A., and A. H.)
Holland, Robert A., and A. H., Winston-Salem, N. C. Extension table. 2,002,576; May 28.
Holm-Hansen, Osmund, Stratford, Conn., assignor to General Electric Company. Electric vacuum cleaner. 2,003,147; May 28.
Holt, Charles K., Santa Barbara, I. B. Marsh, Ventura, and J. B. Merritt, Santa Barbara, Calif. Drill pipe protector. 2,002,893; May 28.
Holt, Harold S., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Vulcanized asphalt oil and product containing it. 2,002,634; May 28.
Hoover Company, The. (See Becker, Bernard C., assignor.)
Hoover Company, The. (See Klitto, William H., assignor.)
Hoover Company, The. (See White, Harry B., assignor.)
Hope, Samuel N., Wauwatosa, assignor to Griffith-Hope Company, West Allis, Wis. Seal. 2,002,850; May 28.
Hubbell, Harvey, Incorporated. (See Von Holtz, Charles T., assignor.)
Hudson, Edwin B., Middletown, Ohio. Self-adjusting valve-operating transmission device. 2,002,982; May 28.
Hull, George K., Fredonia, N. Y. Apparatus for cutting or beveling edges of metal plates. 2,003,049; May 28.
Hunt, Emma F., Brooklyn, N. Y. Screw fastening means. 2,002,741; May 28.
Huntington, Kellogg. (See Gage, Benjamin E., assignor.)
Huston, Sanford K., Jr., Chicago, Ill. Glazing construction. 2,002,536; May 28.
Huxham, Trevor S. (See Werring, W. W., and Huxham.)
Hyde, Ralph C., Los Angeles, and E. O. Erickson, Pasadena, Calif., assignors to Claude Neon Electrical Products Corporation, Ltd., Wilmington, Del. Safety system for therapeutic lamps. 2,002,776; May 28.
Hyman, Henry. (See Muldoon, Bernard F., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hagedorn, M., Reichert, and Guhring, assignors.)
Ice, Herbert H., Muskogee, Okla. Hydraulic safety pipe line repair device. 2,002,577; May 28.
I. G. Farbenindustrie Aktiengesellschaft. (See Mahn, H., Meyer, and Pfannenstiel, assignors.)
Ingersoll, Ella I. (See Tatter, John W., assignor.)
Institute of American Meat Packers. (See Regensburger, Richard W., assignor.)
International Cement Corporation. (See Aynsoe, Thorkild, assignor.)
International Projector Corporation. (See Kindelmann, A., and Ragot, assignors.)
Irving Air Chute Company Incorporated. (See Kuhlemann, Stig O. C., assignor.)
Irving Trust Company, permanent trustee. (See Eckhard, William K.)
Iselin, Harry, Racine, Wis. Beer container and cooler. 2,003,050; May 28.
Isler, Herman R., Norwood, assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Machine tool drive. 2,002,816; May 28.

Ivor Power Specialty Company. (See Moses, Richard I., assignor.)
Jackson, Honel A., Detroit, Mich. Welding electrode holder. 2,003,196; May 28.
Jackson, Luther M., and C. A. Prescott, Middletown, Pa. Combined cigarette dispenser and igniter. 2,003,195; May 28.
Jackson & Moreland, et al. (See Booth, Ralph D., assignor.)
Jackson, Ollie C., Bryn Mawr, Pa. Butter-molding device. 2,003,197; May 28.
Jacobs, Joseph, Bridgeport, assignor to A. J. Donahue Corporation, Milford, Conn. Buckle and making same. 2,002,946; May 28.
Jacobs, Joseph, Bridgeport, assignor to A. J. Donahue Corporation, Milford, Conn. Slide bar for men's garters. 2,002,947; May 28.
Jameson, Charles M., Pasadena, Calif. Antiback roll mechanism for cars. 2,002,857; May 28.
Janson, Carl G., assignor to Aktiebolaget Nomy, Stockholm, Sweden. Bearing. 2,003,080; May 28.
Jauch, Christian, assignor to W. L. Gilbert Clock Company, Winsted, Conn. Alarm clock. 2,002,998; May 28.
Jeffrey Manufacturing Company, The. (See Levin, N. D., and Lewis, assignors.)
Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)
Jelks, Howard C. (See Arpin, Leonard G., assignor.)
Jenkins, Bryan, Flemington, W. Va. Clutch brake. 2,003,198; May 28.
Jenkins, Charles F., Washington, D. C., assignor, by mesne assignments, to Radio Corporation of America. Relay for synchronizing systems. 2,002,664; May 28.
Jenler, Hubert, Zurich, Switzerland. Valve mechanism. 2,003,041; May 28.
Johnson, Arthur A., Bridgeport, Conn., assignor to Autographic Register Company, Hoboken, N. J. Manifolding. 2,003,149; May 28.
Johnson, Charles, assignor to Mattison Machine Works, Rockford, Ill. Abrading machine. 2,002,665; May 28.
Johnson, Charles, and C. L. Mattison, Rockford, assignors to Mattison Machine Works, Rockford, Ill. Abrading or polishing machine. 2,002,666; May 28.
Johnson, David E., Rockford, Ill. Ornamental knob and the formation thereof. 2,002,817; May 28.
Johnson, Frank J., and G. Johnson, Glenside, Pa. Automatic coal stoker. 2,003,199; May 28.
Johnson, Frank L., Brattleboro, Vt. Rack for holding twist drills. 2,002,983; May 28.
Johnson, Gerald. (See Johnson, Frank J., and G.)
Johnson, Henry C., Colton, Calif. Service station. 2,002,777; May 28.
Johnson, Joseph E., Boston, Mass. Weather strip. 2,002,944; May 28.
Johnson Laboratories, Inc. (See Crossley, A., and Meinema, assignors.)
Johnson, Louis H., assignor to Southern Equipment Company, San Antonio, Tex. Steering device for trailers. 2,002,604; May 28.
Johnston, Frank R., assignor to Globe Machinery & Supply Company, Des Moines, Iowa. Wheel freeing attachment for automobile lifts. 2,002,578; May 28.
Jones, Clarence M., Tulsa, assignor to F. V. Maddin, Muskogee, Okla. Tank theft prevention device. 2,002,818; May 28.
Jones, Helen H., Cranston, R. I. Clasp. 2,002,999; May 28.
Jones, Joseph H., assignor to The Studebaker Corporation, South Bend, Ind. Transmission. 2,002,778; May 28.
Joriot, Camille, Lac-ou-Villers, France. Device for placing protective coverings automatically on the seats of water closets. 2,002,948; May 28.
Junkers & Co., Gesellschaft mit beschrankter Haftung. (See Stockmeyer, F. W., and Römmelt, assignors.)
Jupe, William E. (See Butcher, E. G., and Jupe.)
Kahn, Bertrand B., Cincinnati, assignor to The Estate Stove Company, Hamilton, Ohio. Stove. 2,002,894; May 28.
Kaiser, Wilhelm, and H. Balke, Lichtenberg, Berlin, Germany, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Automatic coupling for pipe lines, electric lines on railway and other vehicles and the like. 2,003,082; May 28.
Karasik, Samuel, Oak Park, assignor to The Curtiss Candy Company, Chicago, Ill. Container. 2,002,742; May 28.
Karle, John D., Roselle Park, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Attachment for sewing machines. 2,003,200; May 28.
Kaufmann, Ary. (See Lee, M. L., and Kaufmann.)
Kaufman, Gus, Beacon, assignor to The Texas Company, New York, N. Y. Grease and its manufacture. 2,002,810; May 28.
Kaufmann, K., & Co. Inc. (See Lee, M. L., and Kaufmann, assignors.)
Kaufmann, Hermann. (See Herold, P., and Kaufmann.)
Kaynee Company, The. (See Oathout, Charles E., assignor.)
Kearney, James R., Corporation. (See Halladay, Joseph R., assignor.)
Kearney & Trecker Corporation. (See Andrew, W. K., and Armitage, assignors.)
Kearney & Trecker Corporation. (See Pohl, Walter M., assignor.)
Keller, Walter E., Elkhart, Ind., assignor to The Adlake Company, Chicago, Ill. Lock construction. 2,003,083; May 28.
Kellogg Switchboard and Supply Company. (See Hammer, Sigwald M., assignor.)
Kelly, Eugene J., Kalamazoo, Mich. Printing ink. 2,002,537; May 28.
Kelpe, Walter F., St. Louis County, assignor to Wagner Electric Corporation, St. Louis, Mo. Seal for dynamo electric machines. 2,003,000; May 28.
Kelsall, George A., Belleville, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Magnetic material. 2,002,696; May 28.
Kelsey-Hayes Wheel Company. (See Balsch, C. F., and White, assignors.)
Kelsey-Hayes Wheel Company, The. (See Batle, Joseph E., assignor.)
Kelsey-Hayes Wheel Company, The. (See Sinclair, Charles W., assignor.)
Kempf, Hubert. (See Hartmann, A., Hoefinghoff, Luchtenberg, and Kempf.)
Kennedy, William. (See Blakeman, James, assignor.)
Kenler, Herman I., New York, N. Y. Hand bag. 2,002,949; May 28.
Kent, Horace L., Brooklyn, N. Y. Safety razor. 2,003,201; May 28.
Keplar, James M., Elkhart, Ind. Filing system. 2,003,202; May 28.
Keppler, Helmut. (See Orthner, L., and Keppler.)
Kichline, Frank O. (See Shimer, W. R., Kinney, and Kichline.)
Kim, Young W., Santa Barbara, Calif. Game. 2,003,203; May 28.
Kimball, C. M., Co. (See Wood, Allen H., Jr., assignor.)
Kincaid, Thomas C., Jr., Steubenville, Ohio. Truck. 2,002,605; May 28.
Kindelmann, Albert, Floral Park, and C. L. Ragot, New York, assignors to International Projector Corporation, New York, N. Y. Supporting pedestal. 2,002,538; May 28.
King, Walter E., assignor to R. L. Waxler and J. Hardcastle, Houston, Tex. Control head. 2,002,539; May 28.
Kinney, Brewster P., Cleveland Heights, Ohio. Dispensing device. 2,002,635; May 28.
Kinney, James A. (See Shimer, W. R., J. A. Kinney, and Kichline.)
Kinney, James A., Lebanon, Pa., assignor to Bethlehem Steel Company. Making nut blanks. 2,003,084; May 28.
Kistner, Herman H., Baltimore, Md. Piston. 2,002,606; May 28.
Kitto, William H., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,003,085; May 28.
Klein, Maximilian, assignor to United States Gauge Company, Sellersville, Pa. Pressure gauge. 2,002,950; May 28.
Knight, Alfred W., et al. (See Fisher, Franklin C., assignor.)
Knight, Nelson M., Weymouth Heights, Mass. Pulp screening machine. 2,003,150; May 28.
Knoll, Max, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Electron discharge device. 2,002,667; May 28.
Knox, William H., Jr., Nashville, Tenn., assignor to Victor Chemical Works. Purification of strong phosphoric acid. 2,003,051; May 28.
Koehring Company. (See Lichtenberg, Erich H., assignor.)
Kokanour, Elmer L., Fort Lauderdale, Fla. Article of printer's furniture. 2,002,895; May 28.
Kolath, Francis C., Chicago, Ill., assignor, by mesne assignments, to Cutler-Hammer, Inc., Milwaukee, Wis. Connecter cap. 2,002,779; May 28.
Kopetz, Josef, Vienna, Austria. Manufacturing of helically grooved endless hose and tubing. 2,002,896; May 28.
Kraus, Wilhelm, Vienna, Austria, assignor, by mesne assignments, to America Cyanamid Company. Plastic masses and process of making same. 2,002,540; May 28.
Krels, Walter, assignor to firm, "Chemical Works formerly Sandoz," Basel, Switzerland. Cardio-active glucosides of digitalis lanata and of making same. 2,003,204; May 28.
Kremer, Edward H., assignor to The Dayton Rubber Manufacturing Company, Dayton, Ohio. Belt connecter. 2,002,897; May 28.
Kristensson, August. (See Thorssell, C. T., and Kristensson.)
Kruczek, Andrew B., Detroit, Mich. Printing device. 2,002,698; May 28.
Kuhlemann, Stig O. G., Stockholm, Sweden, assignor, by mesne assignments, to Irving Air Chute Company, Incorporated, Buffalo, N. Y. Quick release fastener for parachute harness. 2,003,205; May 28.
Lack, Arnold S., Beloit, assignor to Fairbanks, Morse & Co., Chicago, Ill. Internal combustion engine. 2,002,668; May 28.
Lamson Company, The. (See Pevear, Chase K., assignor.)
Lamson Company, The. (See Taylor, William J., assignor.)
Lang, Rose, Buffalo, N. Y. Baking pan. 2,003,151; May 28.

Lange, Max E., Cleveland Heights, and W. J. Burger, Shaker Heights, assignors to The Warner & Swasey Company, Cleveland, Ohio. Stock feeding and gripping device. 2,003,152; May 28.
Larsen, Elner W., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Clutch. 2,002,699; May 28.
Laurent, Milton P., assignor to W-K-M Company, Inc., Houston, Tex. Gate valve. 2,002,780; May 28.
Leaper, Percy J. (See Meuser, L. and Leaper.)
Leathers, Ward, Haworth, N. J., assignor to The Quadrex Corporation. Vacuum-broom. 2,002,636; May 28.
Leathers, Ward, Haworth, N. J., assignor to The Quadrex Corporation. Suction cleaner. 2,002,637; May 28.
Lee, Dwight B., Detroit, Mich. Vehicle ventilating window. 2,002,898; May 28.
Lee, Dwight B., Detroit, Mich. Vehicle ventilating apparatus. 2,002,899; May 28.
Lee, Martin L., Brooklyn, N. Y. and A. Kaufmann, South Orange, N. J., assignors to K. Kaufmann & Co., Inc., Newark, N. J. Traveling bag. 2,002,638; May 28.
Lee, Thomas L., assignor to North East Appliance Corporation, Rochester, N. Y. Electrical condenser. 2,003,002; May 28.
Leece, Bennett M., assignor to The Leece-Neville Company, Cleveland, Ohio. Voltage regulating device. 2,003,001; May 28.
Leece-Neville Company, The. (See Leece, Bennett M., assignor.)
Legat, Robert C., assignor to G. E. Prentice Manufacturing Company, New Britain, Conn. Key support. 2,002,858; May 28.
Lelbig, Edward C., assignor to Corning Glass Works, Corning, N. Y. Decorated glass article. 2,002,900; May 28.
Leighton, John W., Port Huron, Mich. Hinged joint. 2,002,781; May 28.
Lemoyne, Raymond A., Rochester, N. H. Baseball game. 2,003,207; May 28.
Lerch, William G., Akron, and A. W. Stoner, Findlay, Ohio, said Lerch assignor of one-half of his entire right and said Stoner assignor of his entire right to Master Tire and Rubber Corporation, Akron, Ohio. Tire retread vulcanizer. 2,002,579; May 28.
Lesser, Nathan, Moline, Ill., assignor to John Deere Tractor Company, Waterloo, Iowa. Tractor. 2,002,669; May 28.
Lester, Robert G., Chicago, Ill. Opera glass. 2,002,782; May 28.
Levin, Nils D., Columbus, Ohio, assignor to The Jeffrey Manufacturing Company. Material handling mechanism. 2,002,952; May 28.
Levin, Nils D., and E. G. Lewis, assignors to The Jeffrey Manufacturing Company, Columbus, Ohio. Loading machine control mechanism. 2,002,951; May 28.
Levy, Stanley L., Kingston Hill, England. Treatment of iron pyrites for recovery of sulphur and formation of iron oxide. 2,002,860; May 28.
Levy, Stanley L., Surrey, and G. W. Gray, London, England. Production of ferric compounds. 2,002,859; May 28.
Lewin, Irving, and C. W. Geier, Hazleton, Pa., assignors to Duplan Silk Corporation, New York, N. Y. Adjusting device for looms and controlling the beating-up operation. 2,002,953; May 28.
Lewis, Edward G. (See Levin, N. D., and Lewis.)
Lewis, Robert E. (See Mirfield, G. E., Lewis, Firth, and Neale.)
Lewis, William L., Los Angeles, Calif. Aircraft. 2,003,206; May 28.
Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Fluid dispensing apparatus. 2,003,153; May 28.
Lincoln Engineering Company. (See Barks, F. S., and Fox, assignors.)
Lindgren, Frank A., Western Springs, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 2,002,743; May 28.
Lindgren, Hans O., Appelviken, Sweden, assignor, by mesne assignments, to The De Laval Separator Company, New York, N. Y. Centrifugal separator. 2,002,954; May 28.
Lipson, William, Brookline, Mass. Detachable-hood garment. 2,002,955; May 28.
Liptak, Michael, St. Paul, Minn. Fire wall. 2,002,820; May 28.
Liss, Samuel A., Philadelphia, Pa., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Cylinder lock. 2,003,086; May 28.
Lissauer, Adolph W., assignor to Louisville Drying Machinery Co., Louisville, Ky. Manifold for tubular driers. 2,002,956; May 28.
Locke, George A., Glenwood, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Automatic printing telegraph exchange system. 2,002,985; May 28.
Locke Insulator Corporation. (See Vrooman, Edward C., assignor.)
Logan, John W., Jr. (See Bone, H. L., and Logan.)
Lomar, Louis L., Houston, Tex. Shock absorber. 2,002,700; May 28.
Long-Bell Lumber Company, The. (See Heppenstall, Thomas E., assignor.)
Long, Jon R., Fort Worth, Tex. Valve. 2,002,783; May 28.
Longobardi, Cesare, Rome, Italy. Explosion and combustion motor. 2,002,957; May 28.
Lord, Edward E., assignor of one-half to J. D. Ross, Pasadena, Calif. Sprinkler head. 2,003,052; May 28.
Loudenback, Clarence F. (See Loudenback, Hamilton L., assignor.)
Loudenback, Hamilton L., assignor of one-third to C. F. Loudenback, Sidney, Ohio. Truss structure. 2,002,500; May 28.
Loudenslager, Charles S. (See Voke, C. E., assignor, and Denbow.)
Louisville Drying Machinery Co. (See Lissauer, Adolph W., assignor.)
Lowe, Albert L. (See North, S. N., assignor, and Gurley.)
Lubrication Corporation, The. (See Dodge, Adiel Y., assignor.)
Lubs, Herbert A., Wilmington, Del., and I. Williams, Woodstown, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Vulcanization of rubber. 2,002,639; May 28.
Luchtenberg, Alex. (See Hartmann, A., Hoefinghoff, Luchtenberg, and Kempf.)
Lucl, Warner S. (See Stein, H., Gross, and Lucl.)
Lucich, Giovanni, assignor to firm "Società Anonima Carburatori Olii Pesanti (S. A. M. C. O.)", Trieste, Italy. Carbureting heavy liquid fuels. 2,003,180; May 28.
Lucich, Giovanni, assignor to firm "Società Anonima Carburatori Olii Pesanti (S. A. M. C. O.)", Trieste, Italy. Burner for heavy liquid fuels. 2,003,181; May 28.
Ludwig, Louis, Brooklyn, N. Y. Electrotherapeutic element. 2,002,744; May 28.
Lummus Company, The. (See Coubrough, George B., assignor.)
Lund, Nels B., Seaford, assignor, by mesne assignments, to The Dorr Company, Inc., New York, N. Y. Thickener. 2,003,281; May 28.
Lurie, Harry J. (See Gardner, Herman B., assignor.)
Luse, Gordon B., Big Spring, Tex. Device for expanding pistons. 2,002,821; May 28.
Lyngfer, Erik S., Stockholm, Sweden, assignor to Electrolux Corporation, Dover, Del. Sprayer. 2,003,087; May 28.
Lyon, George A., Allenhurst, assignor to Lyon Incorporated, Asbury Park, N. J. Cover for spare tires of automobiles. 2,002,784; May 28.
Lyon Incorporated. (See Lyon, George A., assignor.)
MacDonald, Ada A., Ithaca, N. Y. Combined electric stove and ironing device. 2,002,608; May 28.
MacDonald, Clifford K., Brockton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making lasts. 2,002,580; May 28.
MacIntire, Walter H., Knoxville, Tenn., assignor to American Zinc, Lead & Smelting Company, St. Louis, Mo. Making magnesium carbonate. 2,003,208; May 28.
Mack, Carl F., Philadelphia, Pa. Fabric guiding and seaming mechanism. 2,002,861; May 28.
Macleod, Cameron, et al., trustees. (See Belaef, Nikolai, assignor.)
Macleod, Cameron, et al., trustees. (See Dahl, Edward T., assignor.)
Macleod, Eldon, et al., trustees. (See Belaef, Nikolai, assignor.)
Macleod, Eldon, et al., trustees. (See Dahl, Edward T., assignor.)
Maddin, Fred V. (See Jones, Clarence M., assignor.)
Madge, Norman G., Providence, R. I., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Making rubber thread. 2,002,640; May 28.
Magnavox Company, The. (See Brennan, Joseph B., assignor.)
Magyar Ruggyantaarugyár Részvénytársaság. (See Dorogi, István, and L.)
Mahn, Herbert, H. Meyer, and H. Pfannenstiel, Dessau in Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Artificial products of regenerated cellulose. 2,002,822; May 28.
Main, David W., assignor to Transportation Systems, Inc., Oklahoma City, Okla. Vehicle and pilot means therefor. 2,002,901; May 28.
Maluri, Guido, London, England, assignor, by mesne assignments, to Electrolux Servel Corporation. Absorption refrigerating apparatus and method. 2,002,958; May 28.
Mallinckrodt Chemical Works. (See Westerbeck, Frederick, assignor.)
Mallory, Henry R., Rye, and S. Ruben, New Rochelle, N. Y., said Ruben assignor to said Mallory. Remote control of electrical devices. 2,002,541; May 28.
Marathon Paper Mills Company. (See Bergman, Renold, assignor.)
Marbury, Ralph E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Dishwasher. 2,003,003; May 28.
Marion Steel Body Company, The. (See Ehrick, W. F., and Garverick, assignors.)
Marsh, Ira B. (See Holt, C. K., Marsh, and Merritt.)
Martin, Samuel M., Jr., Pittsburgh, and W. A. Gruse, Wilkinsburg, assignors to Gulf Refining Company, Pittsburgh, Pa. Removing gum and gum forming constituents from cracked petroleum distillates. 2,002,902; May 28.
Marvel, Alvin L., Seaford, Del., and D. E. Semon, St. Pauls, N. C. Motor vehicle chassis frame. 2,002,823; May 28.
Mason-Neilan Company. (See Belaef, Nikolai.)

Mason-Neilan Regulator Company. (See Dahl, Edward T.)
Master Tire and Rubber Corporation. (See Lerch, W. G., and Stober, assignors.)
Matters, Helen M., Omaha, Nebr. Liquid dispensing receptacle. 2,002,959; May 28.
Mattison, Carl L. (See Johnson, C., and Mattison.)
Mattison Machine Works. (See Johnson, C., and Mattison, assignors.)
Mattison Machine Works. (See Johnson, Charles, assignor.)
May, Rowland F. (See Edwards, W. F. M., and May.)
Mayer, Bruno, Nuremberg, Germany. Roll film camera. 2,002,824; May 28.
McBride, Eugene A., assignor to Thompson Products Incorporated, Cleveland, Ohio. Two material extruded valve and making the same. 2,002,641; May 28.
McCarthy, Edward F., assignor of one-half to C. H. McCarty, Chicago, Ill. Fluid displacing pump. 2,003,117; May 28.
McCarty, Charles H. (See McCarthy, Edward F., assignor.)
McClendon, S. S., Jr., trustee. (See Nixon, Jeddy D., assignor.)
McConnell, Elliott B., assignor to The Standard Oil Company, Cleveland, Ohio. Making asphalt. 2,002,670; May 28.
McConway & Torley Company, The. (See Regan, W. J., and George, Jr., assignors.)
McDaniel, Henry, New London, Wis. Folding crib. 2,002,607; May 28.
McDonald, Lester. (See Foss, Benjamin Q. P., assignor.)
McDonald, Robert E., San Antonio, Tex., dedicated to the free use of the Public. Machine and method for detecting pink bollworm in cotton seed. 2,002,745; May 28.
McGuire, Archie G., Fort Dodge, Iowa. Semiautomatic transmission. 2,003,088; May 28.
McIntire, James F., assignor to United States Radiator Corporation, Detroit, Mich. Apparatus for making radiators. 2,002,903; May 28.
McIntire, James F., assignor to United States Radiator Corporation, Detroit, Mich. Apparatus for making radiators. 2,002,904; May 28.
McKay Company, The. (See Carpenter, James W., assignor.)
McKinney, James P., Jr., Pittsburgh, Pa., assignor, by mesne assignments, to The American Hardware Corporation, New Britain, Conn. Latch and lock mechanism. 2,002,542; May 28.
McLaughlin, John J., assignor to Buffalo Bolt Company, North Tonawanda, N. Y. Screw and trunnion nut device and making it. 2,002,671; May 28.
McLean, Harry C., and A. L. Weber, assignors to Endowment Foundation, New Brunswick, N. J. Removing spray residue from fruit. 2,003,005; May 28.
McMurry, Ralph B., Kalama, Wash. Abdominal support. 2,003,210; May 28.
McNutt, Joseph D., assignor to Winchester Repeating Arms Company, New Haven, Conn. Priming mixture. 2,002,960; May 28.
McQuaid, James W., Overton, Tex. Hydraulic pumping unit. 2,003,004; May 28.
McWane, A. T., et al executors. (See McWane, James R.)
McWane Cast Iron Pipe Co. (See McWane, James R., assignor.)
McWane, James R., deceased, Birmingham, Ala., A. T. McWane, W. McWane and J. H. Cabaniss, Executors, assignors to McWane Cast Iron Pipe Co., Birmingham, Ala. Method of and apparatus for lining metal pipes. 2,002,701; May 28.
McWane, William, et al., executors. (See McWane, James R.)
McWhirter, Mark H, assignor of one-half to E. G. Stafford, McCamey, Tex. Two-piece four-in-hand necktie. 2,002,829; May 28.
McWilliams, James B. (See Faries, R., and McWilliams.)
Mearl Corporation, The. (See Earle, Francis, assignor.)
Meinema, Herbert E. (See Crossley, A. and Meinema.)
Meiser, Wilhelm. (See Neelmeier, W., and Meiser.)
Melling, Joseph, Jackson, Mich. Clutch or brake, or like mechanism. 2,002,785; May 28.
Melling, Joseph, Jackson, Mich., assignor of one-half to C. T. Cline, Jackson, Mich. Brake. 2,002,786; May 28.
Melott, John M., assignor to C. E. Brown, Los Angeles, Calif. Valve for slush pumps. 2,002,672; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Bearing structure. 2,002,908; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Submersible structure. 2,002,909; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Submersible motor with mercury-sealed balancing means. 2,002,910; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Inverted motor for pumps. 2,002,911; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Control device for pumping systems. 2,002,912; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Submersible motor structure with mechanical seal. 2,002,913; May 28.
Mendenhall, Earl, Los Angeles, and J. B. Van Horn, Alhambra, assignors to Menhorn, Inc., Los Angeles, Calif. Construction for submersible motors and the like. 2,002,914; May 28.
Mendenhall, Earl, Los Angeles, and J. B. Van Horn, Alhambra, assignors to Menhorn, Inc., Los Angeles, Calif. Submersible motor construction. 2,002,916; May 28.
Mendenhall, Earl, and J. B. Van Horn, assignors to Menhorn, Inc., Los Angeles, Calif. Sealing device. 2,002,917; May 28.
Mendenhall, Earl, J. B. Van Horn, and C. J. Coberly; said Mendenhall and said Van Horn assignors to Menhorn, Inc., Los Angeles, Calif. Motor construction. 2,002,915; May 28.
Mendenhall, Earl, J. B. Van Horn, and C. J. Coberly, said Mendenhall and said Van Horn assignors to Menhorn, Inc., Los Angeles, Calif. Fluid-packed seal. 2,002,918; May 28.
Menhorn, Inc. (See Mendenhall, E., and Van Horn, assignors.)
Menhorn, Inc. (See Mendenhall, E., and Van Horn, assignors, and Coberly.)
Menhorn, Inc. (See Sessions, Charles R., assignor.)
Menough, Paul S., Mount Lebanon, assignor to The Duraloy Company, Pittsburgh, Pa. Fabricated damper. 2,003,154; May 28.
Mergenthaler Linotype Company. (See Ackerman, William, assignor.)
Merrill, David R., Long Beach and P. Subkow, assignors to Union Oil Company of California, Los Angeles, Calif. Extraction process. 2,002,702; May 28.
Merritt, John B. (See Holt, C. K., Marsh and Merritt.)
Mesta Machine Company. (See Bedell, Carl E., assignor.)
Mesta Machine Company. (See Fisk, Gustaf L., assignor.)
Metals Disintegrating Company. (See Hall, Everett J., assignor.)
Metals Research Syndicate. (See Sparks, Stanley W., assignor.)
Mettler, Hans W., Geneva, Switzerland. Jigger. 2,002,703; May 28.
Meuser, Ludwig, and P. J. Leaper, Naugatuck, Conn., assignors, by mesne assignments, to United States Rubber Company, New York, N. Y. Reaction product of ketones and amines. 2,002,642; May 28.
Meyer-Gaus, Karl. (See Bauriedel, G. and Meyer-Gaus, assignors.)
Meyer, Harry. (See Mahn, H., Meyer and Pfannenstiel.)
Meyrowitz, E. B., Inc. (See Meyrowitz, Emil B., assignor.)
Meyrowitz, Emil B., New York, N. Y., assignor to E. B. Meyrowitz, Inc. Goggles. 2,002,543; May 28.
Michelin et Cie. (See de Saint-Martin, Charles V., assignor.)
Michelsen, William O., Long Island, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 2,003,211; May 28.
Michelson, Barnett S., Boston, Mass. Water tank cover. 2,003,006; May 28.
Michigan Tool Company. (See Munn, Henry Q., assignor.)
Micromatic Hone Corporation. (See Connor, Kirke W., assignor.)
Mid-Continent Petroleum Corporation. (See Bennett, Harry T., assignor.)
Miessner, Benjamin F., Milburn Township, Essex County, N. J., assignor to Miessner Inventions, Inc. Electromagnetic translating system. 2,002,919; May 28.
Miessner Inventions, Inc. (See Miessner, Benjamin F., assignor.)
Miller, Edward S. (See Townsend, A. J. and Miller.)
Miller, Edward W., assignor to The Fellows Gear Shaper Company, Springfield, Vt. Steering gear. 2,002,746; May 28.
Miller, Stuart P., Englewood, N. J., assignor to The Barrett Company, New York, N. Y. Recovery of tar acids, etc. 2,002,704; May 28.
Millican, Roy E., Dallas, Tex., and W. R. Millican, Parsons, Kans. Power transmission. 2,003,212; May 28.
Millican, Word R. (See Millican, Roy E., and W. R.)
Mills, Oscar L., Los Angeles, Calif. Body treating band or article. 2,002,673; May 28.
Minutillo, Frank, Manahawkin, N. J. Automobile jack. 2,003,213; May 28.
Mirfield, George E., R. E. Lewis, and C. Firth, Youngstown, and J. E. Neale, Girard, assignors to The Youngstown Sheet & Tube Company, Youngstown, Ohio. Electric welding apparatus. 2,003,118; May 28.
Mitchell, Orville, Dallas, Tex. Saw cylinder for cotton extracting machines. 2,003,262; May 28.
Mole-Richardson, Inc. (See Richardson, Elmer C., assignor.)
Moller, Kasper F., Cicero, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for forming articles. 2,002,705; May 28.
Monarch Governor Company. (See Culp, Jay S., assignor.)
Mong, Fern, Greenville, Ohio. Ice creeper. 2,002,706; May 28.
Monro, William L., assignor to American Window Glass Company, Pittsburgh, Pa. Annealing sheet glass. 2,002,544; May 28.
Moore, Chester M., Wakefield, Mass. Shoe shank stiffener. 2,002,707; May 28.
Moore, Harold A. (See Geer, P. L., Moore, and Morton.)

Moore, John M., New York, N. Y. Day and night illuminated plate for signs. 2,003,089; May 28.
Moorman, Charles L., Chicago, Ill. Refrigerator. 2,002,643; May 28.
Moran, Archibald A., Mendham, N. J. Rotary pump. 2,002,862; May 28.
Moran, Matthew F., Kansas City, Mo. Filter. 2,002,826; May 28.
Moray, Virgil, New York, N. Y. Water heating system. 2,002,545; May 28.
Morch, Jacob J., Port Credit, Ontario, Canada. Rotary compressor. 2,002,827; May 28.
Morency, Henry L., Boulder, Colo. Milking device. 2,002,920; May 28.
Morgan, Edmund C., deceased, late of New York, N. Y., by O. E. Morgan, New York, N. Y., executrix, assignor to American Morgan Company. Material handling system for mines. 2,003,007; May 28.
Morgan, Olive E., Executrix. (See Morgan, Edmund C.)
Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,002,747; May 28.
Morrison, Frank A., et al., trustees. (See Belaef, Nikolai, assignor.)
Morrison, Frank A., et al., trustees. (See Dahl, Edward T., assignor.)
Morton, William A. (See Geer, P. L., Moore, and Morton.)
Moses, Richard I., Stockton-on-Tees, England. Fluid pressure operated blower for cleaning the tubes of steam generators and the like. 2,002,787; May 28.
Moses, Richard I., Langley, assignor to Ivor Power Specialty Company, Limited, London, England. Fluid pressure operated blower for cleaning the tubes of steam generators and the like. 2,002,788; May 28.
Mueller, Emilie P., administratrix. (See Mueller, John G.)
Mueller, John G., deceased, Dayton, Ohio, E. P. Mueller, administratrix. Rail stabilising device for railway tracks. 2,002,708; May 28.
Muldoon, Bernard F., Mountainview, N. J., assignor to Henry Hyman, Brooklyn, N. Y. Device for indicating whether a clock is running. 2,002,905; May 28.
Mullan, John H., San Francisco, Calif. Can top remover. 2,002,906; May 28.
Müller, Konrad, Berlin-Siemensstadt, F. Döring, Berlin-Frohnau, and J. Wantosch, Berlin-Reinickendorf-O., Germany, assignors to Siemens & Halske Aktiengesellschaft, Berlin-Siemensstadt, Germany. Electric motor and control therefor. 2,002,546; May 28.
Müller, Richard, and M. Schenck, Mannheim, and W. Wirbatz, assignors to C. F. Boehringer & Soehne G. m. b. H., Mannheim-Waldhof, Germany. Treating cellulose acetate. 2,002,674; May 28.
Multigraph Company. (See Wescott, William B., assignor.)
Munn, Henry Q., Walkerville, Ontario, Canada, assignor to Michigan Tool Company. Adjustable work carrying table. 2,003,263; May 28.
Murphy, Edward J., Lynbrook, N. Y. Freezing apparatus. 2,003,214; May 28.
Murphy, P. H., Company. (See Gilpin, Garth G., assignor.)
Murray Corporation of America, The. (See Westrope, Fred J., assignor.)
Mygland, Arne, Fjotland, near Flekkefjord, Norway. Ring shuttle reel for sewing machines. 2,002,609; May 28.
N. V. Philips' Gloeilampenfabrieken. (See Bouwers, Albert, assignor.)
Nachod & United States Signal Co. (See Richterkessing, Frank H., assignor.)
Nadig, Francis H., Chicago, Ill. Floor cleaner. 2,003,215; May 28.
Nadig, Francis H., Chicago, Ill. Floor cleaning machine. 2,003,216; May 28.
Nagel, Theodore, Brooklyn, N. Y., assignor to Carburetted Gas, Inc. Producing fuel gas. 2,002,863; May 28.
Nall, Elmer L., Chicago, Ill. Fluid dispensing device. 2,002,610; May 28.
Nall, Elmer L., Chicago, Ill. Liquid dispensing device. 2,002,611; May 28.
National Carbon Company. (See Graubner, Herman G., assignor.)
National Gypsum Company. (See Venzie, Frederick M., assignor.)
National Malleable and Steel Castings Company. (See Kaiser, W., and Balke, assignors.)
National Vending Company. (See Parks, R. D., and Hildenbrand, assignors.)
National Venetian Blind Co. (See Cooper, Jesse E., assignor.)
Naugle, Harry M., et al. (See Townsend, A. J., and Miller, assignors.)
Naugle, John J. (See Wickenden, L., and Naugle.)
Neale, John E. (See Mirfield, G. E., Lewis, Firth, and Neale.)
Neelmeier, Wilhelm, and W. Meiser, Leverkusen-I. G. Werk, Germany, assignors to General Aniline Works, Inc., New York, N. Y. N-substituted derivative of sulphoanilines. 2,002,612; May 28.
Nenninger, Lester F., assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding machinery. 2,002,921; May 28.
Netzsch, Fritz. (See Von Issendorff, Jürgen and Netzsch.)
Neuland, Alfons H., Irvington, N. J. Gear damper for engine drive transmission systems. 2,002,828; May 28.
Neveling, Aloys, Chicago, Ill. Hydraulic dredge. 2,002,748; May 28.
Neveling, Aloys, Sr., Chicago, Ill. Hydraulic dredge. 2,002,749; May 28.
Newell, Robert E., Irwin, assignor to Robertshaw Thermostat Company, Youngwood, Pa. Expansible bellows. 2,003,119; May 28.
Nichols Engineering & Research Corporation of Canada, Limited. (See Freeman, Horace, assignor.)
Nichols, Ralph, Elyria, Ohio. Traction device for athletic shoes or the like. 2,002,864; May 28.
Niedecken, Edward F., Milwaukee, Wis. Shower bath cabinet. 2,002,789; May 28.
Niederhauser, Jakob, Wettingen, Switzerland, assignor of one-half to Richard Suter, Cleveland, Ohio. Transmission mechanism. 2,002,709; May 28.
Nixon, Jeddy D., assignor to S. S. McClendon, Jr., Houston, Tex., trustee. Method and apparatus for producing liquid from wells. 2,003,009; May 28.
Nixon, Jeddy D., assignor to S. S. McClendon, Jr., Houston, Tex., trustee. Fluid elevator. 2,003,010; May 28.
Noble, Minnie E., Berkeley, Calif. Jig saw puzzle. 2,002,750; May 28.
Nordengren, Sven G., assignor to Aktiebolaget Kemiska Patenter, Landskrona, Sweden. Decomposing raw phosphates. 2,002,547; May 28.
Nordstrom, Nels F., Minneapolis, Minn. Plow. 2,002,751; May 28.
Norman, Nathaniel C., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission control in signaling systems. 2,002,961; May 28.
North East Appliance Corporation. (See Lee, Thomas L., assignor.)
North East Appliance Corporation. (See Sullivan, Raymond H., assignor.)
North, Samuel N., Rising Sun, and T. J. Gurley, Patriot, said North assignor to A. L. Lowe, Patriot, Ind. Milk strainer. 2,002,865; May 28.
Oathout, Charles E., Shaker Heights, assignor to The Kaynee Company, Cleveland, Ohio. Garment. 2,003,217; May 28.
Olson, Edgar T., Marquette, Mich., assignor to The Cleveland Cliffs Iron Company, Cleveland, Ohio. Activated carbon. 2,003,277; May 28.
Olson, Edgar T., New York, N. Y., assignor to The Cleveland Cliffs Iron Company, Cleveland, Ohio. Preparation of activated carbon. 2,003,278; May 28.
Onken, Herman A., Webster City, Iowa. Coupling for pump rods, trailer hitches and the like. 2,002,922; May 28.
Optical Research Corporation. (See Singer, Nathaniel, assignor.)
Orr, William V., Cleveland Heights, assignor to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Washing machine. 2,002,790; May 28.
Orthner, Ludwig, Leverkusen I. G. Werk, and H. Keppler, Leverkusen-Schlebusch, Germany, assignors to General Analine Works, Inc., New York, N. Y. Reaction product of an organic acid amide and an alkylene oxide. 2,002,613; May 28.
Osten, Joseph W., Chicago, Ill. Golf bag. 2,002,581; May 28.
Osterberg, Arnold E., Rochester, Minn., assignor to The Chemical Foundation, Incorporated, New York, N. Y. Medicinal preparation. 2,002,829; May 28.
Ostermann, Walter. (See Hartmann, A., Hoefinghoff, Bauriedel, and Ostermann.)
Otis, Herbert C., Shreveport, La. Method of and means for flowing oil wells. 2,002,791; May 28.
Otto, Edward A., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Fastener. 2,002,710; May 28.
Outcault, Richard F., Flossmoor, Ill. Advertising device. 2,002,675; May 28.
Owens, William B., assignor of one-half to J. C. Steele, Santa Monica, Calif. Stone cutter gauge. 2,002,676; May 28.
Palik, John J., St. Louis, Mo., assignor to Anchor Cap & Closure Corporation, Long Island City, N. Y. Applicator cap. 2,002,762; May 28.
Palmer, Oscar C., Phoenix, Ariz. Radiator fin construction. 2,002,923; May 28.
Park, Robert N., Los Angeles, assignor to J. M. Roberts, Wilmar, Calif. Electric motor construction 2,002,793; May 28.
Parkhurst, Frederic A., Bethesda, Md., and G. J. Esselen, Swampscott, assignors to The Fiberloid Corporation, Indian Orchard, Mass. Manufacture of thin sheets of cellulose. 2,002,711; May 28.
Parks, Robert D., and G. W. Hildenbrand, Lohrville, Iowa, assignors to National Vending Company, Burnside, Pa. Vending machine. 2,002,753; May 28.
Pass & Seymour, Inc. (See Despard, Victor, R., assignor.)
Patriarche, Valance H., Winnipeg, Manitoba, Canada. Variable diameter propeller. 2,002,712; May 28.
Pavlovic, Frank, and J. G. Sintic, Cleveland, Ohio. Storage battery terminal connecter. 2,003,053; May 28.
Pearson, William J., Los Angeles, Calif. Adjustable printing mechanism. 2,003,218; May 28.
Pearson, William J., Los Angeles, Calif. Dating device. 2,003,219; May 28.
Pearson, William J., Los Angeles, Calif. Type-setting device. 2,003,220; May 28.

Pease, C. F., Company, The. (See Brunk, Harold J., assignor.)
Penick, Arthur J., and K. T. Penick, Houston, Tex. Pump. 2,002,713; May 28.
Penick, Kirby T. (See Penick, Arthur J. and K. T.)
Penniman, William B. D., Lawyer's Hill, Md. Oil seal and dust guard for journal boxes. 2,003,120; May 28.
Perfection Steel Body Company, The. (See Cohen, Harry, assignor.)
Perfection Steel Body Company, The. (See Divney, Raymond P., assignor.)
Perl, Albert H. F., Birmingham, England. Hinging-locking mechanism. 2,003,008; May 28.
Pesci, Thomas, Raritan, N. J. Clamp. 2,003,090; May 28.
Petrocelli, Anastasio. (See Rossi, Pasquale, assignor.)
Petsch, Hermann, assignor to the firm Carl Still, Recklinghausen, Germany. Process and apparatus for compressing coal in a chamber oven, retorts and the like. 2,002,614; May 28.
Peavear, Chase K., New York, assignor to The Lamson Company, Syracuse, N. Y. Conveyer. 2,002,830; May 28.
Pfannenstiel, Hugo. (See Mahn, H., Meyer, and Pfannenstiel.)
Pfauser, Edward M., Wauwatosa, assignor to Blackhawk Mfg. Co., Milwaukee, Wis. Reversible friction clutch. 2,003,155; May 28.
Phillips, Edward W., Flint, Mich. Electric heater. 2,002,714; May 28.
Plevyak, Joseph B., Carbondale, Pa. Tensioning device for shuttles. 2,002,866; May 28.
Pohl, Walter M., Wauwatosa, Wis., assignor to Kearney & Trecker Corporation, West Allis, Wis. Adjustable worm gearing. 2,002,644; May 28.
Pollard, John H. (See Wyatt, J. W., and Pollard.)
Pollock, William B., Company, The. (See de Fries, Walter, assignor.)
Polytechnic Development Corporation. (See Day, Leonard, assignor.)
Porter, Sidney C., Newell, assignor to The Globe Brick Company, Kenilworth, W. Va. Coating apparatus. 2,002,507; May 28.
Potter, Howard M., Youngstown, Ohio. Knock-down basket. 2,002,582; May 28.
Potts, Curran M., and P. B. Ellington, Winter Haven, Fla. Locking means for valves. 2,002,615; May 28.
Powers, Frank T., Douglaston, N. Y. Viewing cabinet. 2,002,867; May 28.
Prange, Alfons F., St. Louis County, Mo. Machine for making springs. 2,002,754; May 28.
Prentice, G. E., Manufacturing Company. (See Legat, Robert C., assignor.)
Prescott, Clyde A. (See Jackson, L. M., and Prescott.)
Praydorowski, Stanislaus, Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Immersing machine. 2,002,795; May 28.
Public, Free use of the. (See Bennett, C. A., and Gaus.)
Public, Free use of the. (See McDonald, Robert E., assignor.)
Pugh, James W. (See Frolich, P. K., and Pugh.)
Purkett, Edward D., assignor to Purkett Laundry Company, Joplin, Mo. Laundry shake-out tumbler. 2,002,796; May 28.
Purkett Laundry Company. (See Purkett, Edward D., assignor.)
Quadrex Corporation, The. (See Leathers, Ward, assignor.)
Querfurth, Wilhelm, Constance, assignor to Deutsche Gold-und Silber-Scheideanstalt vormals Roessler, Frankfort-on-the-Main, Germany. Production of ketones. 2,002,794; May 28.
Radio Corporation of America. (See Allen, Victor O., assignor.)
Radio Corporation of America. (See Dowsett, Harry M., assignor.)
Radio Corporation of America. (See Farnham, Paul O. assignor.)
Radio Corporation of America. (See Gleskieng, Marion W. assignor.)
Radio Corporation of America. (See Jenkins, Charles F., assignor.)
Radio Corporation of America. (See Whitaker, Alfred, assignor.)
Radio Inventions, Inc. (See Donle, Harold P., assignor.)
Ragan, Ralph, Atlanta, Ga., assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa. Support for heddle bars. 2,002,548; May 28.
Regan, William J., Wilkinsburg, and E. George, Jr., assignors to The McConway & Torley Company, Pittsburgh, Pa. Railway draft appliance. 2,003,221; May 28.
Ragot, Charles L. (See Kindelmann, A., and Ragot.)
Rainey, Austin E. Titusville and W. J. Rainey, Grove City, Pa. Scissors sharpener. 2,002,868; May 28.
Rainey, William J. (See Rainey, Austin E. and W. J.)
Ramsey, George, Brooklyn, N. Y. Method and apparatus for volume control. 2,002,831; May 28.
Rankin, Lansing P., Norton, Kans., assignor to Hercules Powder Company, Wilmington, Del. Ozonization products of terpene alcohols and producing. 2,002,583; May 28.
Rankin, Melville B. (See Henton, S. C., and Rankin.)
Ratcliff, Francis G., Birmingham, England. Cleaning and feeding of metal strips to rolls or rolling mills. 2,003,064; May 28.
Rather, James B., and L. C. Beard, Jr., Brooklyn, and O. M. Reiff, Jackson Heights, N. Y., assignors to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Distillate petroleum product and treating same. 2,002,645; May 28.
Rawson, Harry H., assignor to Washington Machinery and Supply Company, Spokane, Wash. Printing press roll shifting means. 2,002,584; May 28.
Raynolds, John F., and F. C., Wilhelm, Minneapolis, Minn., assignor to The Unipress Company, Incorporated, Minneapolis, Minn. Burn guard. 2,002,715; May 28.
Regensburger, Richard W., assignor by mesne assignments to Institute of American Meat Packers, Chicago, Ill. Stunning tongs. 2,002,755; May 28.
Reich, Gustave T., Philadelphia, Pa. Alkali metal compound recovery from waste organic mixtures. 2,002,797; May 28.
Reichert, Otto. (See Hagedorn, M., Reichert and Guhring.)
Reichter, Emil F. (See Strauch, G. A., Richter, and Garrett.)
Reiff, Orland M. (See Rather, J. B., Beard, and Reiff.)
Realistic Permanent Wave Machine Company, The. (See Steinbach, Paul R., assignor.)
Remy, Rudolf, assignor to W. Falthauser, Munich, Germany. Method of and device for closing up vessels, especially bottles. 2,003,091; May 28.
Renholdt, John E., Bridgeport, Conn., assignor to Dictaphone Corporation, New York, N. Y. Control device. 2,002,798; May 28.
Resilient Hammer, Inc. (See Badcon, Eber W., assignor.)
Rice, Joel A., New York, N. Y. Stud-and-eye clasp for corsets and the like. 2,003,222; May 28.
Richards, Antonia, Providence, R. I. Apparatus for molding a liquid bag. 2,003,092; May 28.
Richards, Willard F., Depew, assignor to The Gould Coupler Company, New York, N. Y. Coupler. 2,002,508; May 28.
Richardson, Elmer C., assignor to Mole-Richardson, Inc., Los Angeles, Calif. Arc lamp. 2,002,549; May 28.
Richter, George F., Bogota, assignor to Consolidated Safety Pin Company, Bloomfield, N. J. Cosmetic holder. 2,002,716; May 28.
Richterkessing, Frank H., assignor to Nachod & United States Signal Co., Inc., Louisville, Ky. Railway crossing signal. 2,003,264; May 28.
Richterkessing, Frank H., assignor to Nachod & United States Signal Co., Inc., Louisville, Ky. Railway signaling system. 2,003,265; May 28.
Richterkessing, Frank H., assignor to Nachod & United States Signal Co., Inc., Louisville, Ky. Control for railway signals systems. 2,003,266; May 28.
Riddell, John T., Evanston, Ill. Sole reenforcing plate. 2,002,869; May 28.
Riebel, Frederick, Jr., assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio. Suction cleaner. 2,002,509; May 28.
Ritscher, Freidrich A., assignor to "Universelle" Cigarettenmaschinen-Fabrik J. C. Muller & Co., Dresden, Germany. Device for introducing cigarettes or similar articles into pocket-like packages. 2,002,616; May 28.
Robart, Braxton L., and E. P. Buell, Jackson, Mich., assignors to The Robuell Company. Reducing valve. 2,002,717; May 28.
Roberts, Jess M. (See Park, Robert N., assignor.)
Robertshaw, George A., Greensburg, assignor to Robertshaw Thermostat Company, Youngwood, Pa. Valve. 2,002,550; May 28.
Robertshaw Thermostat Company. (See Newell, Robert E., assignor.)
Robertshaw Thermostat Company. (See Robertshaw, George A., assignor.)
Robertson, Oliver T., Terrace Park, Ohio. Smoking pipe. 2,003,156; May 28.
Robinson, Harold H., assignor to Curtiss Aerocar Company, Inc., Opalocka, Fla. Guard system for tractor-trailer combinations. 2,002,832; May 28.
Robinson, Harold H., assignor to Curtiss Aerocar Company, Inc., Opalocka, Fla. Alarm system for tractor-trailer combinations. 2,002,833; May 28.
Robinson, Roy, Portland, Oreg. Drip catcher for containers. 2,002,677; May 28.
Robison, Merritt D., San Francisco, Calif. Cover bag for cages. 2,002,925; May 28.
Robuell Company, The. (See Robart, B. L., and Buell, assignors.)
Rockafellow, Edward, San Francisco, Calif., assignor to American Meter Company. Meter bellows. 2,002,870; May 28.
Roehm, Erwin G. (See Romaine, M., and Roehm.)
Rolen, Carl R., Waukesha, Wis. Apparatus for injecting graphite into engines. 2,002,834; May 28.
Romaine, Millard, Cincinnati, and E. G. Roehm, Norwood, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Broaching machine. 2,002,924; May 28.
Römmelt, Wilhelm. (See Stockmeyer, F. W., and Römmelt.)
Rose, Herbert A., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Treating-out transformer. 2,003,011; May 28.
Rose, William H., Jersey City, N. J. Siphon device. 2,002,835; May 28.
Rose, William K., New York, N. Y. Airplane. 2,003,223; May 28.

Roselle, Walter A., New York, N. Y. Collapsible tube construction. 2,002,718; May 28.
Rosenblatt, Maurice C., Philadelphia, Pa. Building construction. 2,002,510; May 28.
Rosnell, John E. (See Detwiler, J. G., Heisig, Rosnell, and Hall.)
Ross, J. D. (See Lord, Edward E., assignor.)
Ross, J. O., Engineering Corporation. (See Byron, Ralph, assignor.)
Ross, Oscar A., New York, N. Y. Scanning and apparatus therefor. 2,002,678; May 28.
Rossi, Pasquale, New York, N. Y., assignor of one-half to A. Petrocelli, Hoboken, N. J. Baggage carrier. 2,002,836; May 28.
Rothwell, John J., Jr., Flushing, and L. M. Stuart, Brooklyn, assignors to Ford Instrument Company, Inc., Long Island City, N. Y. Variable speed mechanism. 2,002,585; May 28.
Royal Typewriter Company. (See Michelsen, William O., assignor.)
Rubel, Charles F., assignor to Union Special Machine Company, Chicago, Ill. Sewing machine. 2,002,799; May 28.
Ruben, Samuel. (See Mallory, H. R., and Ruben.)
Rubin, Samuel N., Astoria, N. Y., assignor, by mesne assignments, to The Gurney Elevator Co., Honesdale, Pa. System of control for elevators. 2,002,986; May 28.
Ryberg, Harry, Jr., San Francisco, Calif. Myogenic foot manipulator. 2,002,586; May 28.
Ryde, John W., assignor to The General Electric Company Limited, London, England. Electric discharge tube. 2,002,837; May 28.
Sachs, Joseph, West Hartford, Conn. Electric circuit controlling mechanism. 2,002,587; May 28.
Saeger, Henry, Rochester, N. Y. Morris chair construction. 2,003,157; May 28.
San Antonio, Edmond C. (See Almaraz, E. S., and San Antonio.)
Sanford, Roy S., assignor to Bragg-Kliesrath Corporation, South Bend, Ind. Control mechanism. 2,002,511; May 28.
Saper, Lewis H., et al. (See Wallace, Alexander, assignor.)
Sargent & Company. (See Voight, Henry G., assignor.)
Sargent, Sullivan A., Jr., et al., trustees. (See Belaef, Nikolai, assignor.)
Sargent, Sullivan A., Jr., et al, trustees. (See Dahl, Edward T., assignor.)
Sargent, William D., Newark, N. J., assignor, by mesne assignments, to Durafer (Inc.), Dover, Del. Centrifugal casting machine and method. 2,002,962; May 28.
Sart, Gilbert D., Salem, assignor of one-half to Agoos Leather Companies, Inc., Boston, Mass. Ornamented leather and making the same. 2,002,792; May 28.
Sashoff, Stephan P., Gainesville, Fla., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Grid glow tube structure. 2,003,012; May 28.
Schade, Floyd L., Kansas City, Kans. Frozen confection. 2,002,903; May 28.
Schenck, Martin. (See Müller, R., Schenck, and Wirbatz.)
Schleicher, George B. (See Wagner, W. C., and Schleicher.)
Schmierer, Michael, Berlin, Germany. Glow discharge device. 2,002,551; May 28.
Schoettle, Edwin J., assignor to Edwin J. Schoettle Company, Philadelphia, Pa. Container. 2,003,224; May 28.
Schoettle, Edwin J., Company. (See Schoettle, Edwin J., assignor.)
Schoof, Arthur W., Riverside, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for gauging and adjusting articles. 2,002,079; May 28.
Schorle, Herman J., Astoria, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Percussive tool valve. 2,003,121; May 28.
Schrauth, Walther, Berlin-Dahlem, assignor to Deutsche Hydrierwerke Aktiengesellschaft, Berlin-Charlottenburg, Germany. Plastic materials. 2,002,800; May 28.
Schreyer, Oscar, assignor to H. Stoffel and F. L. Stoffel, Horn Thurgau, Switzerland, trading as Stoffel & Sohn. Machine for affixing two-part seals to string. 2,002,588. May 28.
Schroeder, Clarence A., Appleton, Wis. Food cooking device. 2,002,801; May 28.
Schubert & Salzer Maschinenfabrik Aktiengesellschaft. (See Heinitz, Woldemar, assignor.)
Schulz, Arthur P. (See Teller, J., and Schulz.)
Schulz, Walter F., assignor to Truscon Steel Company, Youngstown, Ohio. Reenforcement for tubular and like structures. 2,002,987; May 28.
Schwarz, August, Chicago, Ill. Apparatus for heating, power, and refrigeration purposes. 2,003,122; May 28.
Scott, David C., Providence, R. I., assignor to Henry L. Scott Company. Specimen supporting device. 2,002,552; May 28.
Scott, Henry L., Company. (See Scott, David C., assignor.)
Scott, Kenneth L., Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for measuring electrical quantities. 2,002,680; May 28.
Screen Advertising, Incorporated. (See Wyatt, J. W., and Pollard, assignors.)
Seeley, Herbert B., New York, N. Y. Tooth powder dispenser. 2,003,093; May 28.
Seely, Thomas H., Melrose, and M. H. Ballard, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Heel breasting machine. 2,002,512; May 28.
Segelhorst, George, Stowe, Ohio. Marker. 2,002,756; May 28.
Semon, David E. (See Marvel, A. L. and Semon.)
Sessions, Charles R., San Francisco, assignor, by mesne assignments, to Menhorn, Inc., Los Angeles, Calif. Motor pump. 2,002,907; May 28.
Shand, Reginald C., Piedmont, Calif. Liquid dispensing system. 2,002,757; May 28.
Sharma, Jagan N., Berkeley, assignor to Food Machinery Corporation, San Jose, Calif. Fruit treating composition and treating fruit. 2,002,589; May 28.
Sharp, John, Cleveland, Ohio. Vibrating mechanism. 2,002,871; May 28.
Shaw, Frederick H. (See Good, Francis R., assignor.)
Sheeler, Walter L., Vancouver, British Columbia, Canada. Venturi flotation method. 2,002,964; May 28.
Shell Development Company. (See Alexandroff, Peter, assignor.)
Shimer, William R., Bethlehem, J. A. Kinney and F. O. Kichline, Lebanon, Pa., assignors to Bethlehem Steel Company. Metal article and preparing same. 2,003,094; May 28.
Shinn, Franklin H., Norwood, N. C. Twisting and winding apparatus. 2,002,590; May 28.
Siegrist, George R., Port Huron, Mich. Vehicle chassis lubricating mechanism. 2,003,013; May 28.
Siegrist, George R., Port Huron, Mich. Combined lubricating and shock absorbing mechanism for motor vehicles. 2,003,014; May 28.
Siemens & Halske Aktiengesellschaft. (See Müller, K., Döring and Wantosch, assignors.)
Simmons, Elizabeth D., executrix. (See Simmons, Ralph C.)
Simmons, Ralph C., deceased, by E. D. Simmons, executrix, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe supporting jack. 2,003,015; May 28.
Sinclair, Charles W., assignor, by mesne assignments, to The Kelsey-Hayes Wheel Company, Detroit, Mich. Hub cap. 2,002,872; May 28.
Sinclair, Charles W., assignor, by mesne assignments, to The Kelsey-Hayes Wheel Company, Detroit, Mich. Brake drum construction. 2,003,055; May 28.
Singer Manufacturing Company, The. (See Karle, John D., assignor.)
Singer, Nathaniel, assignor to Optical Research Corporation, New York, N. Y. Ophthalmic lens. 2,002,719; May 28.
Sintic, Joseph G. (See Pavlovic, F., and Sintic.)
Smith, Arthur W. (See Smith, Herbert E. and A. W.)
Smith, Benjamin H., Bloomfield, N. J., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Demand meter. 2,003,016; May 28.
Smith, Colman. (See Smith, Gabriel, and C.)
Smith, Frank J., Kansas City, Mo., assignor to Standard Oil Company, Chicago, Ill. Throttle valve. 2,002,965; May 28.
Smith, Gabriel, and C. Smith, Leyton, London, England. Machine for dusting sheet materials. 2,003,267; May 28.
Smith, Herbert E., and A. W., Gloucester, Mass. Apparatus for conditioning air. 2,002,802; May 28.
Smith, Russel M., Baltimore, Md. Apparatus for drying sheet material. 2,002,720; May 28.
Smith, Russel T., assignor to Gibson Refrigerator Company, Greenville, Mich. Mounting of motors. 2,002,646; May 28.
Smith, Walter H., Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company. Control apparatus for car connecters. 2,003,017; May 28.
Smith, William A., Hamburg, N. Y. Motor fuel and method of manufacture. 2,003,158; May 28.
Sneed, Stephen P. F., Atlanta, Ga. Box opening device. 2,002,591; May 28.
"Societa Anonima Carburatori Olii Pesanti, (S. A. M. C. O.)". (See Lucich, Giovanni, assignor.)
Socony-Vacuum Oil Company. (See Rather, J. B., Beard, and Reiff, assignors.)
Soderholm Per August, Bridgeport, Conn. Bread baking pan. 2,002,838; May 28.
Soley, William G. (See Benner, R. C., Walker and Soley.)
Somers, Herbert J., Detroit, Mich. Humidifier and air washer. 2,002,553; May 28.
Sorensen, Sam, Houston, Tex. Valve. 2,002,647; May 28.
Soule, Leslie, et al., trustees. (See Belaef, Nikolai, assignor.)
Soule, Leslie, et al., trustees. (See Dahl, Edward T., assignor.)
Southern Equipment Company. (See Johnson, Louis H., assignor.)
Southgate, George T., Forest Hills, N. Y., assignor to Union Carbide and Carbon Research Laboratories, Inc. Electric power converter. 2,003,056; May 28.

Southgate, George T., Forest Hills, N. Y., assignor to Union Carbide and Carbon Research Laboratories, Inc. Arc-welding power unit. 2,003,057; May 28.

Sparkes, Harry P. (See Ferguson, R. W., and Sparkes.)

Sparks, Stanley W., Norwalk, Conn., assignor to C. H. Bickell, Trustee, representing Metals Research Syndicate, New York, N. Y. Method of and apparatus for extruding tubes and other elongated shapes. 2,002,966; May 28.

Specht, Harry G., Montclair, assignor to Eastwood-Nealley Corporation, Belleville, N. J. Woven wire belt for paper making machines. 2,003,123; May 28.

Specht, Harry G., Montclair, assignor to Eastwood-Nealley Corporation, Belleville, N. J. Woven wire belt for paper making machines. 2,003,124; May 28.

Spencer, John A., Newtonville, Mass., assignor to General Plate Company, Attleboro, Mass. Thermostat. 2,003,018; May 28.

Speranza, John et al. (See Fotl, Charles, assignor.)

Sperry Gyroscope Company. (See Bates, Mortimer F., assignor.)

Spiegler, Louis, South Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of methyl-anthraquinone. 2,002,988; May 28.

Spurr, Robert E., assignor to Chrysler Corporation, Detroit, Mich. Grinding apparatus. 2,002,967; May 28.

Square D Company. (See Ball, Albert P., assignor.)

Stafford, Edwin G. (See McWhirter, Mark H., assignor.)

Standard-I G. Company. (See Herold, P., and Kaufmann, assignors.)

Standard Oil Company, The. (See McConnell, Elliott B., assignor.)

Standard Oil Company. (See Smith, Frank J., assignor.)

Standard Oil Development Company, et al. (See Booth, Ralph D., assignor.)

Standard Oil Development Company. (See Buc, Hyym E., assignor.)

Standard Oil Development Company. (See Edson, Frank H., assignor.)

Standard Oil Development Company. (See Flatley, Richard E., assignor.)

Standard Oil Development Company. (See Frolich, Per K., assignor.)

Standard Oil Development Company. (See Frolich, P. K., and Pugh, assignors.)

Star Porcelain Company, The, et al. (See Ferguson, R. W., and Sparkes, assignors.)

Stecher, Henry D., Lakewood, assignor to The Weatherhead Company, Cleveland, Ohio. Hose coupling. 2,002,839; May 28.

Steel Heddle Manufacturing Company. (See Ragan, Ralph, assignor.)

Steele, John C. (See Owens, William B., assignor.)

Stein, Hermann, South Ozone Park, C. G. Gross, Mount Vernon, N. Y., and W. S. Luci, Linden, N. J., assignors, by mesne assignments, to American Machine and Metals, Inc., New York, N. Y. Hair waving. 2,002,840; May 28.

Steinbach, Paul R., Lakewood, assignor to The Realistic Permanent Wave Machine Company, Cincinnati, Ohio. Hair waving method. 2,002,980; May 28.

Stenhouse, Thomas, Washington, Pa., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va. Glass feeder. 2,003,058; May 28.

Stevens, Richard H., Baltimore, Md., assignor to Bethlehem Steel Company. Piling device for sheet mill tables. 2,003,125; May 28.

Stewart-Warner Corporation. (See Williamson, Peter, Jr., assignor.)

Still, Firm Carl. (See Petsch, Hermann, assignor.)

Stockmeyer, Friedrich W., and W. Römmelt, Stuttgart, assignors to Junkers & Co., Gesellschaft mit beschrankter Haftung, Dessau, Germany. Controlling arrangement for a gas burner. 2,002,513; May 28.

Stoffel, Frans L., et al. (See Schreyer, Oscar, assignor.)

Stoffel, Hans, et al. (See Schreyer, Oscar, assignor.)

Stoffel & Sohn. (See Schreyer, Oscar, assignor.)

Stoner, Arthur W. (See Lerch, W. G., and Stoner.)

Stoody Company. (See Strobel, Karl, assignor.)

Straube, Raymond C., Three Rivers, Mich., assignor to Fairbanks Morse & Co., Chicago, Ill. Control mechanism for belt driven apparatus. 2,002,648; May 28.

Strauch, George A., Rockledge, E. F. Richter, and J. E. Garrett, assignors to Artcraft Silk Hosiery Mills, Inc., Philadelphia, Pa. Full fashioned knitting machine. 2,003,095; May 28.

Stremel, Joseph, assignor of two-thirds to N. Stremel and one-third to G. E. Syp, Spokane, Wash. Dispensing device. 2,002,592; May 28.

Stremel, Nellie, et al. (See Stremel, Joseph, assignor.)

Strobel, Karl, assignor to Stoody Company, Whittier, Calif. Protectively facing surfaces with abrasion resisting material. 2,003,019; May 28.

Strobel, Karl, assignor to Stoody Company, Whittier, Calif. Welding rod for applying protective abrasion resisting facings. 2,003,020; May 28.

Strom, Andrew. (See Booth, C., and Strom.)

Strunk, Lester N., assignor to Boyertown Burial Casket Company, Boyertown, Pa. Burial casket. 2,003,096; May 28.

Stuart, Lemuel M. (See Rothwell, J. J., Jr., and Stuart.)

Studebaker Corporation, The. See Jones, Joseph H., assignor.)

Sturdy, William W., Tarrytown, N. Y., assignor to American Telephone and Telegraph Company. Surge limiting circuit. 2,002,617; May 28.

Subkow, Philip. (See Merrill, D. R., and Subkow.)

Sullivan, Raymond H., assignor to North East Appliance Corporation, Rochester, N. Y. Electromagnetic switch. 2,003,021; May 28.

Sundstrand Machine Tool Co. (See Buell, Timothy B., assignor.)

Sundstrand Machine Tool Co. (See Dumser, L. A., and Floody, assignors.)

Sunnen, Joseph, Kirkwood, Mo. Grinding machine guide block. 2,002,649; May 28.

Surface Combustion Corporation. (See Weller, Harvey C., assignor.)

Suter, Richard. (See Niederhauser, Jacob, assignor.)

Sutter, Louis M., Oakland, Calif. Display box. 2,002,618; May 28.

Symington Company, The. (See Barrows, Donald S., assignor.)

Syp, Glen E., et al. (See Stremel, Joseph, assignor.)

Tapper, George O. (See Graham, G. A., and Tapper.)

Tatter, John W., Detroit, assignor, by mesne assignments, of one-half to E. I. Ingersoll, Dearborn, Mich. Clutch. 2,002,841; May 28.

Taylor, William J., assignor to The Lamson Company, Syracuse, N. Y. Pneumatic dispatch system. 2,003,159; May 28.

Teuhen, James M., Detroit, Mich. Apparatus for molding water closet rims. 2,002,873; May 28.

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Knoll, Max, assignor.)

Teller, Jacob, New Rochelle, and A. P. Schulz, New York, assignors to Teller Stove Designing Corporation, New York, N. Y. Cooking range. 2,003,059.

Teller Stove Designing Corporation. (See Teller, J., and Schulz, assignors.)

Tetlow, Lewis J., Holyoke, Mass. Spark plug. 2,002,803; May 28.

Texas Company, The. (See De Florez, Luis, assignor.)

Texas Company, The. (See Detwiler, J. G., Heisig, Rossnell, and Hull, assignors.)

Texas Company, The. (See Kaufman, Gus, assignor.)

Textile Machine Works. (See Gastrich, Gustav, assignor.)

Thomas, William S., assignor of one-half to E. L. Heckert, Montoursville, Pa. Thermostatic controlling device. 2,003,060; May 28.

Thomasma, Harry, Grand Rapids, Mich. Seat cover holder. 2,002,721; May 28.

Thompson, Henry H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Beacon. 2,003,022; May 28.

Thompson, Lincoln, Naugatuck, Conn. Electro-dynamic loud speaker. 2,002,926; May 28.

Thompson Products, Incorporated. (See McBride, Eugene A., assignor.)

Thorp, Joel R., assignor to The Fulton Company, West Allis, Wis. Frost shield. 2,002,722; May 28.

Thorssell, Carl T., and A. Kristensson, Cassel, Germany. Production of potassium carbonate. 2,002,681; May 28.

Torigian, John, Queens Village, assignor to The Drug Products Co. Inc., Long Island City, N. Y. Therapeutic agent and making colloidal calcium malate. 2,002,842; May 28.

Torstenson, Elmer L., Evanston, Ill. Sign. 2,003,126; May 28.

Townley, William, Fort Dodge, Iowa, assignor to United States Gypsum Company, Chicago, Ill. Apparatus for splicing strips of paper. 2,002,554; May 28.

Townsend, Arthur J., and E. S. Miller, assignors, by mesne assignments to H. M. Naugle and A. J. Townsend, Canton, Ohio. Method and apparatus for rolling uniform gauge stock. 2,003,160; May 28.

Townsend, Arthur J., et al. (See Townsend, A. J., and Miller, assignors.)

Transportation Systems, Inc. (See Main, David W., assignor.)

Treesdale Laboratories, Inc. (See Hochstetter, Frederick W., assignor.)

Trogner, Arthur M., Maplewood, N. J., assignor to Wired Radio, Inc., New York, N. Y. Protective system. 2,002,555; May 28.

Truesdell, Arthur E., Pittsfield, Mass. Thread or yarn cleaner. 2,002,843; May 28.

Truscon Steel Company. (See Schulz, Walter F., assignor.)

Truscon Steel Company. (See White, Herbert E., assignor.)

Tubbs, Ira I., Superior, Wis. Shoe cleat. 2,002,556; May 28.

Tupper, Earl S., Shirley, Mass. Removable rumble seat top. 2,002,514; May 28.

Turner, Richard H., Beverly, Mass. Bow for stringed instruments. 2,003,161; May 28.

Ulmer, Donald L., Binghamton, N. Y. Adjustable dolly. 2,003,162; May 28.

Underwood, Charles E., Bethlehem, Pa., assignor to Bethlehem Steel Company. Ejector for saturators. 2,002,557; May 28.

Underwood Elliott Fisher Company. (See Foothorap, Harry A., assignor.)

Union Carbide and Carbon Research Laboratories, Inc. (See Southgate, George T., assignor.)

Union Metal Products Company. (See Gilpin, Garth G., assignor.)

Union Oil Company of California. (See Merrill, D. R., and Subkow, assignors.)

Union Special Machine Company. (See Rubel, Charles F., assignor.)

Union Switch & Signal Company, The. (See Bone, Herbert L., assignor.)

Union Switch & Signal Company, The. (See Bone, H. L., and Logan, assignors.)

Unipress Company, The. (See Raynolds, J. F., and Wilhelm, assignors.)

United Shoe Machinery Corporation. (See Brostrom, Charles G., assignor.)

United Shoe Machinery Corporation. (See Hart, G. T., Jr., and Winkley, assignors.)

United Shoe Machinery Corporation. (See MacDonald, Clifford K., assignor.)

United Shoe Machinery Corporation. (See Secly, T. H., and Ballard, assignors.)

United Shoe Machinery Corporation. (See Simmons, Ralph C., assignor.)

United Shoe Machinery Corporation. (See Whitaker, Carl F., assignor.)

United States Gauge Company. (See Klein, Maximilian, assignor.)

United States Gypsum Company. (See Balduf, Bruno E., assignor.)

United States Gypsum Company. (See Townley, William, assignor.)

United States Radiator Corporation. (See McIntire, James F., assignor.)

United States Rubber Company. (See Cobb, H. Z., and Francis, assignors.)

United States Rubber Company. (See Madge, Norman G., assignor.)

United States Rubber Company. (See Meuser, L., and Leaper, assignors.)

Universal Oil Products Company. (See Morrell, Jacque C., assignor.)

"Universelle" Cigarettenmaschinen-Fabrik J. C. Muller & Co. (See Ritscher, Friedrich A., assignor.)

Urfer, Adolf, Richmond Hill, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Altimeter. 2,002,874; May 28.

Utica Radiator Corporation. (See Bair, Edward J., assignor.)

Utica Towel Cabinet Corp. (See Darman, Joseph, assignor.)

Van Horn, Junius B. (See Mendenhall, E., and Van Horn.)

Van Horn, Junius B. (See Mendenhall, E., Van Horn, and Coberly.)

Vaughan, Arthur H., assignor to The Electric Furnace Company, Salem, Ohio. Stretching machine and operating the same. 2,003,127; May 28.

Vazquez, Alejo V., New York, N. Y. Adjustable lock for windows. 2,003,128; May 28.

Venters, Keith L., Eugene, Oreg. Shoe sole-cementing machine. 2,002,650; May 28.

Venzie, Frederick M., Philadelphia, Pa., assignor to National Gypsum Company, Buffalo, N. Y. Building construction. 2,002,927; May 28.

Vereinigte Stahlwerke Aktiengesellschaft. (See Buchholtz, Herbert, assignor.)

Vickery, George P., Glendora, assignor to Food Machinery Corporation, San Jose, Calif. Fruit sizer. 2,003,097; May 28.

Victor Chemical Works. (See Gnox, William H., Jr., assignor.)

Vila y Colombo, Juan A., Habana, Cuba. Radio receiving set. 2,003,250; May 28.

Vitreous Enameling Company, The. (See Weierich, Andrew C., assignor.)

Voight, Henry G., assignor to Sargent & Company, New Haven, Conn. Doorlock. 2,002,619; May 28.

Voke, Carl E., and C. E. Denbow, said Voke, assignor of one-tenth to C. S. Londenslager, Columbus, Ohio. Closure. 2,002,723; May 28.

Von Holtz, Charles T., assignor to Harvey Hubbell, Incorporated, Bridgeport, Conn. Interlocking connection. 2,002,558; May 28.

Von Issendorff, Jürgen, Berlin-Siemensstadt, and F. Netzsch, Berlin-Charlottenburg, Germany, assignors to Westinghouse Electric and Manufacturing Company. Mercury vapor or noble gas rectifier with arc control. 2,003,023; May 28.

Vrooman, Edward C., Schenectady, N. Y., assignor to Locke Insulator Corporation, Baltimore, Md. Guy insulating and grading means. 2,003,225; May 28.

W-K-M Company. (See Laurent, Milton P., assignor.)

Wagner Electric Corporation. (See Dick, Burns, assignor.)

Wagner Electric Corporation. (See Kelpe, Walter F., assignor.)

Wagner, Walter C., Ardmore, Pa., and G. B. Schleicher, Clementon, N. J. Antitampering meter. 2,002,968; May 28.

Wakefield, C. C., & Company. (See Bliss, John, assignor.)

Walgreen, Charles R., Jr., assignor to Walgreen Co., Chicago, Ill. Card playing device. 2,002,593; May 28.

Walgreen Co. (See Walgreen, Charles R., Jr., assignor.)

Walker, Brooks, Piedmont, Calif. Motor vehicle lifting and traversing device. 2,002,724; May 28.

Walker Dishwasher Corporation. (See Clark, Jesse H., assignor.)

Walker, Prescott H. (See Benner, R. C., Walker, and Soley.)

Wallace, Alexander, New Rochelle, assignor of two-fifths to L. H. Saper and M. Cohen, New York, N. Y. Tool. 2,003,061; May 28.

Wallace, Charles F., Westfield, assignor to Wallace & Tierman Products, Inc., Belleville, N. J. Circuit controlling device. 2,002,804; May 28.

Wallace & Tierman Products, Inc. (See Wallace, Charles F., assignor.)

Wantosch, Josef. (See Müller, K., Döring, and Wantosch.)

Wappler, Frederick C., New York, N. Y. Surgical resection. 2,002,559; May 28.

Wappler, Frederick C., executor. (See Wappler, Reinhold H. and F. C.)

Wappler, Reinhold H., deceased, Yonkers, and F. C. Wappler, New York, N. Y., F. C. Wappler, executor. Instrument for electro-surgical treatment of tissue. 2,002,594; May 28.

Wappler, Frederick C., New York, N. Y. Telescopic instrument. 2,002,595; May 28.

Warner & Swasey Company, The. (See Burrell, Edward R., assignor.)

Warner & Swasey Company, The. (See Lange, M. E., and Burger, assignors.)

Warren, Henry E., Ashland, Mass., assignor to Warren Telechron Company. Drive from sealed gear casing. 2,003,163; May 28.

Warren Telechron Company. (See Warren, Henry E., assignor.)

Washington Institute of Technology, Inc. (See Brockstedt, Theophile E., assignor.)

Washington Machinery and Supply Company. (See Rawson, Harry H., assignor.)

Watling Manufacturing Company. (See Watling, Thomas W. B., assignor.)

Watling, Thomas W. B., assignor to Watling Manufacturing Company, Chicago, Ill. Coin chute. 2,002,560; May 28.

Watson, Ann. (See Campbell, L. W., and Watson, assignor.)

Watson, Wilber P. (See Campbell, L. W., and Watson.)

Waxler, Reuben L., et al. (See King, Walter E., assignor.)

Weatherhead Company, The. (See Stecher, Henry D., assignor.)

Weber, Albert L. (See McLean, H. C., and Weber.)

Webster, Hugh G., assignor of one-half to J. W. G. Winnett, London, Ontario, Canada. Polymerization of nickel carbonyl. 2,002,805; May 28.

Weierich, Andrew C., assignor to The Vitreous Enameling Company, Cleveland, Ohio. Producing ornamental enameled ware. 2,002,806; May 28.

Welbeloved, William F. (See French, H., and Welbeloved.)

Weller, Harvey C., Salem, assignor to Surface Combustion Corporation, Toledo, Ohio. Burning fuel gas. 2,003,226; May 28.

Werring, Walter W., Brooklyn, N. Y., and T. S. Huxham, Chatham, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Number plate for telephone dials. 2,002,969; May 28.

Wescott, William B., Dover, Mass., assignor to Multigraph Company, Wilmington, Del. Etching planographic plates, composition therefor, and resulting product. 2,003,268; May 28.

West, Charles P., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Current control apparatus. 2,003,024; May 28.

Westerbeck, Frederick, University City, assignor to Mallinckrodt Chemical Works, St. Louis, Mo. Closure. 2,003,025; May 28.

Western Electric Company. (See Carter, Herbert F., assignor.)

Western Electric Company. (See Larsen, Einer W., assignor.)

Western Electric Company. (See Moller, Kasper F., assignor.)

Western Electric Company. (See Otto, Edward A., assignor.)

Western Electric Company. (See Schoof, Arthur W., assignor.)

Western Electric Company. (See Scott, Kenneth L., assignor.)

Western Union Telegraph Company, The. (See Dirkes, Robert F., assignor.)

Westhoff, Ernest W., Detroit, Mich. Manufacturing an aluminum alloy. 2,002,758; May 28.

Westinghouse Air Brakes Company, The. (See Hewitt, Ellis E., assignor.)

Westinghouse Electric & Manufacturing Company. (See Baker, John G., assignor.)

Westinghouse Electric & Manufacturing Company. (See Eames, William F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Ellett, E. Vernon, assignor.)

Westinghouse Electric & Manufacturing Company, et al. (See Ferguson, R. W., and Sparkes, assignors.)

Westinghouse Electric & Manufacturing Company. (See Hanna, Clinton R., assignor.)

Westinghouse Electric & Manufacturing Company. (See Marbury, Ralph E., assignor.)

Westinghouse Electric & Manufacturing Company. (See Rose, Herbert A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sashoff, Stephan P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Smith, Benjamin H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Smith, Walter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Thompson, Henry H., assignor.)
Westinghouse Electric & Manufacturing Company. (See von Isendorff, Jürgen, and Netzsch, assignors.)
Westinghouse Electric & Manufacturing Company. (See West, Charles P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wright, Ralph H., assignor.)
Westrope, Fred J., Detroit, Mich., assignor to The Murray Corporation of America. Vehicle body. 2,002,596; May 28.
Whitaker, Alfred, West Drayton, England, assignor to Radio Corporation of America, New York, N. Y. Photographic sound record. 2,002,620; May 28.
Whitaker, Carl F., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,003,026; May 28.
White, Harry B., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,003,098; May 28.
White, Herbert E., Cleveland, assignor to Truscon Steel Company, Youngstown, Ohio. Vehicle brake. 2,002,990; May 28.
White, John W. (See Balsch, C. F., and White.)
White Motor Company, The. (See Wise, Karl M., assignor.)
Whitson, John W., San Francisco, Calif. Card selecting apparatus. 2,002,807; May 28.
Whitson, John W., San Francisco, Calif. Card filing and segregating apparatus. 2,002,808; May 28.
Wickenden, Leonard, Manhasset, and J. J. Naugle, New York, N. Y. Preparing activated vegetable carbons. 2,002,651; May 28.
Wickwire Brothers. (See Wickwire, Charles C., assignor.)
Wickwire, Charles C., assignor to Wickwire Brothers, Cortland, N. Y. Combined staple and strap. 2,003,062; May 28.
Wiesler, Karl, Konstans, Badenia, assignor to Deutsche Gold-und Silber-Scheidenanstalt vormals Roessler, Frankfort-on-the-Main, Germany. Generation and maintenance of constant gas pressure in closed systems. 2,002,621; May 28.
Wike, Reginald E., Detroit, Mich. Starter construction. 2,002,841; May 28.
Wilhelm, Fred C. (See Raynolds, J. F., and Wilhelm.)
Williams, Ira. (See Lube, H. A., and Williams.)
Williams, Ira, Woodstown, N. J., and B. Dales, Chadds Ford, Pa., assignors to E. I. duPont de Nemours & Company, Wilmington, Del. Natural and artificial rubber latex. 2,002,622; May 28.
Williams Oil-O-Matic Heating Corporation. (See Celander, Philip A., assignor.)
Williams, William D., Atwood, Ontario, Canada. Apparatus for making cheese. 2,002,597; May 28.
Williamson, Peter, Jr., Everett, Mass., assignor, by mesne assignments, to Stewart-Warner Corporation, Chicago, Ill. Lubricating system and method. 2,002,809; May 28.
Willshaw, Harry, Wylde Green, and F. A. Davenport, Erdington, Birmingham, England, assignor to Dunlop Tire and Rubber Corporation, Buffalo, N. Y. Apparatus for the manufacture of pneumatic tires. 2,002,910; May 28.
Wilson, Carrol J., Jonesboro, Tex. Foot operable playing attachment for pianos. 2,003,227; May 28.
Wilson, Walter G., Martyr Worthy, Winchester, England. Fluid transmission of power. 2,002,760; May 28.
Winchester Repeating Arms Company. (See McNutt, Joseph D., assignor.)
Winkley, Erastus E. (See Hart, G. T., Jr., and Winkley.)
Winnett, John W. (See Webster, Hugh G, assignor.)
Wirbatz, Wilhelm. (See Müller, R., Schenck, and Wirbatz.)
Wired Radio, Inc. (See Trogner, Arthur M., assignor.)
Wise, Karl M., Buffalo, N. Y., assignor to The White Motor Company, Cleveland, Ohio. Motor vehicle. 2,003,164; May 28.
Wittkowski, Hermann. (See Hinrichs, W. J. H., and Wittkowski.)
Wood, Allen H., Jr., Winchester, assignor to C. M. Kimball Co., Everett, Mass. Applicator for liquids. 2,002,598; May 28.
Woods, William J., assignor to Corning Glass Works, Corning, N. Y. Method of and apparatus for drawing glass. 2,002,875; May 28.
Wootten, George B., Sudbury, Ontario, Canada. Orthoptic instrument. 2,003,165; May 28.
Workman, Esau, Corcoran, Calif. Internal combustion engine. 2,002,759; May 28.
Worrall, Robert H., Washington, D. C. Producing color in television. 2,002,515; May 28.
Worthington Pump and Machinery Corporation. (See Schorle, Herman J., assignor.)
Wright, Ralph H., Swissvale, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Control for shearing apparatus. 2,003,027; May 28.
Wyatt, James W., and J. H. Pollard, assignors to Screen Advertising, Incorporated, Dallas, Tex. Combination doorcheck and display. 2,002,725; May 28.
Wyman, Edward H., Aiken, S. C. Combined safety razor and sharpener. 2,002,682; May 28.
Ylla-Conte, José, Barcelona, Spain. Construction of lenses for concentrating the heat of the sun. 2,003,070; May 28.
Young, Leonard A., Detroit, Mich. Golf ball. 2,002,726; May 28.
Youngstown Sheet & Tube Company, The. (See Mirfield, G. E., Lewis, Firth, and Neale, assignors.)
Youngstown Steel Door Company. (See Beauchamp, Wilfred A., assignor.)
Youngstown Steel Door Company, The. (See Ditchfield, Frank, assignor.)
Zaiger, Louis, Lynn, Mass. Windshield heater. 2,003,028; May 28.
Zancan, Ottavio, New York, N. Y. Front drive for motor cars. 2,003,166; May 28.
Zara, Florentino E., Maasin, Leyte, P. I. Lamp. 2,003,228; May 28.
Zimmerman, Herman W., assignor to Automotive Maintenance Machinery Co., Chicago, Ill. Reamer sharpener. 2,002,971; May 28.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 28TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Casing head. M. T. Archer. 19,587; May 28.
Combustion regulation. G. H. Gibson. 19,592; May 28.
Electrical switch, High voltage. F. G. Baum. 19,588; May 28.
Folding mechanism. C. S. Crafts and C. A. Harless. 19,591; May 28.
Lubricating installation. J. Bijur. 19,589; May 28.
Metal, Method and mill for rolling. J. R. Coe. 19,590; May 28.
Mortuary record container. H. P. Hansen. 19,593; May 28.
Refrigeration apparatus. E. T. Williams. 19,595; May 28.
Titanium oxide suitable for use as a pigment, Manufacturing. K. Leuchs. 19,594; May 28.

LIST OF PLANT INVENTIONS

Apple. E. W. Hartman. 125; May 28.
Tree, Orange. R. Robertson. 126; May 28.

LIST OF DESIGN INVENTIONS

Barbecue machine casing. G. Garvis. 95,741; May 28.
Beer coil cleaner. H. W. Anderson. 95,724; May 28.
Beverage dispenser. O. J. Leins. 95,762; May 28.
Bottle, Decanter type. J. V. Mondi. 95,772; May 28.
Bowl. M. A. Smith. 95,783; May 28.
Bowl or similar article, Fish. C. P. Askew. 95,727; May 28.
Bowl, Sugar. C. Kaiser. 95,750; May 28.
Bracelet or similar article of jewelry. J. M. Miller and G. F. Fenton. 95,771; May 28.
Cabinet and clock, Combination advertising display. M. Pufelea. 95,780; May 28.
Carton, Collapsible. S. M. Andrews. 95,726; May 28.
Chair. W. Hoffmann. 95,745; May 28.
Coffeepot. C. Kaiser. 95,753; May 28.
Cooky. F. C. Werner. 95,784; May 28.
Creamer. C. Kaiser. 95,748; May 28.
Creamer. C. Kaiser. 95,754; May 28.
Cup. C. Kaiser. 95,751; May 28.
Dress. B. Lahn. 95,759; May 28.
Dress, Ensemble. J. Kirschner. 95,757; May 28.
Eraser. J. Meilner. 95,769; May 28.
Facial support. F. L. Brown. 95,729; May 28.
Game scoring device. W. L. Mann. 95,766; May 28.
Glove, Lady's. O. G. Goodhand. 95,742; May 28.
Heater. H. F. Hadley. 95,743; May 28.
Jack. G. G. Hein. 95,744; May 28.
Jar, Cooky. C. Kaiser. 95,755; May 28.
Knife, nail file, and pencil, Combined. P. A. Peterson. 95,778; May 28.
Knitted dress. M. Feldman. 95,786; May 28.
Lace. W. R. Adaire. 95,723; May 28.
Lace. B. Edson. 95,735; May 28.
Lighter, Pocket. J. Galter. 95,740; May 28.
Motor casing. E. R. Mross. 95,774; May 28.
Nozzle, Vaginal syringe. R. Lewis. 95,763; May 28.
Paper, or similar article, Fancy. N. E. Scott. 95,782; May 28.
Plate or similar article. C. Kaiser. 95,752; May 28.
Plate or similar article. C. W. Leigh. 95,760–1; May 28.
Refrigerator cabinet or similar article. J. C. Buchanan. 95,730; May 28.
Sandal or similar article. J. C. Marks. 95,767; May 28.
Score sheet. R. F. Power. 95,779; May 28.
Shade, Lamp. I. Batkin. 95,728; May 28.
Shoe. J. E. Andrews. 95,725; May 28.
Shoe. E. W. Dunbar. 95,732; May 28.
Shoe. J. Fishman. 95,736–7; May 28.
Shoe. S. Fradkin. 95,738; May 28.
Shoe. A. Perugia. 95,775–6; May 28.
Siding. J. J. Cahill and E. F. McClintock. 95,731; May 28.
Sign. G. D. Duntze. 95,734; May 28.
Skate, Roller. J. R. Morgan and J. S. Coldwell. 95,773; May 28.
Skate, Roller. E. E. Whitney. 95,785; May 28.
Smoker's pipe. L. M. Francis. 95,739; May 28.
Spoon, Toothbrush. J. E. Peterkin and F. W. Marlow. 95,777; May 28.
Stand for a hand telephone, Desk. G. R. Lum. 95,765; May 28.
Teapot. C. Kaiser. 95,749; May 28.
Teapot. C. Kaiser. 95,756; May 28.
Textile fabric or similar article. J. L. Lien. 95,764; May 28.
Textile fabric or similar article of manufacture. A. Schumacher. 95,781; May 28.
Tire or similar article. R. W. Hutchens. 95,746; May 28.
Toilet. G. C. Duncan, Jr. 95,733; May 28.
Top spinning device. E. Kleinofen. 95,758; May 28.
Toy locomotive. L. Marx. 95,768; May 28.
Vault, Burial. W. E. Jaquith. 95,747; May 28.
Vehicle, Child's. G. R. Mellon. 95,770; May 28.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 28TH DAY OF MAY, 1935

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abdominal support. R. B. McMurry. 2,003,210; May 28.
Abrading machine. C. Johnson. 2,002,665; May 28.
Abrading or polishing machine. C. Johnson and C. L. Mattison. 2,002,666; May 28.
Acid, Purification of strong phosphoric. W. H. Knox, Jr. 2,003,051; May 28.
Adjustable work carrying table. H. Q. Munn. 2,003,263; May 28.
Adjusting device for looms and controlling the beating-up operation. I. Lewin and C. W. Geler. 2,002,953; May 28.
Advertising and display device, Combined. R. J. Carboni. 2,003,244; May 28.
Advertising device. R. F. Outcault. 2,002,675; May 28.
Advertising device, Pincushion. H. F. Carlston. 2,002,756; May 28.
Aeroplane. J. Hojnowski. 2,002,740; May 28.
Aeroplane steering mechanism. H. A. Douglas. 2,002,528; May 28.
Air, Apparatus for conditioning. H. E. Smith and A. W. Smith. 2,002,802; May 28.
Air chuck. J. C. Crowley. 2,003,039; May 28.
Aircraft. W. L. Lewis. 2,003,206; May 28.
Airplane. W. K. Rose. 2,003,223; May 28.
Alarm system for tractor-trailer combinations. H. H. Robinson. 2,002,833; May 28.
Alkali metal compound recovery from waste organic mixtures. G. T. Reich. 2,002,797; May 28.
Altimeter. A. Urfer. 2,002,874; May 28.
Aluminum alloy, Manufacturing an. E. W. Westhoff. 2,002,758; May 28.
Anchor, Earth. A. B. Chance. 2,002,628; May 28.
Antitampering meter. W. C. Wagner and G. B. Schleicher. 2,002,948; May 28.
Applicator cap. J. J. Pahls. 2,002,752; May 28.
Applicator for liquids. A. H. Wood, Jr. 2,002,598; May 28.
Arc lamp. H. J. Brunk. 2,003,104; May 28.
Arc lamp. E. C. Richardson. 2,002,549; May 28.
Area measuring machine. G. T. Hart, Jr., and E. E. Winkley. 2,002,574; May 28.
Armature winding machine. F. A. Baldwin. 2,003,169; May 28.
Articles, Apparatus for forming. K. F. Moller. 2,002,705; May 28.
Articles, Apparatus for gauging and adjusting. A. W. Schoof. 2,002,679; May 28.
Articles of bonded granules, Method and apparatus for manufacturing. R. C. Benner, P. H. Walker and W. G. Soley. 2,003,131; May 28.
Artificial products of regenerated cellulose. H. Mahn, H. Meyer and H. Pfannenstiel. 2,002,822; May 28.
Asphalt, Making. E. B. McConnell. 2,002,670; May 28.
Automobile jack. F. Minutillo. 2,003,213; May 28.
Axle unit for trucks, Extension. R. P. Divney. 2,002,851; May 28.
Axle unit for trucks, Third. R. P. Divney. 2,002,852; May 28.
Back lash remover. C. B. De Vlieg. 2,002,991; May 28.
Bag: *See*—
Golf bag. Luggage bag.
Hand bag. Traveling bag.
Lady's hand bag.
Bag, Apparatus for molding a liquid. A. Richards. 2,003,062; May 28.
Baggage carrier. P. Rossi. 2,002,836; May 28.
Ball, Golf. L. A. Young. 2,002,726; May 28.
Band or article, Body treating. O. L. Mills. 2,002,673; May 28.
Basket, Knock-down. H. M. Potter. 2,002,582; May 28.
Battery terminal connecter, Storage. F. Pavlovic and J. G. Sistic. 2,003,053; May 28.
Beacon. H. H. Thompson. 2,003,022; May 28.
Bearing. C. G. Janson. 2,003,080; May 28.
Bearing structure. E. Mendenhall and J. B. Van Horn. 2,002,908; May 28.
Bed tray table. A. Brown. 2,003,241; May 28.
Bellows, Expansible. R. E. Newell. 2,003,119; May 28.
Bellows, Meter. E. Rockafellow. 2,002,870; May 28.
Belt, Colostomy. M. A. Bowman. 2,002,931; May 28.
Belt connecter. E. H. Kremer. 2,002,897; May 28.
Belt for paper making machines, Woven wire. H. G. Spechat. 2,003,123–4; May 28.
Blade runner, Adjustable. C. Fuchs. 2,002,735; May 28.
Blind, Venetian. J. E. Cooper. 2,003,174; May 28.
Block: *See*—
Grinding machine guide block.
Blower for cleaning the tubes of steam generators and the like, Fluid pressure operated. R. I. Moses. 2,002,787–8; May 28.
Boat construction, Antivibration. B. E. Baldut. 2,002,517; May 28.
Bow for stringed instruments. R. H. Turner. 2,003,161; May 28.
Box: *See*—
Display box.
Box opening device. S. P. F. Sneed. 2,002,591; May 28.
Box piling. A. Borberg. 2,002,521; May 28.
Brake: *See*—
Clutch brake. Vehicle brake.
Electropneumatic brake.
Brake. J. Melling. 2,002,786; May 28.
Brake apparatus, Hydraulic. E. G. Carroll. 2,003,247; May 28.
Brake drum construction. J. E. Batle. 2,003,063; May 28.
Brake drum construction. C. W. Sinclair. 2,003,055; May 28.
Brake for automotive vehicles. G. W. Harper and A. R. Catto. 2,002,813; May 28.
Brake rigging. W. H. Baselt. 2,002,930; May 28.
Brake testing machine. F. P. Bucklein. 2,002,764; May 28.
Braking apparatus, Railway. H. L. Bone and J. W. Logan, Jr. 2,003,035; May 28.
Braking mechanism. C. F. Balsch and J. W. White. 2,002,876; May 28.
Brinell-numbers, Apparatus for the determination of. S. L. E. Falk. 2,002,495; May 28.
Broaching machine. M. Romaine and E. G. Roehm. 2,002,924; May 28.
Broaching tool. F. F. Graham, Jr. 2,003,144; May 28.
Bronze, bronze powders and making the same. E. J. Hall. 2,002,891; May 28.
Broom, Vacuum. W. Leathers. 2,002,636; May 28.
Buckle. J. R. Bryant. 2,002,490; May 28.
Buckle and making same. J. Jacobs. 2,002,946; May 28.
Buffer spring for railway passenger cars. G. G. Gilpin. 2,002,632; May 28.
Building construction. G. R. Collins. 2,002,934; May 28.
Building construction. M. C. Rosenblatt. 2,002,510; May 28.
Building construction. F. M. Venzie. 2,002,927; May 28.
Bulldozer. C. J. Bath. 2,002,563; May 28.
Burner: *See*—
Oil burner.
Burner. B. Q. P. Foss. 2,002,660; May 28.
Burner for heavy liquid fuels. G. Lucich. 2,003,181; May 28.
Butter-molding device. O. C. Jackson. 2,003,197; May 28.
Cabinet, Dispensing. A. Galante. 2,003,044; May 28.
Cabinet, Refrigeration. P. A. Celander. 2,003,274; May 28.
Cabinet, Shower bath. E. F. Niedecken. 2,002,789; May 28.
Cabinet, Towel vending. J. Darman. 2,002,568; May 28.
Cabinet, Viewing. F. T. Powers. 2,002,867; May 28.
Cage for parison molds. A. W. Beeson. 2,003,064; May 28.
Calcium carbamate, Production of. N. Caro, A. R. Frank, and H. H. Franck. 2,002,656; May 28.
Calendar, Advertising. J. S. Fisher. 2,003,142; May 28.
Camera, Roll film. B. Mayer. 2,002,824; May 28.
Can top, Quick-opening. R. Bergman. 2,002,564; May 28.
Can top remover. J. H. Mullan. 2,002,906; May 28.
Capacitor motor. J. G. Baker. 2,003,031; May 28.
Car, House. F. Ditchfield. 2,003,040; May 28.
Cars, Antiback roll mechanism for. C. M. Jameson. 2,002,857; May 28.
Carbon, Activated. E. T. Olson. 2,003,277; May 28.
Carbonaceous material, Destructive hydrogenation of. P. Herold and H. Kaufmann. 2,002,997; May 28.
Carbons, Preparing activated vegetable. L. Wickenden and J. J. Naugle. 2,002,651; May 28.
Carburetor. E. S. Almaraz and E. C. San Antonio. 2,002,928; May 28.
Carburetor. J. S. Culp. 2,002,732; May 28.
Card filing and segregating apparatus. J. W. Whitson. 2,002,808; May 28.
Card playing device. C. R. Walgreen, Jr. 2,002,593; May 28.
Card selecting apparatus. J. W. Whitson. 2,002,807; May 28.
Carrier: *See*—
Baggage carrier.
Carton. C. J. Alfred. 2,002,485; May 28.
Casket, Burial. L. N. Strunk. 2,003,096; May 28.
Caster. O. Clay. 2,003,249; May 28.

Casting machine and method, Centrifugal. W. D. Sargent. 2,002,962; May 28.
Cathode glowlamp. A. F. Henninger, Jr. 2,002,775; May 28.
Cellulose acetate, Treating. R. Müller, M. Schenck, and W. Wirbatz. 2,002,674; May 28.
Cellulose derivatives containing an inorganic substituent. M. Hagedorn, O. Reichert, and E. Guhring. 2,002,811; May 28.
Cement, Apparatus for making Portland. T. Avnsoe. 2,002,972; May 28.
Cementitious material, Producing. G. A. Hoggatt. 2,002,945; May 28.
Centrifugal pump. F. B. Allen. 2,003,168; May 28.
Centrifugal separator. H. O. Lindgren. 2,002,954; May 28.
Chair. J. W. Carpenter. 2,002,765; May 28.
Chair construction, Morris. H. Saeger. 2,003,157; May 28.
Cheese, Apparatus for making. W. D. Williams. 2,002,597; May 28.
Chute, Coin. T. W. B. Watling. 2,002,560; May 28.
Cigarette dispenser and igniter, Combined. L. M. Jackson and C. A. Prescott. 2,003,195; May 28.
Cigarette holder. W. Eisenberg. 2,002,494; May 28.
Cigarettes, Apparatus for the production of. W. F. M. Edwards and R. F. Mayo. 2,002,886; May 28.
Cigarettes or similar articles into pocket-like packages, Device for introducing. F. A. Ritscer. 2,002,616; May 28.
Circuit breaker system, Automatic reclosing. E. V. Ellett. 2,003,042–3; May 28.
Circuit, Control. V. T. Callahan. 2,003,036; May 28.
Circuit controller. S. S. Green. 2,003,260; May 28.
Circuit controlling device. C. F. Wallace. 2,002,804; May 28.
Circuit controlling mechanism, Electric. J. Sachs. 2,002,587; May 28.
Circuit, Electrical control. E. O. Erickson. 2,002,769; May 28.
Circuit, Power supply. S. M. Hammer. 2,002,774; May 28.
Circuit, Surge limiting. W. W. Sturdy. 2,002,617; May 28.
Clamp. T. Pesel. 2,003,090; May 28.
Clasp. H. H. Jones. 2,002,939; May 28.
Clasp, Dental. J. V. Amenta. 2,003,030; May 28.
Clasps for corsets and the like, Stud-and-eye. J. A. Rice. 2,003,222; May 28.
Cleaner: *See*—
Electric vacuum cleaner. Suction cleaner.
Floor cleaner. Thread or yarn cleaner.
Cleat, Shoe. I. I. Tubbs. 2,002,556; May 28.
Clock Alarm. C. Jauch. 2,002,998; May 28.
Closet rims, Apparatus for molding water. J. M. Teahen. 2,002,873; May 28.
Closure. J. N. Halkett. 2,003,046; May 28.
Closure. C. E. Yoke and C. E. Denbow. 2,002,723; May 28.
Closure. F. Westerbeck. 2,003,025; May 28.
Clutch: *See*—
Friction clutch.
Clutch. F. C. Fisher. 2,002,979; May 28.
Clutch. A. J. Hartley. 2,002,943; May 28.
Clutch. E. W. Larsen. 2,002,699; May 28.
Clutch. J. W. Tatter. 2,002,841; May 28.
Clutch brake. B. Jenkins. 2,003,198; May 28.
Clutch or brake, or like mechanism. J. Melling. 2,002,785; May 28.
Coal in a chamber oven; retorts and the like, Process and apparatus for compressing. H. Petsch. 2,002,614; May 28.
Coating apparatus. S. C. Porter. 2,002,507; May 28.
Coatings, Producing moistureproof and air tight. W. J. H. Hinrichs and H. Wittkowski. 2,003,192; May 28.
Color in television, Producing. R. H. Worrall. 2,002,515; May 28.
Compass, Magnetic. H. T. Faus. 2,003,179; May 28.
Compasses, Follow-up system for magnetic. M. F. Bates. 2,003,270; May 28.
Composition for coating sheets, fibrous stocks, and the like. C. M. Boyce. 2,003,065; May 28.
Compressor, Rotary. J. J. Morch. 2,002,827; May 28.
Compressor unit. F. J. Heldeman. 2,002,575; May 28.
Concrete form holding means. S. S. Colt. 2,002,526; May 28.
Condenser: *See*—
Electrical condenser.
Conductor, Extensible electric. K. Herkenberg. 2,002,739; May 28.
Confection, Frozen. F. L. Schade. 2,002,963; May 28.
Connecter: *See*—
Battery terminal connecter Belt connecter.
Connecter cap. F. C. Kollath. 2,002,779; May 28.
Connection, Interlocking. C. T. Von Holtz. 2,002,558; May 28.
Constituents of mineral oils, Separating. H. T. Bennett. 2,003,239; May 28.
Container: *See*—
Mortuary record container. Shipping container.
Container. J. M. Driver. 2,003,182; May 28.
Container. S. Karasik. 2,002,742; May 28.
Container. E. J. Schoettle. 2,003,224; May 28.
Container and cooler, Beer. H. Iselin. 2,003,050; May 28.
Container or receptacle, Display. M. M. Einson. 2,002,493; May 28.
Continue process and apparatus. A. Hartmann, W. Roefinghoff, G. Bauriedel, and W. Ostermann. 2,002,994; May 28.
Continue process and apparatus. W. Hoefinghoff and A. Hartmann. 2,002,996; May 28.
Continue process apparatus. A. Hartmann, W. Hoefinghoff, A. Luchtenberg, and H. Kempf. 2,002,995; May 28.
Control apparatus for car connecters. W. H. Smith. 2,003,017; May 28.
Control device. J. E. Renholdt. 2,002,798; May 28.
Control device for pumping systems. E. Mendenhall and J. B. Van Horn. 2,002,912; May 28.
Control device for rolling mills. C. E. Bedell. 2,003,129; May 28.
Control for gyrator-type washing machines. L. B. Green. 2,002,573; May 28.
Control for elevators, System of. S. N. Rubin. 2,002,986; May 28.
Control for railway signal systems. F. H. Richterkessing. 2,003,266; May 28.
Control for shearing apparatus. R. H. Wright. 2,003,027; May 28.
Control head. W. E. King. 2,002,539; May 28.
Control mechanism. E. T. Dahl. 2,002,692; May 28.
Control mechanism. R. S. Sanford. 2,002,511; May 28.
Control mechanism for belt driven apparatus. R. C. Straube. 2,002,648; May 28.
Control mechanism for typewriting machines. H. A. Foothorap. 2,002,695; May 28.
Control of electrical devices, Remote. H. R. Mallory and S. Ruben. 2,002,541; May 28.
Control system. W. F. Eames. 2,003,041; May 28.
Control system. S. C. Henton and M. B. Rankin. 2,003,047; May 28.
Controlling arrangement for a gas burner. F. W. Stockmeyer and W. Römmelt. 2,002,513; May 28.
Conveyer. C. K. Pevear. 2,002,830; May 28.
Corrosion, Preventing. H. E. Buc. 2,002,523; May 28.
Cosmetic holder. G. F. Richter. 2,002,716; May 28.
Coupler. J. Elliott and J. Chalmers. 2,002,658; May 28.
Coupler. W. F. Richards. 2,002,508; May 28.
Coupling: *See*—
Hose coupling.
Coupling device, High-frequency. A. Crossley and H. E. Melnema. 2,002,500; May 28.
Coupling for pipe lines, electric lines on railway and other vehicles and the like, Automatic. W. Kaiser and H. Balke. 2,003,082; May 28.
Coupling for pump rods, trailer hitches and the like. H. A. Onken. 2,002,922; May 28.
Cover: *See*—
Water tank cover.
Cover bag for cages. M. D. Robison. 2,002,925; May 28.
Cover for spare tires of automobiles. G. A. Lyon. 2,002,784; May 28.
Coverings automatically on the seats of water closets, Device for placing protective. C. Jorlot. 2,002,948; May 28.
Crate, Bottle. H. V. Bowman. 2,003,133–5; May 28.
Crib, Folding. H. McDaniel. 2,002,607; May 28.
Current control apparatus. C. P. West. 2,003,024; May 28.
Cutter: *See*—
Pie cutter.
Cutter blades for slicing machines, Producing. J. Hansen. 2,002,812; May 28.
Cylinder lock. S. A. Liss. 2,003,086; May 28.
Dampening mechanism for printing-presses. C. W. Harrold. 2,002,815; May 28.
Damper, Fabricated. P. S. Menough. 2,003,154; May 28.
Dating device. W. J. Pearson. 2,003,219; May 28.
Demand meter. B. H. Smith. 2,003,016; May 28.
Device for indicating whether a clock is running. B. F. Muldoon. 2,002,905; May 28.
Diameter propeller, Variable. V. H. Patriarche. 2,002,712; May 28.
Dipper construction, Excavating. W. H. Brune. 2,003,067; May 28.
Dishwasher. R. E. Marbury. 2,003,003; May 28.
Dispenser: *See*—
Tooth powder dispenser.
Dispensing device. B. P. Kinney. 2,002,635; May 28.
Dispensing device. J. Stremel. 2,002,592; May 28.
Display article and producing the same. H. Ferrill. 2,002,734; May 28.
Display box. L. M. Sutter. 2,002,618; May 28.
Dolly, Adjustable. D. L. Ulmer. 2,003,162; May 28.
Door, Car. W. A. Beauchamp. 2,003,033; May 28.
Doorcheck and display, Combination. J. W. Wyatt and J. H. Pollard. 2,002,725; May 28.
Doorlock. H. G. Voight. 2,002,619; May 28.
Door operating mechanism. I. M. Chambers. 2,003,037; May 28.
Draft appliance, Railway. W. J. Regan and E. George, Jr. 2,003,221; May 28.
Draft control. E. T. Dahl. 2,002,693; May 28.
Draft rigging. D. S. Barrows. 2,003,231; May 28.
Dredge hoisting apparatus. J. M. Bennett. 2,002,599; May 28.
Dredge, Hydraulic. A. Neveling, Sr. 2,002,748–9; May 28.

Drill pipe protector. C. K. Holt, I. B. Marsh, and J. B. Merritt. 2,002,893; May 28.
Drilling machine. F. W. Hild. 2,003,078; May 28.
Drilling machine. F. W. Hild. 2,003,079; May 28.
Drilling machine, Portable. K. H. Andren. 2,002,727; May 28.
Drip catcher for containers. R. Robinson. 2,002,677; May 28.
Drive for motor cars, Front. O. Zancau. 2,003,166; May 28.
Drive from sealed gear casing. H. E. Warren. 2,003,163; May 28.
Drive, Machine tool. H. R. Isler. 2,002,816; May 28.
Drum, Tire building. A. E. Benson. 2,002,687; May 28.
Dynamometer. J. A. Carr. 2,002,977; May 28.
Edges of metal plates, Apparatus for cutting or beveling. G. K. Hull. 2,003,049; May 28.
Ejector for saturators. C. E. Underwood. 2,002,557; May 28.
Electric clock motor. L. Hammond. 2,003,116; May 28.
Electric discharge tube. J. W. Ryde. 2,002,837; May 28.
Electric heater. L. M. Daly. 2,003,175–6; May 28.
Electric heater. E. W. Phillips. 2,002,714; May 28.
Electric vacuum cleaner. O. Holm-Hansen. 2,003,147; May 28.
Electric wave amplifying system. E. E. Hiler. 2,002,855; May 28.
Electric wiring apparatus. V. R. Despard. 2,002,491; May 28.
Electrical condenser. T. L. Lee. 2,003,002; May 28.
Electrical quantities, Apparatus for measuring. K. L. Scott. 2,002,980; May 28.
Electrical switch. A. P. Ball. 2,002,623; May 28.
Electromagnetic switch. R. H. Sullivan. 2,003,021; May 28.
Electromagnetic translating system. B. F. Miessner. 2,002,919; May 28.
Electron discharge device. V. O. Allen. 2,002,653; May 28.
Electron discharge device. M. Knoll. 2,002,667; May 28.
Electropneumatic brake. E. E. Hewitt. 2,002,892; May 28.
Electrotherapeutic element. L. Ludwig. 2,002,744; May 28.
Elevator: *See*—
Fluid elevator.
Emulsions of thermoplastic materials, Preparation of. A. W. Hixson and J. M. Fain. 2,002,505; May 28.
Engine: *See*—
Internal combustion engine. Steam engine.
Explosion and combustion motor. C. Longobardi. 2,002,957; May 28.
Extension table. R. A. and A. H. Holland. 2,002,576; May 28.
Extraction process. D. R. Merrill and P. Subkow. 2,002,702; May 28.
Fabric guiding and seaming mechanism. C. F. Mack. 2,002,851; May 28.
Fare collection method and apparatus. F. R. and W. B. Fageol. 2,003,257; May 28.
Fastener: *See*—
Window fastener.
Fastener. E. A. Otto. 2,002,710; May 28.
Fastener for parachute harness, Quick release. S. O. C. Kuhlemann. 2,003,205; May 28.
Fastener members of sliding-clasp fasteners in rows, Apparatus for arranging the. H. Gutherlett. 2,003,196; May 28.
Feeder: *See*—
Glass feeder.
Ferric compounds, Production of. S. I. Levy and G. W. Gray. 2,002,859; May 28.
File, Route. T. W. Flory. 2,002,887; May 28.
Filing system. J. M. Keplar. 2,003,202; May 28.
Film, Producing uniform motion in a sound. L. Day. 2,003,276; May 28.
Filter. C. Davies. 2,002,936; May 28.
Filter. M. F. Moran. 2,002,826; May 28.
Finish, Protective. M. J. Callahan. 2,003,068; May 28.
Finishes imitative of stone, Producing. H. Cohen. 2,002,848; May 28.
Firearm of the gas reloading type. F. N. Bröndby. 2,003,086; May 28.
Fire wall. M. Liptak. 2,002,820; May 28.
Flame and waterproofing compositions for aqueous cellulosic media, Compounding. F. W. Hochstetter. 2,003,188; May 28.
Flashing. L. Friedberg. 2,002,810; May 28.
Flash light of candle type. H. G. Graubner. 2,002,602; May 28.
Floating fish trap. H. L. Christie. 2,002,882; May 28.
Floor cleaner. F. H. Nadig. 2,003,215; May 28.
Floor cleaning machine. F. H. Nadig. 2,003,216; May 28.
Flower holder. A. W. Asman. 2,003,101; May 28.
Fluid dispensing apparatus. E. H. Lichtenberg. 2,003,153; May 28.
Fluid dispensing device. E. L. Nall. 2,002,610; May 28.
Fluid displacing pump. E. F. McCarthy. 2,003,117; May 28.
Fluid elevator. J. D. Nixon. 2,003,010; May 28.
Fluid pressure distribution system. H. L. Bone. 2,003,034; May 28.
Fluid valve. J. H. Clark. 2,003,173; May 28.
Foam for fire extinction, Producing. W. Friedrich. 2,003,184; May 28.
Food cooking device. C. A. Schroeder. 2,002,801; May 28.
Foot manipulator, Myogenic. H. Ryberg, Jr. 2,002,586; May 28.
Fourdrinier wire, Stringing a. E. E. Berry. 2,003,103; May 28.
Fractionation device and method for employing the same. C. A. Bennett and G. E. Gans. 2,002,974; May 28.
Frame: *See*—
Puzzle frame. Vehicle chassis frame.
Freezing apparatus. E. J. Murphy. 2,003,214; May 28.
Frequency control system for electric welder. J. V. Caputo. 2,003,136; May 28.
Friction clutch, Reversible. E. M. Pfauser. 2,003,155; May 28.
Fruit and other articles, Method of and apparatus for treating. E. M. Brogden. 2,003,275; May 28.
Fruit, Preserving. J. H. Hinrichs and H. Wittkowski. 2,003,191; May 28.
Fruit sizer. G. P. Vickery. 2,003,097; May 28.
Fruit treating composition and process of treating fruit. J. N. Sharma. 2,002,589; May 28.
Fuel and method of manufacture, Motor. W. A. Smith. 2,003,158; May 28.
Fuel, Carbureting heavy liquid. G. Lucich. 2,003,180; May 28.
Fuel saver. J. Blakeman. 2,002,879; May 28.
Fuels from hydrocarbon oils, Producing motor. M. L. Chappell. 2,002,729; May 28.
Furniture, Article of printer's. E. L. Kokanour. 2,002,895; May 28.
Game. J. A. Flondella. 2,002,631; May 28.
Game. Y. W. Kim. 2,003,203; May 28.
Game apparatus. J. Graner. 2,003,145; May 28.
Game, Baseball. R. A. Lemoyne. 2,003,207; May 28.
Garment. C. E. Oathout. 2,003,217; May 28.
Garment, Detachable-hood. W. Lipson. 2,002,955; May 28.
Garment protector. S. J. Goldsmith. 2,003,114; May 28.
Gas, Burning fuel. H. C. Weller. 2,003,220; May 28.
Gas mixtures, Resolution of. M. Fränko. 2,002,940; May 28.
Gas mixtures, Separating. M. Fränkl. 2,002,941; May 28.
Gas pressure in closed systems, Generation and maintenance of constant. K. Wiesler. 2,002,621; May 28.
Gas, Producing fuel. T. Nagel. 2,002,863; May 28.
Gas regulator. G. M. Deming. 2,002,884; May 28.
Gas, Utilization of high pressure. R. D. Booth. 2,002,565; May 28.
Gate valve. M. P. Laurent. 2,002,780; May 28.
Gauge: *See*—
Pressure gauge. Stone cutter gauge.
Steering arm gauge.
Gauge. F. P. Held. 2,003,188; May 28.
Gauge stock, Method and apparatus for rolling uniform. A. J. Townsend and E. S. Miller. 2,003,160; May 28.
Gear damper for engine drive transmission systems. A. H. Neuland. 2,002,828; May 28.
Gear, Steering. E. W. Miller. 2,002,746; May 28.
Gearing, Adjustable worm. W. M. Pohl. 2,002,644; May 28.
Geometrical instrument. C. W. Burt. 2,003,172; May 28.
Glare shields of vehicles, Control of. C. Chilowsky. 2,003,248; May 28.
Glass, Annealing sheet. W. L. Monro. 2,002,544; May 28.
Glass article, Decorated. E. C. Leibig. 2,002,900; May 28.
Glass feeder. T. Stenhouse. 2,003,058; May 28.
Glass gathering device, Suction. P. L. Geer, H. A. Moore, and W. A. Morton. 2,002,889; May 28.
Glass, Method of and apparatus for drawing. W. J. Woods. 2,002,875; May 28.
Glazing construction. S. K. Huston. 2,002,536; May 28.
Glow discharge device. M. Schmilerer. 2,002,551; May 28.
Glucosides of digitalis lapata and making same, Cardioactive. W. Kreis. 2,003,204; May 28.
Goggles. E. R. Meyrowitz. 2,002,543; May 28.
Golf bag. J. W. Osten. 2,002,581 May 28.
Golf ball printing machine. R. Attl. 2,002,847; May 28.
Golf playing field. B. E. Gage. 2,003,074; May 28.
Granular material, Apparatus for separating. M. I. Dorfan. 2,003,141; May 28.
Graphite into engines, Apparatus for injecting. C. R. Boden. 2,002,834; May 28.
Grease and its manufacture. G. Kaufman. 2,002,819; May 28.
Grease trap. G. J. Dehn. 2,003,139–40; May 28.
Grid glow tube structure. S. P. Sashoff. 2,003,012; May 28.
Grinding apparatus. R. E. Spurr. 2,002,967; May 28.
Grinding machine. C. Booth and A. Strom. 2,002,489; May 28.
Grinding machine, Automatic. H. Arter and W. F. Fraser. 2,003,209; May 28.
Grinding machine guide block. J. Sunnen. 2,002,649; May 28.
Grinding machinery. L. F. Nenninger. 2,002,921; May 28.
Grip for handles. G. E. Gagnier. 2,002,535; May 28.
Gripper mechanism. W. K. Eckhard. 2,002,853; May 28.

Guard, Burn. J. F. Raynolds and F. C. Wilhelm. 2,002,715; May 28.
Guard system for tractor-trailer combinations. H. H. Robinson. 2,002,832; May 28.
Gum and gum forming constituents from cracked petroleum distillates, Removing. S. M. Martin and W. A. Gruse. 2,002,902; May 28.
Guy insulating and grading means. E. C. Vrooman. 2,003,225; May 28.
Hair waving. H. Stein, C. G. Gross, and W. S. Luci. 2,002,840; May 28.
Hair waving appliance. B. M. Beskow. 2,002,487; May 28.
Hair waving method. P. R. Steinbach. 2,002,980; May 28.
Halogen-containing solutions, Purification of. H. E. Bierbaum. 2,002,654; May 28.
Hammer, Electric. E. W. Badcon. 2,002,762; May 28.
Hand bag. H. I. Kenler. 2,002,949; May 28.
Hanger: *See*—
Window and screen hange
Hanger for supporting towels, cloths, and other articles. M. R. Conigrave. 2,002,500; May 28.
Heat absorbing device for the protection of stokers. J. A. Hoffman. 2,003,194; May 28.
Heat circulator for motor vehicles. J. B. Brennan. 2,002,626; May 28.
Heat treatment of oils and fats, more particularly for the purpose of bleaching and hardening same. W. Gensecke. 2,003,076; May 28.
Heater: *See*—
Electric heater. Windshield heater.
Heater for automobiles, Hot water. R. H. Griffiths. 2,003,045; May 28.
Heating convector. E. J. Bair. 2,002,763; May 28.
Heating, power, and refrigeration purposes, Apparatus for. A. Schwarz. 2,003,122; May 28.
Heel breasting machine. T. H. Seely and M. H. Ballard. 2,002,512; May 28.
High tension contact protection. A. Bouwers. 2,002,688; May 28.
Hinged joint. J. W. Leighton. 2,002,781; May 28.
Hinging-locking mechanism. A. H. F. Perl. 2,003,008; May 28.
Holder: *See*—
Cigarette holder. Jar or bottle holder.
Cosmetic holder. Seat cover holder.
Flower holder. Welding electrode holder.
Holder for thread and the like, Suspensible clew. E. Goddemeyer. 2,003,143; May 28.
Hollow articles, such as pipe fittings and the like, and making the same. F. H. Benge. 2,003,232; May 28.
Honing tool. K. W. Connor. 2,002,567; May 28.
Hose and tubing, Manufacturing of helically groved endless. J. Kopetz. 2,002,896; May 28.
Hose coupling. H. D. Stecher. 2,002,839; May 28.
Hospital corridor light. F. L. Garrigues. 2,003,273; May 28.
Hub cap. C. W. Sinclair. 2,002,872; May 28.
Humidifier. E. T. Brace. 2,002,880; May 28.
Humidifier and air washer. H. J. Somers. 2,002,553; May 28.
Hurdle washer. W. Belmann and J. Hagenbeck. 2,003,271; May 28.
Hydrocarbons and their oxygen-containing derivatives, Separation of. P. K. Frolich and J. W. Pugh. 2,002,533; May 28.
Hydrocarbons from gaseous or lower boiling hydrocarbon materials, Production of normally liquid. P. K. Frolich. 2,002,534; May 28.
Ice creeper. F. Mong. 2,002,706; May 28.
Immersing machine. S. Przyborowski. 2,002,795; May 28.
Incinerator control. H. W. Ewing. 2,002,659; May 28.
Indicator for pressure regulators, Seat leak. G. M. Deming. 2,002,883; May 28.
Ink, Printing. E. J. Kelly. 2,002,537; May 28.
Ink, Stencil and marking. W. Ernest. 2,002,939; May 28.
Instrument for electro-surgical treatment of tissue. R. H. Wappler and F. Charles. 2,002,594; May 28.
Internal combustion engine. H. J. Hickey. 2,002,663; May 28.
Internal combustion engine. A. S. Lack. 2,002,668; May 28.
Internal combustion engine. E. Workman. 2,002,759; May 28.
Iron pyrites for the recovery of sulphur and formation of iron oxide, Treatment of. S. I. Levy. 2,002,860; May 28.
Jack: *See*—
Automobile jack. Shoe supporting jack.
Jar or bottle holder. J. L. Donovan. 2,002,767; May 28.
Jigger. H. W. Mettler. 2,002,703; May 28.
Joint: *See*—
Hinged joint.
Ketones, Production of. W. Querfurth. 2,002,794; May 28.
Key support. R. C. Legat. 2,002,858; May 28.
Kitchen utility device. A. C. Gilbert and A. A. Arnold. 2,003,259; May 28.
Knitting machine, Full fashioned. G. A. Strauch, E. F. Richter, and J. E. Garrett. 2,003,095; May 28.
Knob and the formation thereof, Ornamental. D. E. Johnson. 2,002,817; May 28.
Lady's hand bag. W. O. Benjafield. 2,003,130; May 28.
Lamp: *See*—
Arc lamp.
Lamp. F. E. Zara. 2,003,228; May 28.
Lasts, Making. C. K. MacDonald. 2,002,580; May 28.
Latch and lock mechanism. J. P. McKinney, Jr. 2,002,542; May 28.
Leather and making the same, Ornamented. G. D. Sart. 2,002,792; May 28.
Lens, Ophthalmic. N. Singer. 2,002,719; May 28.
Lenses for concentrating the heat of the sun, Construction of. J. Ylla-Conte. 2,003,070; May 28.
Light: *See*—
Hospital corridor light.
Lighter, Cigar. L. V. Aronson. 2,002,845; May 28.
Lighter, Cigarette. B. Dess. 2,002,492; May 28.
Lining for shoes, Repair. B. Caplun. 2,003,105; May 28.
Liquid dispensing device. E. L. Nall. 2,002,611; May 28.
Liquid dispensing receptacle. H. M. Matters. 2,002,959; May 28.
Liquid dispensing system. R. C. Shand. 2,002,757; May 28.
Liquid from wells, Method and apparatus for producing. J. D. Nixon. 2,003,009; May 28.
Load-limiting device. H. P. Grohn. 2,003,115; May 28.
Loading machine control mechanism. N. D. Levin and E. G. Lewis. 2,002,951; May 28.
Lock: *See*—
Cylinder lock.
Lock construction. W. E. Keller. 2,003,083; May 28.
Lock for windows, Adjustable. A. V. Vazquez. 2,003,128; May 28.
Locking means for valves. C. M. Potts and P. B. Ellington. 2,002,615; May 28.
Loud speaker, Electro-dynamic. L. Thompson. 2,002,926; May 28.
Lubricating and shock absorbing mechanism for motor vehicles, Combined. G. R. Siegrist. 2,003,014; May 28.
Lubricating apparatus. F. S. Barks and A. P. Fox. 2,003,032; May 28.
Lubricating device. A. Y. Dodge. 2,003,107; May 28.
Lubricating system and method. P. Williamson, Jr. 2,002,809; May 28.
Lubrication, Railway and tramway rail and wheel flange. E. G. Butcher and W. E. Jupe. 2,003,242; May 28.
Luggage bag. L. G. Arpin. 2,003,099–100; May 28.
Machine and method for detecting pink bollworm in cotton seed. R. E. McDonald. 2,002,745; May 28.
Machine for affixing two-part seals to string. O. Schreyer. 2,002,588; May 28.
Machine for dusting sheet materials. G. and C. Smith. 2,003,267; May 28.
Machine for making springs. A. F. Prange. 2,002,754; May 28.
Machine for papering houses, etc., and for washing windows. T. P. Greene. 2,002,633; May 28.
Machine for paving highways. A. W. French. 2,002,661; May 28.
Machine for roughing shoe parts. C. G. Brostrom. 2,002,522; May 28.
Machine for slitting welts. A. J. Beford. 2,002,486; May 28.
Machine tool. L. A. Dumser and O. W. Floody. 2,002,938; May 28.
Magnesium carbonate, Making. W. H. MacIntire. 2,003,208; May 28.
Magnetic material. G. A. Kelsall. 2,002,696; May 28.
Magnetic material and treating. R. M. Bozorth and J. F. Dillinger. 2,002,689; May 28.
Manifold for tubular driers. A. W. Lissauer. 2,002,956; May 28.
Manifolding. A. A. Johnson. 2,003,149; May 28.
Marker. G. Segelhorst. 2,002,756; May 28.
Masking apparatus for finishing articles of manufacture. H. Cohen. 2,002,849; May 28.
Massaging device. W. G. Betz. 2,003,272; May 28.
Matches and the like, Advertising book. J. Farrelly. 2,002,571; May 28.
Material handling mechanism. N. D. Levin. 2,002,952; May 28.
Material handling system for mines. E. C. Morgan. 2,003,007; May 28.
Material testing apparatus. T. E. Heppenstall. 2,003,077; May 28.
Mechanical movement. L. Greenberg. 2,002,890; May 28.
Medicinal preparation. A. E. Osterberg. 2,002,829; May 28.
Metal article and preparing same. W. R. Shimer, J. A. Kinney, and F. O. Kichline. 2,003,094; May 28.
Metal strips to rolls or rolling mills, Cleaning and feeding of. F. G. Ratcliff. 2,003,054; May 28.
Metallic structure and making the same. W. de Fries. 2,003,138; May 28.
Meter: *See*—
Antitampering meter. Demand meter.
Methyl-anthraquinone, Preparation of. L. Spiegler. 2,002,988; May 28.
Milking machine. H. L. Moreney. 2,002,920; May 28.
Mill: *See*—
Rolling mill.
Mining machine. F. A. Lindgren. 2,002,743; May 28.

Motor: *See*—
Capacitor motor. Explosion and combustion motor.
Electric clock motor. motor.
Motor and control therefor, Electric. K. Müller, F. Döring, and J. Wantosch. 2,002,546; May 28.
Motor construction. E. Mendenhall, J. B. Van Horn, and C. J. Coberly. 2,002,915; May 28.
Motor construction, Electric. R. N. Park. 2,002,793; May 28.
Motor construction, Submersible. E. Mendenhall and J. B. Van Horn. 2,002,916; May 28.
Motor for pumps, Inverted. E. Mendenhall and J. B. Van Horn. 2,002,911; May 28.
Motor pump. C. E. Sessions. 2,002,907; May 28.
Motor structure with mechanical seal, Submersible. E. Mendenhall and J. B. Van Horn. 2,002,913; May 28.
Motor with mercury-sealed balancing means, Submersible. E. Mendenhall and J. B. Van Horn. 2,002,910; May 28.
Motors and the like, Construction for submersible. E. Mendenhall and J. B. Van Horn. 2,002,914; May 28.
Mounting of motors. R. T. Smith. 2,002,646; May 28.
Moving matter, Method of and apparatus for treating. H. F. Carter. 2,002,690; May 28.
Muzzle. B. B. Bailes. 2,003,229; May 28.
N-substituted derivative of sulphoanilines. W. Neelmeier and W. Meiser. 2,002,612; May 28.
Napkin, Folded. A. E. Cofrin. 2,002,691; May 28.
Necktie, Two-piece four-in-hand. M. H. McWhirter. 2,002,828; May 28.
Nickel carbonyl, Polymerization of. H. G. Webster. 2,002,805; May 28.
Number plate for telephone dials. W. W. Werring and T. S. Hukham. 2,002,969; May 28.
Nut blanks, Making. J. A. Kinney. 2,003,084; May 28.
Nut device and making it, Screw and trunnion. J. J. McLaughlin. 2,002,671; May 28.
Oil and preparing the same, Road. P. Alexandroff. 2,002,652; May 28.
Oil and product containing it, Vulcanized asphalt. H. S. Holt. 2,002,634; May 28.
Oil burner. H. L. Fischer. 2,003,111; May 28.
Oil wells, Method of and means for flowing. H. C. Otis. 2,002,791; May 28.
Oils, Manufacturing high viscosity index. H. T. Bennett. 2,003,233; May 28.
Oils, Manufacturing high viscosity index. H. T. Bennett. 2,003,235; May 28.
Oils, Producing high viscosity index. H. T. Bennett. 2,003,234; May 28.
Oils, Producing high viscosity index. H. T. Bennett. 2,003,236; May 28.
Oils, Separating mineral. H. T. Bennett. 2,003,238; May 28.
Oils, Textile fiber spraying. J. G. Detwiler, T. C. Heisig, J. E. Rounell, and F. W. Hall. 2,002,885; May 28.
Oils, Treatment of hydrocarbon. L. de Florez. 2,003,137; May 28.
Oils, Treatment of hydrocarbon. J. C. Morrell. 2,002,747; May 28.
Oils with selective solvents, Treating mineral. H. T. Bennett. 2,003,237; May 28.
Oiler, Air-line. J. Bliss. 2,003,132; May 28.
Opening for use in aircraft construction, Access. C. E. Hathorn. 2,002,944; May 28.
Opera glass. R. G. Lester. 2,002,782; May 28.
Operating mechanism for motion picture projectors and phonographs. H. B. Gardner. 2,003,075; May 28.
Ore, Roasting sulphide. H. Freeman. 2,002,496; May 28.
Ores, Apparatus for concentrating. E. W. Davis. 2,002,979; May 28.
Orthoptic instrument. G. B. Wootten. 2,003,165; May 28.
Oven, Bake. R. P. Bolling. 2,002,655; May 28.
Oven, Baking. R. Byron. 2,002,976; May 28.
Oxidation process. F. A. Canon. 2,002,627; May 28.
Osonization products of terpene alcohols and producing. L. P. Rankin. 2,002,583; May 28.
Pail, Minnow. T. C. Forbes and O. R. Hedberg. 2,002,572; May 28.
Pan, Baking. R. Lang. 2,003,151; May 28.
Pan, Bread baking. P. A. Soderholm. 2,002,838; May 28.
Paper feeding machine. F. L. Cross. 2,002,850; May 28.
Pedestal, Supporting. A. Kindelmann and C. L. Ragot. 2,002,533; May 28.
Pen recorder, Multiple. N. Belaef. 2,002,686; May 28.
Percussive tool valve. H. J. Schorle. 2,003,121; May 28.
Petroleum fractions, Condensing. G. B. Coubrough. 2,002,731; May 28.
Petroleum product and treating same, Distillate. J. B. Rather, L. C. Beard, Jr., and O. M. Reiff. 2,002,645; May 28.
Phosphates, Decomposing raw. S. G. Nordengren. 2,002,547; May 28.
Photophone apparatus. C. R. Hanna. 2,003,048; May 28.
Pianos, Foot operable playing attachment for. C. J. Wilson. 2,003,227; May 28.
Picture system, Sound. W. J. Albersheim. 2,003,029; May 28.
Pie cutter. J. B. Deutsch. 2,003,253; May 28.
Piling device for sheet mill tables. R. H. Stevens. 2,003,122; May 28.
Pipe: *See*—
Smoking pipe.
Pipe line repair device, Hydraulic safety. H. H. Ice. 2,002,577; May 28.

Radio receiving system. J. G. Aceves and E. V. Amy. 2,002,844; May 28.
Radio receiving system. P. O. Farnham. 2,003,110; May 28.
Rail stabilizing device for railway tracks. J. G. Mueller. 2,002,708; May 28.
Railway crossing signal. F. H. Richterkessing. 2,003,264; May 28.
Range, Cooking. J. Teller and A. P. Schulz. 2,003,059; May 28.
Razor and sharpener, Combined safety. E. H. Wyman. 2,002,682; May 28.
Razor, Safety. H. L. Kent. 2,003,201; May 28.
Reaction product of an organic acid amide and an alkylene oxide. L. Orthner and H. Keppler. 2,002,613; May 28.
Reaction product of ketones and amines. L. Meuser and P. J. Leaper. 2,002,642; May 28.
Receptacle: *See*—
Liquid dispensing receptacle.
Record, Photographic sound. A. Whitaker. 2,002,620; May 28.

Rectifier with arc control, Mercury vapor or noble gas. J. von Issendorff and F. Netzsch. 2,003,023; May 28.
Recycling process for cracking oil. F. H. Edson. 2,002,530; May 28.
Reducing valve. B. L. Robart and E. P. Buell. 2,002,717; May 28.
Reenforcement for tubular and like structures. W. F. Schulz. 2,002,987; May 28.
Refrigerating apparatus and method, Absorption. G. Maiuri. 2,002,958; May 28.
Refrigerator. C. L. Moorman. 2,002,643; May 28.
Refuse-collection device. W. F. Ehrick and R. A. Garverick. 2,002,993; May 28.
Regulator: *See*—
Gas regulator.
Relay for synchronizing systems. C. F. Jenkins. 2,002,664; May 28.
Resins and making same, Synthetic. A. Gams and K. Frey. 2,002,601; May 28.
Riffling machine. H. E. G. T. Gerlich. 2,003,185; May 28.
Rolling mill. G. L. Fisk. 2,002,531; May 28.
Roof, Gondola car. G. G. Gilpin. 2,003,113; May 28.
Rotary pump. A. A. Moran. 2,002,802; May 28.
Rubber latex, Natural and artificial. I. Williams and B. Dales. 2,002,622; May 28.
Rubber vulcanization. H. A. Lubs and I. Williams. 2,002,639; May 28.
Saddle. B. J. Anderson. 2,002,929; May 28.
Safety device. G. D. Engle. 2,003,256; May 28.
Safety means for tanks. R. W. Crossen, Jr. 2,002,935; May 28.
Safety system for therapeutic lamps. R. C. Hyde and E. O. Erickson. 2,002,776; May 28.
Saw cylinder for cotton extracting machines. O. Mitchell. 2,003,262; May 28.
Scanning and apparatus therefor. O. A. Ross. 2,002,678; May 28.
Scooter. D. J. Bontrager. 2,002,520; May 28.
Scraper. J. J. Glassmer. 2,003,186; May 28.
Screen for receiving projected images. F. Earle. 2,002,733; May 28.
Screw fastening means. E. F. Hunt. 2,002,741; May 28.
Scroll. G. C. Groth. 2,002,697; May 28.
Seal. S. N. Hope. 2,002,856; May 28.
Seal and dust guard for journal boxes, Oil. W. B. D Penniman. 2,003,120; May 28.
Seal, Fluid packed. E. Mendenhall, J. B. Van Horn, and C. J. Coberly. 2,002,918; May 28.
Seal for dynamo electric machines. W. F. Kelpe 2,003,000; May 28.
Seal, Frangible. R. W. Ferguson and H. P. Sperkes. 2,003,183; May 28.
Sealing compound for pneumatic tires and making the same. H. French and W. F. Welbeloved. 2,003,112; May 28.
Sealing device. E. Mendenhall and J. B. Van Horn. 2,002,917; May 28.
Seat cover holder. H. Thomasma. 2,002,721; May 28.
Seat top, Removable rumble. E. S. Tupper. 2,002,514; May 28.
Separator: *See*—
Centrifugal separator.
Service station. H. C. Johnson. 2,002,777; May 28.
Sewing machine. C. F. Ruhel. 2,002,799; May 28.
Sewing machine, Shoe. C. F. Whitaker. 2,003,026; May 28.
Sewing machines, Attachment for. J. D. Karle. 2,003,200; May 28.
Sewing machines, Ring shuttle reel for. A. Mygland. 2,002,609; May 28.
Shampoo fixture. E. A. Eckhouse. 2,002,630; May 28.
Sharpener, Reamer. H. W. Zimmerman. 2,002,971; May 28.
Sharpener, Scissors. A. E. and W. J. Rainey. 2,002,868; May 28.
Sheet material, Apparatus for drying. R. M. Smith. 2,002,720; May 28.
Sheet of unvulcanized rubber to a portion of a fabric upper, Securing a preformed and continuous. I. and L. Dorogi. 2,002,527; May 28.
Sheets of cellulose, Manufacture of thin. F. A. Parkhurst and G. J. Esselen. 2,002,711; May 28.
Shield, Frost. J. R. Thorp. 2,002,722; May 28.
Shift control for telegraph printers. R. F. Dirkes. 2,003,177; May 28.
Shipping container. R. Faries and J. B. McWilliams. 2,002,570; May 28.
Shipping container, Returnable. R. C. Bender. 2,002,625; May 28.
Shock absorber. W. M. Glezen. 2,002,980; May 28.
Shock absorber. L. L. Lomar. 2,002,700; May 28.
Shock absorber, Wire line. E. E. Duff. 2,003,255; May 28.
Shoe shank stiffener. C. M. Moore. 2,002,707; May 28.
Shoe sole-cementing machine. K. L. Venters. 2,002,650; May 28.
Shoe supporting jack. R. C. Simmons. 2,003,015; May 28.
Shuttle motion. R. J. Bartholomew. 2,002,973; May 28.
Sign. E. L. Torstenson. 2,003,126; May 28.
Signal: *See*—
Railway crossing signal.
Signal for automobiles, Direction. C. Foti. 2,002,503; May 28.
Signalling system, Railway. F. H. Richterkessing. 2,003,265; May 28.
Silk and the like, Process of and apparatus for the production of artificial. G. Bauriedel and K. Meyer-Gans. 2,003,170; May 28.
Siphon device. W. H. Rose. 2,002,835; May 28.
Ski fastening, Automatically acting. E. Elster. 2,002,694; May 28.
Slab, Reenforced concrete construction. W. P. Cummings. 2,003,251; May 28.
Slide bar for men's garters. J. Jacobs. 2,002,947; May 28.
Smoking pipe. O. T. Robertson. 2,003,156; May 28.
Sole reenforcing plate. J. T. Riddell. 2,002,869; May 28.
Spark plug. R. J. L. Butterer. 2,002,529; May 28.
Spark plug. L. J. Tetlow. 2,002,803; May 28.
Specimen supporting device. D. C. Scott. 2,002,552; May 28.
Speed mechanism, Variable. J. J. Rothwell, Jr., and L. M. Stuart. 2,002,585; May 28.
Speed transmission, Variable. A. Y. Dodge. 1,003,108; May 28.
Spindle drive mechanism. H. Z. Cobb and R. S. Francis. 2,002,629; May 28.
Spray residue from fruit, Removing. H. C. McLean and A. L. Weber. 2,003,005; May 28
Sprayer. E. S. Lynger. 2,003,087; May 28.
Sprinkler head. E. E. Lord. 2,003,052; May 28.
Staple and strap, Combined. C. C. Wickwire. 2,003,062; May 28.
Starter construction. R. E. Wike. 2,002,561; May 28.
Steam engine, Electrically controlled. R. R. Blank. 2,002,488; May 28.
Steam trap and apparatus for controlling or maintaining the supply of water or other fluid. F. S. Carter. 2,003,069; May 28.
Steel for railroad rails, wheel tires, plank piles, and other objects. H. Buchholtz. 2,002,932; May 28.
Steering arm gauge. Vehicle. J. F. Duby. 2,003,178; May 28.
Steering control, Method of and apparatus for radiodynamic. T. E. Brockstedt. 2,003,240; May 28.
Steering device for trailers. L. H. Johnson. 2,002,604; May 28.
Stock feeding and gripping device. M. E. Lange and W. J. Burger. 2,003,152; May 28.
Stocking made in a single operation and making same. W. Heinitz. 2,003,189; May 28.
Stockings, Ornamental toe reenforcement for. G. Gastrich. 2,002,888; May 28.
Stoker, Automatic coal. F. J. and G. Johnson. 2,003,199; May 28.
Stone cutter gauge. W. B. Owens. 2,002,676; May 28.
Stove. B. B. Kahn. 2,002,894; May 28.
Stove and ironing device, Combined electric. A. A. Macdonald. 2,002,608; May 28.
Strainer, Milk. S. N. North and T. J. Gurley. 2,002,865; May 28.
Strands and producing same, Twisted. W. M. Brooks. 2,002,975; May 28.
Stretching machine and operating the same. A. H. Vaughan. 2,003,127; May 28.
Strips of paper, Apparatus for splicing. W. Townley. 2,002,554; May 28.
Submersible structure. E. Mendenhall and J. B. Van Horn. 2,002,909; May 28.
Suction cleaner. B. C. Becker. 2,002,624; May 28.
Suction cleaner. W. H. Kitto. 2,003,085; May 28.
Suction cleaner. W. Leathers. 2,002,637; May 28.
Suction cleaner. F. Riebbel, Jr. 2,002,509; May 28.
Suction cleaner. H. B. White. 2,003,098; May 28.
Support: *See*—
Abdominal support. Key support.
Support for heddle bars. R. Ragan. 2,002,548; May 28.
Surfaces with abrasion resisting material, Protectively facing. K. Strobel. 2,003,019; May 28.
Surgical resection. F. C. Wappler. 2,002,559; May 28.
Swaging machine. H. A. Douglas. 2,002,502; May 28.
Switch: *See*—
Electrical switch. Telephone handset switch.
Electromagnetic switch.
Table: *See*—
Adjustable work carrying table. Red tray table.
Extension table.
Tank theft prevention device. C. M. Jones. 2,002,818; May 28.
Tape perforating machine. W. Ackerman. 2,002,516; May 28.
Tar acids, etc., Recovery of. S. P. Miller. 2,002,704; May 28.
Target. J. P. Bull. 2,002,600; May 28.
Telegraph exchange system, Automatic printing. G. A. Locke. 2,002,985; May 28.
Telephone handset switch. G. A. Graham and G. O. Tapper. 2,002,504; May 28.
Telephony. M. W. Gleskieng. 2,002,942; May 28.
Telescope. E. P. Burrell. 2,003,171; May 28.
Telescopic instrument. F. C. Wappler. 2,002,595; May 28.

Television method and apparatus. H. P. Donle. 2,002,992; May 28.
Television system. H. M. Dowsett. 2,002,937; May 28.
Tensioning device for shuttles. J. B. Plevyak. 2,002,866; May 28.
Textile lines. Device for restoring the lay to twisted. C. O. Carey. 2,003,245; May 28.
Therapeutic agent and process for making colloidal calcium malate. J. Torikian. 2,002,842; May 28.
Thermal treatment of gases and vapors. A. Cambron and C. H. Bayley. 2,002,524–5; May 28.
Thermocouple. R. E. Flatley. 2,002,532; May 28.
Thermostat. J. A. Spencer. 2,003,018; May 28.
Thermostatic controlling device. W. S. Thomas. 2,003,066; May 28.
Thickener. N. B. Lund. 2,003,261; May 28.
Thread, Making rubber. N. G. Madge. 2,002,640; May 28.
Thread or yarn cleaner. A. E. Truesdell. 2,002,843; May 28.
Throttle valve. F. J. Smith. 2,002,965; May 28.
Tires, Apparatus for the manufacture of pneumatic. H. Willshaw and F. A. Davenport. 2,002,970; May 28.
Toe protector. A. W. Hauer. 2,002,662; May 28.
Tongs, Stunning. R. W. Regensburger. 2,002,755; May 28.
Tool: *See*—
Broaching tool. Machine tool.
Honing tool. Wire connecter tool.
Tool. A. Wallace. 2,003,061; May 28.
Tool for making dynamo electric machine elements. V. G. Apple. 2,002,562; May 28.
Tool relief mechanism. T. B. Buell. 2,002,933; May 28.
Tool transmission and control, Machine. W. K. Andrew and J. B. Armitage. 2,002,728; May 28.
Toothbrush. L. W. Campbell and W. P. Watson. 2,003,243; May 28.
Tooth powder dispenser. H. B. Seeley. 2,003,093; May 28.
Toy. Y. Hirose. 2,003,193; May 28.
Toy, "Nides" twin. L. S. Bautista. 2,002,685; May 28.
Track. E. Bretschneider. 2,002,881; May 28.
Track shifting device. H. B. M. de Lange. 2,003,252; May 28.
Traction device for athletic shoes or the like. R. Nichols. 2,002,864; May 28.
Tractor. N. Lesser. 2,002,669; May 28.
Transformer, Treating-out. H. A. Rose. 2,003,011; May 28.
Transmission. J. H. Jones. 2,002,778; May 28.
Transmission control in signalling systems. N. C. Norman. 2,002,961; May 28.
Transmission device, Self-adjusting valve-operating. E. H. Hudson. 2,002,982; May 28.
Tranmission for motion picture and sound projectors, Selective. E. J. Hadley. 2,002,854; May 28.
Transmission mechanism. J. Niederhauser. 2,002,709; May 28.
Transmission, Semiautomatic. A. G. McGuire. 2,003,088; May 28.
Trap: *See*—
Floating fish trap. Grease trap.
Traveling bag. A. S. Beller. 2,002,878; May 28.
Traveling bag. M. L. Lee and A. Kaufmann. 2,002,638; May 28.
Traveling set. J. Baer. 2,003,102; May 28.
Truck. C. F. Collins. 2,003,038; May 28.
Truck. T. C. Kincaid, Jr. 2,002,605; May 28.
Truck for toy locomotive. A. C. Gilbert. 2,003,258; May 28.
Truss structure. H. L. Loudenback. 2,002,506; May 28.
Tube: *See*—
Electric discharge tube.
Tube construction, Collapsible. W. A. Roselle. 2,002,718; May 28.
Tubes and other elongated shapes, Method of and apparatus for extruding. S. W. Sparks. 2,002,966; May 28.
Tubes, Producing hot cathode. E. O. Erickson. 2,002,768; May 28.
Tumbler, Laundry shake-out. E. D. Purkett. 2,002,796; May 28.
Turbine, High vapor expansion. H. M. Barber. 2,002,497; May 28.
Twisting and winding apparatus. F. H. Shinn. 2,002,590; May 28.
Typewriting machine. W. O. Michelsen. 2,003,211; May 28.
Type-setting device. W. J. Pearson. 2,003,220; May 28.
Valve: *See*—
Fluid valve. Reducing valve.
Gate valve. Throttle valve.
Percussive tool valve.
Valve. J. R. Long. 2,002,783; May 28.
Valve. G. A. Robertshaw. 2,002,550; May 28.
Valve. S. Sorensen. 2,002,647; May 28.
Valve and making the same, Two material extruded. E. A. McBride. 2,002,641; May 28.
Valve for slush pumps. J. M. Melott. 2,002,672; May 28.
Valve for steam lines, Automatically controlled multiple. C. E. Armstrong. 2,002,761; May 28.
Valve mechanism. H. Jezler. 2,003,081; May 28.
Vehicle and pilot means therefor. D. W. Main. 2,002,901; May 28.
Vehicle body. F. J. Westrope. 2,002,596; May 28.
Vehicle brake. H. E. White. 2,002,990; May 28.
Vehicle chassis frame, Motor. A. L. Marvel and D. E. Semon. 2,002,823; May 28.
Vehicle chassis lubricating mechanism. G. R. Siegrist. 2,003,013; May 28.
Vehicle lifting and traversing device, Motor. B. Walker. 2,002,724; May 28.
Vehicle, Motor. K. M. Wise. 2,003,164; May 28.
Vehicle, Power driven. J. H. Baldwin. 2,002,518; May 28.
Vehicle ventilating apparatus. D. B. Lee. 2,002,899; May 28.
Vending machine. R. D. Parks and G. W. Hildenbrand. 2,002,753; May 28.
Ventilating apparatus for vehicle bodies. W. D. Crowell. 2,002,730; May 28.
Venturi flotation method. W. L. Sheeler. 2,002,904; May 28.
Vessels, especially bottles, Method of and device for closing up. R. Remy. 2,003,091; May 28.
Vibrating mechanism. J. Sharp. 2,002,871; May 28.
Vitamins, Isolation of water-soluble. R. J. Block and G. R. Cowgill. 2,002,519; May 28.
Voltage regulating device. B. M. Leece. 2,003,001; May 28.
Volume control, Method and apparatus for. G. Ramsey. 2,002,831; May 28.
Vulcanizer, Tire retread. W. G. Lerch and A. W. Stoner. 2,002,579; May 28.
Ware, Producing ornamental enameled. A. C. Weierich. 2,002,806; May 28.
Washer: *See*—
Hurdle washer.
Washing machine. W. V. Orr. 2,002,790; May 28.
Water, Apparatus for softening. A. Barrett. 2,003,230. May 28.
Water heating system. V. Moray. 2,002,545; May 28.
Water tank cover. B. S. Michelson. 2,003,006; May 28.
Wave translation system. H. S. Black. 2,002,499; May 28.
Weather strip. W. J. Dennis. 2,002,569; May 28.
Weather strip. J. E. Johnson. 2,002,984; May 28.
Welding apparatus, Electric. G. E. Mirfield, R. E. Lewis, C. Firth, and J. E. Neale. 2,003,118; May 28.
Welding electrode holder. H. A. Jackson. 2,003,196; May 28.
Welding equipment and welding. W. N. Barrington. 2,002,877; May 28.
Welding rod for applying protective abrasion resisting facings. K. Strobel. 2,003,020; May 28.
Wheel freeing attachment for automobile lifts. P. R. Johnston. 2,002,578; May 28.
Wheel structure. W. H. Farr. 2,003,109; May 28.
Window. T. J. Anderson. 2,002,683; May 28.
Window and screen hanger, Storm. R. J. Haug. 2,002,738; May 28.
Window fastener. C. W. Carr. 2,003,246. May 28.
Windows, Vehicle ventilating. D. B. Lee. 2,002,898; May 28.
Windscreen. C. F. Carlotti. 2,003,106; May 28.
Windshield. W. J. Grotenhuis. 2,002,736; May 28.
Windshield heater. L. Zaiger. 2,003,028. May 28.
Wiper, Windshield. W. K. Correll. 2,002,657; May 28.
Wire connecter tool. J. R. Halladay. 2,002,981; May 28.
Wire testing machine and method. C. Field. 2,002,770; May 28.
Writing implement, Combination. G. Donato. 2,002,501; May 28.
X-ray cassette. A. E. Drexel. 2,003,254; May 28.

CLASSIFICATION OF PATENTS

ISSUED MAY 28, 1935

NOTE.—First number=class, second number=subclass, third number=patent number

2— 14: 2,002,543
41: 2,003,210
84: 2,002,955
121: 2,003,217
155: 2,002,825
4— 68: 2,003,006
146: 2,002,789
242: 2,002,721
247: 2,002,948
5— 99: 2,002,607
8 - 19: 2,002,703
10— 86: 2,002,671
2,003,084
12 17: 2,003,015
33: 2,002,650
47: 2,002,512
142: 2,002,580
15 - 9: 2,002,624
16: 2,002,636
50: 2,003,215
2,003,216
155: 2,002,509
158: 2,002,637
167: 2,003,243
16 — 36: 2,003,249
146: 2,003,008
149: 2,002,738
18 8: 2,002,579
2,002,994
2,002,995
2,002,996
2,003,170
35: 2,003,092
50: 2,002,622
53: 2,002,639
54: 2,002,640
2,002,822
55: 2,003,232
57: 2,002,711
59: 2,002,527
63: 2,003,262
19 - 72: 2,002,974
20— 11: 2,002,683

U. S. GOVERNMENT PRINTING OFFICE: 1935

Patents Nos. 2,000,004 to 2,000,896

CARNEGIE LIBRARY OF ATLANTA

THE OFFICIAL GAZETTE OF THE United States Patent Office

Vol. 454—No. 1 TUESDAY, MAY 7, 1935 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $18.75; single numbers, 25 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Notice of Cancellation

U. S. PATENT OFFICE, *Washington, Apr. 18, 1935.*

Louis M. Furman, his assigns or legal representatives take notice:

An application for cancellation having been filed in this Office by The Manhattan Shirt Company, 444 Madison Avenue, New York, N. Y., to effect the cancellation of trade-mark registration of Louis M. Furman, 110 Bleeker Street, Brooklyn, N. Y., No. 156,799, dated July 11, 1922, and the notice of such proceeding sent by registered mail to the said Louis M. Furman at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Louis M. Furman, his assigns or legal representatives shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

RICHARD SPENCER,
First Assistant Commissioner.

U. S. PATENT OFFICE, *Washington, Apr. 20, 1935.*

Morris Pober, his assigns or legal representatives take notice:

An application for cancellation having been filed in in this Office by Henry J. Edwards, 61 Hanover Street, Boston, Massachusetts, to effect the cancellation of trade-mark registration of Morris Pober, 16 West 18th Street, New York, N. Y., No. 317,523, dated September 25, 1934, and the notice of such proceeding sent by registered mail to the said Morris Pober at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Morris Pober, his assigns or legal representatives shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

RICHARD SPENCER,
First Assistant Commissioner.

Applicant's Address

The requirement of Rule 33, that the post-office address of the applicant must be stated in the petition, means that the applicant must give the post-office address at which he customarily receives his mail.

The rule was made in order that the Office in necessary cases might correspond directly with the applicant and not through his attorney. The address of the attorney with instructions to send communications to the applicant in his care will not be accepted as a compliance with this rule.

Classification Bulletin No. 67

Classification Bulletin No. 67, July 1 to December 31, 1934, is now available and may be purchased from the Superintendent of Documents, United States Government Printing Office.

Adverse Decisions in Interference

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,599,389, James Aiken, Transmission mechanism, decided March 25, 1935, claims 1, 3, 4, and 5.

Pat. 1,745,213, W. M. Gray, Track lubricating apparatus, decided February 28, 1935, claim 1.

Pat. 1,788,935, W. H. Wood, Vehicle headlight, decided April 16, 1935, claims 4 and 5.

Pat. 1,796,198, C. L. Gehnrich, Oven safety control, decided March 27, 1935, claims 1, 2, and 3.

Pat. 1,870,101, W. J. Davey, Wall and ceiling structure, decided March 27, 1935, claims 1, 2, 3, 4, 5, 7, 8, 10, and 11.

Pat. 1,919,452, W. L. Semon, Rubber composition and method of preserving rubber, decided April 13, 1935, claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, and 14.

Pat. 1,943,139, P. A. Myers, Power head for a pump, decided April 16, 1935, claim 14.

Design Pat. 93,142, Frasier Smith, Design for jar, decided April 18, 1935, the claim as shown.

Condition of Applications Under Examination at Close of Business April 20, 1935

(Total number of applications awaiting action, excluding Trade-Mark Division, 34,667; Trade-Mark Division, 1,341. Oldest new case, December 20, 1934; oldest amended, December 20, 1934. The dates given are 1935 except where † indicates 1934.)

Room No.	Divisions, Examiners, and Subjects of Inventions	Oldest new application and oldest action by applicant awaiting office action: New	Amended	No. of applications awaiting action

DECISIONS IN PATENT AND TRADE-MARK CASES

Decisions of the Board of Appeals

Ex parte Schwarz

Decided March 28, 1935

1. Patents—Claims—Multiplicity.

"Numerous decisions of this Office and of the Courts condemn the practice of filing an undue multiplicity of claims, not only because of the unnecessary burden it places upon the Office and the Courts, but because it invites controversy and litigation and is harmful to the interests of the patentee in any suit in which he becomes involved."

2. Same—Same—Same.

"That the rejection upon undue multiplicity of claims upon the ground that they do not meet the requirements of the statutes, is a proper rejection, is well established by a long line of decisions."

3. Same—Same—Same.

Where an application was filed with twenty claims and in response to a rejection ten claims were canceled and eighty-five claims were inserted *Held* that the Examiner properly rejected the claims on the sole ground that so many claims had been presented that the applicant had failed to comply with the requirements of the statute that he particularly point out and distinctly claim his invention; and that it had not been made to appear that more than ten claims, as specified by the Examiner, are necessary to adequately cover the invention.

Appeal from the Examiner. Affirmed.

Mr. R. J. Schwarz and *Mr. George E. Tew* for applicant.

Before Ruckman, Redrow, and Edenburg, Examiners in Chief. Ruckman, Examiner in Chief

This is an appeal from the final rejection of all the claims in the case, 46 in number.

In view of the fact that the claims were rejected on the ground of undue multiplicity, it is unnecessary to quote typical claims. Moreover, since the final rejection was not based on prior art, there is no need of citing the references given in the early Office actions.

The nature of the invention is concisely described in the Examiner's statement. It is sufficient here to refer to the Examiner's statement that "the alleged invention is simple" and to the appellant's concurrence therewith on page 15 of his brief.

In his statement, the Examiner gives the ground of his rejection as follows:

"All the above claims were rejected as a group on the ground of indistinctness due to multiplicity of claims, without applying references, since the number of claims was so excessive that the case was deemed to come within the class mentioned as follows in lines 10 to 14 page 15 of the decision *Ex parte* McCullough, 1927, C. D. 12.

"'There may be applications, such as this one when originally filed, in which it is obvious from even a cursory examination of the application and the prior art, that so many claims have been presented that applicant has failed to comply with the requirement of section 4888 Revised Statutes, that he 'distinctly claim' his invention.'"

The record discloses the following prosecution of the case: the application was filed with 20 claims, all of which were rejected on references in the first Office action. In response to this rejection, appellant cancelled 10 claims, amended the other 10 claims and inserted 85 new claims. In his next action, the Examiner rejected the 95 claims on the ground that they did not comply with the statutes in particularly pointing out and distinctly claiming the invention and held that the number of claims presented was so unreasonable as to bring the case within the general class condemned in the third paragraph, page 15 of the McCullough decision, 1927, C. D. 12. The Examiner added that "in view of the references cited, 10 claims would be more than enough". Applicant then cancelled 13 claims whereupon the Examiner finally rejected the 82 claims remaining in the case. The applicant then petitioned the Commissioner to instruct the Examiner to withdraw the final rejection on the ground of multiplicity of claims. The Commissioner denied the petition as follows:

"This is a petition requesting that the Examiner be instructed that the entry of the final rejection without applying the references to the claims and pointing out in what respects the claims do not distinguish patentably from the references or from each other was improper and should be withdrawn.

"At the time the final rejection was made, the application contained eighty-two claims which, in the opinion of the Examiner, was such an excessive number, in view of the nature of the invention and the state of the art as revealed by cited references, that they could not and did not particularly point out and distinctly claim the invention as required by the statutes. The final rejection offers a clear issue which is reviewable by the Board of Appeals and the Courts. It is believed that the Examiner acted within his authority in resorting to a rejection of this character and his action will not be disturbed on petition.

"If, however, the applicant will present an amendment within thirty days to limit the claims to a number regarded by the Examiner as reasonable, the Examiner should enter the restricted amendment and give an action upon the merits of the claims presented therein."

Following this decision the applicant reduced the number of claims to 46. The Examiner then held that

"in view of the Commissioner's decision, applicant should either limit the number of claims to 10 or less, or appeal to the Board".

The present appeal was then filed.

The two main grounds of appellant's appeal are (1) that the Examiner erred in rejecting the claims on the ground that they do not comply with the statutes in that they do not particularly point out and distinctly claim the invention and (2) that the Examiner erred in requiring the appellant to reduce the number of claims to 10, or less, and in finally rejecting the claims without specifically pointing out why he believed the number of claims excessive, or acting on the merits of the claims.

[1] Numerous decisions of this Office and of the courts condemn the practice of filing an undue multiplicity of claims, not only because of the unnecessary burden it places upon the Office and the courts, but because it invites controversy and litigation and is harmful to the interests of the patentee in any suit in which he becomes involved.

[2] That the rejection upon undue multiplicity of claims upon the ground that they do not meet the requirements of the statutes, is a proper rejection, is well established by the long line of decisions cited in the Examiner's statement. That is so well settled that we will refer to but three of these

decisions. The U. S. Supreme Court in the case of *Carlton v. Bokee*, 17 *Wallace*, 463, stated as follows:

"Without deciding that a repetition of substantially the same claim in different words will vitiate a patent, we hold that where a specification by ambiguity and a needless multiplication of nebulous claims is calculated to deceive and mislead the public, the patent is void."

In the case of *In re* Wells, 1932 C. D. 310, 420 O. G. 232; 56 F.(2d) 674; 19 C. C. P. A. 1044, the U. S. Court of Customs and Patent Appeals made the following statement:

"The fourteen claims to cover this comprise about two thousand words, or something more than one-fourth the number which were used in framing the Constitution of the United States. We really feel that appellant could have reduced the number without sacrificing either substance, clarity or protection . . . it seems to us to have been unnecessary to have so many claims."

The same court, *In re* Spencer, 1931 C. D. 224, said:

"Appellant filed his application in the Patent Office for an improvement in thermostats. Attached to his application were a multitude of claims which unnecessarily and vexatiously clouded the issue. The Examiner and the Board of Appeals both referred to this unnecessary duplication, and had it in mind while making allowance of certain claims to the appellant. The practice of filing unnecessary duplicates of claims, differentiated from each other by only the slightest change of language and with no material advantage to the applicant, can not be too strongly condemned and is more often an indication of the inability of the pleader to properly state his case than of anything else."

Concerning the second ground of appellant's appeal, the following decisions are considered pertinent.

The commissioner's decision in *ex parte* McCullough, in the extract quoted above from the Examiner's statement, held that there may be applications in which it is obvious from even a cursory examination of the application and the prior art, that so many claims have been presented that applicant has failed to comply with section 4888 R. S.

In *ex parte* Duncan, 1920 C. D. 36, where the application involved 21 claims, the assistant commissioner held:

"The most emphatic and important requirement of the patent law is that the patentee shall distinctly point out his invention. He has no right to a patent which contains any claim or set of claims which for any reason fail to do this thing. Duplicating claims invariably brings this about, and an entire set of claims should be rejected as indistinct whenever by reason of duplication it is made uncertain to the reader what the invention is. The different claims must be on their face obviously different in substance."

This decision further states that it is the duty of the applicant rather than that of the Examiner to point out how each claim patentably differs from every other one. The appellant in that case was given 30 days in which to file "a small set of claims", each of which, clearly distinguished from every other in a patentable sense. Instead of complying with this requirement the appellant took an appeal to the Court of Appeals of the District of Columbia which affirmed the decision of the Commissioner, *In re* Duncan, 1920 C. D. 197, 49 App. D. C. 372, 265 Fed. Rep. 1012.

In *ex parte* Oswald, 1925 C. D. 20, the application as filed, contained 135 claims. The Examiner rejected the claims under *ex parte* Duncan and stated:

"that if applicant insisted upon retaining more than 15 or 20 claims in the case he should specifically point out how he considered each claim to patentably distinguish from all the other claims."

A petition from the Examiner's action was denied by the Commissioner.

In *ex parte* Chipman, 1910, C. D. 49, the Commissioner gave the applicant the privilege of further prosecution provided he reduced the number of claims by one-half. The decision states, "the Examiner might properly have required the reduction to 6 claims before acting upon the merits".

The case of *In re* Prescott & Rummler, 1922, C. D. 119, 51 App. D. C. 281, 287 Fed. Rep. 590, the Court of Appeals in the District of Columbia found that the invention of the application was not met in the references but held:

"Inasmuch however as claim 28 completely covers applicant's contribution to the art, there is no reason for allowing a large number of claims, and thus inviting controversy and litigation."

We particularly call attention to the decision of the U. S. Court of Customs and Patent Appeals rendered February 25, 1935, 24 U. S. Pat. Q. 375, in the case of *In re* Buttolph, Patent Appeal, No. 3,476, as the most recent and emphatic decision of the court on this subject. The part of said decision dealing with the matter of multiplicity of claims reads as follows:

"With reference to the question of undue multiplicity of claims, the Solicitor for the Patent Office stated in his brief that 'Aside from the electrical circuits and connections to the electrodes, which are involved in the appealed claims only in a broad way, there is left nothing of appellant's device but the tube with electrodes at each end and a gaseous filling therefor.' On this simple subject matter, aside from the ten claims allowed, appellant has seen fit to present the some thirty-four claims involved on the appeal. The statutes require (U. S. C., Title 35, sec. 33) that the applicant, in order to obtain a patent, 'shall particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery.'"

"In the case of *ex parte* McCullough, supra, the Commissioner of Patents pointed out the difficulties attending the filing of patent applications containing undue multiplicity of claims, and stated that such applications interfered with the work of the Patent Office; that they were unfair to the applicants themselves, to other inventors, and to the public; that they had been condemned by a committee representing the 'Patent Bar Association'; that protracted consideration of such applications by the Patent Office had been criticized by committees of Congress; and that the courts had, at times, expressed disapproval of the issuance of patents containing an unnecessarily large number of claims.

"Obviously, if permanent relief is to be had in the premises, it is necessary for the Patent Office tribunals to enforce compliance with the provisions of section 4888 of the Revised Statutes (U. S. C., Title 35, sec. 33), which read:

'Before any inventor or discoverer shall receive a patent for his invention or discovery, he shall make application therefor, in writing, to the Commissioner of Patents, and shall file in the Patent Office a written description of the same, and of the manner and process of making, constructing, compounding, and using it, *in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same;* and in case of a machine, he shall explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions; *and he shall particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery.* The specification and claim shall be signed by the inventor. No plant patent shall be declared invalid on the ground of noncompliance with this section *if the description is made as complete as is reasonably possible.* [Italics ours.]'

"We are not unmindful of the fact that it is sometimes difficult to define an alleged invention with conciseness and precision. However, such difficulty ought not to be used as an excuse to present an unnecessarily large number of claims, the net result of which is to confuse, rather than to clarify, the issues relative to an alleged improvment, which, it is claimed, involves invention.

"Although we are in entire accord with the specific reasons assigned and discussed by the Board of Appeals in its rejection of the appealed claims, we are of opinion, nevertheless, that they might well have been rejected on the sole ground of undue multiplicity. *In re Duncan*, 49 App. D. C. 372, 265 Fed. 1012, affirming the decision of the Commissioner of Patents in *ex parte Duncan*, 1920 C. D. 36. See also *In re* Dann, supra; *In re* Spencer, supra."

[3] From our examination of the present case, we are clearly of the opinion that so many claims have been presented, that appellant has failed to comply with the requirement of the statutes that he particularly point out and distinctly claim his invention.

By the limitation to 10 claims, we understand in accordance with the Commissioner's decision, *ex parte* Oswald, 1925 C. D. 20, the Examiner means that 10 claims

"seem to him a reasonable number and that it was incumbent upon the applicant to show why a greater number was necessary".

We think the Examiner was justified in view of the simplicity of the invention in requiring the claims to be limited in number and appellant has not satisfied us that more than 10 claims, as specified by the Examiner, are necessary to adequately cover the invention.

The decision of the Examiner rejecting the claims on the ground of undue multiplicity is affirmed.

U. S. Court of Customs and Patent Appeals

ROSSITER v. ELLIS

No. 3,358. Decided December 24, 1934

1. INTERFERENCE—MOTIONS—DELAY IN BRINGING.

R. *Held* not entitled to raise on appeal to the Court of Customs and Patent Appeals the question whether the claims in the renewal application of E. are for a different invention from that originally claimed since he did not make a motion to dissolve on that ground and the mere fact that the court had construed Section 4897 R. S. in a subsequent decision does not excuse the delay in bringing the motion.

2. SAME—SAME—PRIORITY.

Record reviewed and *Held* insufficient to establish that the disclosure of E. is inoperative and that priority was properly awarded to him since the party R. alleged no date of conception as early as E's. filing date.

APPEAL from the Patent Office. Affirmed.

Mr. H. C. Bierman, *Mr. Chas. S. Grindle* and *Mr. Leonard A. Watson* for Rossiter.

Mr. Sol Shappirio for Ellis.

GRAHAM, *P. J.*:

The appellant, Edmund C. Rossiter, filed his application in the United States Patent Office, Serial No. 145,369, on October 30, 1926, for patent upon a process for the manufacture of artificial resins. This application discloses a process wherein thiourea is dissolved in an aqueous solution of formaldehyde and heated to between 60° and 70° C. The specification further discloses that such a solution remains clear for a considerable period, but that the properties of the product obtained after drying render the use of accelerators desirable during the subsequent molding with heat; that with a similar treatment, when urea is used instead of thiourea, the mixture becomes solid and useless for some purposes; that one object of the invention is to obtain resins suitable for molding purposes which are insoluble in water, and that another object is to produce solutions which retain the properties of the thiourea condensation product so far as regards solubility, but—

whose subsequent condensation into the final product takes place more readily than that of the thiourea condensation product alone.

This statement is then made in the specification:

If equivalents of urea are used up to a proportion such that about 25% of the thiourea is replaced, clear solutions are obtained which, on concentration, yield the resin as a clear or nearly clear syrup.

If, however, the thiourea is replaced to the extent of more than 25%, then the products become more and more turbid, as the proportion of urea is increased, which effect may be obviated largely by the addition of a little ammonia.

On September 3, 1924, the appellee, Carleton Ellis, filed his application in the Patent Office for a patent on certain alleged improvements in urea products and processes of making the same, and which application was renewed on April 13, 1929, as Serial No. 735,600.

The Ellis application referred particularly to sheets or other articles of mica, which were formed by cementing together flakes or particles of mica—

with the aid of a resinous product prepared from urea especially from urea and formaldehyde or from derivatives of urea such as thiourea and to the process of making same.

An examination of the specification in this application discloses that it was the object of the inventor—

to obtain a synthetic resin which may be prepared of fairly constant quality that will have satisfactory cementing or binding effect.

The specification discloses that not all resinous phenol formaldehyde products have the ability to "wet" such material, but that the solid compounds obtained by the reaction of formaldehyde with urea do have such a characteristic, and have the further property of hardening or setting when heated. An example of the process is given in these words:

As an example 30 parts by weight of urea are dissolved in 120 parts of aqueous 40 percent formaldehyde and 3 parts of phthalic acid or phthalic anhydride are added. As the urea dissolves in the formaldehyde solution there is a decided lowering of temperature. Then the solution begins to show signs of turbidity which change is accompanied by a gradual rise in temperature. The reaction is exothermic. The solution finally becomes milky about the time the spontaneous temperature rise has reached its maximum. In one case the temperature went from 28 to 67° C. in about 20 minutes. The reaction mixture was allowed to stand for 1 hour during which time the temperature dropped to 42° C. Heat was applied and the temperature was raised over a period of one-half hour to 76° C. and then more gradually over a period of 2 hours to 94° C. After heating for about 45 minutes the mixture began to clear but a longer heating was required to completely clarify the solution. A syrupy solution was obtained having a specific gravity of 1.151 at 25° C. the solid content of which was 44 per cent.

Further in the specification, the appellant stated,

In place of urea, mixtures of the latter and thiourea and the like may be employed in some cases or even the thiourea by itself subjecting it to appropriate treatment with formaldehyde.

On June 10, 1929, an interference was declared between said applications, the counts of this interference being five in number, they being the first five counts in the interference, as it is now before us. The appellant then moved to dissolve the interference on the grounds that Ellis could not make the counts, and that the application of Ellis did not show an operative process. The party Ellis moved to amend by adding proposed counts 6, 8, 9, 10, 11, and 12. Rossiter's motion to dissolve was supported

by two affidavits which purported to show inoperativeness of Ellis' disclosure.

The Law Examiner overruled the motion to dissolve, and allowed the amendment. Thereupon Rossiter, the appellant, being the junior party, was ordered to show cause why an award of priority should not go to Ellis. Rossiter then moved that the order to show cause be vacated, and time be set for the taking of testimony on the question of Ellis' right to make certain of the claims in the issue, it being stated that it was desired to establish, by evidence, that the Ellis application did not disclose an operative process. This was a repetition in part of the said motion to dissolve which had been made by Rossiter on November 4, 1929, and which motion had been supported by affidavits of chemists which, it is claimed by Rossiter, established a *prima facie* case of inoperativeness.

The Examiner of Interferences denied the motion to take testimony, which decision was reversed by the Commissioner of Patents, and testimony was duly taken.

On August 19, 1931, the party Rossiter moved to dissolve on the grounds that "a statutory bar exists against the grant of a patent to him (Ellis)." In the alternative, it was moved that the burden of proof be shifted from Rossiter to Ellis, the ground given being that the present claims of the issue relate to a different subject matter than the subject matter included in the original Ellis application.

The Examiner of Interferences held that the motion period had expired on November 4, 1929, and that the motion of August 19, 1931, to dissolve, was brought too late, and that the affidavits filed in support thereof were not sufficient to support the same, and denied the motion to dissolve.

On final hearing, the Examiner of Interferences held that the burden of establishing that Ellis' disclosure was inoperative, was imposed upon the party Rossiter; that Rossiter had the burden of establishing and sustaining a *prima facie* case, and that—

> such case is not established if in the opinion of the Examiner the disclosure is operative if the matter set out in the disclosure is modified or added to in regard to details within the non-inventive ability of one skilled in the art at the time of filing.

The Examiner of Interferences, after an extended discussion, came to the conclusion that Rossiter had failed to establish the inoperativeness of Ellis' disclosure, and therefore awarded priority to the senior party Ellis.

The Board of Appeals was of opinion that counts 1, 4, 6, 7, and 9 were typical of all the counts of the interference, and discussed them at length. The Board was of the opinion that it might not consider the questions presented, but not directly passed upon, by the Examiner of Interferences. These were the questions arising out of the motion of Rossiter to dissolve, made after the motion-making time had expired. With regard to the holding as to insufficiency of disclosure and inoperativeness, the Board said:

> • • • The Examiner of Interferences, Law Examiner and Primary Examiner have all held that the disclosure is sufficient and we can see no good reason for taking a contrary position. We fail to see why it is necessary after making a statement as above quoted that in each instance an example be given of the process with mixtures as well as individual elements of the mixture set forth. Unless there is something essentially different and unusual about the reactions with the use of urea, thiourea or the mixtures of urea and thiourea in the process, it seems superfluous to give duplicate examples for each of the elements referred to.

Following this, the Board concluded that the disclosure in the Ellis application—

> is a *prima facie* disclosure of an operative process and that appellant has failed to present proofs, satisfactory to us, to the contrary.

Finally, the Board affirmed the decision of the Examiner.

The reasons for appeal filed by the appellant embrace three general subject matters: First, that the Board was in error in finding that the party Rossiter had not established the inoperativeness of the Ellis disclosure; second, and more specifically, that the Board of Appeals was in error in refusing to hold that Ellis' application did not disclose an operative process to produce a solution containing a condensation product of urea with formaldehyde, and a condensation product of thiourea with formaldehyde, the condensation products having substantially the same degree of condensation; third, in general, that the Board was in error in not finding that Ellis was confined to the filing date of his renewal application, as the question was raised by Ellis' last motion to dissolve, and which was filed, as has been stated, after the time for filing such motions had expired.

Counts 1, 4, 6, 7, and 9 are as follows:

> 1. The process for the manufacture of an improved solution for use in preparing moulding products from synthetic resin which consists in causing the intermixing in solution of a condensation product of thiourea and formaldehyde with a condensation product of urea and formaldehyde, the condensation products being of substantially the same degree of condensation.
>
> 4. A solution for use in preparing moulding products from synthetic resin, the solution containing in a dissolved state a condensation product of thiourea and formaldehyde and a condensation product of urea and formaldehyde, the condensation products being of substantially the same degree of condensation.
>
> 6. A resinous complex containing the condensation products of formaldehyde with urea and a formaldehyde with thiourea, the condensation products being of substantially the same degree of condensation.
>
> 7. The method of making a resinous complex which comprises interacting formaldehyde with urea and formaldehyde with thiourea to produce a condensation product of each of the ingredients specified, the condensation products being of substantially the same degree of condensation.
>
> 9. The process for the manufacture of an improved solution for use in preparing molding products from synthetic resin which consists in dissolving urea and thiourea in formaldehyde without heating the solution to the boiling point for any substantial period of time.

[1] In order that the issues may be more precisely defined, attention will be given to the appellant's last motion to dissolve, filed August 19, 1931, and which was filed after the period for filing motions had expired. This motion was based upon the contention that the appellee was claiming in his renewal application herein involved, a different invention than that claimed in his original application. As a reason for not raising this point within the appointed period, the appellant filed affidavits by which it is shown that counsel had just been advised of the holding of this court in *In re Kaisling*, 18 C. C. P. A. (Patents) 740, 44 F.(2d) 863, in which this subject was discussed.

We are unable to conclude that Rossiter has made any showing sufficient to excuse his failure to file this motion to dissolve during the motion period, in conformance with rules 130 and 122 of the office. The concluding language of rule 122 is significant:

> • • • If in the opinion of the Examiner of Interferences the motion be not in proper form, or if it be not brought within the time specified and no satisfactory reason be given for the delay, it will not be considered and the parties will be so notified.

The mere fact that this court, in *In re Kaisling*, supra, may have construed section 4897 Revised Statutes, did not change the rule or the law.

The Examiner of Interferences refused to pass upon the matters raised by this motion, and the Board of Appeals affirmed this holding. We are of opinion there was no reversible error in such holdings.

> It is familiar law that a party challenging the right of his opponent to make the contested claims must do so at the inception of the proceeding by motion to dissolve the interference.
>
> *Rocke* v. *Bogdonoff*, 56 App. D. C. 140, 10 F. (2d) 1005.

This is not such a question as was thought by the majority of the court in *Sundstrand* v. *Gubelmann*, 55 App. D. C. 200, 4 F.(2d) 166, to be a jurisdictional one which could be first raised on appeal.

This holding disposes of the claims of the appellant described in the following language by the Board of Appeals:

> Other grounds of appeal are that the Examiner of Interferences erred in failing to hold that Ellis is barred from obtaining a patent for the subject matter in issue on his renewal application involved in the interferences because under section 4897 Revised Statutes such subject matter is not the same invention as was claimed in the original Ellis application before and at the time the same was originally allowed. It is also urged that the Examiner of Interferences erred in failing to hold on the record that Ellis is not entitled to any date of reduction to practice, constructive or otherwise, before April 13, 1929, the renewal date of his application, Serial No. 735,600, involved in this interference. As another ground it is stated that the Examiner of Interferences erred in failing to hold that the Rossiter British Patent No. 266,028, which is alleged to be patented and received in this country more than two years before Ellis renewed his application, constitutes a statutory bar against Ellis under section 4886 Revised Statutes.
>
> As to these latter grounds for appeal, the Examiner of Interferences refused to consider them inasmuch as they were raised after the motion period had terminated and no sufficient reason given for delay in presenting the motion. It is a well recognized practice in this office that matters not considered by the tribunal of original jurisdiction will not ordinarily be reviewed on appeal. • • •

This leaves for consideration the questions presented by appellant's motion to dissolve filed November 4, 1929. Five specific grounds are therein urged, as follows:

First. That Ellis is entitled to no claims that do not include phthalic acid or its equivalent, because of the limitations of the prior art; that the—

> prior art shows it to be old to heat together urea or thiourea with formaldehyde until condensation takes place, and the only difference between the prior art and the Ellis disclosure, so far as production of a resin solution is concerned, is that Ellis includes phthalic anhydride in his procedure.

Second. That Ellis has stated in his specification that thiourea and mixtures of thiourea and urea are the equivalent of the urea in his specific example, and that Ellis has failed to prove this to be true, and that, in fact, it is not true.

Third. That the counts are limited to a solution of the reaction product of urea, thiourea, and formaldehyde; that Ellis' disclosure, including phthalic anhydride, does not satisfy these counts.

Fourth. That Ellis' application does not disclose a procedure which is operative to produce a resin solution as specified in the counts of the issue.

Fifth. That Ellis' application does not disclose a procedure which would be operative to produce a solution such as defined by the counts of the issue, as shown by experiments and by the affidavits of Barsky and Wohnseidler, but will produce only a "heavy flocculent precipitate."

As to the first ground above alleged, the Law Examiner, in his decision of June 19, 1930, held adversely to the party Rossiter and that specific ground does not again appear of record, nor is it urged as a reason for appeal here. As a matter of fact, the appellant makes no insistence here that Ellis' claims are not patentable.

As to the second and third grounds of said motion, we find ourselves in harmony with the decision of the Law Examiner, where, in discussing these points, he says:

> Ellis states that his invention relates to sheets or other articles of mica formed by cementing together flakes or particles of mica with the aid of a resinous product prepared from urea and formaldehyde or from derivatives of urea such as thiourea and to the process of making the same. He states that the solid compounds obtained by the reaction of formaldehyde with urea have the property of adhering to mica and are therefore useful in making sheets from mica splittings. A formula for making a solution is given in which urea, formaldehyde, and phthalic acid or phthalic anhydride are used. He states "in place of urea, mixtures of the latter and thiourea and the like may be employed in some cases or even the thiourea by itself subjecting it to appropriate treatment with formaldehyde." Ellis' claims first presented covered articles made from mica flakes or sheets cemented together with urea or urea formaldehyde resin and processes of making composite sheets in which a cementing solution of "urea formaldehyde resin" was used.
>
> Count 3 is the broadest of the group and comprises the single step of simultaneously dissolving urea and thiourea in formaldehyde. It is considered that Ellis has sufficient a disclosure to support this count in his statement that mixtures of urea and thiourea may be used, obviously by dissolving in formaldehyde. It is not necessary that Ellis should show he appreciated that the thiourea had an accelerating action on the urea which action is alleged by Rossiter, so long as he appreciated it would produce a solution that would adhere to mica, as evidently he did. Nor should he be confined to the addition of phthalic or other organic catalyst such as phthalic acid and that in other cases an alkaline catalyst such as ammonia may be employed but that his invention contemplates the use of urea resin whether made in acid, alkaline or neutral solution. The neutral solution obviously would exclude phthalic acid.

The controversial question, therefore, arises upon the operability of Ellis' disclosure.

[2] Both parties took testimony on this question. A series of *ex parte* and *inter partes* experiments were conducted and the results include certain physical exhibits, and also a very considerable volume of testimony. As we agree with the conclusions of the Board of Appeals, it seems unnecessary to comment at length upon this testimony. A few suggestions, however, are pertinent. Counts 1, 2, 3, 7, 9, and 11 are for a process, while counts 4, 5, 6, 8, and 10 are for a product. It will also be observed that the first five counts and count 9 of the interference are for a "solution" or process for making the same. The other counts are for "a resinous complex" or synthetic resin, or method of making the same.

The general impression created upon the mind by reading the record is that, in conducting the experiments, the witnesses for the party Rossiter were not so much endeavoring to completely test out the

operativeness of Ellis' disclosure, as to establish the fact that it was not operative. The facts in the record show plainly that urea and thiourea products are extremely sensitive products and that the least alteration of methods of manufacture may, and usually does, produce great changes in the products, ranging all the way from syrupy solutions to flocculent, useless products. Variation in degrees of heat, length of heating, the time of adding, and character of, catalysts or agents such as phthalic anhydride, all effect marked changes in the product.

The appellant insists that the following of Ellis' one example will not produce a syrupy solution, and hence is not operative. This contention is based upon the fact that Ellis recites, in his example, that he obtained "a syrupy solution," after certain processes. As said by the Board:

> We note that counts 1–5, inclusive, and 9 are the only counts which refer to a *solution*, and *not necessarily a syrupy solution*. We also note that there is nothing to indicate in the counts that a permanent solution is obtained in which the resins or resinous complexes exist in permanently soluble form and in which no further conversion to the insoluble form can gradually take place. In fact the counts might be construed to cover soluble resinous complexes which are not completely in solution at ordinary temperatures but will redissolve on heating. It therefore should be proven on behalf of Rossiter that a solution cannot be obtained at any time following the disclosure of the Ellis application.

We agree with these suggestions of the Board.

Furthermore, as we read the record, syrupy solutions were obtained in some of the Rossiter experiments, as well as in those of Slaughter, a witness for the appellee. Practically all the experiments showed a syrupy solution at some time during the experiments. This solution, it was testified, changed, in some cases, into a solid sedimentary deposit, the exact character and nature of which is not clearly shown by the record. What would have happened if the process had been stopped while the materials were in solution, also does not appear. On the whole, there is no preponderating proof that the disclosure of Ellis is inoperative.

The samples of the results obtained, and which are before the court, are of little or no evidentiary value, as it plainly appears of record that such products are not stable and are apt to change from time to time. Furthermore, it is, to say the least, doubtful whether those who conducted the tests on the part of the party Rossiter followed the method disclosed by Ellis, in the time and manner of adding phthalic acid or phthalic anhydride. Obviously, Ellis, in his typical example, intended that this element be added after the urea or thiourea had been dissolved in the formaldehyde.

It is contended by counsel for appellant that certain counts of the interference should be so construed as to cover a process in which a condensation product of urea and formaldehyde was first produced, then, separately, a condensation product of thiourea and formaldehyde, and then a mixing of these resulting condensation products. The counts of the interference, however, are not thus confined, but are broad enough to cover a simultaneous mixing of urea, thiourea, and formaldehyde. As remarked by the Board of Appeals, the one example given by Rossiter discloses just such a simultaneous admixture. It is:

> The invention is illustrated in the following example: 96 lbs. of thiourea and 74 lbs. of urea are dissolved in 271 lbs. of formalin containing 120 lbs. of formaldehyde; the mixture is warmed to 60°–70° C. until all the thiourea and urea has dissolved. A turbid solution is obtained which after remaining a few hours to allow the condensation to take place is evaporated at 70°–80° C. by blowing a brisk current of air through it, until the solution of the condensation product is sufficiently concentrated or until all adhering water is evaporated.

Appellant contends that count 9 will not read on appellee's disclosure, because of the fact that this count provides that the solution may not be heated to the boiling point for any "substantial period of time," and that Ellis does so heat his solution. The Law Examiner points out, we think properly, that this count only limits such heating to the period when the dissolving of the products is occurring. Ellis' one example shows that, during this period, the temperature of the mixture does not rise above 67 degrees centigrade.

We find no error in the decision of the Board of Appeals and it is affirmed.

We have examined those portions of the record brought here by certiorari, after suggestion of a diminution of the record, by appellee. Of these, papers 1 and 2, the preliminary statements of the parties, and paper 106, a supplemental decision by the Board of Appeals, should have been included in the record, and the costs of printing these items are taxed against the appellant. Papers 68, 79, and 88, relating to a motion to suppress and a motion to strike, are not involved in the issues on appeal here, and the costs for printing the same will be taxed to the appellee.

Affirmed.

Patent Suits

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922]

908,125, F. C. Overbury, Roofing member and the method of making same; 1,410,018, O. P. Kiracofe, Roofing machine, D. C. N. J., Doc. E 1168, *Flintkote Co.* v. *National Asbestos Mfg. Co.* Decree for complainant Mar. 18, 1935.

Disclaimers

1,911,008.—*William H. Withington*, New York, N. Y. LIQUID CLARIFIER. Patent dated May 23, 1933. Disclaimer filed April 12, 1935, by the patentee, the assignee, *Hardinge Company, Incorporated*, consenting and approving.

Hereby enters this disclaimer to that part of the claims in said specification which is in the following words, to wit: Claims 4, 24, and 37 of my above-identified patent, reading as follows:

"4. In a settling device the combination of a tank, scraper means in said tank, means for moving the scraper over the bottom of the tank in one direction, leverage mechanism operative when the scraper is moved in the opposite direction for raising the scraper away from the bottom of the tank, and means for removing the settled and scraped substances from the tank."

"24. A clarifier for sewage and the like comprising a tank, a carriage movable thereover, sludge scraping means carried by the carriage for scraping sludge from the bottom of the tank, said scraper means being relatively displaceable from a scraping position to a non-scraping position, leverage mechanism for controlling the position of said scraper means, and means at each end of the tank for operating said leverage mechanism."

"37. A clarifier for sewage and the like comprising a tank, a carriage movable thereover, sludge scraping means carried by the carriage for scraping sludge from the bottom of the tank and including a blade movable into and out of sludge scraping position, means for moving the carriage alternately in opposite directions over the tank, means for positioning the sludge scraping means in operation and inoperative positions, and stationary means rendered operative by the movement of the carriage for controlling the positioning of said blade."

1,991,455.—*Christian Gottwald*, Cleveland Heights, Ohio. CONDUIT AND CONDUIT SYSTEM. Patent dated February 19, 1935. Disclaimer filed April 16, 1935, by the assignee, *The Rio-wiL Company*.

They therefore, in compliance with R. S. 4917; 35 U. S. C. 65, severally and jointly enter this disclaimer as follows:

They disclaim from claim number 11 any unit in which a central tube and outer covering are hermetically sealed together at both ends of the covering and intermediate the ends of the central tube to provide an hermetically sealed jacket about a portion of said central tube.

Adjudicated Patents

(D. C. Ill.) Wahl patent, No. 1,487,189, for clipper, claim 2 *Held* valid and infringed. *Wahl v. Brown & Sharpe Co.*, 9 F. Supp. 902.

(C. C. A. Ohio) Wood patent, No. 1,788,935, for lens, claims 1 and 3 *Held* not infringed and claims 5, and 6 *Held* invalid. *Wood v. Peerless Motor Car Corporation*, 75 F.(2d) 554.

(C. C. A. Minn.) Gray patent, No. 1,810,826, for grease service rack *Held* invalid. *Gray v. Texas Co.*, 75 F.(2d) 606.

(D. C. Mass.) Earnshaw patent, No. 1,852,993, for play suit, *Held* invalid and infringed. *Earnshaw Knitting Co. v. William Carter Co.*, 9 F. Supp. 910.

TRADE-MARKS

OFFICIAL GAZETTE, MAY 7, 1935

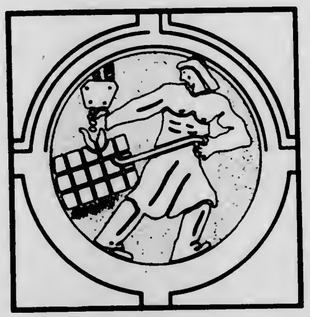
[VOL. 454 · No. 1]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1



Raw or Partly-Prepared Materials

Ser. No. 337,960. HENRY LAUHOFF CEREAL MILLS, INC., Detroit, Mich. Filed May 18, 1933.

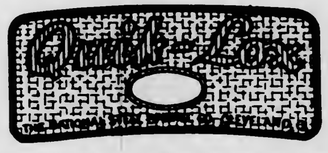
Reishlax

For Rice Flakes and Cereals for Brewers' Grains.
Claims use since June, 1928.

Ser. No. 358,026. PERLSTEIN BROTHERS, New York, N. Y. Filed Nov. 8, 1934.

For Sole Leather.
Claims use since January, 1934.

Ser. No. 362,492. SYLVANIA INDUSTRIAL CORPORATION, Fredericksburg, Va., and New York, N. Y. Filed Mar. 13, 1935.



OLD GOLD

For Sheets Made of Regenerated Cellulose.
Claims use since Feb. 26, 1935.

CLASS 2

Receptacles

Ser. No. 362,523. THE NATIONAL STEEL BARREL COMPANY, Cleveland, Ohio. Filed Mar. 14, 1935.

No claim is made to the words "Quik-Lox" and "Cleveland, O." apart from the mark as shown. The drawing is lined for red and gold.

For Metal Shipping and Storing Drums and Barrels of the Removable Head Type.
Claims use since Jan. 26, 1935.

105,603. CERTAIN NAMED FINISHED LOCOMOTIVE-ENGINE PARTS. Registered August 10, 1915. THE LOCOMOTIVE FINISHED MATERIAL COMPANY, Atchison, Kans., a corporation of Kansas. Renewed August 10, 1935.

105,681. A LIQUID SHAMPOO. Registered August 10, 1915. THE R. L. WATKINS COMPANY, Cleveland, Ohio. Renewed August 10, 1935, to The R. L. Watkins Company, New York, N. Y., a corporation of Ohio.

105,685. A REMEDY FOR RHEUMATIC AFFECTIONS AND NEURALGIAS. Registered August 10, 1915. THE BAYER COMPANY, INC., New York, N. Y., a corporation of New York. Renewed August 10, 1935.

105,714. ADHESIVE PASTE. Registered August 17, 1915. THE CARTER'S INK COMPANY, Cambridge, Mass., a corporation of Massachusetts. Renewed August 17, 1935.

105,722. CERTAIN NAMED SPORTING SUPPLIES. Registered August 17, 1915. THE ENTERPRISE MANUFACTURING COMPANY, Akron, Ohio, a corporation of Ohio. Renewed August 17, 1935.

105,736. DENTIFRICE AND TOOTH-CLEANING COMPOUND. Registered August 17, 1915. LAVORIS CHEMICAL COMPANY. Renewed August 17, 1935, to The Lavoris Company, Minneapolis, Minn., a corporation of Delaware, assignee.

105,781. WRENCHES. Registered August 17, 1915. BONNEY VISE & TOOL WORKS INC., Philadelphia, Pa.; New York, N. Y.; and Allentown, Pa. Renewed August 17,1935, to Bonney Forge and Tool Works, Allentown, Pa., a corporation of Pennsylvania, by change of name.

105,787. MUSTARD. Registered August 17, 1915. CHARLES GULDEN. Renewed August 17, 1935, to Charles Gulden, Inc., New York, N. Y., a corporation of New York, assignee.

105,828. ELECTRICITY-METERS, ELECTRIC INDICATORS, ELECTRIC TESTING APPARATUS, AND ELECTRIC RECORDING INSTRUMENTS. Registered August 17, 1915. SANGAMO ELECTRIC COMPANY, Springfield, Ill., a corporation of Illinois. Renewed August 17, 1935.

105,851. ENAMELED METAL SIGNS. Registered August 24, 1915. INGRAM-RICHARDSON MANUFACTURING COMPANY, Beaver Falls, Pa., a corporation of Pennsylvania. Renewed August 24, 1935.

105,854. WHISKY. Registered August 24, 1915. JOHNSTONE SADLER AND COMPANY, LIMITED. Renewed August 24, 1935, to John Walker & Sons, Limited, London, England, a corporation of Great Britain, assignee.

105,918. A CREAM PREPARATION FOR TOILET USE. Registered August 24, 1915. PETRA FOLKMAN, New York, N. Y. Renewed August 24, 1935.

105,920. LINOLEUMS. Registered August 24, 1915. THE NAIRN LINOLEUM CO. Renewed August 24, 1935, to Congoleum-Nairn, Inc., Kearny, N. J., a corporation of New York, assignee.

105,950. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,951. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,952. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,953. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,954. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,955. RUBBER HOSE, RUBBER BELTING, AND COMPOSITE RUBBER PACKING FOR PISTONS. Registered August 31, 1915. BOWERS RUBBER WORKS. Renewed August 31, 1935, to Pioneer Rubber Mills, San Francisco, Calif., a corporation of California, by change of name.

105,969. LAGER-BEER. Registered September 7, 1915. AMERICAN BREWING CO., New Orleans, La., a corporation of Louisiana. Renewed September 7, 1935.

105,996. CERTAIN NAMED GAMES, TOYS, AND SPORTING GOODS. Registered September 14, 1915. CONTINENTAL RUBBER WORKS, Erie, Pa., a corporation of Pennsylvania. Renewed September 14, 1935.

105,997. RUBBER HEELS AND RUBBER GLOVES. Registered September 14, 1915. CONTINENTAL RUBBER WORKS, Erie, Pa., a corporation of Pennsylvania. Renewed September 14, 1935.

106,014. GAMES. Registered September 14, 1915. PARKER BROTHERS, INC., Portland, Maine, and Salem, Mass., a corporation of Maine. Renewed September 14, 1935.

LABELS

REGISTERED MAY 7, 1935

45,532.—*Title:* 900. For A Bleaching and Cleaning Solution. OLIVER DORILL BACHAND, Jamestown, N. Y. Published July 1, 1932.

45,533.—*Title:* CARLING'S RED CAP ALE. For Ale. BREWING CORPORATION OF AMERICA, Cleveland, Ohio. Published June 10, 1934.

45,534.—*Title:* CARLING'S OLD PIRATE LAGER BEER. For Lager Beer. BREWING CORPORATION OF AMERICA, Cleveland, Ohio. Published December 13, 1934.

45,535.—*Title:* CARLING'S AMBER CREME ALE. For Ale. BREWING CORPORATION OF AMERICA, Cleveland, Ohio. Published March 11, 1935.

45,536.—*Title:* NUMBER ONE BRAND CHINA RICE. For China Rice. CHINA RICE IMPORTING CO., San Francisco, Calif. Published March 20, 1935.

45,537.—*Title:* GROVEHILL. For Straight Rye Whisky. CONTINENTAL DISTILLING CORPORATION, Philadelphia, Pa. Published March 11, 1935.

45,538.—*Title:* OVEN FRESH TASTY OYSTER CRACKERS. For Oyster Crackers. DAVIDSON BISCUIT COMPANY, Mount Vernon, Ill. Published November 19, 1932.

45,539.—*Title:* WALDORF GOLDEN BOCK LAGER. For Lager. FOREST CITY BREWERY, INC., Cleveland, Ohio. Published March 6, 1935.

45,540.—*Title:* WALDORF GOLDEN BOCK LAGER. For Lager. FOREST CITY BREWERY, INC., Cleveland, Ohio. Published March 1, 1935.

45,541.—*Title:* BELLAIRE. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,542.—*Title:* BIG BEAR. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 11, 1935.

45,543.—*Title:* BRANCH SHOES. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 27, 1935.

45,544.—*Title:* CRESCENT MODERN VOGUE. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,545.—*Title:* FASHION MAID. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 1, 1935.

45,546.—*Title:* FASHIONABLE STOUTS. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 4, 1935.

45,547.—*Title:* FOOT-TRUE. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,548.—*Title:* LADY BEAUTIFUL. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,549.—*Title:* RIO RITA. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,550.—*Title:* SANDRA. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 6, 1935.

45,551.—*Title:* SLAX. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 18, 1935.

45,552.—*Title:* SMART SHOES. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 11, 1935.

45,553.—*Title:* SWITZER WITZER. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 25, 1935.

45,554.—*Title:* WALK-O-PEDIC. For Boxes. HOAGUE-SPRAGUE CORPORATION, Lynn, Mass. Published February 11, 1935.

45,555.—*Title:* MINER'S QUALITY — ALWAYS FRESH. For Vacuum Packed California Seedless Raisins. A. R. MINER, doing business as Miner Products Co., Fowler, Calif. Published January 2, 1935.

45,556.—*Title:* OUR CUSTOM FINISHED SHIRT. For Shirts. LELAND R. MORSE, Chicago, Ill. Published December 31, 1934.

45,557.—*Title:* THE FAMILY PULLMAN LOAF. For Bread. RICHTER'S BAKERY, San Antonio, Tex. Published December 20, 1934.

45,558.—*Title:* SOUTHLAND READIMIX. For Mixed Feed for Stock. SOUTHLAND COTTON OIL COMPANY, Jackson, Miss. Published March 15, 1935.

45,559.—*Title:* SOMOLA. For Salad and Cooking Vegetable Oil. SUFFOLK OIL MILL, INCORPORATED, Suffolk, Va. Published March 1, 1935.

45,560.—*Title:* GOWRIE BRAND CREAMERY BUTTER (No. 248 O—S). For Butter. SUTHERLAND PAPER COMPANY, Kalamazoo, Mich. Published January 2, 1935.

45,561.—*Title:* ICE CREAM (No. 482 A—P—D—F). For Ice Cream. SUTHERLAND PAPER COMPANY, Kalamazoo, Mich. Published January 2, 1935.

45,562.—*Title:* ICE CREAM (No. 483 A—P). For Ice Cream. SUTHERLAND PAPER COMPANY, Kalamazoo, Mich. Published January 14, 1935.

45,563.—*Title:* ICE CREAM (No. 480 P—D—F). For Ice Cream. SUTHERLAND PAPER COMPANY, Kalamazoo, Mich. Published January 2, 1935.

45,564.—*Title:* BUTTER (No. 249). For Butter. SUTHERLAND PAPER COMPANY, Kalamazoo, Mich. Published December 31, 1934.

45,565.—*Title:* BIG-TIME FOOTBALL GAME. For a Game. RICHARD E. VEAZEY, New Orleans, La. Published October 15, 1934.

45,566.—*Title:* VINCO. For a Powder Used as a Boiler Cleanser. THE VINCO COMPANY, INC., New York, N. Y. Published March 9, 1935.

PRINTS

REGISTERED MAY 7, 1935

15,125.—*Title:* EVERY DAY HE BURNS UP AS MUCH ENERGY AS A BOXING CHAMPION! For Wheat Breakfast Food. THE CREAM OF WHEAT CORPORATION, Minneapolis, Minn. Published February 5, 1935.

15,126.—*Title:* ANESTEX LOCAL ANESTHETIC CONTAINING PROCAINE IN COMBINATION WITH FRUIT ACIDS AS TARTACAINE-CITROCAINE MALICAINE AND EPINEPHRINE. For Local Anesthetic. DAVID CURTIS, doing business as Anestex Laboratories (De-Ce Products Co. of N. Y.), New York, N. Y. Published March 21, 1935.

15,127.—*Title:* EVER READY WALL-AN-DESK CATALOG NO. 5. For Trusses, Abdominal Supports, Shoulder Braces, and Elastic Hosiery. L. A. FRITSCH, Cincinnati, Ohio. Published December 1, 1934.

15,128.—*Title:* A TRICK YOUR MOTHER-IN-LAW DOESN'T KNOW ABOUT MUFFINS. For Biscuit Flour. GENERAL MILLS, INC., Minneapolis, Minn. Published March 10, 1935.

15,129.—*Title:* WHEN YOUR CHILD BEGINS TO "HATE" HIS CEREAL HERE'S THE THING TO DO. For Cereal Food. GENERAL MILLS, INC., Minneapolis, Minn. Published March 10, 1935.

15,130.—*Title:* A BLACK PANTHER ISN'T HALF AS TREACHEROUS AS A BLOW-OUT! (Ad. GBC-46.) For Rubber Tires. THE B. F. GOODRICH COMPANY, Akron, Ohio. Published March 23, 1935.

15,131.—*Title:* THE OFFICIAL AMERICAN LEGION UNIFORM. For American Legion Uniforms. HAYMARKET CLOTHING COMPANY, Boston, Mass. Published September 5, 1933.

15,132.—*Title:* WINGS OF A CENTURY. For Automobiles. CHARLES S. HENSHAW, Boston, Mass. Published January 18, 1935.

15,133.—*Title:* FLIGHT. For Silver Plated Flat Ware. NATIONAL SILVER COMPANY, New York, N. Y. Published January 30, 1935.

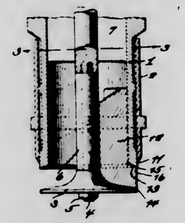
15,134.—*Title:* SEARLE GRAPHOID MOTOR OIL. For Motor Oil. SEARLE PETROLEUM COMPANY, Omaha, Nebr. Published November 15, 1934.

15,135.—*Title:* SEARLE GRAPHOID FLUID GEAR LUBRICANT. For Fluid Gear Lubricants. SEARLE PETROLEUM COMPANY, Omaha, Nebr. Published November 15, 1934.

15,136.—*Title:* A GARMENT FOR EVERY FIGURE. For Corsets. VOGUE MFG. CO., Newark, N. J. Published January 15, 1934.

REISSUES

MAY 7, 1935



19,557

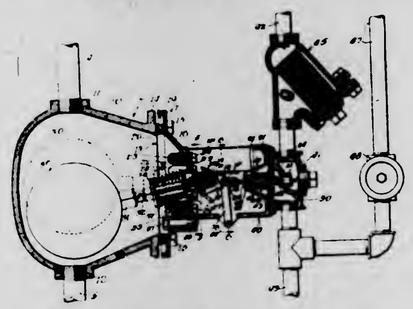
ATTACHMENT FOR DOUGHNUT CUTTING AND COOKING MACHINES

John Baumann, Philadelphia, Pa.

Original No. 1,670,230, dated May 15, 1928, Serial No. 206,717, July 18, 1927. Application for reissue September 22, 1930, Serial No. 483,733

4 Claims. (Cl. 107—14)

1. The combination with a doughnut cutting machine having an annular channel in which the dough is shaped into ring form and means for forcing the dough through said channel, of means for radially splitting the ring.



19,558

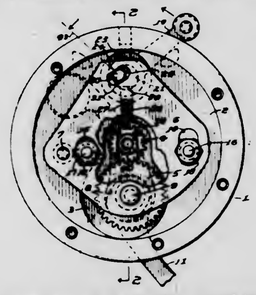
BOILER FEED CONTROL

Oscar F. Carison, Chicago, Ill., assignor of one-half to Oscar F. Carison Company, Chicago, Ill., a corporation of Illinois, and one-half to Everett N. McDonnell, Chicago, Ill.

Original No. 1,934,486, dated November 7, 1933, Serial No. 513,485, February 5, 1931. Application for reissue May 9, 1934, Serial No. 724,769

39 Claims. (Cl. 137—101)

1. A float controlled boiler feed regulator comprising, in combination, a float housing having an inlet and an outlet, a closure for the housing, a float arm pivoted to said closure and having a portion extending into the float housing with a float thereon, and a portion extending outside said closure, a second housing secured to the first housing and enclosing the outer end of the float arm, means effecting a liquid tight seal between said first and second housings, a third housing secured to the second housing and provided with fluid flow control means, means operatively connecting the outer end of said float arm and said control means whereby the position of the float governs the operation of said control means, and sealing means between said second and third housings.



19,559

FISHING REEL

Clarence A. Godshalk, Ardmore, and Frederick Henke and David Behrsing, Philadelphia, Pa., assignors, by mesne assignments, to Ocean City Manufacturing Co., Philadelphia, Pa., a corporation of Pennsylvania

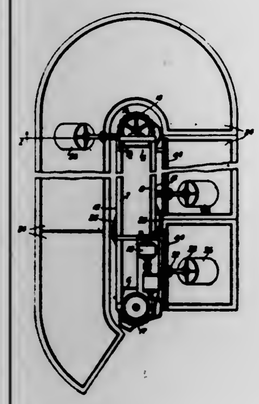
Original No. 1,904,992, dated April 25, 1933, Serial No. 608,600, May 2, 1932. Application for reissue January 27, 1934, Serial No. 708,706

8 Claims. (Cl. 242—84.7)

1. In a free spool reel, the combination of a reel head, a spool spindle, one end of which is journaled in said head, a pinion fixed on said spindle, a driving gear, an oscillatory member mounted on the outer side of said head to oscillate, and movable back and forth in a fixed path, connections between said member and said driving gear to move said gear toward the axis of said pinion into mesh with said pinion when said oscillatory member is moved to one limit of its motion, and to move said driving gear away from the axis of said pinion and out of mesh with said pinion when said oscillatory member is moved to the other limit of its motion, and resilient means on said reel head to yieldingly hold said member at the limits of its motion in either direction, and operative, when said member is manually moved toward one of said limits beyond a point substantially midway between said limit, to automatically throw said member to that limit of its travel toward which it was being manually moved.

19,560

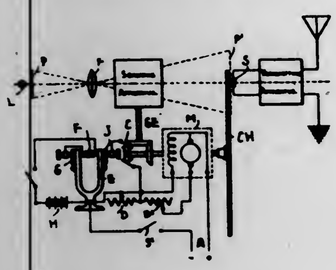
ELECTROPROCESSING MACHINE



Albert H. Hannon, Springfield, Ohio

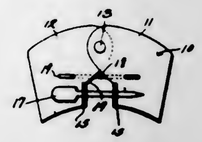
Original No. 1,895,622, dated January 31, 1933, Serial No. 523,007, March 16, 1931. Application for reissue March 24, 1933, Serial No. 662,522

14 Claims. (Cl. 204—5)



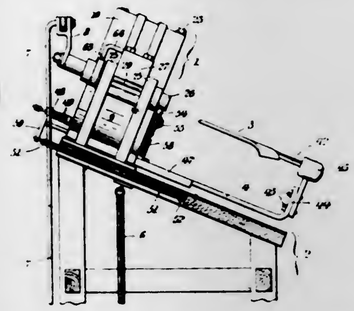
10. In an electroprocessing machine, a solution tank, an inclined shaft, means for supporting the inclined shaft and moving the same along the tank, a hollow tumbling receptacle removably mounted on the end of the shaft for holding loose

pieces for being plated, and means for lowering and raising the shaft as it is moved along to dip



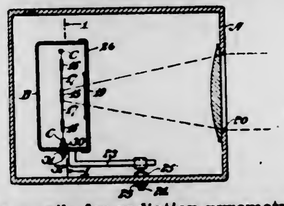
the receptacle into the solution in the tank and to lift the same over the ends of the tank.

19,561
PICTURE TRANSMISSION
Charles Francis Jenkins, Washington, D. C., assignor, by mesne assignments, to Radio Corporation of America, a corporation of Delaware
Original No. 1,693,506, dated November 27, 1928, Serial No. 130,282, August 19, 1926. Application for reissue July 30, 1930, Serial No. 471,860
5 Claims. (Cl. 178—69.5)



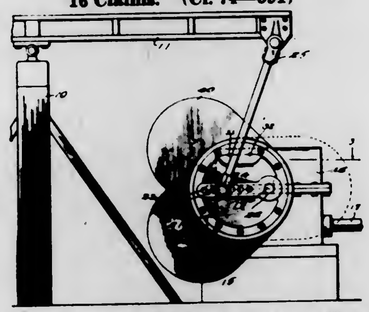
1. The method of transmitting and receiving pictures which comprises, scanning the successive elementary areas of the picture to produce light variations, interrupting the light variations at a rate proportional to the rate of scanning to produce a synchronizing signal, modulating a carrier current in accordance with said interrupted light variations, transmitting the modulated current to a receiving station, causing a light distributor to traverse a picture receiving surface at a rate proportional to the rate of interruption of the light variations, modulating the light of the distributor in accordance therewith, generating at the receiving station a synchronizing signal of audio frequency bearing a definite relation to the light distributor, and transmitting the two synchronizing signals to a single sound producing instrument.

19,562
MASK FOR FOWLS
Jacob Jones, Woodinville, Wash., assignor of forty-nine per cent to J. Clayton Cridlebaugh, Woodinville, Wash.
Original No. 1,962,395, dated June 12, 1934, Serial No. 650,721, January 7, 1933. Application for reissue July 12, 1934, Serial No. 734,857
11 Claims. (Cl. 119—97)



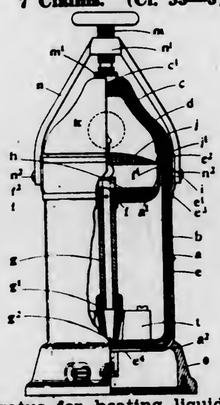
8. A mask for fowls comprising a member to be positioned upon the beak of a fowl and normally extending upwardly therefrom, said member having portions to lap the side portions of the beak at the rear part thereof, and a pivot member extending through said lapped portions and the beak of the fowl.

19,563
PRESSING MACHINE
Edward V. McTague, Millville, N. J., assignor to The Convertible Duplex Die Corporation, Millville, N. J., a corporation of New Jersey
Original No. 1,890,882, dated December 13, 1932, Serial No. 603,692, April 7, 1932. Application for reissue June 12, 1933, Serial No. 675,496
13 Claims. (Cl. 223—55)



13. In a garment point forming machine, a bed, walls extending transversely to the plane of the bed and forming a recess adapted to confine and substantially abut the edges of a garment point positioned therein and confine the same to a predetermined shape, means for positioning a garment point within said recess, means for applying heat to a garment point positioned in said recess, and means for applying pressure to said garment point, said latter means including a die holder mounted for vertical movement relative to the bed, and a die mounted for rotation therein about an axis substantially parallel to the plane of the bed thereby to adjust itself to the garment point to be formed.

19,564
THERMOPILE
John F. Quereau, Barren Hill, Pa., assignor to Leeds & Northrup Company, Philadelphia, Pa., a corporation of Pennsylvania
Original No. 1,988,858, dated January 22, 1935, Serial No. 527,035, April 1, 1931. Application for reissue March 9, 1935, Serial No. 10,328
11 Claims. (Cl. 136—4)



1. A thermopile for radiation pyrometry whose components comprise a plurality of pairs of hot and cold thermo-junctions, and means for thermally and electrically connecting said hot and cold junctions, said components being so constructed and arranged that the loss of heat by radiation from the hot junctions is so proportioned with respect to the other losses of heat therefrom that for any given radiant heat input to the hot junctions the resulting temperature difference between the hot and cold junctions at different ambient temperatures is such that the output voltage of the thermopile is substantially constant at said given radiant heat input at said different ambient temperatures.

19,565
COUNTERBALANCE FOR WELL PUMPS
Alva L. Skinner, Bridgeport, Ill., assignor to the Ohio Oil Company, Findlay, Ohio, a corporation of Ohio
Original No. 1,868,028, dated July 19, 1932, Serial No. 429,168, February 17, 1930, refiled for abandoned application Serial No. 322,467, November 28, 1928. Application for reissue July 14, 1934, Serial No. 735,270
16 Claims. (Cl. 74—591)

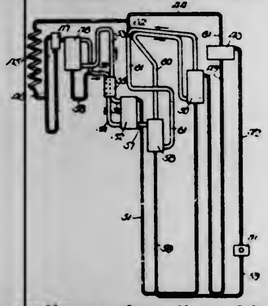
11. In a counterbalance for deep well pumping devices, a shaft, an eccentric on said shaft, a counterbalance weight mounted on the eccentric for rotation around the eccentric, means for rotating the weight entirely around the eccentric, and means for operating said rotating means.

19,566
WATER HEATING AND INFUSION APPARATUS
Aurelio Valls, London, England
Original No. 1,981,402, dated November 20, 1934, Serial No. 708,262, January 25, 1934. Application for reissue February 27, 1935, Serial No. 8,512. In Great Britain January 26, 1933
7 Claims. (Cl. 53—3)

1. Apparatus for heating liquids, more especially for preparing infusions, such as of coffee, comprising a liquid container which is electrically non-conducting at least exteriorly, a closure for the container, a plurality of electrodes in the bottom of the container, in contact with the liquid, for heating the liquid by its resistance to the electrolytic conduction of current, and a vertically disposed, liquid elevating tube insulated from the electrodes and having its lower end close to and between them.

19,567
METHOD OF FORMING ELECTRICAL HEATING ELEMENTS
Edwin L. Wiegand, Pittsburgh, Pa.
Original No. 1,903,604, dated April 11, 1933, Serial No. 329,630, December 31, 1928. Application for reissue May 12, 1934, Serial No. 725,392
13 Claims. (Cl. 201—67)

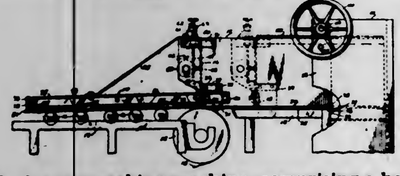
8. The method of making resistor heating elements of the character described, in which the resistor is in the form of a relatively delicate resistance wire, which comprises holding the resistor against displacement, pouring refractory insulating material loosely over and about the resistor, and mechanically compacting the loose insulating material to fix the same about the resistor wire.



PATENTS

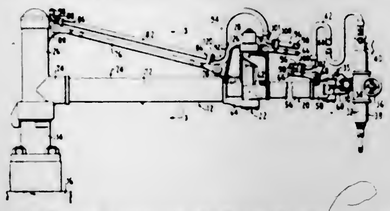
GRANTED MAY 7, 1935

2,000,004
INSECT REPELLENT
Elmer W. Adams, Hammond, Ind., assignor to Standard Oil Company, Chicago, Ill., a corporation of Indiana
No Drawing. Application August 28, 1931, Serial No. 559,590
5 Claims. (Cl. 167—30)



1. An insectifuge comprising a mineral oil solution of an alkyl benzoate, wherein said alkyl group contains from one to six carbon atoms.

2,000,005
CONTINUOUS ABSORPTION REFRIGERATION
Edmund Altenkirch, Neuenhagen, near Berlin, Germany, assignor to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Original application November 27, 1929, Serial No. 410,628. Divided and this application October 3, 1933, Serial No. 692,373. In Germany November 30, 1928
9 Claims. (Cl. 62—119.5)



2. In a continuous absorption refrigerating system, the combination with an absorber, a boiler and means for circulating absorption liquid therebetween, of means for lowering the concentration of the absorption liquid as it passes from the boiler to the absorber and for raising the concentration of the absorption liquid as it passes from the absorber back to the boiler, said means comprising an auxiliary boiler, an auxiliary absorber and means for circulating inert gas between the auxiliary boiler and the auxiliary absorber to transfer refrigerant from the auxiliary boiler to the auxiliary absorber.

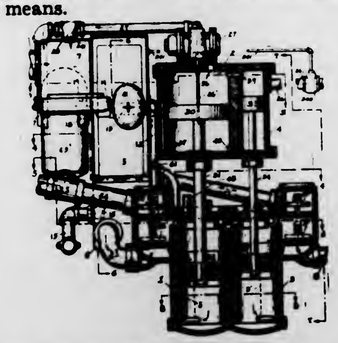
2,000,006
PAPER MAKING MACHINE
Samuel Amantea, Niagara Falls, N. Y.
Application November 12, 1934, Serial No. 752,643
15 Claims. (Cl. 92—44)

1. A paper making machine, comprising a head box, a movable outlet box in telescoped relation with the head box, and means for moving the outlet box into the head box.

2,000,007
TORCH CUTTING OR WELDING APPARATUS
James L. Anderson, Closter, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y., a corporation of New York
Application December 5, 1933, Serial No. 700,949
11 Claims. (Cl. 266—23)

1. In a torch cutting or welding machine having a jointed arm for supporting a torch for universal movement in a plane, a conduit for supplying gas to the torch, said conduit including a section connected by brackets to each link of the jointed arm to move as a unit with the link, and a flexible portion at the joint connecting the sections carried by the respective links of the jointed arm.

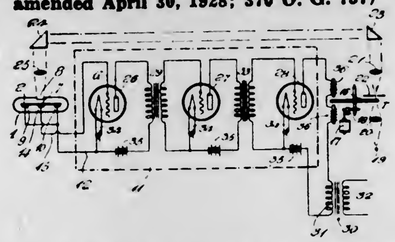
2,000,008
DISPENSER
Cesare Barbieri, New York, N. Y., assignor to Vortex Cup Company, Chicago, Ill., a corporation of Delaware
Application June 5, 1933, Serial No. 674,353
13 Claims. (Cl. 312—44)



11. In a dispenser of the character described, an escapement mechanism for delivering peripherally flanged cups from a stack, said mechanism including a member shaped to extend between the flanges of adjacent cups of the stack and cause a separation of the lower cup from the upper when the member is moved, said member being bodily movable circumferentially relatively to the cups of said stack, and actuating means for said member.

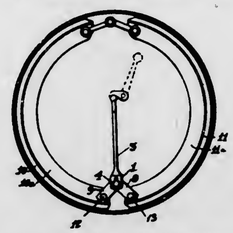
2,000,009
FEED WATER HEATER FOR LOCOMOTIVES, ETC.
Edmund H. Blunt, Brooklyn, N. Y.
Application October 27, 1928, Serial No. 315,579
Renewed July 19, 1934
16 Claims. (Cl. 122—442)

1. In an open type feedwater heater, a steam heated vessel, cold water supply means and hot water removal means, an excess cold water return means, a deficit hot water return means, and



common water level control means for influencing the excess return means and the deficit return means.

5. In a feedwater heater, a heating vessel, a main steam supply means for normally heating the same, auxiliary exhaust steam supply means connected both to the vessel and to the atmosphere, said vessel connections including an admission valve having adjustable means that keeps said valve open to the vessel when the pressure within the vessel is nearly atmospheric, while a greater increase in the vessel pressure tends to close said valve.



9. Boiler feed water heater apparatus comprising a heater vessel, a pump with connections for forcing hot water from said vessel to a boiler and protective means interposed between the pump and the boiler for preventing shocks due to the pump action without introducing air into the system, said protective means comprising a cylinder connected at one end only to the pump discharge and connected at the other end to the boiler, piston means operable in the cylinder and a one-way check valve interposed between the cylinder and the boiler for permitting steam pressure from the boiler to be applied to the piston means and preventing escape of steam from the cylinder, so as to cushion the action of the piston means under pressure of the pump.

2,000,010
OSCILLATION SYSTEM
Ward E. Bower, Washington, D. C.
Application June 22, 1932, Serial No. 618,777
16 Claims. (Cl. 250—36)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

14. The method of operating a rectangular parallelepipedal piezo electric crystal at the frequency determined by its free transverse oscillation characteristics which comprises impressing a light beam on to a part only of one of the faces of said crystal in such a way as to transversely stress said crystal and generate electric charges therealong which vary in value longitudinally thereof and utilizing the electric charges generated along said crystal to concomitantly control the value of the light flux impressed upon said crystal in such phase with the deformation thereof as to cause said crystal to oscillate at its free transverse oscillation frequency.

2,000,011
BRAKE SHOE EXPANDER
Fred V. Clancy, San Jose, Calif.
Application July 2, 1934, Serial No. 733,461
1 Claim. (Cl. 188—78)

An expander adapted to be inserted between the opposing ends of a pair of brake shoes on a vehicle and to be actuated by a push-rod cooperating therewith and comprising, a yoke having a hole formed in its head to slidably receive the adjacent end of the said rod, a pin passing transversely through the side portions of said yoke, arms pivotally mounted on the pin within the yoke and means for connecting the same to the adjacent ends of the said shoes, and a plate mounted in the yoke and inserted between the push-rod and said arms.

2,000,012
COMBINATION WRENCH AND PLIERS
Ernest Cullen, San Diego, Calif., assignor to John B. Smiley, Los Angeles, Calif.
Application December 22, 1932, Serial No. 648,459
10 Claims. (Cl. 7—3)

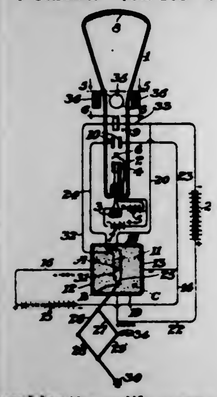
1. A combination tool comprising a pair of pliers consisting of pivotally connected jaw members, each having teeth at the outer side of its jaw portions, and a flexible member extending around said teeth and attachable at its opposite end portions to the opposite sides of the pliers and outer sides of said jaw portions for coacting with the teeth for gripping a pipe.

2,000,013

METHOD OF PRODUCING ARTIFICIAL STRAW AND PRODUCT THEREOF

Camille Dreyfus, New York, N. Y., and William Whitehead, Cumberland, Md., assignors to Celanese Corporation of America, a corporation of Delaware

No Drawing. Application November 5, 1931, Serial No. 573,292
12 Claims. (Cl. 18—48)



1. Method of producing dull artificial straw or like products of flattened cross section, which comprises causing a plurality of filamentary products, containing a plastic material and also a volatile liquid which is a solvent for at least part of the material of which the products are composed, to coalesce by the application of pressure at a temperature substantially above the boiling point of said volatile liquid.

2,000,014

TELAUTOGRAPH

Allen B. Du Mont, Upper Montclair, N. J.

Application May 31, 1932, Serial No. 614,347
7 Claims. (Cl. 178—18)

1. The combination with means for generating cathode rays, of a fluorescent and phosphorescent screen and means angularly displaced about the path of said rays for relatively deflecting said rays and screen, a pair of plates of resistance material respectively controlling angularly displaced ray deflecting means by respectively varying the potentials applied thereto, contacts between said plates and respectively bearing against the same and adapted to be moved in any direction between said plates, said contacts being mechanically secured together but insulated from each other and means for electrically connecting said contacts with ray deflecting means angularly displaced about the ray path and means for impressing potentials respectively upon the angularly displaced ray deflecting means.

2,000,015

SAFETY ARROW RELEASE DEVICE FOR BOWS IN ARCHERY

Godfrey Flury, Austin, Tex.

Application October 3, 1933, Serial No. 691,906
6 Claims. (Cl. 272—107.5)

1. A safety arrow release for bows and arrows in archery, comprising a pair of pivoted jaws adapted to grip and hold the arrow and the string of an archer's bow and arrow, and rearwardly extending handles on said jaws, one of said handles being shaped to fit in the palm of the hand of the archer, and the other of said handles being shaped so that the fingers may engage over the

edge and against the outer face so that the handles may be conveniently pressed together, said handles being substantially at right angles to each other when in gripping position.

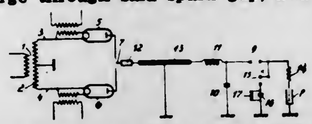
2,000,016

MULTIPLE FUSE DEVICE

William H. Frank, Joseph A. Messing, and Harrison J. L. Frank, Detroit, Mich., assignors to Bulldog Electric Products Company, Detroit, Mich., a corporation of West Virginia

Application April 19, 1933, Serial No. 666,786
17 Claims. (Cl. 200—126)

11. In a multiple fuse device, a fuse carrier comprising a substantially flat disc-like body of insulating material, and circumferentially spaced fuses projecting thru the body from side to side thereof and having exposed contact ends on the flat sides of the disc-like body, the body having a plurality of explosion chambers, one for that part of each fuse that is in the body, the chambers communicating with a center hole in the body that acts as an explosion manifold, and a hollow center-axis hub rotatably supporting said disc-like body, the interior of the center hole communicating with the interior of the hub.



2,000,017

ELECTRICAL CLEANING OF FLUIDS

Richard Heinrich, Berlin-Sudende, and Wilhelm Feldmann, Berlin-Spandau, Germany, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a corporation of Germany

Application April 4, 1931, Serial No. 527,690
In Germany April 5, 1930
12 Claims. (Cl. 183—7)

1. An arrangement for electrical cleaning of fluids, comprising in combination with an electric cleaning apparatus for said fluid having opposing electrodes, a generator for producing high voltage uni-directional current, a conductor between said generator and the high potential electrode of said cleaning apparatus, a spark gap inserted into said conductor in such manner as to prevent flow of current from said generator to said high potential electrode otherwise than by discharge through said spark gap, and an im-

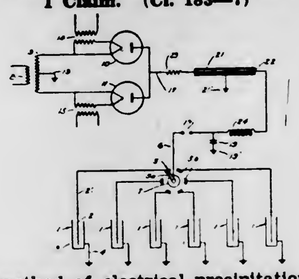
pulse condenser connected at one terminal to the other electrode of said cleaning apparatus and at the other terminal to said conductor between the spark gap and the generator, for applying sharp electrical impulses through said spark gap to said high potential electrode at intervals, constituting a large multiple of the impulse durations.

2,000,018

METHOD FOR THE SEPARATION OF EMULSIONS BY ELECTRICAL ACTION

Richard Heinrich, Berlin-Sudende, Germany, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a corporation of Germany

No Drawing. Application November 30, 1931, Serial No. 578,215. In Germany December 5, 1930
3 Claims. (Cl. 204—24)



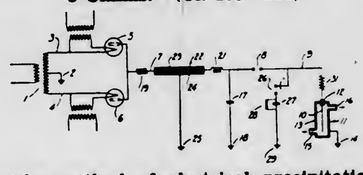
1. A method of separating emulsions, for example of oil and water, by means of uni-directional current, consisting in supplying the electrodes of the separating apparatus with distinctly separate high voltage impulse discharges of a duration of not more than about 10^{-6} seconds at time intervals of at least ten times the duration of a voltage impulse, during which time intervals the supply of electric energy to the electrodes is substantially interrupted.

2,000,019

ART OF ELECTRICAL PRECIPITATION

Richard Heinrich, Berlin-Sudende, and Wilhelm Feldmann, Berlin-Spandau, Germany, assignors to International Precipitation Company, Los Angeles, Calif., a corporation of California

Application December 3, 1931, Serial No. 578,830
In Germany December 16, 1930
1 Claim. (Cl. 183—7)



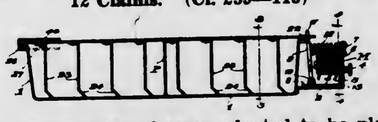
The method of electrical precipitation which consists in storing electric energy in a condenser in connection with a park gap until the spark potential of said gap is reached, thereby delivering a high voltage impulse through said spark gap, repeating said operations so as to produce a succession of such impulses, and applying such high voltage impulses to energize successively, one at a time, a plurality of electrical fields containing gases carrying suspended material so as to effect electrical precipitation by the action of said electrical fields.

2,000,020

METHOD OF ELECTRICAL PRECIPITATION OF SUSPENDED PARTICLES FROM GASES

Richard Heinrich, Berlin-Sudende, Germany, assignor to International Precipitation Company, Los Angeles, Calif., a corporation of California

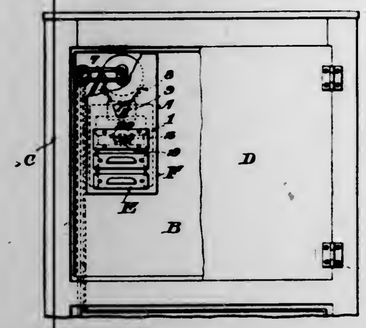
Application May 26, 1932, Serial No. 613,783
In Germany June 2, 1931
8 Claims. (Cl. 183—114)



1. The method of electrical precipitation of suspended particles from gases which comprises producing unidirectional electrical energy at high voltage, storing said energy in a condenser, intermittently discharging energy from said condenser in an electrical field between opposing discharge and collecting electrodes to provide a series of short unidirectional high potential electrical impulses of steep wave front and sharp peak, substantially interrupting the supply of electrical energy from said condenser to said electrodes for a relatively long period between each impulse and the next succeeding impulse, and passing gas containing suspended particles through said electrical field so as to subject the same to said electrical impulses and thereby causing precipitation of said suspended particles upon said collecting electrode, the peak voltage of each of said impulses being at least 30% greater than the voltage which could be maintained through said gas between said electrodes if said electrodes were energized by impulses of ordinary commercial frequency, and the duration of each of said impulses being sufficiently short to substantially prevent formation of an arc discharge between said electrodes.

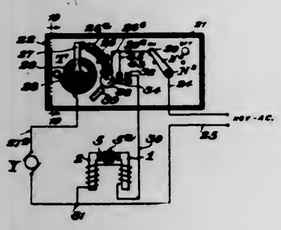
2,000,021

ICE CREAM FREEZER



Charles T. Hoffman and Emory L. Groff, Washington, D. C., assignors to Emory L. Groff, as trustee

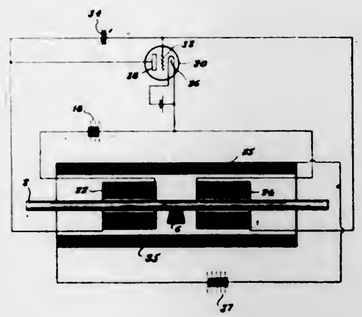
Application November 7, 1930, Serial No. 494,154
12 Claims. (Cl. 259—113)



1. An ice cream freezer adapted to be placed in a refrigerator compartment including a container adapted to be inserted in and removed from said compartment, an electro-mechanical actuator carried by the container, agitating means within the container operatively connected with said actuator, a constant source of electrical current, means for changing said current from the constant source to an intermittent current, and an electrical connection between said electro-mechanical actuator and said means for changing the constant current to intermittent current.

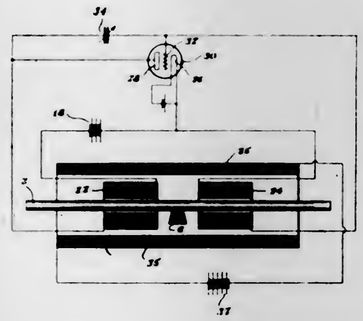
2,000,022
ICE CREAM FREEZER
Charles Thomas Hoffman, Washington, D. C., assignor, by direct and mesne assignments, to Emory L. Greff, as trustee
Application July 22, 1931, Serial No. 552,503
20 Claims. (Cl. 62—116)

1. An ice cream freezer including a freezing pan, dasher means therein, and a synchronous motor for operating said dasher means, said synchronous motor including an electro-magnet comprising a relatively fixed part and a detachable part carried by the pan, the rotor of the motor also being carried by the pan.



2,000,023
ICE CREAM FREEZER FOR REFRIGERATORS
Charles T. Hoffman, Washington, D. C., assignor, by direct and mesne assignments, to Emory L. Greff, as trustee
Application July 11, 1932, Serial No. 621,988
16 Claims. (Cl. 62—116)

1. In a refrigerator having an evaporator provided with pan compartments, a face plate for the evaporator, electromagnets fitted to the face plate at a pan compartment location of the evaporator, a pan for the mixture to be frozen adapted to be inserted in one of said compartments, a rotor and divided pole pieces carried by said pan, said pole pieces being adapted to contact with the electromagnets.

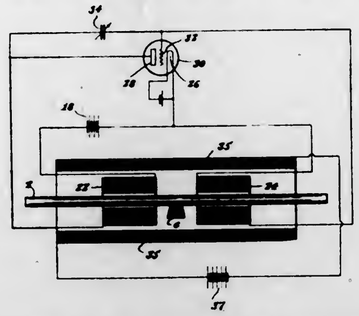


2,000,024
VIBRATOR
John McDonald Ide, Cambridge, Mass.
Application September 14, 1933, Serial No. 689,493
9 Claims. (Cl. 175—21)

1. A magnetostrictive vibrator having a substantially constant frequency with variations of temperature and constituted of cobalt, nickel

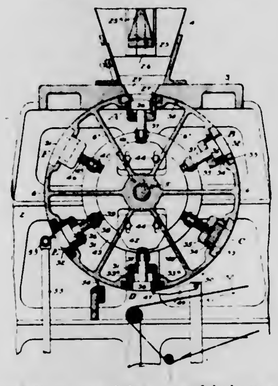
and iron with a properly chosen magnetic polarizing field.

2,000,025
VIBRATOR
John McDonald Ide, Cambridge, Mass.
Application September 16, 1933, Serial No. 689,784
16 Claims. (Cl. 175—21)



1. A vibrator having a substantially constant frequency with variations of temperature, and constituted of an alloy having about 8 to 10 parts chromium, 36 to 40 parts nickel, and the balance iron with a small addition of another substance or substances, and a coil cooperatively related to the vibrator, the relation between the coil and the vibrator being such that the current flowing through the coil is subjected to the reaction of the vibrator at a frequency which resonates with the vibrator.

2,000,026
VIBRATOR
John McDonald Ide, Cambridge, Mass.
Original application September 14, 1933, Serial No. 689,493. Divided and this application June 14, 1934, Serial No. 730,566
4 Claims. (Cl. 175—338)

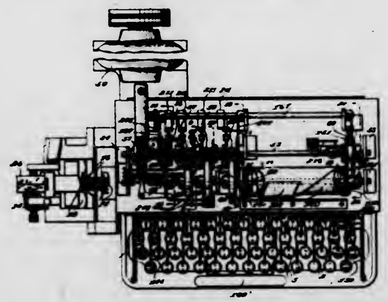


1. A vibrator having a substantially constant frequency with variations of temperature and constituted of cobalt, chromium, nickel and iron, and a coil cooperatively related to the vibrator, the

relation between the coil and the vibrator being such that the current flowing through the coil

is subjected to the reaction of the vibrator at a frequency which resonates with the vibrator.

2,000,027
MOLDING MACHINE
John G. Kazanjian, Naugatuck, Conn., assignor to Peter Paul Incorporated, Naugatuck, Conn., a corporation of Connecticut
Application November 13, 1929, Serial No. 406,797
Renewed July 14, 1932
11 Claims. (Cl. 107—8)



1. A molding machine combining a frame; a matrix carier supported thereby, said carrier being provided with a removable section; retaining means comprising a stud for said section, one or more molding compartments formed in said section; and ejecting mechanism for said molding compartments, said ejecting mechanism and said section being removable as a unit by the removal of said retaining means.

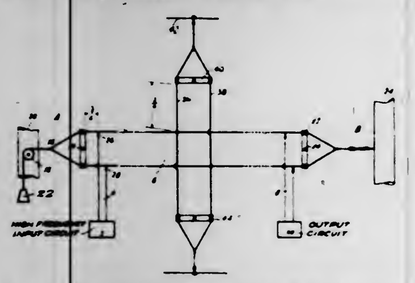
2,000,028
COMPOUNDING OF RUBBER, ETC.
Robert J. King and Elizabeth C. King, Stamford, Conn., assignors to The Robert J. King Company, Inc., Stamford, Conn., a corporation of Connecticut
No Drawing. Application December 20, 1932, Serial No. 648,084
25 Claims. (Cl 106—23)

1. An improved thermo-plasticizing composition for use in the compounding of rubber, said composition being a liquid composition made up for the most part of a hydrocarbon solvent of rubber which is substantially non-volatile at the usual temperatures of rubber compounding and vulcanizing, said solvent having dissolved therein an oil-soluble sulfonated product as an activator, said composition acting on unmasticated rubber to enable the rubber to be readily plasticized and made ready for compounding substantially without preliminary mastication and with an important saving in time and power required.

2,000,029
KEYBOARD PERFORATOR AND COUNTER
Edward E. Kleinschmidt, Park Ridge, and Louis M. Potts, Evanston, Ill., assignors, by mesne assignments, to Teletypesetter Corporation, Chicago, Ill., a corporation of Delaware
Application September 4, 1929, Serial No. 390,352
33 Claims. (Cl. 164—112)

1. In a keyboard perforator, a perforating mechanism, a magnet adapted to operate the perforating mechanism, a plurality of contacts, any one of which is adapted to control the energization of said magnet, a group of keys corresponding to one kind of operation, a second group of keys corresponding to a different kind of operation, one of said contacts corresponding to one group of keys and controlled thereby and another of said contacts corresponding to the second group of keys and controlled thereby.

2,000,030
COVERING FOR SURFACES EXPOSED TO THE WEATHER
George Knapp, St. Louis County, Mo., assignor to Certain-teed Products Corporation, New York, N. Y., a corporation of Maryland
Application November 29, 1930, Serial No. 498,993
Renewed July 31, 1934
10 Claims. (Cl. 20—5)



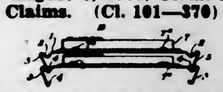
1. A protective covering for buildings comprising a sheet having a coating thereon in which is formed a groove to simulate the longitudinal joint of masonry and having a cut in the sheet to simulate a transverse joint of masonry, and surfacing material embedded in the coating to simulate the masonry surface, said groove and said cut demarking upon the strip a masonry unit and joints adjacent thereto.

2,000,031
COMPOSITION OF MATTER, ETC.
Leon H. Larsen, Norwalk, Conn., assignor to R. T. Vanderbilt Co. Inc., New York, N. Y., a corporation of New York
No Drawing. Application April 11, 1932, Serial No. 604,651
9 Claims. (Cl. 134—18)

1. A new composition comprising an intimately admixed dry mixture of lime, alum and titanium oxide, the proportions of lime and alum being such that they will react to form a gelatinous precipitate when added to water which will coat and disperse the particles of titanium oxide, and the titanium oxide being in such proportions as to impart opacity to the product of such reaction, after use and drying as a coating and filling material, said composition being adapted, when added to an amount of water approximating that of the composition to form a product which, when the reaction is completed, will be of a plastic or pasty consistency, and said reaction mixture being adapted for use as a coating material and as a filling material for paper manufacture.

2,000,032
TRANSMISSION LINE
Nils E. Lindenblad, Port Jefferson, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application June 25, 1930, Serial No. 463,610
13 Claims. (Cl. 178—44)

9. In combination, a two wire transmission line supported at least at one end thereof, a short circuit connection across said transmission line at said one end, and high frequency apparatus connected across said transmission line at points approximately one quarter wave length from said short circuit connection, said short circuit connection being substantially a voltage nodal point at which said line is supported.

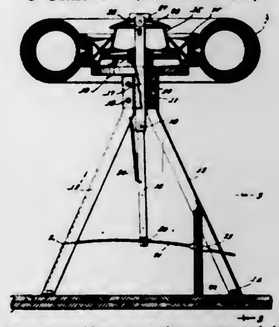


2,000,033
PROCESS FOR THE MANUFACTURE OF THIOINDIGO DYES
Herbert August Lubs and John Elton Cole, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application September 22, 1932, Serial No. 634,421
24 Claims. (Cl. 260—53)

1. In the process of preparing thioindigo dyes, the steps which comprise diazotizing an ortho-amino-aryl-thioglycollic acid in aqueous solution, neutralizing the solution, treating the solution with sodium cuprous cyanide solution to convert the diazo compound to the nitrile and then treating the resulting reaction mass with an alkali metal sulfide.

2,000,034
PROCESS FOR THE MANUFACTURE OF CERTAIN PARA-N-SEC-ALKYLAMINO-PHENOLS AND OTHER SUBSTITUTED PHENOLS AND THEIR SALTS
Randolph T. Major, Westfield, N. J., assignor to Merck & Co. Inc., Rahway, N. J., a corporation of New Jersey
No Drawing. Application July 30, 1931, Serial No. 554,075
8 Claims. (Cl. 260—128)

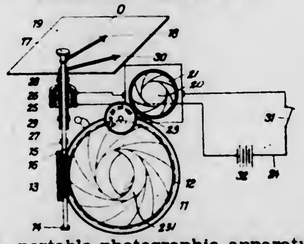
6. In the process of making para-N-sec-alkylaminophenols with the chemical formula $p\text{-}RR'CHNHC_6H_4OH$, in which R and R' are alkyl radicals, the step of reducing the reaction product of p-aminophenol and an aliphatic ketone with the formula RR'CO in which R and R' have the connotation as above, by hydrogen with the aid of a metal hydrogenation catalyst.



2,000,035
TYPE RETAINING PLATE
Frank H. Poeppelmeier, Dayton, Ohio, assignor, by mesne assignments, to Set-O-Type Manufacturing Company, Cleveland, Ohio, a corporation of Delaware
Application August 6, 1931, Serial No. 555,635
11 Claims. (Cl. 101—370)

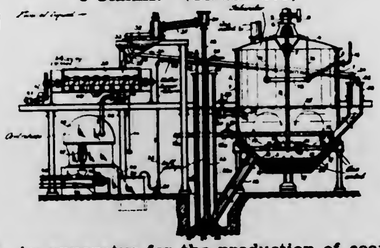
1. A type retaining means comprising a plate, a plurality of type channels, bottom flanges on said type channels at one end thereof, a tab at one side of the outer surface of said plate beneath which the flanges on said type channels are inserted, leaving their flanged ends open to receive type, and a flanged projection on said plate, closing the other ends of said type channels and cooperating with the tab in firmly securing the channels to the plate.

8. A type receiving means comprising a plate, having means for carrying type lines, said plate being formed with grooves in its top surface, one on each side of, and at right angles to, the type lines, the side portions of said plate beyond the grooves inclining downwardly and inwardly, to a region a considerable distance below the grooved portions of the plate, and reinforcing flanges turned upwardly from the lower edges of said downwardly and inwardly inclined sides for the purpose specified.



2,000,036
TIRE MOUNTING MACHINE
O. H. Renfro, South Gate, Calif.
Application May 31, 1933, Serial No. 673,676
5 Claims. (Cl. 144—288)

1. A tire mounting macine comprising means providing a surface against which a wheel may



be positioned, means movable through the surface adapted to be extended through the hub of the wheel, a spanning means adapted to be connected to said movable means and caused thereby to press the wheel against the surface, means for imposing a tension upon the movable means including a bendable lever, and means for releasably holding the lever depressed.

2,000,037
APPARATUS FOR AUTOMATICALLY DETERMINING THE EXPOSURE IN PHOTOGRAPHIC APPARATUS
Ödön Rissdorfer, Budapest, Hungary
Application January 28, 1931, Serial No. 511,832
12 Claims. (Cl. 88—23)

1. In a portable photographic apparatus having an objective and two exposure controlling devices, viz., a shutter and a diaphragm for controlling the quantity of light passing through said objective, means for determining the correct exposure, comprising in combination a photoelectric cell having an adjustable diaphragm for varying the quantity of light passing to the cell, two indicating members, one of said members actuatable by the cell current, manually actuatable means for varying the position of one of said indicating members relatively to the other for enabling the indicating members to be brought into coincidence and positive transmission means connected to one of said exposure controlling devices so as to enable the said exposure controlling device to be adjusted in accordance with the displacement of the indicating member actuated by the cell current.

2,000,038
APPARATUS FOR THE PRODUCTION OF AMMONIUM SULPHATE
Adolf Schmalenbach, Essen-Ruhr, Germany
Application September 10, 1932, Serial No. 632,495
In Germany July 30, 1931
8 Claims. (Cl. 23—273)

2. An apparatus for the production of coarse-crystalline ammonium sulphate from concentrated ammonia gas and sulphuric acid comprising a vessel adapted to receive the sulphuric acid to be worked up, an ammonia gas feeding pipe, a plurality of perforated pipes in the liquid space of said vessel at different levels, said pipes communicating with said gas feeding pipe, means for agitating the liquid in said vessel during the introduction of the gas, and means for withdrawing the solid products from the liquid.

2,000,039
RUBBER COMPOSITION AND METHOD OF PRESERVING RUBBER
Waldo L. Semon, Cuyahoga Falls, and Arthur W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
No Drawing. Application August 22, 1928, Serial No. 301,440
58 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with the condensation product of an unsaturated aliphatic ketone with a primary aromatic amine.

2,000,040
RUBBER COMPOSITION AND METHOD OF PRESERVING RUBBER
Waldo L. Semon, Silver Lake Village, and Arthur W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
No Drawing. Original application August 22, 1928, Serial No. 301,440. Divided and this application September 15, 1934, Serial No. 744,196
20 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with a reaction product of a ketone containing not more than two oxygen atoms with an aromatic amine derived from benzene or an alkyl or alkoxy substituted benzene and containing only one primary amino group.

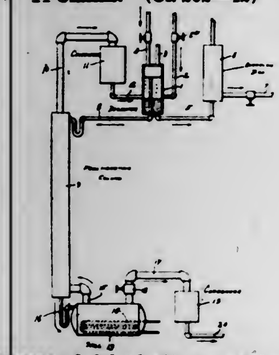
2,000,041
RUBBER COMPOSITION AND METHOD OF PRESERVING RUBBER
Waldo L. Semon, Silver Lake Village, and Arthur W. Sloan, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
No Drawing. Original application August 22, 1928, Serial No. 301,440. Divided and this application September 15, 1934, Serial No. 744,197
20 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with a reaction product of a ketone containing not more than two oxygen atoms with an aromatic amine containing both primary and secondary amino groups.

2,000,042
COMPRESSED FOAM GELATIN
Samuel E. Sheppard and James H. Hudson, Rochester, N. Y., assignors to Eastman Kodak Company, Rochester, N. Y., a corporation of New York
No Drawing. Application March 23, 1933, Serial No. 662,404
8 Claims. (Cl. 87—7)

2. A permanently set sheet of compressed, substantially dry gelatin foam which, at atmospheric pressure, contains air cells the air in a substantial number of which is under substantial pressure.

3. A process of producing gelatin containing a substantial number of compressed air cells, comprising agitating an aqueous gelatin solution with air to form a gelatin foam, casting the gelatin foam in sheet form, setting the structure of the gelatin foam sheet by chilling, substantially dehydrating the gelatin foam with a current of air



at atmospheric pressure substantially warmer than the chilling temperature, and compressing the gelatin sheet to such an extent that it is permanently set in a compressed, flattened condition.

2,000,043

PROCESS FOR AZEOTROPIC DRYING OF MIXTURES OF WATER AND ALCOHOLS OR KETONES

William H. Shiffler and Robert C. Mithoff, Berkeley, Calif., assignors to Standard Oil Company of California, San Francisco, Calif., a corporation of Delaware

Application July 6, 1932, Serial No. 621,038
11 Claims. (Cl. 202—42)

1. A process of dehydrating organic liquids of the alcohol or ketone group, which comprises passing the hydrated organic liquid into a stratifying zone, therein contacting the organic liquid with a mixture of the condensed vapors of the organic liquid, water, and a volatile solvent of the organic liquid which solvent is substantially insoluble in water and thereby forming two separate liquid layers, one relatively rich in water and weak in the organic liquid and the other relatively poor in water and rich in the organic liquid, passing the latter layer to a reflux column, and condensing the vapor from the reflux column to form the condensed mixture utilized in the first step of the process.

2,000,044

ANTIOXIDANT

Arthur W. Sloan, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York

No Drawing. Application May 26, 1933, Serial No. 673,114
29 Claims. (Cl. 18—50)

1. The method of retarding the deterioration of rubber which comprises treating rubber with a poly-aryl carbinol containing at least one and not more than two amino-groups.

2,000,045

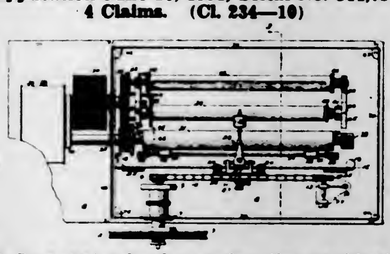
ANTIOXIDANT

Arthur W. Sloan, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York

No Drawing. Application May 26, 1933, Serial No. 673,115
16 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with a substance having the general formula

A-R-X-R'-A'



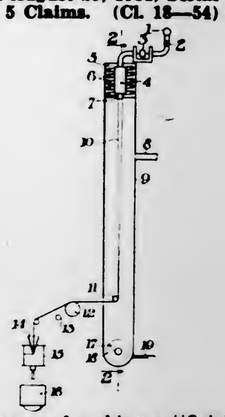
wherein A and A' represent amino groups, R and R' represent aromatic nuclei and X represents a methylene or hydrocarbon substituted methylene group, and at least one of the groups A and A' contains an aliphatic hydrocarbon substituent.

2,000,046

WATER LEVEL RECORDER

John C. Stevens, Portland, Oreg., assignor to Leupold, Volpel & Co., Portland, Oreg., a corporation of Oregon

Application June 16, 1931, Serial No. 544,751
4 Claims. (Cl. 234—10)



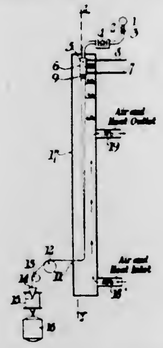
2. In a water level recorder, the combination of a base plate, rails mounted on the base plate, switch plates affixed to the rails, a recording carriage movably secured on the rails, a lever pivotally attached to the recording carriage, a cycloidal cam pivotally affixed to the lever and operably mounted in the recording carriage, said lever being actuated by the switch plates on the rail.

2,000,047

PROCESS OF MAKING ARTIFICIAL SILK

Herbert G. Stone, Kingsport, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New York

Application August 29, 1931, Serial No. 560,191
5 Claims. (Cl. 18—54)



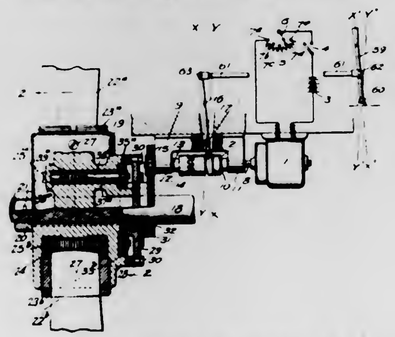
1. The process of making artificial silk by the dry spinning method which comprises extruding a solution of an organic ester of cellulose in a volatile solvent in the form of a filament into a zone of substantially immobile evaporative atmosphere and then into a current of evaporative medium of pregressively higher temperatures with progress of the filament therethrough and all points of which are maintained above room temperature, but below the decomposition temperature of the ester, said solution being heated immediately prior to filamenting to a temperature higher than that of any portion of the evaporative medium, but not substantially above approximately 70° C.

2,000,048

PROCESS OF MAKING ARTIFICIAL SILK

Herbert G. Stone, Kingsport, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New York

Application September 21, 1932, Serial No. 634,185
6 Claims. (Cl. 18—54)



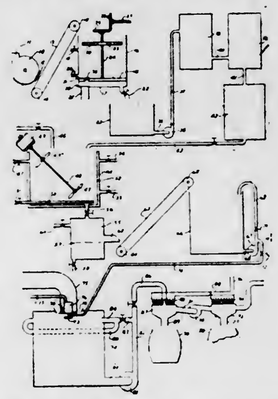
1. The process of making artificial silk by the dry spinning method which comprises heating a solution of an organic ester of cellulose in a volatile solvent to a temperature above room temperatures, but below the decomposition temperature of the ester, extruding the heated solution in the form of a filament into a zone of evaporative medium of lower temperature than the solution and then into a current of evaporative medium of progressively higher temperature with progress of the filament therethrough, all points of which evaporative medium are maintained above the spinning solution temperature, but below the decomposition temperature of the ester, none of the foregoing temperatures being substantially in excess of 120° C.

2,000,049

AUTOMATIC VARIABLE PITCH PROPELLER

Lester M. Taylor, Dayton, Ohio

Application April 19, 1934, Serial No. 721,351
4 Claims. (Cl. 170—163)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. In a pitch control mechanism for aircraft a rotatable mount including propeller blades freely adjustable about their longitudinal axes, means carried by said mount for changing the pitch of said propeller blades, a shaft including means for driving the same at a series of predetermined constant speeds, and means for operatively coupling said pitch changing means with said shaft upon attainment of a predetermined relative rotational rate between said shaft and rotatable mount such that any deviation from the aforesaid relative rotational rate automatically actuates said propeller pitch changing means.

2,000,050

PIGMENT

Charles A. Thomas and Carroll A. Hochwalt, Dayton, Ohio., assignors to The Mead Research Engineering Company, Chillicothe, Ohio, a corporation of Ohio

Application April 26, 1930, Serial No. 447,535
9 Claims. (Cl. 134—58)

1. In the manufacture of pigment, the method which comprises mixing ferrous hydroxide with a non-alkaline tannin extract derived from chestnut wood, then bubbling an oxidizing fluid such as air through the non-alkaline mixture to produce a copious rapid settling bluish black precipitate, and separating, washing and drying the resultant precipitate to provide a water insoluble bluish black pigment.

6. In the manufacturing of pigment, the method which comprises mixing a pigment-metal compound of the group consisting of ferrous hydroxide, titanium chloride, vanadium trichloride, ammonium vanadate, mercurous nitrate, and cuprous chloride with a non-alkaline tannin extract solution to provide a non-alkaline mixture, bubbling an oxidizing gas such as air through the non-alkaline mixture to produce a copious rapid settling precipitate, separating the precipitate from the solution, and drying the separated precipitate to form a solid water insoluble pigment.

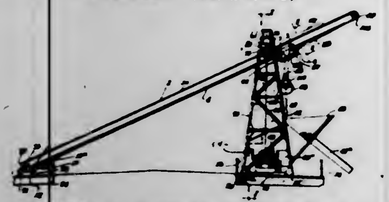
2,000,051

METAL COMPOUND CONTAINING AN ISOINDOLE NUCLEUS AND PROCESS OF MAKING THE SAME

Jocelyn Field Thorpe, Reginald Patrick Linstead, and John Thomas, Earl's Road, Grangemouth, Scotland

No Drawing. Application June 10, 1932, Serial No. 616,570. In Great Britain June 20, 1931
14 Claims. (Cl. 260—11)

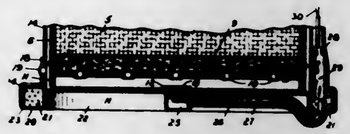
11. The process which comprises heating o-cyanobenzamide at temperatures between 200° C. and 300° C. in the presence of a finely divided polyvalent metal.



2,000,052
PROCESS FOR THE MANUFACTURE OF COLORED COMPOUNDS AND THE PRODUCT THEREOF
Jocelyn Field Thorpe and Reginald Patrick Linstead, Earl's Road, Grangemouth, Scotland, assignors to Imperial Chemical Industries Limited, a corporation of Great Britain
No Drawing. Application June 10, 1932, Serial No. 616,571. In Great Britain June 22, 1931
18 Claims. (Cl. 260—11)

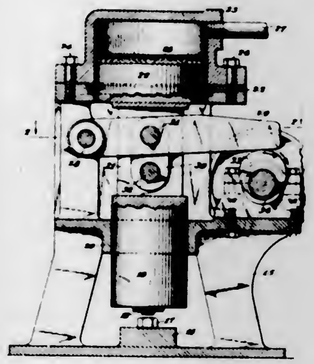
1. A process for the manufacture of colored compounds which comprises heating a phthalimide and a metal in the presence of ammonia.

2,000,053
PROCESS FOR THE PRODUCTION OF CARBOXYLIC ACID
Walter Elwood Vail, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application August 24, 1931, Serial No. 559,132
7 Claims. (Cl. 260—116)



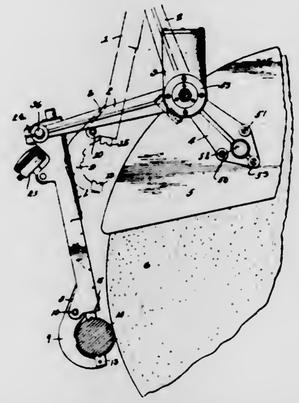
1. In a process of reacting a gaseous mixture containing an olefinic hydrocarbon, steam, and carbon monoxide, and thereby producing aliphatic carboxylic acid, the step of passing the gaseous mixture over a metal compound that forms a salt with the said carboxylic acid.

2,000,054
STEVEDORING APPARATUS
Francis H. Weeks, New York, N. Y.
Application September 24, 1931, Serial No. 564,792
3 Claims. (Cl. 212—3)



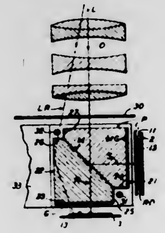
1. A crane for stevedoring vessels of a size and weight adapted to be removably applied to the deck of the usual freight carrying vessel without alteration of said deck, said crane being of a self-contained operating unit adapted to be immediately operated when so applied, said crane including a rigid stiffly braced self-sustaining and upstanding tower, terminating in a substantially horizontal plane lower surface, said tower being of a size adapted to be rested directly on the deck of the usual cargo carrying vessel in the space between the hatch coaming and the adjacent side of the ship and being of a weight adapted to be carried by the deck of the usual cargo carrying vessel between the hatch coaming and the adjacent side of the ship, said crane comprising in addition a cargo beam suspended from said tower adapted to extend therefrom transversely across the hatch of the usual cargo carrying vessel and to be supported by the side of said vessel remote from the said tower, a trolley carried by and movable longitudinally along said beam, driving means connected to and carried by said tower, drums operatively connected to said driving means, said driving means, drums and said trolley being operatively connected to lift cargo out of the hold of the ship and to move same longitudinally along the said beam.

2,000,055
FLARE CONTAINER
Samuel Wiley, Metuchen, N. J.
Application March 10, 1934, Serial No. 714,937
4 Claims. (Cl. 102—24)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



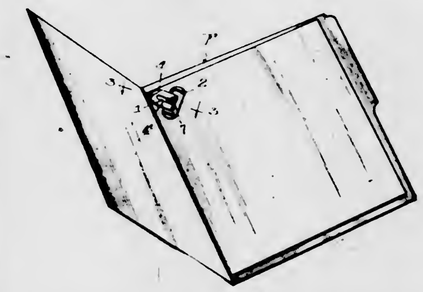
1. A container having an annular chamber at its lower end, a powder charge in said chamber, a detachable cover closing the lower end of the container and said chamber and adapted to be forcibly removed from the container on combustion of the powder charge, a thimble carried by the cover, a quick-match leading from the thimble to the powder charge, means for igniting the powder charge, a combustible member within the container and supported by the cover, and a delay charge carried by said member and disposed in the thimble of the cover.

2,000,056
METHOD AND APPARATUS FOR COMPRESSING AND INDENTING
Wylie G. Wilson, Elizabeth, N. J., assignor to Wilson Locknut Company, Jersey City, N. J., a corporation of Delaware
Application February 8, 1933, Serial No. 655,750
14 Claims. (Cl. 10—72)



1. The process which consists in providing a plurality of nuts which have an ascertained maximum variation in axial height, feeding one of the nuts to a predetermined point below an axially-movable indenting tool whose axis is alined with that of the nut, lowering the tool into contact with the upper face of the nut, and then permitting a falling weight of predetermined mass to drop through a predetermined distance upon the indenting tool, the tool being held at all times to true axial movement, raising the tool and the weight, removing the treated nut, inserting another nut, and repeating the operations above set forth, the drop of the weight being at least 25 times the variation in axial height of the plurality of nuts placed in succession beneath the indenting tool.

2,000,057
AUTOMATIC GAUGE CONTROL AND MEANS THEREFOR
Philip S. Arnold, Flint, Mich., assignor of one-fifth to Charles E. Wisner, Detroit, Mich.
Application June 7, 1929, Serial No. 369,134
3 Claims. (Cl. 33—147)



2. In a device for gauging a piece of work during the finishing operation by a machine, a torsion spring tending to raise the gauge away from the work upon its release therefrom, a shaft rotatable by the spring and to which the gauge is connected, a liquid chamber, a pump element secured to the shaft and positioned in the liquid chamber operable by the said spring upon release of the tool from the work to pass a body of liquid through a restricted opening provided therefor and thereby limit the rapidity of movement of the tool away from the work by the spring.

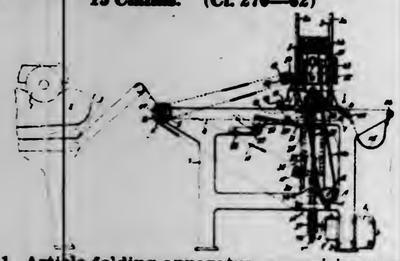
2,000,058
THREE-COLOR PHOTOGRAPHY
Joseph A. Ball, Los Angeles, Calif., assignor, by mesne assignments, to Technicolor, Inc., New York, N. Y., a corporation of Delaware
Application June 22, 1931, Serial No. 545,951
23 Claims. (Cl. 95—2)

1. Photographic apparatus comprising juxtaposed apertures, one for a green sensitive film and another for superposed films sensitive to blue and red light respectively, means for focusing light at the apertures respectively, a green filter in the light path to the first aperture, and a minus green filter in the light path to the second aperture.

2,000,059
FOLDER PAPER FASTENER
Russell G. Bourdon, Muskegon, Mich., assignor to The Shaw-Walker Company, Muskegon, Mich., a corporation of Michigan
Application November 5, 1931, Serial No. 573,082
6 Claims. (Cl. 24—153)

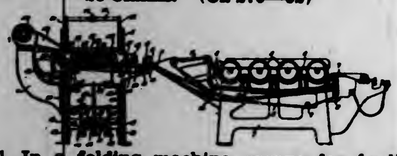
1. A metal fastener comprising a single stout short prong having an integral base adapted to be fixed to a folder, said prong being pointed at its end and relatively wide whereby sheets pierced thereby are held against displacement about the fastener, and a follower plate having a centrally disposed slot to receive and acting to exert pressure on the sheets when the prong is bent over.

2,000,060
ORNAMENTAL CROSS
Raymond F. Brennan, Attleboro, Mass.
Application December 29, 1933, Serial No. 704,387
4 Claims. (Cl. 41—10)



1. An ornamental cross comprising upright and transverse members having central frontal face portions of substantially uniform color and surface appearance throughout, and an outwardly inclined frontal edge portion surrounding said frontal face portions and transversely curved to retain therein a coating material, said frontal edge portion being coated with an adherent material sharply contrasting in color with the color of said central frontal face portions to present in appearance the contour of a cross standing out from the background of the central frontal face portions.

2,000,061
MANUFACTURE OF DIARYL SULPHONES
James Irvin Carr, Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application June 20, 1933, Serial No. 676,759
21 Claims. (Cl. 260—158)



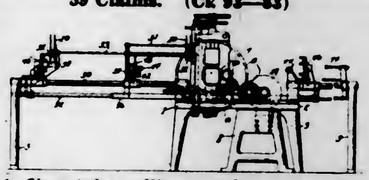
1. A process for the manufacture of a diaryl sulphone, which comprises reacting a volatile aryl compound, having at least one carbon-hydrogen group in the aromatic ring, in vapor phase with sulphur trioxide, and recovering the formed diaryl sulphone from the reaction mass.

2,000,062
FABRIC FOLDING MACHINE
Forrest J. Couch, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a corporation of Ohio
Application February 18, 1933, Serial No. 657,497
15 Claims. (Cl. 270—62)

1. Article folding apparatus, comprising means for winding an article into cylindrical shape, means for conveying an article in a flat state to said winding means, means for cross folding the cylinder, and means sensitive to movement of the article in a flat state for controlling operation of said cross folding means.

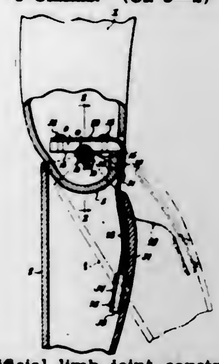
2,000,063
FOLDING MACHINE
Forrest J. Couch, Rochester, N. Y., assignor to The American Laundry Machinery Company, Norwood, Ohio, a corporation of Ohio
Application December 22, 1933, Serial No. 703,593
23 Claims. (Cl. 270—62)

1. In a folding machine, means for feeding a flat article therethrough, means for forming said article into a flattened elliptical shape, means for directing said article from said feeding means about said forming means, a blade adapted to remove the formed article from said forming means, and belts for cross-folding said formed article.



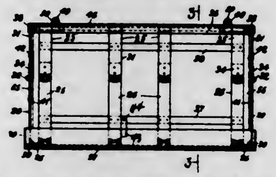
2,000,064
RESPIRATOR
Harvey S. Cover, South Bend, Ind.
Application March 27, 1933, Serial No. 662,929
17 Claims. (Cl. 128—146)

3. A device of the character described comprising a main body portion formed of an integral piece of flexible resilient material and terminating in a pair of forwardly extending



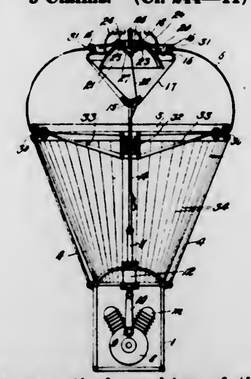
lips arranged to provide a flutter valve, and an intake opening in said main body portion to the rear of said flutter valve.

2,000,065
FIBER TUBE ROLLING MACHINE
Homer J. Davis, Wilmington, Del.
Application September 2, 1930, Serial No. 479,378
59 Claims. (Cl. 92—83)



1. A fiber tube rolling machine comprising a supporting frame, rolling mechanism mounted thereon, delivery mechanism, feeding mechanism for receiving the tubes from the delivery mechanism and reciprocating the same through said rolling mechanism, and timing mechanism for timing the number of passages of the tubes through the rolling mechanism.

2,000,066
ARTIFICIAL LIMB JOINT CONSTRUCTION
William J. Didier, Racine, Wis.
Application November 25, 1933, Serial No. 699,697
8 Claims. (Cl. 3—2)

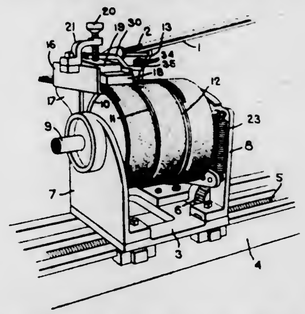


1. An artificial limb joint construction comprising an upper member and a lower member pivotally joined together, a spring rest carried by said upper member and having a rearwardly projecting portion, and a leaf spring secured adjacent its upper portion to said spring rest and extending over the rearwardly projecting portion of said spring rest and attached adjacent the lower portion of said spring to said lower member, whereby said spring urges said lower member towards a forward position and arrests the forward swinging motion of said lower member at a predetermined point with respect to said upper member.

2,000,067
COLLAPSIBLE CONTAINER
Giuseppe Di Mauro, Brooklyn, N. Y., assignor, by direct and mesne assignments, of two-thirds to William M. Goldweber, Bayonne, N. J.
Application February 3, 1933, Serial No. 655,041
2 Claims. (Cl. 220—6)

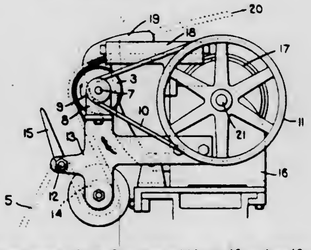
1. In a container the combination of a bottom frame, stabilizers each comprising an upper and lower arm hinged to each other, the lower end of each lower arm of each stabilizer hinged to said bottom frame, a brace connecting a plurality of the lower arms of said stabilizers and a latch arm hinged to said brace adapted to lock with said bottom frame, to maintain said stabilizers in operative position.

2,000,068
AERONAUTICAL MACHINE
John Auguste Domenjos, New York, N. Y.
Application June 13, 1934, Serial No. 730,422
In France August 16, 1932
5 Claims. (Cl. 244—11)



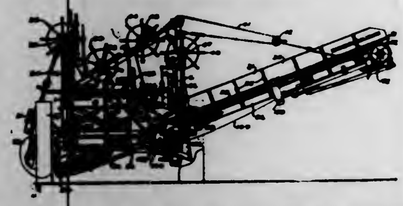
1. An aeronautical machine of the character described comprising a carrier, a motor supported thereby, a flexible motive canopy secured at its outer marginal portion to the carrier and actuating connections from the motor to the central portion of the canopy operative vertically to reciprocate the canopy central portion and air valve means associated with the central portion of the canopy to allow passage of air therethrough during the up-stroke of the actuating connections.

2,000,069
PREPARATION OF LEAD ALKYLS
Frederick B. Downing, Carneys Point, and Louis S. Bake, Pennsgrove, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application May 24, 1932, Serial No. 613,260
6 Claims. (Cl. 260—11)



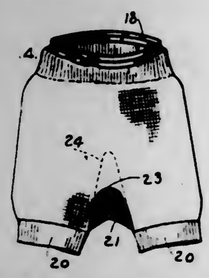
1. The method of producing lead alkyls which comprises reacting an alkyl halide with a composition of matter comprising 10% sodium, 89.95% to 89.00% lead and 0.05% to 1.00% magnesium.

2,000,070
CARD ROLLER MOUNTING MACHINE
Edward S. Flynn, Lowell, Mass., assignor to Davis & Furber Machine Company, North Andover, Mass., a corporation of Massachusetts
Application November 22, 1934, Serial No. 754,269
5 Claims. (Cl. 140—99)



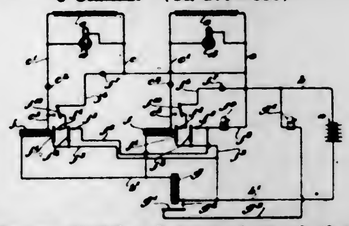
1. An apparatus for applying fillet material under tension to a driven roll comprising means for applying a retarding friction to the fillet; a movable controller held yieldingly against the fillet between the driven roll and the retarding friction-applying means by a pressure just sufficient to be overcome by the desired tension on the fillet; and means connecting the controller and the retarding friction-applying means acting, upon movement of the controller caused by a change from the desired tension, to effect a compensating change in the retarding friction and thereby to restore the desired tension.

2,000,071
CARD CLOTHING RESETTING MACHINE
Edward S. Flynn, Lowell, Mass., assignor to Davis & Furber Machine Company, North Andover, Mass., a corporation of Massachusetts
Application November 22, 1934, Serial No. 754,270
6 Claims. (Cl. 140—98)



1. An apparatus for resetting the teeth of card clothing comprising a roll over which the card clothing is fed with the back of the clothing in engagement with the roll periphery, means for maintaining the back of the card clothing pressed against the roll periphery, and means for rotating the roll in the direction of the feed of the card clothing at a peripheral speed greater than the speed of the feed, whereby any teeth the bases of which project below the back of the clothing are driven in place and reset.

2,000,072
ROAD MACHINE
Rudolph Godstad, Peoria, Ill., assignor to Caterpillar Tractor Co., San Leandro, Calif., a corporation of California
Application February 2, 1933, Serial No. 654,863
8 Claims. (Cl. 37—110)



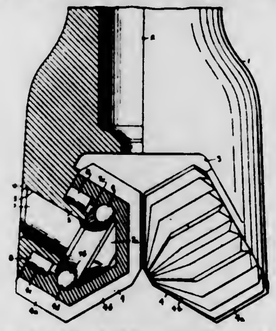
1. In an elevating grader, a frame, a carrier adjustably supported in said frame, a carrier belt on said carrier, a motor mounted in said frame, a clutch housing, means for driving said belt from said motor including a clutch, a clutch-driven shaft, and means for preventing reverse movement of said belt comprising a cam on said shaft having offset cam surfaces, a tubular member secured to said housing and surrounding said cam, said offset cam surfaces and the inner surface of said member forming pockets having substantially radial walls adjacent the deeper ends thereof, rollers in said pockets, and spring-pressed plungers seated in said walls and engaging said rollers, said plungers serving to urge said rollers into engagement with said surfaces to lock said cam against reverse movement.

2,000,073
BODY GARMENT AND METHOD OF MANUFACTURE
Harry A. Geus, Schuylkill Haven, Pa., assignor to Julius Kayser & Co., a corporation of New York
Application April 21, 1932, Serial No. 606,556
4 Claims. (Cl. 66—176)

1. A method of producing knitted body garments which comprises knitting a continuous tubular fabric with a multiplicity of alternately arranged uniform loosely knit sections and uniform tightly knit sections, the loose sections being all of similar dimensions and the tight sections being also of dimensions similar to each other, cutting the double thickness of the tubular material substantially transversely of the latter to form tubular blanks but in such a way that one of the cut edges is at an angle to the other, slitting at least one edge of the blanks partway of its length to form a unitary one-piece garment, and finishing off the end of the relatively tight portion of the knitting below the hips.

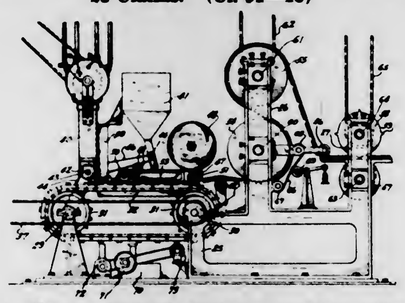
2,000,074
SUPERVISED ELECTRIC SYSTEM
Harry Campbell Grant, Jr., New York, N. Y., assignor to Walter Kidde & Company, Inc., New York, N. Y., a corporation of New York
Application March 8, 1928, Serial No. 259,958
6 Claims. (Cl. 177—355)

1. In an electric alarm system of the type wherein a plurality of circuits are provided each of which includes a source of electrical energy and a relay coil, the combination of two circuits controlled by each relay and independent of the plurality of circuits, one of each of the last named circuits including signalling means of a substantially non-objectionable nature to the senses, and the other thereof including signalling means having a signalling effect of a nature objectionable to the senses, and a switch and connections to close the circuit through a first signalling means and disconnect the second signalling means from actuation by a particular local circuit whilst leaving the second signalling means connected for actuation by any one of the remaining local circuits, said connections maintaining the circuit through the first signalling means closed until the last named switch is opened.



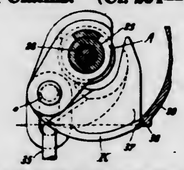
2,000,075
CLAM-OPENER
Vernon R. Hallock, Riverhead, N. Y.
Application November 8, 1930, Serial No. 494,414
Renewed August 28, 1933
2 Claims. (Cl. 17—9)

1. A clam opener comprising a base-plate having a longitudinally disposed groove in its upper side constituting a clam-seat, a pivot-post united with said base-plate, and a knife pivoted to said pivot-post and having a considerably bulged cutting edge over the end of the clam seat towards the pivot-post and constructed to enter said groove and meet the hinge of a clam at a theoretical point when the clam-hinge is seated in said end of the clam-seat, a portion of the bulged cutting edge adjacent the pivot being of substantially the same curvature as the bottom of said clam-seat so as to enable the clam hinge to be severed thereby.



2,000,076
ROLLER BIT
George G. Harrington, Houston, Tex., assignor to Reed Roller Bit Company, Houston, Tex., a corporation of Texas
Application October 3, 1932, Serial No. 635,937
5 Claims. (Cl. 255—71)

1. In a roller bit: a head having a cutter recess in the bottom thereof, a pin opening extending outwardly and upwardly from said recess to the exterior of said head, and an annular flange on the wall of said recess about said opening; a cutter pin in said opening and having an enlarged portion in said recess and bearing against said flange, said enlarged portion having a ball raceway therein, and a removable plug forming a part of said raceway; a roller cutter enclosing said flange and the enlarged portion of said pin, said cutter having a roller raceway in alignment with said



flange and a ball raceway in alignment with the ball raceway of said pin; balls insertable into said ball raceways upon removal of said plug and through the space left thereby, and serving to rotatably lock said cutter on said pin when said plug is replaced; and rollers between said flange and said roller raceway; said cutter having a substantially cylindrical base portion about said balls and rollers and a substantially conical point portion extending inwardly of said head from said base portion.

2,000,077
APPARATUS FOR AND METHOD OF APPLYING SURFACING MATERIAL TO A FABRIC WEB
Norman P. Harshberger, Scarsdale, N. Y., assignor to Bakelite Building Products Co., Inc., New York, N. Y., a corporation of Delaware
Application November 3, 1930, Serial No. 493,033
23 Claims. (Cl. 91—18)

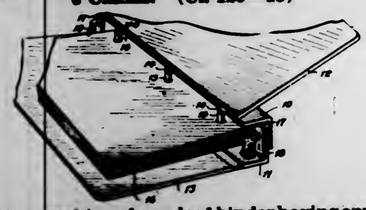
1. The method of applying crushed mineral surfacing in the manufacture of building material, comprising depositing measured amounts of crushed mineral in a hopper in a predetermined arrangement of superimposed strata of different colors, applying bituminous coating to a travelling fabric web, causing the strata of mineral to be discharged in order by said hopper onto a travelling endless receiving means, applying a parting substance to said receiving means prior to the application of mineral thereon, and causing the transfer of said strata of mineral in the same order, from said receiving means onto the coated surface of the web while said surface is still in a plastic state.

2,000,078
HAND BRAKE
Stacy B. Haseltine, Chicago, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a corporation of Delaware
Original application August 1, 1930, Serial No. 472,218. Patent No. 1,931,655, dated October 24, 1933. Divided and this application September 22, 1933, Serial No. 690,521
4 Claims. (Cl. 254—149)

1. In a hand brake mechanism, the combination with a chain-winding drum; of a brake chain connected to the drum; operating means for rotating the drum; a gravity-influenced swinging stop member connected to the drum; and stop shoulder means cooperating with said stop member to stop rotation of the drum when the brakes are completely released.

2,000,079
MACHINE
Lee Roy Herndon, Kenmore, N. Y., assignor to Du Pont Cellophane Company, Inc., New York, N. Y., a corporation of Delaware
Continuation of application Serial No. 540,412, May 27, 1931. This application October 21, 1932, Serial No. 639,000
13 Claims. (Cl. 18—57)

1. In the manufacture of regenerated cellulose films the step which comprises passing the film over a heated roller having an adhesive surface.

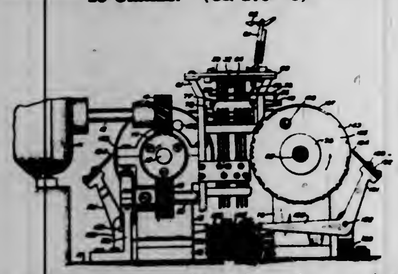


2,000,080
SWITCH
Peder B. Hoye, Maywood, Ill., assignor to Electrical Engineers Equipment Co., Melrose Park, Ill., a corporation of Illinois
Application June 20, 1932, Serial No. 618,273
17 Claims. (Cl. 200—48)

1. A pivotally mounted contact housing comprising a substantially box-like structure having a slit opening on one side merging at one end with an outwardly flared opening at an adjacent side for receiving a switch blade, a stop member extending outwardly of the housing adjacent the opposite end of the slit and having a curved camming surface, a pair of mounting ears projecting from the housing from adjacent the side opposite the side having the slit opening, a pivotal mounting for the housing including a pivot pin extending through the mounting ears, spring means biasing the housing about its pivot to a predetermined normal position, stop means for limiting the extent of turning of the housing

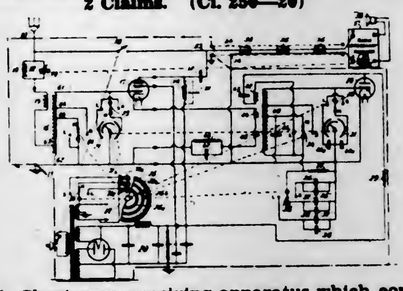
about its pivot to a fractional part of a half revolution, and contact means mounted within the housing and adapted to receive a blade.

2,000,681
LOOSE LEAF BINDER
Stanley G. Johnson, Grosse Pointe, Mich., assignor to The Burkhardt Company, a corporation of Michigan
Application May 4, 1934, Serial No. 723,944
6 Claims. (Cl. 129—13)



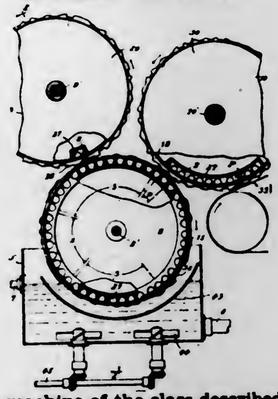
1. In a post type loose leaf binder having opposed leaf-engaging members and means for receiving punched filler sheets, round solid posts secured to one of the leaf-engaging members, hollow posts having an internal diameter slightly larger than said round solid posts secured to the other leaf-engaging member telescopingly receiving said solid posts, said hollow posts having radially disposed concentric apertures therethrough forming a shouldered recess within said hollow posts for receiving a locking member, a rotatable locking member having a head concaved substantially coincident with the inner surface of the said hollow posts within each of said hollow posts, the said locking members adapted to be urged into vise-like biting engagement with the said solid posts.

2,000,682
ARTIFICIAL MANURE AND METHOD OF PRODUCING SAME
Jacob Kaiser, Vaihingen, and Eberhard Sauer, Stuttgart, Germany
No Drawing. Application March 11, 1931, Serial No. 521,876. In Germany July 16, 1927
1 Claim. (Cl. 71—8)



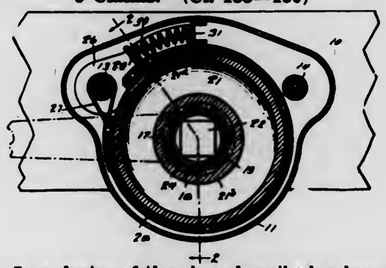
As a new product, an artificial manure being a substantially neutral mixture of putrefied sludge from town-sewage settling tanks (Imhoff tanks) with peat, the product being loose and strewable.

2,000,683
FACSIMILE PRINTING TELEGRAPH SYSTEM AND APPARATUS
Edward F. Kleinschmidt, Chicago, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application November 1, 1930, Serial No. 492,855
15 Claims. (Cl. 178—5)



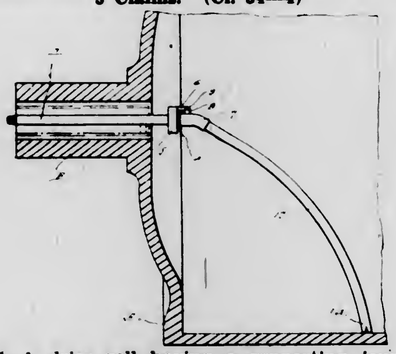
1. In a facsimile telegraph system, a transmitter having a plurality of similar transmitting elements each having control surfaces corresponding to the light and dark areas of a scanned character, and an additional similar transmitting element for transmitting a stop condition to all receivers connected to said transmitter.

2,000,684
SHORT WAVE RECEIVER ARRANGEMENT
Harold Miller Lewis, Douglaston, N. Y., assignor to Hazeltine Corporation
Application September 25, 1931, Serial No. 565,025
2 Claims. (Cl. 250—20)



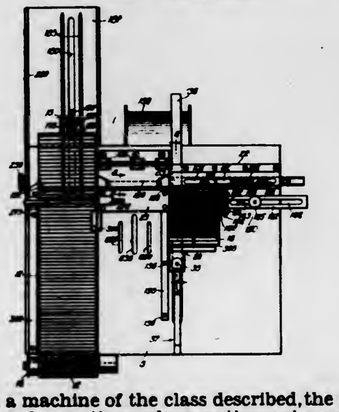
1. Short wave receiving apparatus which comprises a converter, for converting short wave signals into long wave signals, said converter including a trap circuit comprising a fixed inductance and a variable condenser in its input circuit for preventing impressing signals of a long wave length directly upon the input of said converter, a radio broadcast receiver connected to said converter, and means connecting the tuning element of said wave trap with the tuning element of said broadcast receiver, whereby said trap circuit will be simultaneously tuned to the wave length to which said broadcast receiver is tuned to prevent impressing signals of the long wave length by said converter upon said broadcast receiver.

2,000,685
PULP MOLDING MACHINE
Alonzo H. Maginnis, Rochelle, Ill.
Application January 5, 1934, Serial No. 705,333
11 Claims. (Cl. 92—56)



1. In a machine of the class described, a forming drum having a molding plate with a predetermined profile, means for depositing pulp in wet plastic condition thereon, means for subjecting the molding plate to vibration relative to the drum while the pulp is being deposited thereon, an extracting drum having a wringer surface profiled to match the profiled surface of the molding plate to subject the coating of pulp to compression between said surfaces to eliminate moisture therefrom and conform the pulp to the profile of the molding plate, means for moving the molding plate on the forming drum into alignment with the surface on the extracting drum prior to registration therewith, and means for transferring the molded product from the molding plate.

2,000,686
SHOCK ABSORBER
Bonnie L. Mallory, Cleveland, Ohio, assignor to Gadget's Inc., Cleveland, Ohio, a corporation of Ohio
Application August 7, 1933, Serial No. 683,982
3 Claims. (Cl. 188—130)

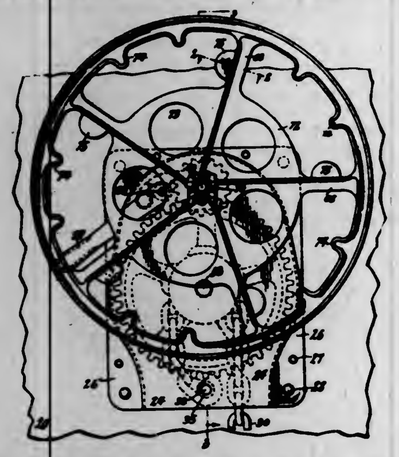


1. In a device of the class described, a housing, a drum journaled therein and having a shaft extending therefrom for receiving an arm, a bolt extending through said housing, a yoke member having its ends received on said bolt, a friction band connected to said bolt, wound around said drum and provided with an abutment received within said yoke, and compression spring means interposed between said abutment and the bight portion of said yoke.

2,000,687
SIPHON
William P. Meeker and Edward C. Price, Franklin, Ohio, assignors to The Black-Clawson Company, Hamilton, Ohio, a corporation of Ohio
Application December 31, 1931, Serial No. 584,308
3 Claims. (Cl. 34—4)

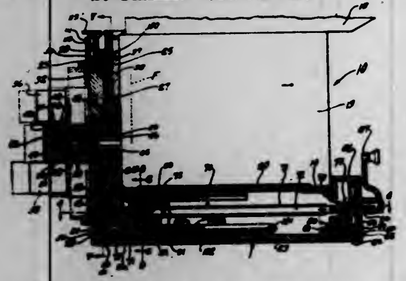
1. A drier roll having a supporting journal provided with a horizontal passage of restricted diameter, and, in combination therewith, a siphon pipe assembly adapted for entry through said passage and for removal therefrom, said assembly comprising a supporting pipe portion extending horizontally through said passage, a pipe extension within the drier roll depending angularly downwardly from the end of said pipe portion, interconnected attachment members on the adjacent ends of said pipe portion and said pipe extension, said attachment members having engageable seat portions normally providing a substantially fluid-tight connection and maintained in seating engagement merely by the weight of the extension pipe and its connected attachment member, said attachment members having interengaging portions affording upward movement of the pipe extension into general alignment with said pipe portion.

2,000,688
TYPE BAR MACHINE
Harley J. Megley, Chicago, Ill.
Application January 28, 1933, Serial No. 653,966
6 Claims. (Cl. 29—24)



1. In a machine of the class described, the combination of a continuously operating reciprocatory means for moving a printing slug by intermittent motion in a given path, and movable means operable with said continuously operating means during a portion of its reciprocatory movement but during a period of intermission in the movement of the slug and constituting a part of the machine for operating upon the slug in a direction transverse to the normal movement of the slug in said path to form retention means on the slug.

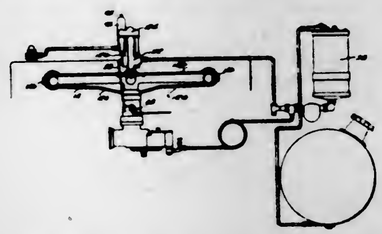
2,000,689
HAND BRAKE MECHANISM
Frank D. Miller and Everard C. Mersereau, Buffalo, N. Y., assignors to National Brake Company, Inc., Buffalo, N. Y., a corporation of New York
Application April 3, 1933, Serial No. 664,096
1 Claim. (Cl. 188—81.1)



A holding and releasing mechanism for railway car hand brakes including a ratchet wheel, a detent pawl engaging said ratchet wheel, a pawl shaft carrying said pawl and having a radial bearing face adjacent to the axis of the pawl shaft and a peripheral stop face, and a trip shaft having its axis parallel with the axes of said pawl and ratchet wheel and having a releasing cam adapted to engage said pawl for disengaging the same from said ratchet wheel upon turning the trip shaft in one direction, a closing finger adapted to engage said bearing face and press the pawl into engagement with the ratchet wheel

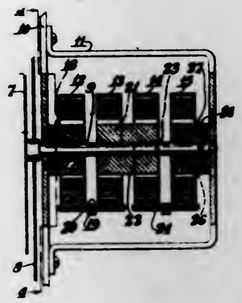
upon turning the trip shaft in the opposite direction, and also having a stop dog adapted to en-

gage said stop face for limiting the pawl releasing movement of said trip shaft.



2,000,090
CAMERA FOCUSING MECHANISM
George A. Mitchell, Los Angeles, Calif., assignor to Mitchell Camera Corporation, West Hollywood, Calif., a corporation of Delaware
Application February 23, 1934, Serial No. 712,545
27 Claims. (Cl. 95—45)

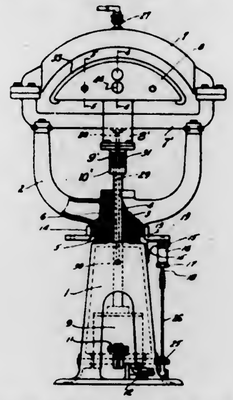
1. In a lens focusing mechanism, the combination of a movable lens carrier member adapted to be moved to carry a lens forwardly and rearwardly, and means for moving said carrier member embodying a lens carrier operating member movable in a straight line and operably connected with said lens carrier member, an operating lever connected to said member, and a fulcrum for said lever adjustable in a direction at right angles to the line of movement of said lens carrier operating member.



2,000,091
PRESSURE DELIVERY OF FUEL IN INTERNAL COMBUSTION ENGINES
Arlington Moore, New York, N. Y., assignor, by mesne assignments, to Maxmoor Corporation, New York, N. Y., a corporation of Delaware
Application October 24, 1927, Serial No. 228,210
25 Claims. (Cl. 123—127)

2. The herein described method of improving the operation of internal combustion engines during accelerating periods which consists in imposing the pressure of the gases and products of combustion from the engine cylinder upon a head of auxiliary fuel, and effecting the delivery there-

of under said pressure into the air at a point in advance of the point of introduction of main fuel, whereby to supplement the main charge of fuel and air when the same is in an impoverished mixture state.



2,000,092
THERMOMETER
Harry Y. Norwood, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a corporation of New York
Application October 12, 1933, Serial No. 693,263
1 Claim. (Cl. 297—12)

Actuating mechanism for a thermo-responsive device comprising a composite spring formed of coaxially arranged bimetallic coil spring sections joined together in series by rigid connections including at least one sleeve, a collar, one end of said spring being fixed, a shaft attached to the other end of said spring, said shaft being rotatable in said collar and extending through said sleeve and through said coil spring sections along the axis thereof, said sleeve being rotatable on said shaft, and a member actuated by said shaft.

2,000,093
NECKBAND AND COLLAR FINISHING PRESS
John S. Patterson, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a corporation of Ohio
Application November 12, 1930, Serial No. 495,129
Renewed March 21, 1934
15 Claims. (Cl. 68—9)

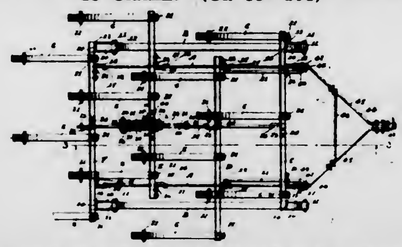
14. A pressing machine comprising a pair of cooperating relatively movable pressing members, one of said members having two differently shaped pressing edges to enable two different types of work to be pressed therewith, and a rotatable support for said last mentioned pressing member to enable either of its pressing edges

to be positioned toward a predetermined side of the machine.

2,000,094
ART OF PRINTING
Victor Peterson, Chicago, Ill., and Archie C. Schaefer, Los Angeles, Calif.
Application September 14, 1932, Serial No. 633,032
6 Claims. (Cl. 101—211)

1. The herein described improvement in the art of printing which includes: making a relief tympan with the relief portions thereof corresponding to the areas to be printed; applying a coating of finely granulated material to such portions of an initially plain surface printing plate as to leave uncoated those areas thereon corresponding to said relief printing areas; fixing said relief tympan and coated printing plate in relative register in a printing press with the relief tympan beneath a tympan sheet; inking the printing plate; and then printing the print-receiving sheet while positioned between the printing plate and tympan sheet.

2,000,095
INSULATED ELECTRIC CONDUCTOR
Earle C. Pitman, Princton, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
Application March 11, 1931, Serial No. 521,629
7 Claims. (Cl. 173—264)

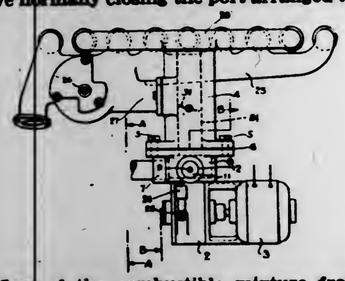


3. An electric conductor comprising a wire, a layer of rubber surrounding the wire, a fabric layer surrounding the rubber layer, and an outer cellulose ester lacquer coating, said fabric layer being impregnated with diethylene glycol phthalate.

2,000,096
PROCESS FOR MANUFACTURING FORMALDEHYDE
Eugène Albert Prudhomme, Levallois-Perret, France, assignor to Lucien Henri Roman, Paris, France
No Drawing. Application July 20, 1931, Serial No. 551,976. In France July 19, 1930
4 Claims. (Cl. 260—138)
(Granted under the provisions of sec. 14, act of March 2, 1927; 357 O. G. 5)

2. A process for the manufacture of formaldehyde which comprises passing a current of gas containing essentially hydrogen and carbon monoxide, at a temperature ranging between 130° C. and 200° C., through a hydrogenation catalyst of the nickel group of the periodic system until the catalyst becomes polarised by polymerisation of aldehydes formed by the reaction of the hydrogen and the carbon monoxide, and then passing a current of gas consisting essentially of nitrogen through said catalyst to cause depolarization thereof.

2,000,097
SPRING TOOTH HARROW
Arthur W. Reynolds, Newtown, Conn.
Application October 20, 1933, Serial No. 694,404
18 Claims. (Cl. 55—104)



1. In a harrow of the class described, the combination of a pair of spaced side-bars, a series of tooth bars each separately pivoted upon and crosswise above the side bars, teeth mounted upon the tooth bars and extended rearward over the next adjacent tooth bar, and means for uniformly swinging the tooth bars forward and backward in a manner to raise and lower the said teeth.

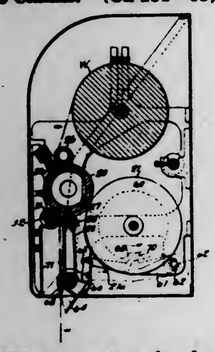
8. A harrow comprising a frame, including a pair of spaced side-bars, a series of bearing arms hingedly connected to each side bar, a series of tooth bars supported on said arms and crosswise above the side bars, and teeth mounted upon the said bars and extended rearward runners hung from the side bars to support the harrow and adapted to be raised and lowered, means for moving the arms and tooth bars forward and backward in a manner to raise and lower the teeth and runners, and adjustable means for limiting the amount of said movement.

2,000,098
INTERNAL COMBUSTION MOTOR CARBURATION APPARATUS AND SYSTEM OF CONTROL THEREFOR
Oscar A. Ross, New York, N. Y.
Application April 23, 1927, Serial No. 186,087
23 Claims. (Cl. 123—119)

1. In combination with an internal combustion motor having an intake passage in communication therewith, of a combustible mixture producing device comprising, apparatus for finely dividing and suspending a liquid fuel in air, an air

passage in communication therewith for supplying air thereto, a combustible mixture passage also in communication with the apparatus arranged to conduct the combustible mixture from the apparatus to the intake passage, a port connecting the air and combustible mixture passages, a valve normally closing the port arranged to per-

mit flow of the combustible mixture from the combustible mixture passage to the air passage but restraining movement of air from the air passage to the combustible mixture passage, a spring for seating the valve, means for adjusting the tension of the spring, and a source of liquid fuel arranged to supply fuel therefrom to the device.



2,000,099

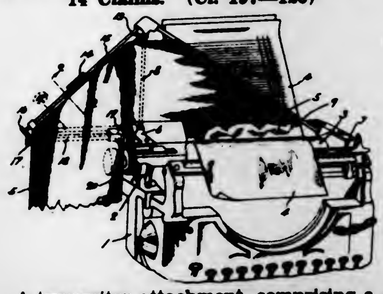
PAPER DELIVERY MECHANISM

George Schaefer, Jr., Flushing, N. Y., assignor to Sanitary Public Service Corporation, New York, N. Y., a corporation of Delaware

Application December 19, 1933, Serial No. 703,099

15 Claims. (Cl. 164—68)

1. A machine having a cycle of operations for severing a web of paper to form paper articles one at a time, including male and female rollers meshing together and having severing devices which cut the web to form the article to shape without completely severing the same, a pressure roller disposed to grip the entire width of the paper after severing to thereby hold the formed but incompletely severed article suspended, manually releasable stop mechanism for stopping the machine with the completed article passed beyond the pressure roller, a delivery chute having front and rear walls confining the paper after it passes by the pressure roller, a movable door across the bottom of the chute, and door operating means effective for keeping the door closed except at the end of the cycle whereby the article being formed is confined in the chute above the door during formation and for opening it at the end of the cycle to allow the article to drop out of the chute.



2,000,100

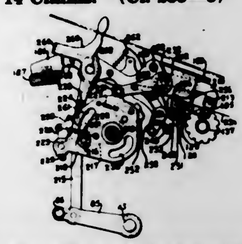
TRANSFER MATERIAL STRIPPER

John Q. Sherman, Dayton, Ohio

Application September 19, 1931, Serial No. 563,820

14 Claims. (Cl. 197—126)

1. A typewriter attachment, comprising a carbon paper guide disposed intermediate the paths of superposed strips of record material as they leave the writing machine and in diagonally disposed relation with the path of travel of the strips, and a take-up device for withdrawing the carbon material over said diagonal guide from between the superposed portions of record material.



2,000,101

CASH REGISTER

Bernis M. Shipley, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio, a corporation of Maryland

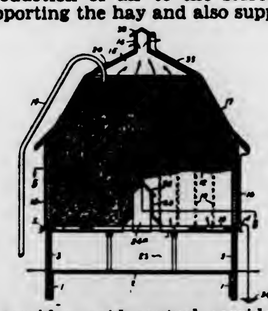
Application July 24, 1930, Serial No. 470,366

14 Claims. (Cl. 235—3)

1. In a machine of the class described, the combination with type carriers; and impression means; of a cam to operate the impression means, a pawl mounted on the cam; means to drive the cam through the pawl; a rock shaft; connections between said means and the rock shaft to drive the means; and manually operated devices to operate the rock shaft.

2,000,102

APPARATUS FOR THE STORAGE OF HAY



John G. Shedron, Fort Atkinson, Wis., assignor to James Manufacturing Company, Fort Atkinson, Wis., a corporation of Wisconsin

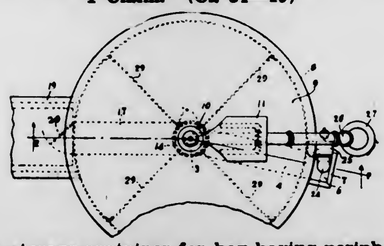
Application November 18, 1932, Serial No. 643,232

3 Claims. (Cl. 98—54)

1. In combination, in a barn, means of dividing the barn into a plurality of thin tall compartments with foraminous walls, said walls extending across the entire width of the barn, means of storing hay between said walls, means of introducing air between said columns of hay through the walls thereof for ventilating the hay columns, means enclosing the top of said columns for guiding the air from the hay upwardly and out the top thereof, means forming a central corridor between said hay columns into which hay can be discharged, and means below said hay columns for the enclosure of stock and

the reception of feed to feed the stock, said barn being provided with a floor having openings for the introduction of air to the stored hay, said floor supporting the hay and also supporting said

central corridor, said central corridor having a roof located a comparatively short distance above said floor, and a side opening for the removal of hay.



2,000,103

APPARATUS FOR STORAGE, CURING, AND PRESERVATION OF HAY

John G. Shedron, Fort Atkinson, Wis., assignor to James Manufacturing Company, Fort Atkinson, Wis., a corporation of Wisconsin

Original application October 14, 1932, Serial No. 637,816. Divided and this application August 31, 1933, Serial No. 687,629

1 Claim. (Cl. 34—19)

A storage container for hay having peripheral walls and a roof, and a return air duct located substantially centrally of the container having a plurality of openings, and doors for closing said openings, a blower, an air passageway connected to the exit end of said blower and extending through said container adjacent the top thereof, and having an exit for air beneath the top of said roof, a conical cap on said return air duct for dividing the air as it leaves the exit of said passageway, whereby the air is caused to pass through the hay and enter said return air duct through at least one of said openings, said return air duct being connected to the suction end of said blower.

2,000,104

STRANDING MACHINE

William E. Somerville, Coal City, Ill.

Application January 5, 1934, Serial No. 705,327

6 Claims. (Cl. 117—17)

4. In a wire twisting machine, the combination of a stationary head, a plurality of supply reels for wire strands, said reels mounted for rotation about their individual axes but maintained against bodily rotation, means for supplying a core wire, stationary means adjacent said head for feeding the strands to the core wire at substantially right angles to the axis of the core to be wound about the core, and means for axially rotating the core to wrap the strands therearound and thereafter rotating the formed product, whereby the individual strands will be maintained against twist-

ing about their individual longitudinal axes as the strands are fed to and wrapped or laid about the core.

2,000,105

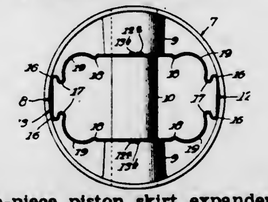
MINERAL OIL COMPOSITION

Bertrand W. Story and Everett W. Fuller, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York

No Drawing. Application July 2, 1932, Serial No. 620,727

1 Claim. (Cl. 87—9)

The combination, with a mineral oil susceptible to atmospheric oxidation, of a relatively small quantity of a stabilizer comprising beta naphthol and dibenzyl disulphide.



2,000,106

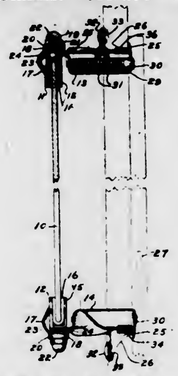
PISTON SKIRT EXPANDER

Ralph R. Teetor, Hagerstown, Ind., assignor to The Perfect Circle Company, Hagerstown, Ind., a corporation of Indiana

Application January 18, 1933, Serial No. 652,279

10 Claims. (Cl. 309—12)

1. A one-piece piston skirt expander formed of flat spring metal and forming a continuous integral oblong figure having a plurality of spaced apart expansion folds adjacent each end.

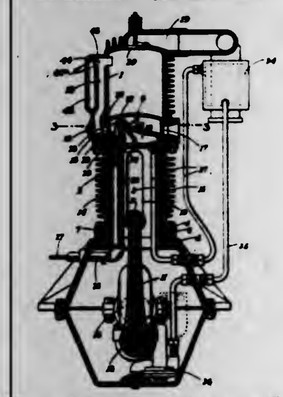


2,000,107

DEFLECTING DEVICE

Joel R. Thorp, West Allis, Wis., assignor to The Fulton Company, West Allis, Wis., a corporation of Wisconsin

Application June 18, 1931, Serial No. 545,235



19 Claims. (Cl. 296—84)

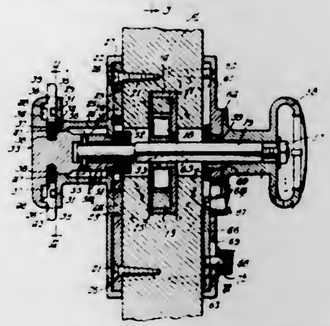
13. In combination, a deflector shield, pivot elements secured to the opposite edges of said shield, each of said elements comprising a part

having a spherical surface spaced from the adjacent end of said shield, and brackets having spherical ends interposed between said surfaces and said shield.

2,000,108
TWO-CYCLE GAS ENGINE
Emmitt M. Tucker, Sacramento, Calif., assignor to Tucker Diesel Motor Co. Ltd., a corporation of California
Application February 29, 1932, Serial No. 595,699
10 Claims. (Cl. 123—50)

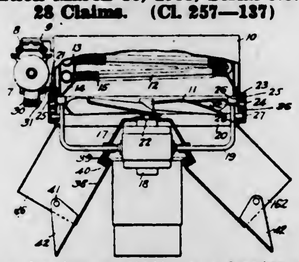
7. A two-cycle gas engine comprising a fixed head, a piston slidable thereon, a compression chamber in which the piston is slidable, said chamber being closed on its outer end and the piston being closed on that end which is disposed between the head and the closed end of the chamber, a valve closed intake to the head of the chamber, a port in one side of the chamber just beyond the head, the piston having a port to register with the chamber port when the piston is at the outer end of its stroke, a by-pass between the chamber port and the side of the chamber near its outer end, and means to reciprocate the piston; said piston at the end of its outward stroke approaching close to the head of the chamber and closing the adjacent end of the by-pass.

2,000,109
OIL WELL SWAB
Bert E. Tyler, Los Angeles, Calif.
Application February 14, 1933, Serial No. 656,669
2 Claims. (Cl. 309—23)



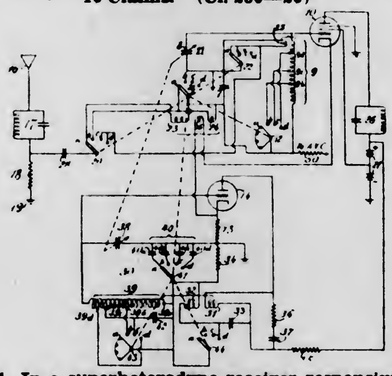
1. A packing structure comprising a pair of cups mounted in opposed relation to each other, and in longitudinal alignment, each of said cups being formed with a cylindrical seat, an expansible packing member having cylindrical portions disposed in the cylindrical seats of the two cups, and an enlarged intermediate portion capable of expansion when the packing member is longitudinally compressed, the end of said expansion member being formed with a circumscribing pressure groove and the ends of the cups being formed with fluid pressure ducts communicating with said grooves whereby fluid pressure will longitudinally compress the expanding member and the edges of said end grooves will be forced outwardly to form a seal with the seat within the cups.

2,000,110
FLOOR SLAB CONSTRUCTION
Frederick M. Vensie, Philadelphia, Pa., assignor to National Gypsum Company, Buffalo, N. Y., a corporation of Delaware
Application December 5, 1931, Serial No. 579,326
7 Claims. (Cl. 72—68)



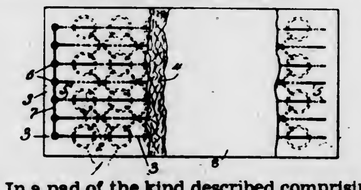
1. In a building construction of the character stated, floor beams, pre-cast floor slabs supported by said beams, a channel iron embedded in each slab end, a channel iron embedded in each slab side, adjacent channel irons of adjacent slabs being arranged to lie one within the other when said slabs are positioned side by side.

2,000,111
KEYLESS LOCK MECHANISM
Paul B. Weis, Aurora, Ill., assignor to S. Eugene Miller, Aurora, Ill.
Application July 28, 1933, Serial No. 682,603
4 Claims. (Cl. 70—58)



1. In a keyless lock, the combination with a closure member and latch therefor, of a locking plate secured to said member, a cover plate adapted to cover said locking plate and having means engageable with the locking plate to prevent relative movement of said plates, a disc formed integrally with said cover plate, a knob rotatably mounted with respect to said disc, manually actuated locking means operatively related to said knob and disc for preventing relative movement thereof, a shaft connected to said knob and latch, and means for securing said shaft and knob against endwise movement with respect to said member.

2,000,112
HEATER
Harry Stewart Wheller, Elizabeth, N. J.
Application March 30, 1933, Serial No. 663,504
28 Claims. (Cl. 257—137)

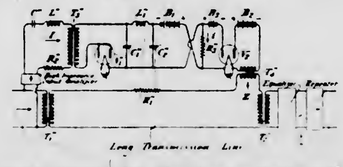


1. In a heater, a stationary heater casing, a heating pipe within the casing, a series of spaced radiator fins carried by the pipe, a motor carried by the casing, a revoluble fan arranged adjacent the casing and coaxially of and driven by the motor to direct air substantially vertically past the pipe and thereby to heat the air, a discharge casing, anti-friction means carried by the heater casing for suspending the discharge casing for rotation relatively to the heater casing, an outlet on the discharge casing arranged to discharge heated air under the influence of the fan in a direction inclined to the vertical, and means including a member operatively connected to the discharge casing for imparting continuous rotational movement to the discharge casing whereby the heated air is given a rotary motion in a generally downward and outward direction and distributed in a continuous stream to all parts of a predetermined area successively.

2,000,113
SUPERHETERODYNE RADIORECEIVER
Harold Alden Wheeler, Great Neck, N. Y., assignor to Hazeltine Corporation, a corporation of Delaware
Application November 16, 1933, Serial No. 698,280
10 Claims. (Cl. 250—20)

1. In a superheterodyne receiver responsive to signals within a lower and a higher frequency band, having a tunable heterodyne oscillator and a selector tunable to the signal frequency, the arrangement for minimizing the required frequency range of said oscillator, which comprises uni-control means for simultaneously tuning both selector and oscillator, and switching means for maintaining the oscillator frequency higher than the selector frequency in the lower band and lower than the selector frequency in the higher band.

2,000,114
UPHOLSTERING FOR METAL SPRING CONSTRUCTIONS
Frank B. Williams and Harold E. Williams, Carthage, Mo.
Application January 31, 1934, Serial No. 709,122
5 Claims. (Cl. 5—351))



1. In a pad of the kind described comprising an upper cloth sheet and a lower cloth sheet and padding between said sheets, straight parallel resilient wires threaded back and forth through and slidable in said lower sheet and having one set of ends free, and means engaging the other set of ends of said wires and disposed above said lower sheet for holding said wires from substantial longitudinal movement relatively to each other.

2,000,115
ALLOY
Robert T. Wood, Cleveland, Ohio, assignor, by mesne assignments, to Magnesium Development Corporation, a corporation of Delaware
No Drawing. Application September 20, 1933, Serial No. 690,293
5 Claims. (Cl. 75—1)

1. An alloy containing from about 0.1 to about 12.0 per cent of tin, from about 0.5 to about 10.0 per cent of aluminum, from about 0.1 to about 1.0 per cent of manganese, and at least one of the class of elements composed of zinc and cadmium in total amount betwen about 0.1 per cent and 5.0 per cent, the balance being substantially magnesium.

2,000,116
TRANSMISSION REGULATION
Sumner B. Wright, South Orange, N. J., assignor to American Telephone and Telegraph Company, a corporation of New York
Application January 17, 1930, Serial No. 421,454
4 Claims. (Cl. 178—44)

3. In a circuit for the transmission of alternating currents, a regulating network including a resistance, a variable impedance effectively in series therewith, means responsive to changes in the intensity of the energy impressed on the input of said network for making adjustment of the magnitude of said variable impedance to introduce an auxiliary distortion tending to produce inequality between the ratio of two values at the input of the network and the ratio of the corresponding values at the output thereof, means for correcting such control in accordance with variation of the frequency of the currents impressed on the input of said network, and means for controlling the delay in the action of said network.

2,000,117

OESTRUS EXCITING PRODUCT AND PROCESS OF PRODUCING SAME

Selmar Aschheim, Berlin-Charlottenberg, Germany, assignor to Schering-Kahlbaum A. G., Berlin, Germany

No Drawing. Application January 13, 1931, Serial No. 508,547. In Germany January 17, 1930

4 Claims. (Cl. 167—74)

1. The process for the production of an oestrogenous substance, which comprises treating bituminous material and derivatives thereof with organic solvents, and isolating said substance from the extract obtained by said treatment.

2,000,118

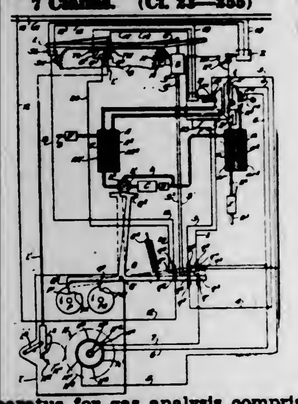
PYROLYSIS OF HYDROCARBONS

David Bloede, Northwich, England, assignor to Imperial Chemical Industries Limited, London, England, a corporation of England

No Drawing. Application November 5, 1930, Serial No. 493,696. In Great Britain November 12, 1929

2 Claims. (Cl. 260—170)

1. The process of forming acetylene which comprises passing a gas mixture consisting of equal volumes of methane and hydrochloric acid through a tube of non-metallic refractory material at a temperature of 1400–1450° C. and at a space velocity of 6000–9000.



2,000,119

APPARATUS FOR GAS ANALYSES

Richard F. Brown, Philadelphia, and Thomas R. Harrison, Wyncote, Pa., assignors to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania

Application September 11, 1930, Serial No. 481,085

7 Claims. (Cl. 23—255)

1. Apparatus for gas analysis comprising two gas analyzing devices, burning means for burning unconsumed combustible constituents of the gas, means normally operative to pass the gas first through one of said devices, then through said burning means and then the other device, measuring means including elements individual to each of said devices and a common measuring instrument adapted to be interchangeably connected therewith, a by-pass about said burning means, periodically operating means connecting said measuring instrument to the elements individual to each of said devices at alternate intervals to separately measure the operative results of said devices and, at less frequent intervals, to divert the gas flow away from said burning means into said by-pass and to connect said instrument and elements to measure any unbalance in the operative results of said devices, and means controlled by said instrument at said less frequent intervals for effecting corrective adjustments of said mechanism tending to eliminate such unbalance.

5. A Wheatstone bridge measuring circuit comprising a bridge energizing source of current and three pairs of bridge arms connected in multiple with one another to said source, the two arms of one pair being of fixed resistance value and the relative resistances of the two arms of each other pair being variable, mechanism normally operative to successively measure the potential differences between the junction of the arms of fixed resistance and the junction of the arms of first one and then the other of the other two pairs of arms at regular intervals, and means operative at less frequent intervals for measuring the potential difference between the last mentioned two junctions and adjusting the said circuit to minimize the last mentioned potential difference.

2,000,120

STAIN AND RELATED COMPOSITION

Edward R. Bush, Lemont, Ill., assignor to Chadeloid Chemical Company, New York, N. Y., a corporation of West Virginia

No Drawing. Application December 20, 1932, Serial No. 648,137

25 Claims. (Cl. 134—48)

7. A shading stain consisting of a water-soluble acid aniline dye in solution in a rapidly volatilizing organic solvent.

10. A dye in organic dispersion comprising a dye material normally insoluble in the common organic solvents, a member of a group consisting of ethylene glycols and alkyl ethers of the ethylene glycols and a common organic solvent as a dispersion medium.

2,000,121

WOOD STAIN

Edward R. Bush, Lemont, Ill., assignor, by mesne assignments, to Chadeloid Chemical Company, a corporation of West Virginia

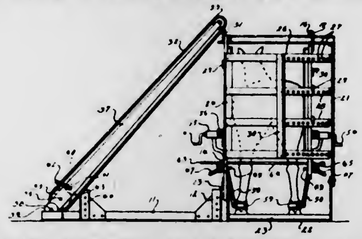
No Drawing. Application November 5, 1929, Serial No. 405,054

11 Claims. (Cl. 134—48)

1. A wood stain composition comprising a water soluble aniline dye, diethylene-glycol monoethyl ether, methanol and toluol.

2. As a wood stain composition, a water-soluble aniline dye, a volatile solvent therefor including a glycol ether, a volatile hydrocarbon component selected from the group consisting of benzol, toluol, solvent naphtha, xylol, ethyl benzene, and coal tar distillates; and a rapidly volatilizing organic component increasing the rapidity of drying and setting of the composition, said rapidly volatilizing organic component being selected from the group consisting of the aliphatic alcohols, ketones, and the esters of the aliphatic alcohols, the components being present in proportions to yield a substantially light-fast, penetrating, non-bleeding, non-grain raising wood stain.

2,000,122



HORSE SHOEING AND VETERINARY RACK

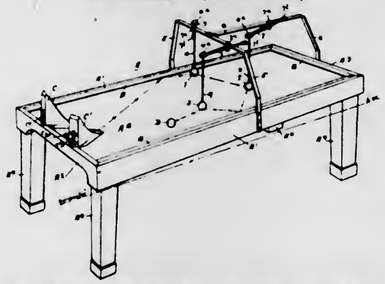
John Duncan Cameron, Dresden, Ontario, Canada

Application February 19, 1931, Serial No. 517,035. Renewed September 1, 1934. In Canada February 19, 1930

6 Claims. (Cl. 119—103)

1. A horse shoeing and veterinary rack including a stationary base; a rectangular body having one side hinged on said base; a second side adjustable toward and away from the first mentioned side of said body; supporting and guiding means for said second mentioned side carried by the first mentioned side of the body; end members for said body carried by the first mentioned side and adapted to be locked on the second mentioned side of the body after adjustment of the latter; said sides and ends of the body being padded on their inner faces contacting with an animal clamped in said rack to prevent injury to said animal; a false bottom for

said body; supporting and suspending means for said false bottom carried by a side of the body; means adjustable on either side of said body for holding firmly the legs of the animal clamped in said body and preventing movement of said legs in any direction; and means operable on said base and connected with the upper edge of the first mentioned side of the body for tilting the body with the animal therein on to said base and returning said body to upright position with the animal therein.



2,000,123

GAME AND GAME APPARATUS

George F. Cahill, New York, N. Y.

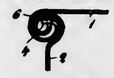
Application November 28, 1932, Serial No. 644,579

22 Claims. (Cl. 273—2)

1. A target mechanism for use in a game apparatus, which includes (*a*) a target; (*b*) a supporting means to support said target; (*c*) means for suspending said target from the target-supporting means aforesaid; and (*d*) means between said target and said supporting means, designed and adapted to permit said target to swing when struck but to damp its oscillations and to bring it to rest quickly thereafter.

2,000,124

BRACKET ARRANGEMENT FOR SHELVES OR THE LIKE



Richard Egidius Carlsson, Stockholm, Sweden

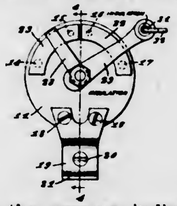
Application December 22, 1933, Serial No. 703,614

In Sweden November 22, 1932

5 Claims. (Cl. 248—19)

1. An adjustable support for shelves, supporting arms and the like comprising a base member provided with a sleeve involute in cross section, a bracket member also provided with a sleeve involute in cross-section telescoping with the

sleeve of said base member and means on each member mutually engageable at the centers of the sleeves.



2,000,125

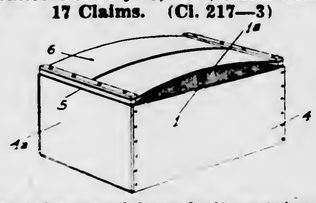
REGULATOR FOR CHARGING GENERATORS

Francis P. Clesi, Charles B. Cousley, and Clarence Meyers, New Orleans, La.

Application September 26, 1932, Serial No. 634,974

1 Claim. (Cl. 201—48)

A device for the purpose indicated comprising a casing formed of complemental disks of equal thickness and means for securing the same together in facing relation, one of said disks being formed with an annular channel concentric with its axis, a resistance element disposed in said channel, a bushing passing centrally through the disks and provided with means for securing the disks together, a spindle journalled in said bushing, contact segments mounted on the outer face of the channel disk and respectively electrically connected with the extremities of the resistance, a contact arm mounted on the spindle and traversing the segment, an actuating arm connected with the spindle and terminally provided with means for operative connection with the throttle lever of an auto vehicle, and binding posts mounted on the casing disks and respectively electrically connected with the spindle and with one of said contact segments, said contact segments being arranged concentrically with the bushing and at the same radial distance therefrom and being of an angular extent equal to approximately half the angular movement of the contact arm, the segments being in end-to-end relation but slightly spaced from each other.



2,000,126

LINING COLLAR FOR FRUIT BOXES

Robert H. Dart, Sacramento, Calif., assignor, by mesne assignments, to Carton Development Corporation, New York, N. Y., a corporation of Delaware

Application January 13, 1930, Serial No. 420,393

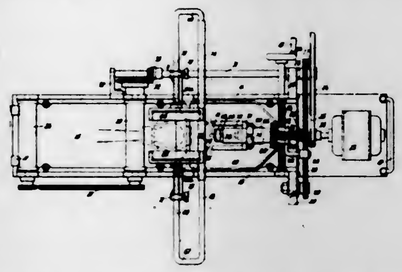
17 Claims. (Cl. 217—3)

13. An edge guard for a fruit container having a lid which is bowed outwardly intermediate its ends, leaving a space between the top edge of a

wall of the container and the bowed lid, said guard including a band to be positioned along the top edge of said wall and extending above such edge, said band extending substantially the full distance between two opposite walls of the container, the outer margin of said band being curved on an outbow from substantially one end of the band to the other in approximate conformity with the bowed contour of the lid.

2,000,127
LINGERIE CLASP
Marie Blanche Desrosiers, East Springfield, Mass.
Application October 11, 1934, Serial No. 747,864
4 Claims. (Cl. 24—73)

1. As an article of manufacture, a flat one-piece member having a base portion and integral free inner end portions spaced from the base portion and with their free inner ends spaced from each other, pin means on one of the integral ends for attaching the article to a garment when in use.



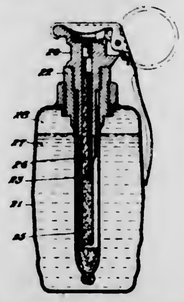
2,000,128
HEEL COVERING MACHINE
William P. Devine, Dorchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application July 22, 1930, Serial No. 469,752
Renewed July 3, 1933
47 Claims. (Cl. 12—42)

1. A device for applying sheet material to a heel comprising an elastic pad having a pair of arcuate grooves in its upper surface extending longitudinally thereof and forming a portion of a contour approximately that of the development of the outer surface of a shoe heel.

2,000,129
GROOVING MACHINE
Richard A. Dunham, Dayton, Ohio
Application April 14, 1934, Serial No. 720,547
22 Claims. (Cl. 82—4)

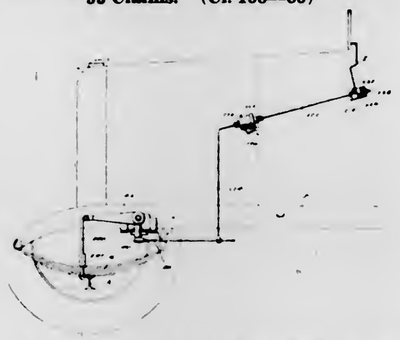
1. In a machine for grooving tires and the like, a supporting structure having its front portion adapted to be moved lengthwise beneath a tire, a roller carried by said portion of said structure to engage said tire and rotate the same, a motor mounted on the rear portion of said structure, a cutter supporting device mounted on said structure between said roller and said motor for reciprocatory movement transverse to said structure, a grooving cutter carried by said device and

adapted to engage the periphery of a tire which is being rotated by said roller, means driven by said motor to actuate said roller to rotate said tire against said cutter, and means driven by said motor for imparting reciprocatory movement to said cutter supporting device and said cutter to impart a sinuous form to the groove cut by said cutter.



2,000,130
WIDE BAND TRANSMISSION SYSTEM
Lloyd Espenschied, Kew Gardens, N. Y., and Estill I. Green, East Orange, N. J., assignors to American Telephone and Telegraph Company, a corporation of New York
Application December 16, 1932, Serial No. 647,682
11 Claims. (Cl. 250—9)

1. In a radio system capable of transmitting a band of frequencies whose width is many times the width of the audible frequency range, terminal arrangements whereby said frequency band may be utilized for a plurality of signaling channels, terminal apparatus for transmitting radio signals, a plurality of repeaters for receiving and transmitting radio signals, terminal apparatus for receiving radio signals, and arrangements in at least one of said repeaters for dropping off signaling channels and adding other signaling channels.



7. In a multiplex transmission system, means for deriving control frequencies lying one above and one below the band of frequencies to be transmitted by the system so that said control frequencies will be separated by a frequency width many times that between adjacent channels, means for transmitting said control frequencies over the system in association with said band of signal frequencies, and means at some point in the system for deriving from said control frequencies a frequency many times as great as the inter-channel separation, whereby the frequency for shifting the entire signal band in the frequency spectrum may be derived by simple harmonic production.

2,000,131
DISABLING AND INCAPACITATING GAS GENERATING CHEMICAL
Byron C. Goss, Cleveland, Ohio, assignor to United States Ordnance Engineers, Inc., Cleveland, Ohio, a corporation of Ohio
Application March 1, 1932, Serial No. 596,103
6 Claims. (Cl. 167—47)

1. A disabling gas generating chemical composition which generates irritating and disabling "suspensions", containing vanillyl-normal-heptoylamide, associated with an auxiliary pressure generating agent.

2,000,132
SHOCK ABSORBER
John W. Gray, Chattanooga, Tenn., assignor of one-half to Bernard V. Curnen, Chattanooga, Tenn.
Application June 4, 1929, Serial No. 368,264
33 Claims. (Cl. 188—88)

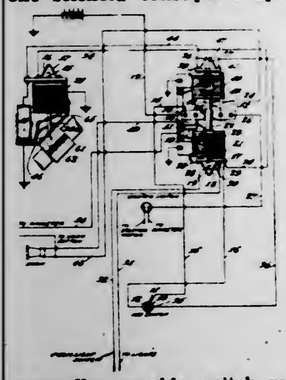
1. A spring damping shock absorber for vehicle bodies suspended by springs having a fluid filled cylinder mounting a piston therein for movement in opposite directions from an intermediate position, a fluid reservoir and a circulating passage connecting the reservoir with the cylinder through which passage the fluid is forced in the single direction of the reservoir by piston movement in opposite directions, means for effecting movement of the piston in synchronism with spring movement, and means mounted in said passage and movable in synchronism with piston and spring movement progressively to restrict the flow of fluid through said passage to apply damping force to spring flexure down and up from normal in synchronism to movement of the spring and to its progressively increasing resistance to flexure, and reversely movable progressively to decrease the attained restriction of said passage to progressively decrease damping force applied to rebound of the spring up to and down to normal in synchronism with the rebound movement of the spring and with the progressive decrease of its rebound force.

2,000,133
AZO DYESTUFF
Josef Haller, Leverkusen-Wiesdorf, Germany, assignor, by mesne assignments, to Durand & Huguenin A.-G., Basel, Switzerland, a corporation of Switzerland
No Drawing. Application August 4, 1931, Serial No. 555,136. In Germany August 11, 1930
8 Claims. (Cl. 260—86)

7. As new products azo dyestuffs of the general formula $R—N=N—R_1$ wherein R stands for the radical of an acid leuco sulfuric acid ester of an indigoid vat dyestuff, the azo group being attached to a carbon atom of an aromatic nucleus of said indigoid dyestuff and R_1 stands for the radical of a compound of the group consisting of acetoacetic acid arylides and pyrazolones, being generally water soluble various colored powders, the sulfuric acid ester groups being split off by the action of oxidizing agents in the presence of mineral acid whereby the color is changed.

2,000,134
MANUFACTURE OF HYDROCYANIC ACID
Charles Roberts Harris, Niagara Falls, N. Y., assignor to The E. I. du Pont de Nemours & Company, Incorporated, Wilmington, Del., a corporation of Delaware
No Drawing. Application July 21, 1933, Serial No. 681,565
10 Claims. (Cl. 23—151)

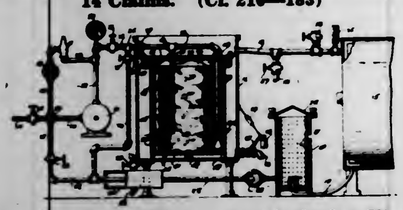
10. A process for producing hydrocyanic acid comprising preheating a mixture of one volume of ammonia, a hydrocarbon gas equivalent to two to five volumes of methane and five to fifteen volumes of air to a temperature of 400 to 1000° C. and passing the preheated mixture through finely divided wood charcoal at a temperature of 1100 to 1500° C.



2,000,135
PIGMENT
Friedrich August Henglein, Cologne-Deutz, and Oswin Nitzschke, Leverkusen-I. G. Werk, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
No Drawing. Application December 23, 1932, Serial No. 648,723. In Germany January 13, 1932
4 Claims. (Cl. 134—58)

1. Process for preparing green pigments consisting in heating an alkaline-earth metal chromate to a temperature of 700–1300° C. in an atmosphere containing SO_y, y standing for 2 or 3.

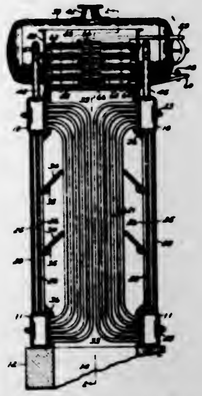
2,000,136
AUTOMOBILE THEFT PREVENTING DEVICE
Joseph F. Huss, Charlotte, N. C., assignor of one-half to Burman K. Bialock, Charlotte, N. C.
Application November 28, 1932, Serial No. 644,737
2 Claims. (Cl. 177—314)



1. In a theft preventing device for automobiles having a battery, a starter switch and a steering shaft, a pair of normally open contacts, one of which is connected to the battery and the other to the starter switch, oppositely disposed solenoids, circuit closing means moved by one of said solenoids into engagement with said contacts for clos-

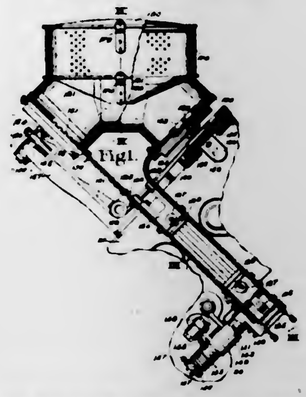
ing the circuit to the starter switch, circuit breaking means movable with said circuit closing means and operable under actuaton of the other solenoid to break the circuit to the starter switch, separate circuits for said solenoids, means operable by said one solenoid for opening the circuit to said one solenoid consequent upon closing

thereof, manually operable switch means connected to said separate circuits for controlling the closing thereof, locking means for the steering shaft, electrically operated means in circuit with said one solenoid for moving said locking means to released position, and electrically operated means in circuit with said other solenoid for holding said locking means in released position.



2,000,137
PRESSURE FILTER
Blaine Kelley, Charlotte, N. C.
Application August 19, 1931, Serial No. 558,179
14 Claims. (Cl. 210—183)

14. A pressure filter, a receptacle for filtered solvent having an outlet, a foraminous casing in said receptacle, a filter-bag supported in said casing, and means for delivering the fluid to be cleaned together with a powdered suspended filter-aid into the filter-bag at a point adjacent its lower end and in a direction tangential to the wall of the bag to thus cause a swirling motion of the mixture upwardly within the entire area of the filter-bag whereby the filter-aid is uniformly deposited in the form of a filter-cake upon the wall of the filter-bag throughout the area thereof and whereby also any displaced pieces of the filter-cake will be disintegrated and redistributed and redeposited upon the wall of the filter-bag.



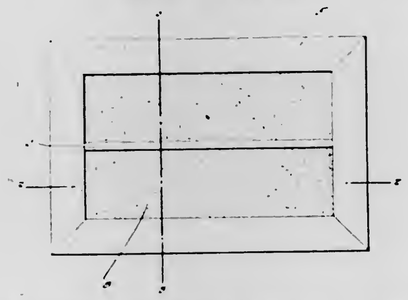
2,000,138
STEAM GENERATOR
Max H. Kuhner, Worcester, Mass., assignor to Riley Stoker Corporation, Worcester, Mass., a corporation of Massachusetts
Application July 2, 1932, Serial No. 618,864
13 Claims. (Cl. 122—332)

1. A steam generator comprising four parallel horizontal headers arranged at the four corners of a vertical rectangle, longitudinal walls extending between the upper and lower headers to define a vertical gas passage, a group of vertical tubes located within the gas passage and spaced laterally from said walls, the upper and lower

ends of the tubes being bent laterally and connected to the upper and lower headers respectively, and a plurality of vertically spaced baffles extending between each wall and the tubes to direct gases among the tubes.

2,000,139
FASTENER SUPPLYING MECHANISM
Axel A. Lawson, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Original application September 20, 1932, Serial No. 633,973. Divided and this application March 31, 1933, Serial No. 663,786
7 Claims. (Cl. 218—15.1)

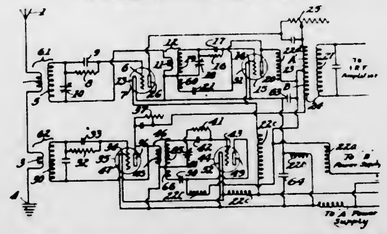
1. A fastener-inserting machine comprising a frame, a detachable fastener-supplying unit including fastener-supplying brushes arranged to rotate about angularly related axes, said frame and said unit being provided with cooperative interengaging members for supporting the unit in an operative position, and rotary brush-driving members journaled in said frame to rotate about said axes respectively, said brushes and said driving members being provided with brush-driving lugs arranged to be brought into cooperative relation by arranging said unit in said operative position.



3. A fastener-supplying hopper comprising a lower section having a mouth at the top and one or more ports for emitting fasteners, and a detachable upper section formed to be seated on and supported by said lower section, said sections being provided with cooperative means for connecting them, and the upper section having a depressed bottom wall formed and arranged to cover said mouth and enter the lower section and provided with a restrictive opening through which fasteners may be discharged in small volume at a level substantially lower than said mouth.

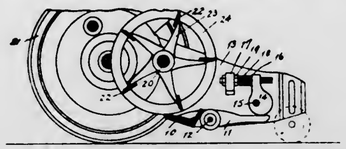
7. A fastener-inserting machine comprising a detachable raceway having a socket open at both ends, raceway-supporting means including a member arranged to extend through and beyond said socket, and a spring-stressed latching device mortised into said member to secure the raceway thereon, the latching device normally projecting from one side of said member and being repressible to flush relation therewith to permit its passing through the socket.

2,000,140
PROCESS FOR THE DISTILLATION OF ZINC AND SIMILAR METALS
Arthur Leysner, Magdeburg, Germany, assignor to the firm Fried. Krupp Grusonwerk Aktiengesellschaft, Magdeburg-Buckau, Germany
No Drawing. Application September 6, 1933, Serial No. 688,414. In Germany September 23, 1932
1 Claim. (Cl. 75—28)



The process of recovering volatilizable metals by reduction of materials containing them, which comprises heating the materials in a rotary muffle, the walls of which are composed at least partly of one or both of the metals nickel and cobalt, while maintaining in the muffle an atmosphere composed principally of carbon monoxide, in order to reduce the materials and volatilize the metals.

2,000,141
SHARPENING DEVICE
Frank Liggieri, Paterson, N. J.
Application December 31, 1934, Serial No. 759,980
1 Claim. (Cl. 51—185)

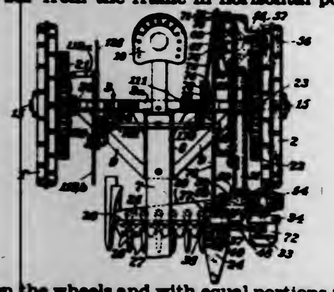


A device of the character described comprising a substantially rectangular frame, a plate member combined within the frame and disposed at an incline, an abrasive sheet covering each side of the plate member, and longitudinal dividing strips arranged in the frame at opposite sides of the plate member and spaced equi-distantly inwardly from opposite sides of the frame.

2,000,142
SYSTEM FOR ELIMINATING STATIC
Casper N. Loewenstein, Columbus, Ohio
Application June 8, 1933, Serial No. 674,859
3 Claims. (Cl. 250—20)

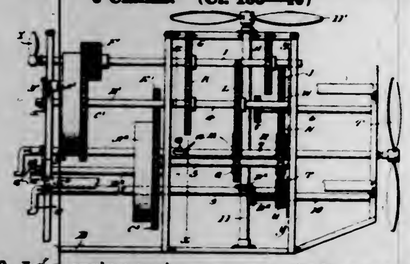
1. A radio hook-up for the elimination of static including two detector circuits each having a detector tube, and a radio frequency transformer having a split primary, the sides of which are connected respectively with the plate elements in the said detector tubes, one detector circuit being tuned to receive a desired signal with static and the other detector circuit being tuned to as close a frequency as possible to that of the first circuit but with static and no signal, vacuum tube oscillators for each detector circuit for producing the same beat frequency in the grid circuits of the detector circuits, whereby the beat frequencies from the plate circuits of the detector tubes will be equal but opposed in the opposite sides of the said split primary of the radio frequency transformer.

2,000,143
LAWN MOWER
Harry Greaves Nall, Sydney, New South Wales, Australia
Application May 13, 1932, Serial No. 611,209. Renewed October 26, 1933. In Australia May 14, 1931
3 Claims. (Cl. 56—294)



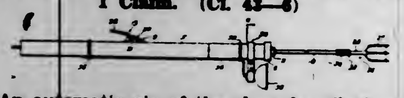
1. A lawn-mower comprising in combination a framing, a reel, a substantially horizontal bottom cutting-blade pivotally mounted on a pin at each side of the framing, a rearwardly-extending arm secured to each end of the blade, and cam-faced members pivoted on the framing and adapted to contact with the rear portions of said arms.

2,000,144
MOWING MACHINE
Mike Holt Newlin, Sanford, N. C., assignor of one-half to Thomas B. Upchurch, Jr., Raeford, N. C., and one-half to Edwards Railway Motor Company, Sanford, N. C., a corporation of North Carolina
Application May 5, 1933, Serial No. 669,618
46 Claims. (Cl. 56—272)



1. A mowing machine for harvesting a crop planted between rows of corn, the machine having an over-all width adapting it to move between two adjacent rows of corn, the machine including a wheel supported frame, a cutter bar and co-

operating knife bar shorter than the width of the frame and cutting a path less than the distance between the wheels, means supporting the cutter bar from the frame in horizontal position

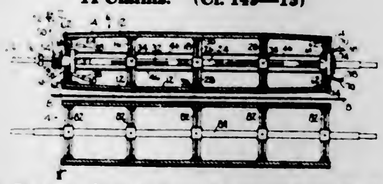


between the wheels and with equal portions thereof located at opposite sides of the longitudinal center of the machine, and means disposed within the wheel tracks for operating the knife bar.

2,000,145
SELF WINDING SPRING MOTOR
Antonio Pate, North Providence, R. I.
Application October 20, 1931, Serial No. 569,988
6 Claims. (Cl. 185—40)

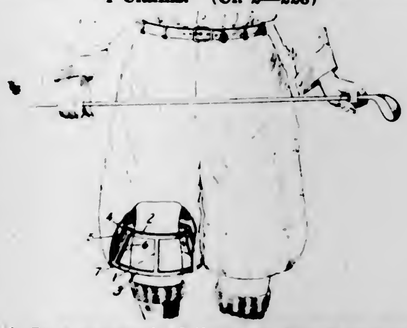
3. In a spring motor, a power shaft, a spring driving unit composed of two spring driven gears, a separate train of gearing connecting each gear to the power shaft, a second spring driven unit composed of two spring driven gears, a gear meshing with the two last mentioned gears and driving a shaft having gears adapted to mesh with one or both of the trains of gearing whereby both units may drive the power shaft or the first unit rewind the second unit.

2,000,146
AUTOMATIC GIG
Marco M. Penn, Tampa, Fla.
Application September 18, 1933, Serial No. 689,964
1 Claim. (Cl. 43—6)



An automatic gig of the class described comprising a longitudinally elongated cylindrical barrel forming a handle and casing, one end of said casing being externally threaded, a guide bushing in said end, a cap screw threaded on said end for securing said bushing therein, a plunger rod mounted for reciprocation in said bushing, a guide collar adjustably mounted on the inner end of said plunger rod, a retractible spring having one end secured to said guide bushing, and the outer end to said guide collar, and trigger means on said barrel cooperable with said plunger rod to hold it in retracted position and to permit it to be automatically projected when released.

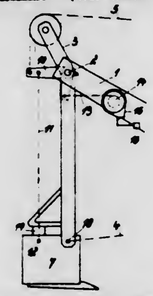
2,000,147
NONPERFORATED CHANNEL ASSEMBLY
Elon C. Place, Detroit, Mich., assignor of one-half to George E. Gagnier, Detroit, Mich.
Application August 7, 1931, Serial No. 555,793
2 Claims. (Cl. 45—138)



2. A metal reinforced trim panel, consisting of a body provided with openings adjacent an edge thereof, a metal reinforcement secured to said edge and including an unperforated skirt portion extending partially over said openings so that the heads of spring fasteners may be positioned in said openings and engaged on said skirt portion through the uncovered part of said openings.

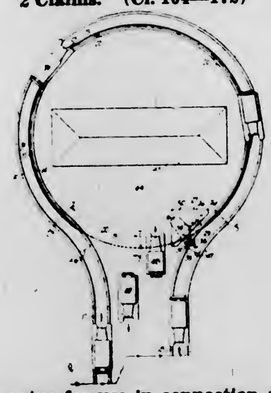
2,000,148
MACHINE FOR TREATING HIDES, SKINS, LEATHER, AND OTHER SIMILAR PIECES OF WORK
Karl Rausch, Dresden, Germany, assignor to The Turner Tanning Machinery Company, Portland, Maine, a corporation of Maine
Application April 10, 1933, Serial No. 665,318
In Germany June 3, 1932
11 Claims. (Cl. 149—15)

1. In a machine for operating upon hides, skins and pieces of leather, a work treating roll having an intermediate cylindrical portion and tapered or conical end portions, and means for simultaneously adjusting the tapered end portions to vary the inclination thereof with respect to the cylindrical portion of the roll.



2,000,149
GARMENT
Morris Reich, Columbus, Ohio
Application August 9, 1934, Serial No. 739,172
4 Claims. (Cl. 2—228)

1. In a garment of the type described having a leg portion, a stiffening unit of substantially

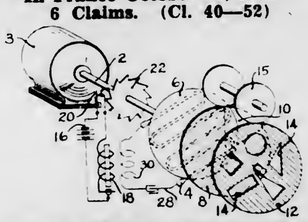


frusto-conical form disposed within said leg portion with the smaller end disposed substantially at the extreme end of the leg portion and the larger end spaced within the leg portion, means for fastening the smaller end of the unit to said leg portion, the end of said leg being turned inwardly and upwardly upon itself to produce a blouse effect.

2,000,150
EXCAVATOR
Heinrich Siebert, Duisburg, Germany, assignor to Demag Aktiengesellschaft, Duisburg, Germany
Application January 27, 1933, Serial No. 653,791
In Germany February 5, 1932
8 Claims. (Cl. 214—138)

1. An instroke excavator comprising a jib, a haft member supported by and rotatable upon the said jib, a shovel movable relatively to and supported by the haft member, a braking element adjustable upon the said jib independently of the said haft member, a hoisting cable connected with the braking element and engaging the haft member, and a link between the braking element and the shovel such that the braking element being retained in fixed relation to the jib the haft member may be swung by the hoisting cable while the shovel retains its angular disposition in space.

2,000,151
WASH RACK FOR AUTOMOBILES
Samuel J. Silverman, Portland, Oreg., assignor to Gillespie Auto Laundry System, Inc., Chicago, Ill., a corporation of Delaware
Application May 10, 1927, Serial No. 190,365
2 Claims. (Cl. 104—172)

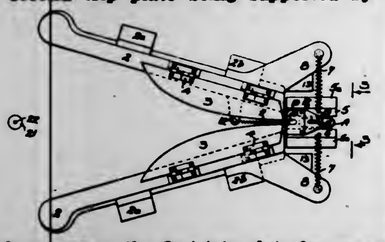


2. Apparatus for use in connection with automobile washing systems comprising a runway for automobiles; the same including a stationary and substantially circular portion around which the automobiles are adapted to be moved and respective entrance and exit stationary portions spaced apart from each other in relative parallelism substantially and co-operable with the circular portion to enable a continuous lane of automobiles to successively enter the circular portion from the entrance portion while another continuous lane of automobiles are successively conducted to the exit portion from the circular portion; means for slowly moving the automobiles around the circular portion as they pass thereinto from the entrance portion and to occupy positions for successive discharge onto the exit portion; and means in the circular portion and the entrance and exit portions for guiding the automobiles during translation thereof.

2,000,152
STABILIZATION OF FORMALDEHYDE SOLUTIONS
Joseph Frederic Walker, Perth Amboy, N. J., assignor to E. I. du Pont de Nemours & Company, Inc., Wilmington, Del., a corporation of Delaware
No Drawing. Application June 29, 1932, Serial No. 619,957
29 Claims. (Cl. 23—250)

1. A method for preventing polymer precipitation in an aqueous formaldehyde solution comprising adding thereto stabilizing amounts of a water-soluble, organic nitrogen compound capable of reversibly reacting with formaldehyde at temperatures below 30° C. to form a water-soluble compound.

2,000,153
METHOD AND APPARATUS FOR PRODUCING VISUAL EFFECTS
Arthur C. Watson, Marietta, Ohio.
Application October 20, 1932, Serial No. 638,825
In France October 20, 1931
6 Claims. (Cl. 40—52)



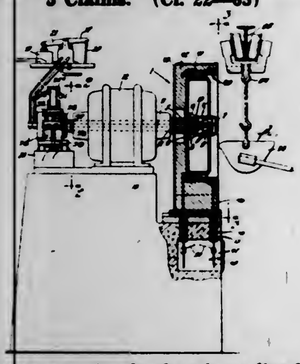
1. A method which consists in causing substantially instantaneous intermittent illuminations throughout an area, cutting off the illumination from a constantly changing portion of such area and cutting off a constantly changing portion of the remaining illumination, the space between successive illuminations and the duration thereof being sufficient to satisfy the requirements for critical frequency for continuous visual sensation and also for the critical frequency for brilliance and producing visual effects of appreciable duration.

2,000,154
PICK-UP AND DELIVERY SYSTEM
Edward John White and Arthur S. Garove, Detroit, Mich.
Application April 16, 1934, Serial No. 720,738
8 Claims. (Cl. 258—1)

2. A pick-up and delivery system comprising a ground station and a travelling element consist-

ing of a cable having a control member depending therefrom, two identical trip plates to each of which a package is secured, means on the ground station detachably supporting one trip plate, a pivoted catch in the control member, the second trip plate being supported by the

catch, means on the first trip plate for engaging the cable so that the latter may slide through said trip plate until it rests upon the control member, and means in the control member actuated by the weight of the first trip plate thereon for moving the catch pivotally and releasing the second trip plate.



2,000,155

APPARATUS FOR FORMING BRAKE DRUMS

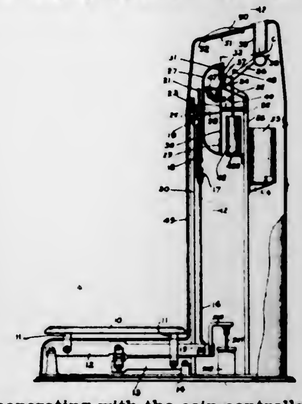
John William White, Detroit, Mich., assignor, by mesne assignments, to Kelsey-Hayes Wheel Company, Detroit, Mich., a corporation of Delaware

Application July 30, 1932, Serial No. 626,266

5 Claims. (Cl. 22—65)

1. In an apparatus for forming a lined annular member, the combination with a rotatable chuck for the annular member, means for rotating said chuck, means for braking said chuck and means for operating said chuck, of means for heating the annular member to a temperature to cause effective fusing thereof with the molten metal which forms the lining, common means controlling the operation of said rotating means, braking means, operating means, and heating means, and means for pouring molten metal into the annular member.

2,000,156



COIN SCALE

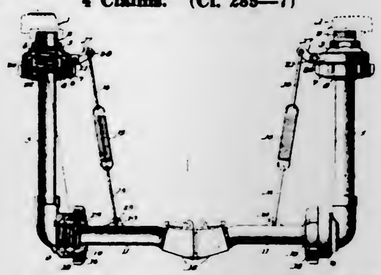
George E. Wood, Toronto, Ontario, Canada, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York

Application May 23, 1933, Serial No. 672,385

5 Claims. (Cl. 194—95)

1. In a coin scale, a load platform, weighing mechanism controlled thereby including a concealed load indicator, means for bringing the load indication of the indicator into view, coin controlled mechanism for receiving a coin for a limited, predetermined interval after which the coin is automatically released independently of the weighing mechanism, the coin controlled mechanism being effective upon reception of a coin for causing operation of said means, a de-

vice cooperating with the coin controlled mechanism for delaying operation of said means to retard exposure of the load indication until the indicator is substantially at rest, and means controlled by the coin mechanism after release of the coin for restoring said first-named means to initial, non-exposing position regardless of the operation of said weighing mechanism.



2,000,157

TRAIN PIPE CONNECTER

Francis N. Bard, Highland Park, Ill., assignor to Barco Manufacturing Co., Chicago, Ill., a corporation of Illinois

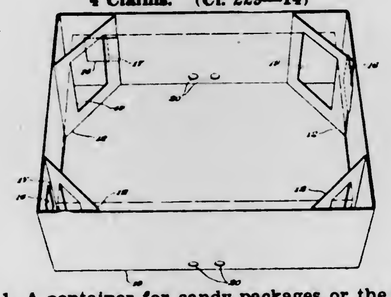
Continuation of application Serial No. 148,434, November 15, 1926. This application August 29, 1932, Serial No. 630,777

4 Claims. (Cl. 285—7)

1. A train pipe connecter comprising a flexible metallic conduit structure adapted to be suspended from the end valve of a railway car and resilient supporting means arranged to hold the horizontal member in its normal operating position when not attached to the corresponding coupler head of an adjoining car, said resilient supporting means being flexibly attached at its upper end to a support which does not move relatively to the car and at its lower end to the horizontal member in such a manner that the points of support are equidistant from centers of rotation between articulated parts of the flexible connecter and said centers and points

of support are the vertices of a parallelogram by virtue of which the resilient supporting means will hold the horizontal member in its normal position when the connecter is not in service and will allow flexing of the connecter in service without increased tension on the resilient supporting means in any position of the connecter.

2,000,158



CONTAINER FOR CANDY PACKAGES AND THE LIKE

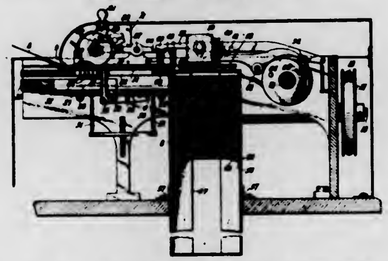
David Black, Newton, and James Reid, Braintree, Mass., assignors to H. D. Foss and Company, Inc., Cambridge, Mass., a corporation of Massachusetts

Application June 11, 1932, Serial No. 616,688

Renewed July 27, 1934

4 Claims. (Cl. 229—14)

1. A container for candy packages or the like comprising a closure of generally rectangular outline supports positioned in the corners of a height corresponding to the interior of the closure, the corner supports being tubular and having slots in the walls adapted to engage the package, the slots corresponding substantially in height to that of the package to prevent displacement of the latter and to maintain the package completely removed from the surrounding walls of the closure when assembled therein, the corner supports being readily removable together with the package from within the closure.



2,000,159

TICKET MACHINE

Andrew Bolognino, New York, N. Y.

Application May 12, 1931, Serial No. 536,890

9 Claims. (Cl. 164—42)

1. In a machine of the character disclosed, the combination of a ticket guide, a stop gage associated with said guide and positioned to positively stop a ticket inserted in said guide, ticket feeding means for engaging a ticket so inserted in the guide, a controller positioned for actuation by a ticket engaged with the stop gage and power actuated means governed by said controller for retracting the stop gage and operating the ticket feeding means.

2,000,160

COMPOSITION OF MATTER AND PROCESS OF PRODUCING POROUS MATERIAL

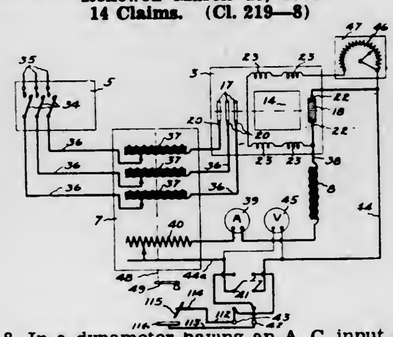
William Edward Broeg, Chicago, Ill., assignor to Standard Brands Incorporated, New York, N. Y., a corporation of Delaware

No Drawing. Application August 10, 1928, Serial No. 298,872. Renewed September 20, 1934

9 Claims. (Cl. 99—10)

1. A yeast free composition of matter containing gum karaya and urea for the purpose of leavening baking powder products.

2,000,161



ARC WELDING APPARATUS

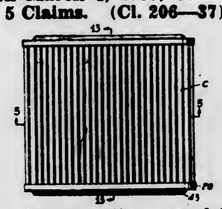
Lynn S. Burgett, Euclid, Ohio

Application August 18, 1928, Serial No. 300,408

Renewed March 15, 1934

14 Claims. (Cl. 219—8)

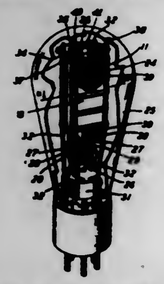
8. In a dynamotor having an A. C. input side and a D. C. output side, inductance connected in the A. C. side in series so as to obtain drooping voltage characteristics in the D. C. output, and resistance connected in series in the D. C. side likewise to cause drooping voltage characteristics in the D. C. output.



2,000,162

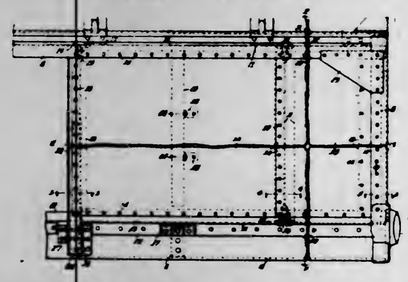
RECEPTACLE

Christian A. Buscham, Newark, N. J., assignor to Exotic Vanities, Inc., New York, N. Y., a corporation of New York



Application March 4, 1935, Serial No. 9,149

5 Claims. (Cl. 206—37)

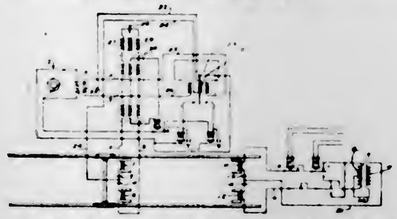


1. A cigarette or vanity case of the character described, comprising a shell having side walls, said walls having lugs, a pair of side pieces, each of said side pieces having an inwardly depressed central portion and perforations in said portion in register with said lugs, said lugs projecting through said perforations and being bent over whereby said side pieces are secured to said walls, each of said side pieces having a continuous channel surrounding the wall to which it is secured, and an articulated closure in slidable engagement with said channels, said closure comprising a plurality of strips of material transversely arranged and means for connecting said strips together.

2,000,163
METHOD OF MOUNTING ELECTRODES
James R. Clark, Long Island City, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application August 4, 1934, Serial No. 738,422
6 Claims. (Cl. 250—27.5)

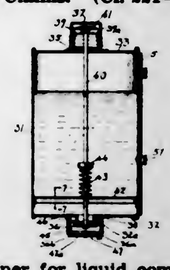
1. The method of assembling hollow grids for discharge devices which comprises forming an inner and an outer grid, placing the inner grid within the outer grid with the laterals in alternate relation, and stretching the grids to a point beyond the elastic limit to secure a permanent set in the laterals, whereby the laterals of one grid will be in the same plane as the laterals of the other grid.

2,000,164
HOUSE CAR
Frank Ditchfield, Cleveland, Ohio, assignor, by direct and mesne assignments, of one-half to The Youngstown Steel Door Company, Cleveland, Ohio, a corporation of Ohio, and one-half to Pressed Steel Car Company, Pittsburgh, Pa., a corporation of New Jersey
Application May 12, 1933, Serial No. 670,725
3 Claims. (Cl. 105—409)



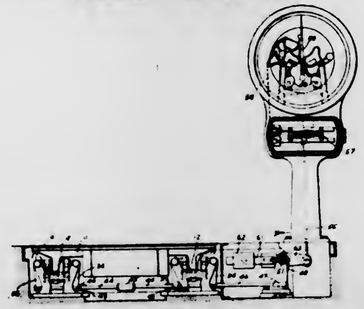
1. A house car having a side door opening comprising: an underframe including a metal side sill; a side plate; metal door and intermediate side posts disposed outwardly of the plane of the side sill and having their lower ends extended downwardly below the top of the side sill and secured to the latter; means for securing the upper ends of said posts to the side plate; sheet metal sheathing between each door post and corner of the car secured along its upper edge to the side plate and to the outer sides of said posts, the lower edge of said sheathing terminating above the bottom ends of said posts; and angular sectioned metal members, each extending between a pair of posts and secured respectively to the corresponding adjacent lower portions of the metal sheathing and to the side sill.

2,000,165
ACOUSTIC DEVICE
John R. Erickson, Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application January 10, 1934, Serial No. 706,021
10 Claims. (Cl. 179—107)



4. A bone conduction receiver comprising an armature, means for actuating said armature, resilient means supporting said armature, said resilient means comprising parallel strips of spring metal, one end of each of which is joined by a substantially diagonally disposed strip of spring metal, and means movable with said armature and resilient means for engagement with the head bones of a user.

2,000,166
RAILWAY SIGNAL SYSTEM
Lloyd Espenschied, Hollis, N. Y.
Application August 24, 1926, Serial No. 131,146
7 Claims. (Cl. 246—63)

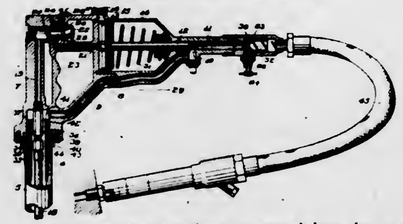


1. A wayside circuit for train control purposes comprising two inductors, means for connecting the two inductors in parallel with each other in the circuit for transmission in one direction, from or to the train, and in series with each other in the circuit for transmission in the reverse direction, means in the wayside for interconnecting the two superimposed paths thus formed, together with means on the train whereby energy is received from said wayside circuit to the substantial exclusion of the energy which is transmitted into it.

2,000,167
LIQUID DISPENSER
James Formañ, Astoria, Long Island, N. Y., assignor to Florence B. Bohack, New York, N. Y., doing business under the name of Progress Supply Company
Application February 13, 1934, Serial No. 711,005
4 Claims. (Cl. 221—16)

1. A container for liquid comprising a closed member having a filling spout and discharge opening, spring pressed valve means normally closing said discharge opening, a closure cap surrounding said discharge opening and having an opening therein, a disk on the exterior of said closure cap provided with an opening adapted to be moved into alignment with the closure cap opening and manual means normally extending outwardly of said filling spout for operating said valve means to open the discharge opening.

2,000,168
SCALE BASE SYSTEM
William N. Gilbert, Hudson Heights, N. J., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application January 15, 1932, Serial No. 586,777
5 Claims. (Cl. 265—71)

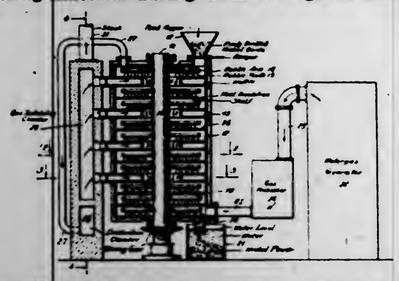


1. In an equilibrium machine, a factor lever, a member movable downwardly under the influence of a load force and connected to a point of said factor lever unequally distant from the ends of the latter to divide the latter into two unequal arms bearing unequal divisions of the force applied by said member at said point, a pair of lever elements immovable relatively to each other, each having a load arm and a power arm with the load arm connected to one of said factor lever arms, said lever elements being fulcrumed to tend to rock in opposite directions under the influence of the force divisions applied thereto by said factor lever, a force counterbalancing device, and operative connections between the device and the power arm of each lever element to influence the device in accordance with the resultant of the forces transmitted by said power arms to the latter connections.

2,000,169
PROCESS OF PRODUCTION OF MALT SIRUP
Herbert C. Gore, Scarsdale, and Stephen Józsa and Charles N. Frey, New York, N. Y., assignors to Standard Brands Incorporated, Dover, Del., a corporation of Delaware
No Drawing. Application January 11, 1930, Serial No. 420,280
5 Claims. (Cl. 99—11)

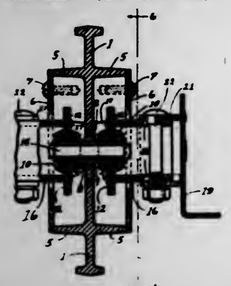
4. The process of manufacturing a stable, highly concentrated malt sirup which includes as steps, in combination, preparing a mash including starchy materials, water and a malt which has been prepared by short germination and drying at a relatively high temperature, converting the starch into sugar by rapidly bringing the mash to a temperature in the neighborhood of 70° C. to avoid excess proteolysis and holding until the starch reaction is no longer obtained, subsequently heating the mash to a temperature in the neighborhood of 90° C. to destroy effectively the proteolytic enzymes, separating the wort from the mash and concentrating to about 80% solids or over.

2,000,170
LUBRICATING MEANS
Russell J. Gray, Minneapolis, Minn.
Application June 28, 1932, Serial No. 619,748
7 Claims. (Cl. 221—47.3)



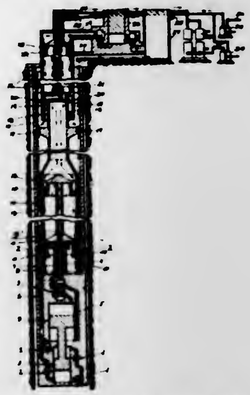
1. A lubricating system comprising in combination a tubular housing having a large diameter low pressure lubricant cylinder nearer the intake end thereof, and having a small diameter and high pressure lubricant cylinder nearer the discharge end thereof, a piston unit movably mounted within said housing, having a large diameter low pressure lubricant actuated piston operatively disposed within said low pressure cylinder, and a small diameter high pressure lubricant expelling piston operatively connected therewith and disposed in cooperative relation to said high pressure cylinder, a lubricant passageway extending through said pistons, and normally interconnecting the intake end and the discharge end of said housing, a check valve carried in the discharge end of said lubricant passageway adapted normally to permit the free flow of lubricant therethrough, but adapted to close when the pressure of lubricant ahead of the pistons increases, a spring of predetermined strength operatively interposed between said housing and said pistons, tending to urge the latter towards the intake end of said housing, pneumatic lubricant dispensing means flexibly connected to the intake end of the aforesaid housing through a flexible lubricant conduit, said pneumatic grease dispensing means including a lubricant expelling piston operatively disposed within a lubricant cylinder, a larger diameter air-actuated piston operatively disposed within a pneumatic cylinder and operatively connected with said lubricant piston, and means for delivering lubricant to said lubricant cylinder at a relatively low pressure, and for delivering compressed air to said pneumatic cylinder at a relatively low pressure;—the effective area of the first-mentioned low pressure lubricant actuated piston and the strength of the first mentioned spring being so proportioned with relation to each other and to said last-mentioned air-actuated piston and said last-mentioned lubricant-expelling piston, as to cause the first-mentioned low and high pressure pistons totravel forward against the force of the first-mentioned spring at a pressure somewhat below the maximum pressure which the last-mentioned lubricant-expelling piston is capable of delivering to the intake end of the aforesaid housing.

2,000,171
REDUCTION OF OXYGENEOUS NICKEL OR NICKEL COPPER COMPOUNDS
Anton Martin Gronningsaeter, New York, N. Y., assignor to Falconbridge Nickel Mines Limited, Toronto, Ontario, Canada
Application August 15, 1933, Serial No. 685,225
In Norway August 27, 1932
2 Claims. (Cl. 75—66)



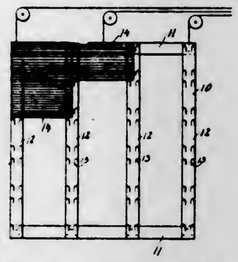
1. The improvement in the method of preparing reactive metallic nickel powder by the re-

duction of nickel oxide, nickel-copper oxide and the like, which comprises progressively advancing the nickel oxide bearing material in finely divided form through a reduction zone in a direction generally countercurrent to and in direct contact with hot reducing gases, and at the same time indirectly heating the nickel oxide bearing material during its first stages of move-



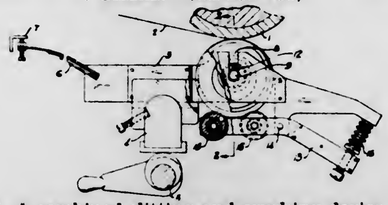
ment through the reduction zone, said hot reducing gases being introduced into the final stage of the reduction zone at a temperature between 500–700° C. to heat the material directly during its final stages of reduction and to maintain the treated material leaving the reduction zone at a temperature between 400–550° C. whereby sintering of the material is avoided and a highly reactive nickel powder is obtained.

2,000,172
HINGE
Walter M. Hansen, Grand Rapids, Mich., assignor to American Seating Company, Grand Rapids, Mich., a corporation of New Jersey
Application October 23, 1933, Serial No. 694,748
4 Claims. (Cl. 155—86)



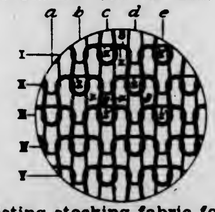
1. In a structure of the class described, a supporting member having a plane surface provided with a rivet receiving aperture, a solid spherical element whose opposite sides are parallelly truncated to form flat side faces and provided with a rivet receiving aperture disposed transversely with respect to the parallel plane surfaces of the spherical element, a pair of flat plates each having a cupped portion provided with an aperture therein for permitting the passage of a rivet and rotatably embracing the spherical element on its opposite sides and whose flat surfaces are secured to each other, and a rivet passing through said apertures and extending entirely through the spherical element and engaging the side face thereof remote from the supporting member for securing the spherical element to the supporting member with one of the plane surfaces of the spherical element in juxtaposition to the plane surface of the supporting element to thereby form a semi-universal joint between the spherical element and said plates.

2,000,173
APPARATUS FOR TRANSMITTING ENERGY
Irving C. Harris, Los Angeles, and Harry W. Doubrava, Beverly Hills, Calif.
Application March 25, 1932, Serial No. 601,156
16 Claims. (Cl. 103—45)



1. In apparatus of the character described, pumping means at the upper end of the apparatus, strings of tubing, connected to the pumping means and connected together at their lower ends in a manner to form a circuit through which a circulation of fluid may be maintained by the pumping means; a separator, near the lower end of the strings of tubing, adapted to separate gas from liquid; an energy using device adapted to receive gas from the separator; a mixer adapted to receive gas from the said device and return it to the circulation of fluid; means of conveying gas from the said device to the mixer; and means of introducing gas into the circulation of fluid.

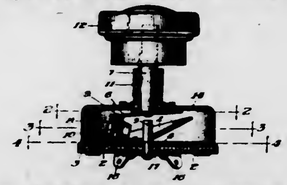
2,000,174
TALKING PICTURE SCREEN
Harry Hertsberg, Brooklyn, N. Y.
Application September 7, 1934, Serial No. 743,042
5 Claims. (Cl. 88—24)



2. A screen for moving pictures comprising a frame, a plurality of panels supported on one side of said frame, each of said panels being folded of a single sheet of material having longitudinal slots therein and bars between said slots, said bars overlapping each other forming vanes and said slots forming sound passages between said vanes when folded.

2,000,175
COMBINED SLITTING AND CRUSHING DEVICE
Robert McC. Johnstone, Short Hills, and Leopold C. Borios, West Englewood, N. J., assignors to Cameron Machine Company, Brooklyn, N. Y., a corporation of New York
Application August 9, 1934, Serial No. 739,088
7 Claims. (Cl. 164—65)

5. A combined slitting and crushing device for webs of flexible material including in combination with a backing member: a crushing element comprising a pair of rotatable crushing wheels spaced apart and adapted to engage and crush the adjacent slitted edges of a web of flexible material as said web passes in contact with the backing member; a slitting element comprising a rotatable score-cut slitter centrally disposed between the crushing wheels to slit said flexible material against the backing mem-the edges of said end grooves will be forced outber; two pivotally supported and spring-pressed carriers one of which is mounted on the other, one carrier for the crushing element and the other for the slitting element; rotatable means on one of the said carriers to engage the periphery of one of said elements; and means to move the carriers toward the backing member to thereby place both carriers under spring tension.



2,000,176
RUN RESISTANT FABRIC
Harry E. Katzenmoyer, Laureldale, Pa., assignor to Fisher Hosiery Co., Inc., Reading, Pa., a corporation of Pennsylvania
Application September 23, 1932, Serial No. 634,524
1 Claim. (Cl. 66—172)

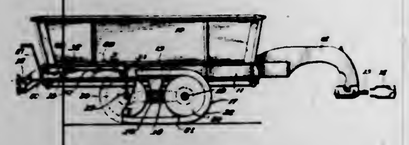
A run-resisting stocking fabric formed of circular courses of loops knitted of two continuous threads, said courses having alternate loops of both threads with intermediate loops of one thread and floats of the other thread, and the single loops in one course engaging loops of both threads in the next course whereby the fabric wales have alternate loops of both threads with intermediate loops of one thread.

2,000,177
RHEOSTAT
Mahlon W. Kenney, Milwaukee, Wis., assignor to Allen-Bradley Company, Milwaukee, Wis., a corporation of Wisconsin
Application February 5, 1932, Serial No. 591,079
13 Claims. (Cl. 201—55)

1. A rheostat comprising a resistor in the form of an interrupted ring, a terminal contact arranged within said resistor, a contact member having a conical contact portion mounted to roll in a circle upon said resistor and said terminal contact to electrically bridge the same, and an actuator having a driving roller rotated and revolved thereby upon said contact member to roll the same upon said resistor and terminal contact.

12. In a rheostat, a resistor having a substantially circular contact portion, a contact terminal having a substantially circular contact portion, means for mounting said resistor and said contact terminal in spaced relationship with one inside the other, a contact member having a conical contact portion arranged to roll simultaneously on the contact portions of the resistor and the contact terminal to electrically bridge the same, and actuating means for the contact member to roll its conical contact portion along the contact portions of the resistor and contact terminal.

2,000,178
RHEOSTAT
Mahlon W. Kenney, Berwyn, Ill., assignor to Allen-Bradley Company, Milwaukee, Wis., a corporation of Wisconsin
Application May 16, 1932, Serial No. 611,625
4 Claims. (Cl. 201—55)

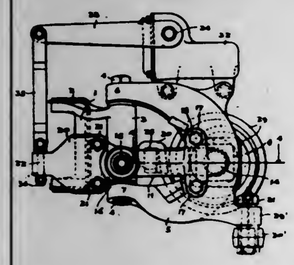


1. In a rheostat, a housing having spaced walls, one of which provides a base, a resistor mounted on the base and having a circular contacting surface facing the other wall, a contact disk having a conical portion in rolling engagement with the contacting surface of the resistor, an actuating shaft journalled in said other wall, a resilient arm non-rotatably connected with the shaft, a roller carried by the free end of the arm and engaging the contact disk to hold its conical portion in engagement with the resistor contacting surface at a location determined by the position of rotation of said arm, a terminal carried by the base and permanently electrically connected with the resistor, a second terminal permanently electrically connected with the said other wall, and said resilient arm having direct contact with a permanent part of said other wall maintained by the resiliency of the arm which also holds the roller down onto the contact disk with spring tension.

2,000,179
TRAILER JACK
Joseph Kuchar, Chicago, Ill., assignor to Athey Truss Wheel Co., Chicago, Ill., a corporation of Illinois
Application January 23, 1933, Serial No. 653,042
7 Claims. (Cl. 280—6)

1. In combination, in a wagon of the cart type, a wagon body, a wheeled sub-structure on

which said wagon is pivotally mounted, a flexible element connected to said wheeled substructure and to said body, and force multiply-

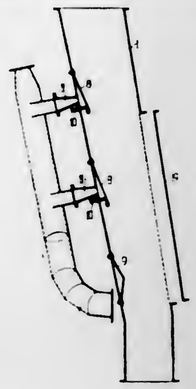


ing means mounted on said body adapted to apply tension upon said flexible element to cause the wagon body to tilt.

2,000,180

INDIVIDUAL WHEEL SUPPORT FOR MOTOR VEHICLES

John Wycliffe Leighton, Port Huron, Mich.
Application July 19, 1933, Serial No. 681,084
8 Claims. (Cl. 267—20)



1. A wheel support for motor vehicles, comprising a member pivoted to swing laterally on the vehicle frame, an arm mounted on the wheel axle and having a threaded oscillating bearing in said laterally swingable member to swing vertically, said threaded bearing presenting an extensive end thrust bearing area to restrict end play between said arm and swingable member, and spring means interposed between the laterally swingable member and the vertically swinging arm to limit the swinging movement of the latter arm.

2,000,181

SEPARATION OF POWDERED OR GRANULAR MATERIAL, ESPECIALLY COAL

Rudolf Lessing and Roland Herbert Allen, London, England, assignors to The Clean Coal Company Limited, London, England, a British company
Application November 30, 1931, Serial No. 577,972
In Great Britain December 4, 1930
2 Claims. (Cl. 209—139)

1. In apparatus for the separation of powdered or granular material especially coal by means of an upflowing gas current, a separator in the form of a tubular member slightly inclined to the vertical having an outlet port at its lower end for removal of coarse material, a gas port near its lower end for supply of gas to produce an upflowing gas current in said separator and an inlet port at a higher level for supply of material to be separated and said separator also having a substantially flat lower side below said inlet port, deflectors projecting from said flat lower side to guide solid materials away from said flat lower side and supplemen-

tary gas inlet means associated with said deflectors.

2,000,182

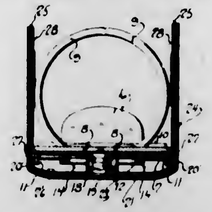
METHOD OF MAKING WELDING ROD OR FLUX HOLDER

John C. Lincoln, Cleveland, Ohio, assignor to the Union Trust Company, Cleveland, Ohio
Original application January 29, 1920, Serial No. 354,950, now Patent No. 1,722,929, dated July 30, 1929. Divided and this application December 15, 1928, Serial No. 326,309
7 Claims. (Cl. 219—8)

1. The herein described method of manufacturing a welding rod which consists in progressively forming a flat strip of sheet metal to substantially U-shape, progressively packing the U-shaped portion tightly with powdered fluxing material and progressively bending the edges of the strip inwardly over the tightly packed fluxing material to form a tube enclosing said fluxing material.

2,000,183

METHOD FOR WORKING UP AURIFEROUS AND CUPRIFEROUS ARSENICAL PYRITES



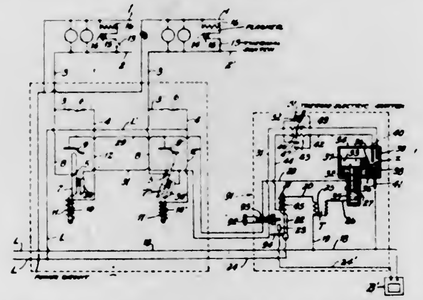
Axel Rudolf Lindblad, Djursholm, Sweden
No Drawing. Application June 13, 1934, Serial No. 730,535. In Sweden February 19, 1934
5 Claims. (Cl. 75—62)

1. Method for working up auriferous and cupriferous arsenical pyrites or arsenical pyrites in mixture with sulphur pyrites, characterized thereby that a part of the ore is roasted in the ordinary way and smelted for getting matte, which is subjected to blast treatment in a converter, whereas another part of the ore, after having been subjected to roasting, is charged direct into the converter, so as to be blasted together with the matte from the first mentioned part of the ore that has been smelted in a suitable furnace.

2,000,184

LOOSE LEAF BINDER

Adolph G. Lotter, Milwaukee, Wis., assignor to Stationers Loose Leaf Company, Milwaukee, Wis., a corporation of Wisconsin
Application July 13, 1933, Serial No. 680,223
3 Claims. (Cl. 129—9)

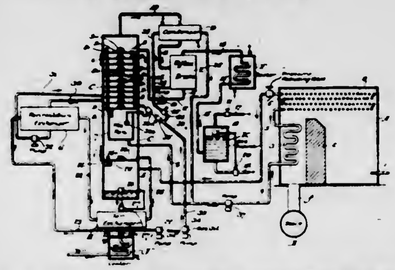


1. In a loose leaf binder, separable ring sections, a base plate channel-shaped in cross section, means on the outer face of the base plate to separably mount the ring sections, a back plate channel-shaped in cross section and wider than the base plate, means to connect said plates with the base plate nested in the back plate, mechanism to shift the ring sections disposed in the space between the nested back and base plates, and covers carried by the back plate.

2,000,185

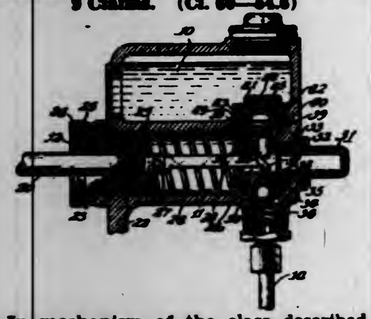
ALARM CIRCUIT

Roger W. McBrien, Alton, and Norval F. Wilson, East Alton, Ill.; said Wilson assignor to said McBrien
Application December 28, 1931, Serial No. 583,434
2 Claims. (Cl. 177—356)



1. A combined power and alarm system comprising a power circuit connected to a source of power and including a fuse in series therewith, a two-step electromagnetically operated device having a stepping magnet for controlling the stepping thereof normally connected in shunt to said fuse, a normally open alarm switch, an intermittent interrupter having interrupting contacts and control means therefor, a connection across the power circuit including in series the alarm switch, the interrupter contacts and the interrupter control means, the capacity of the fuse being such that upon the occurrence of a short across the power circuit or upon the closure of the alarm switch the fuse will blow, thereby diverting current to the stepping magnet and cause the stepping magnet to step the two-step device one step, switching means operated by the first step of the device for opening the first magnet circuit by disconnecting the power source from the power circuit and preparing a second circuit therefor, means for differentiating between the intermittent closure of the power circuit by the intermittent interrupter and a permanent short across the power circuit including means for closing a first circuit in response to the operation of the intermittent means and this circuit and a second circuit in response to a permanent short and for closing the first circuit a predetermined time after closure of the second circuit, means also operated on the first step of the device for associating the power circuit with the differentiating means, means operated by the closure of the first differentiating circuit for controlling an alarm circuit and means controlled by the closure of the second differentiating circuit for completing the second stepping magnet circuit and means controlled by the second step of the device for disassociating the differentiating means from the power circuit to thereby prevent further response of the differentiating means to the power circuit.

2,000,186



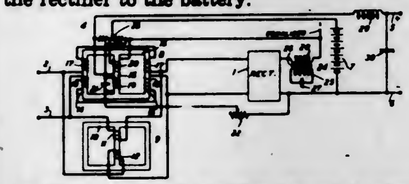
CONVERSION OF HYDROCARBON OILS

George B. Murphy, Philadelphia, Pa., assignor to The Atlantic Refining Company, Philadelphia, Pa., a corporation of Pennsylvania
Application April 9, 1929, Serial No. 353,872
2 Claims. (Cl. 196—48)

1. A process for converting relatively high boiling hydrocarbon oils into lower boiling oils, which comprises passing a high boiling distillate through a heating zone of restricted cross-sectional area, raising the temperature of the oil during its passage through the heating zone to effect conversion of a substantial portion thereof, maintaining superatmospheric pressure on the oil while in the heating zone, reducing the pressure on the cracked products and introducing them into a vaporizing zone at lower pressure whereby vaporization of sufficiently and insufficiently cracked products is effected, passing the vapors produced to a dephlegmating zone, separating the insufficiently cracked portion by condensation therein, returning said portion to the cracking zone for further conversion, continuously removing liquid from a point in the dephlegmating zone, passing said liquid in indirect heat exchange with a secondary charging stock containing high boiling constituents unsuitable for cracking and lower boiling components suitable for cracking whereby the secondary charging stock is heated and the removed liquid cooled, returning the removed liquid to the dephlegmating zone at a point adjacent the point of withdrawal, introducing the secondary charging stock into the vaporizing zone to effect vaporization of a lower boiling portion thereof, passing the vapors produced to the dephlegmating zone in mixture with the vapors of the cracked products, and withdrawing from the vaporizing zone the nonvolatile portion of the reaction products in mixture with the residue of the secondary charging stock.

2,000,187
MASTER CYLINDER
Wallace F. Oliver, Detroit, Mich., assignor to Hydraulic Brake Company, Detroit, Mich., a corporation of California
Application October 17, 1932, Serial No. 638,060
9 Claims. (Cl. 60—54.6)

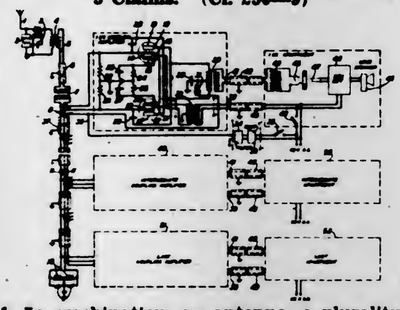
1. In mechanism of the class described, the combination of a fluid reservoir, a master cylinder, there being a passageway connecting said master cylinder with said reservoir, a conduit system supplied with fluid under pressure from said master cylinder, valve means interposed between said cylinder and said reservoir, valve means interposed between said cylinder and said conduit system, a piston in said cylinder having a single part contacting with and controlling both of said valve means, and means for reciprocating said piston.



2,000,188
PAPER RECEPTACLE AND PROCESS OF MAKING SAME
George W. Poppe, Brooklyn, N. Y., assignor to Equitable Paper Bag Co. Inc., Brooklyn, N. Y., a corporation of New York
Application June 26, 1934, Serial No. 732,494
2 Claims. (Cl. 206—46)

1. An inspectable mailing package comprising a receptacle of flexible material containing a magazine, booklet or the like with one of the free edges thereof facing the mouth of the receptacle, the two edges of the mouth each having a flap extending inwardly and interleaved within the leaves of the magazine, booklet or the like, the relative size of the receptacle as compared with the contents being such that the distance between the ends of the inturned flaps and the bottom of the receptacle is less than the corresponding dimension of the magazine, booklet or the like.

2,000,189
REGULATED RECTIFIER
James R. Power, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application January 19, 1934, Serial No. 706,910
16 Claims. (Cl. 175—363)



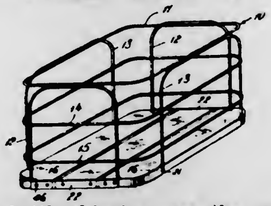
2. In a regulated rectifier, a rectifier for supplying rectified current to a load circuit, an impedance network for connecting said rectifier to an alternating current supply circuit to compensate for supply circuit voltage variations, a storage battery connected across said load circuit, and means for completely compensating the rectifier action for current supplied by the rectifier to the load circuit and for partially compensating the rectifier action for charging current supplied by the rectifier to the battery.

7. In a regulated rectifier system, a plurality of rectifiers adapted to supply rectified current to a load circuit, a bridge circuit for connecting each of said rectifiers to an alternating current supply circuit, said bridge circuits serving to compensate for supply circuit voltage variations, and load compensating means associated with each rectifier for compensating the rectifiers according to the load and for insuring that each rectifier carries a proportional share of the load.

12. In a regulated rectifier, a rectifier for supplying rectified current to a load circuit, an inductive impedance network for connecting said rectifier to an alternating current supply circuit and for compensating for supply circuit voltage variations, and means in the rectifier output circuit comprising a parallel tuned circuit resonant to a frequency somewhat below the rectifier ripple frequency for shifting the phase of the current supplied to the rectifier to increase the voltage output.

2,000,190
RADIO RECEIVING SYSTEM
Francis X. Rettenmeyer, Woodside, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application August 28, 1931, Serial No. 559,847
5 Claims. (Cl. 250—9)

1. In combination, an antenna, a plurality of receiving sets connected thereto, and a plurality of neutralized push-pull amplifiers at least one of which is included between each of the said sets and the antenna.

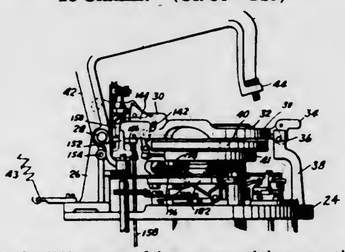


2,000,191
DOOR-STAY
John Riebe, Bronx, N. Y.
Application August 16, 1934, Serial No. 739,220
1 Claim. (Cl. 292—336)

In combination with a hinged door and its frame, a lock on the door including a casing having a pair of lugs projecting therefrom beyond the edge of the door and defining a slot therebetween the inner end of which is defined by the outer side wall of the lock casing, a bolt slidable in said lugs across said slot, a keeper member in the form of a rod pivoted at one end to the door frame and having formed therein a substantially U-shaped open loop for insertion within the slot of the lock with the open side of the loop disposed outwardly, the bolt being projectible through said loop to secure the keeper member to the door, the keeper member being straight on either side of said loop and the center of said loop being disposed substantially in line with the axes of said

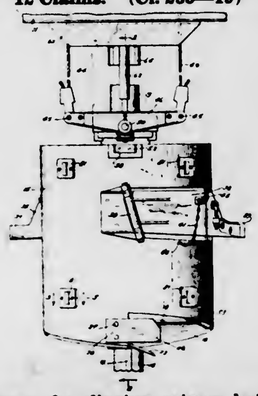
straight portions, and the inner end of said slot being spaced from the adjacent side of said bolt by an amount to maintain the center of said loop substantially alined with the axis of said bolt when the latter is in a locking position extending through said loop, whereby the keeper member is held against being disengaged from the bolt by lateral movement of said keeper member toward the lock and whereby any opening or closing force exerted upon the door is transmitted by the bolt to the keeper member substantially directly in line with the straight portions of the keeper member.

2,000,192
SHIPPING CASE
Harold E. Rue and Elof Nordstrom, East Orange, N. J., assignors to Hoffman Beverage Company, Newark, N. J., a corporation of New Jersey
Application May 19, 1932, Serial No. 612,212
9 Claims. (Cl. 217—19)



1. In a bottle shipping case, the combination of a fabricated wire having an upper horizontal hand rail extending laterally from the adjacent bottles, a base for the frame, a removable liner within the frame resting on the base and spaced from the hand rail, and a removable bottle separator within the liner.

2,000,193
INSECT TRAP
George T. Schroder, New York, N. Y.
Application March 1, 1929, Serial No. 343,782
6 Claims. (Cl. 43—121)

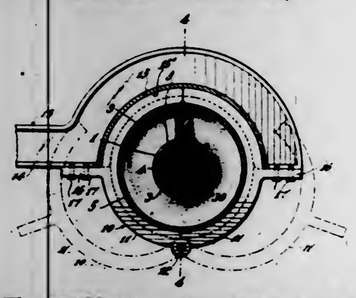


1. In an insect trap of the type having walls forming an enclosure and adapted to retain bait, an entrance member for insects comprising a funnel shaped member having an elongated opening at the inner end with the major axis of the opening adapted to extend in a horizontal direction, and the sides of said member adjacent to the ends of said axis being slit toward the other end of the member.

2,000,194
KNITTING MACHINE
Stanley R. Shelmire, Laconia, N. H., assignor to Standard-Trump Bros. Machine Company, Laconia, N. H., a corporation of Delaware
Application July 8, 1933, Serial No. 679,511
16 Claims. (Cl. 66—140)

1. A knitting machine comprising a circular series of needles and devices cooperating therewith for the formation of stitches, said devices including wrap fingers arranged to feed wrap yarns to the needles for the production of designs, means for alternately feeding main yarns to the needles during the rotary knitting of each course of a split portion of fabric, said means being operated to produce a limited overlap of the main yarns on each side of the fabric, and means for clamping and cutting the main yarns as they are taken out of action during the formation of each course.

2,000,195
AUGER BUCKET FOR MACHINES FOR DIGGING CAISSONS AND THE LIKE
Ewald H. Siebel, Chicago, Ill.; Emeline R. Siebel, executrix of said Ewald H. Siebel, deceased, assignor, by mesne assignments, to Spencer, White & Prentis, Incorporated, New York, N. Y., a corporation of Connecticut
Application September 6, 1932, Serial No. 631,850
12 Claims. (Cl. 255—19)



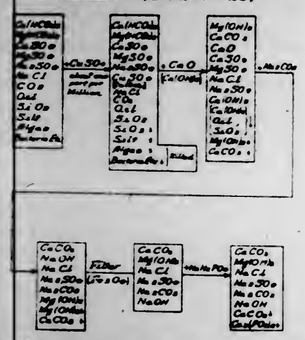
1. An auger for digging caisson holes and the like, comprising a cylindrical bucket having radial earth receiving slots in its bottom and pro-

vided with digging elements for digging on the floor of the hole and delivering the excavated earth through said slots into said bucket, and means within the bucket for discharging the excavated earth received through said slots out through the slots in a tangential direction after the bucket has been removed from the hole for discharge.

2,000,196

PNEUMATIC SUSPENSION FOR VEHICLES

Harold B. Simmons, Caldwell, N. J.
Application November 6, 1933, Serial No. 696,792
5 Claims. (Cl. 267—35)

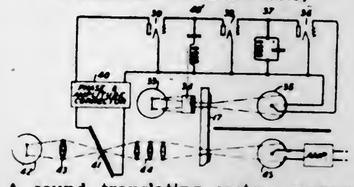


1. The combination of a chassis, an axle, an annular resilient cushion mounted on and encircling the axle in close relation thereto and having a peripheral groove, an annular strap in said groove encircling said cushion and having a substantial portion of its periphery in direct contact with said chassis, and means fastening said strap to said chassis.

2,000,197

METHOD OF TREATING WATER

Robert M. Smith, Youngstown, Ohio
Application April 27, 1932, Serial No. 607,694
4 Claims. (Cl. 210—33)



1. A method of water treatment which comprises the steps of adding copper sulphate to the water in proportion of approximately one part per million to thereby destroy living organisms and precipitate slime and other organic materials, treating the water with lime to neutralize acidic compounds therein and precipitate the copper, adding sodium carbonate to precipitate scale forming compounds, filtering through magnetite ore, and finally adding mono-sodium phosphate in an amount less than that theoretically required to precipitate all residual dissolved calcium and magnesium compounds.

2,000,198

SOUND AND PICTURE SYSTEM

Edwin H. Smythe, Evanston, Ill., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application November 14, 1933, Serial No. 697,903
9 Claims. (Cl. 179—100.3)

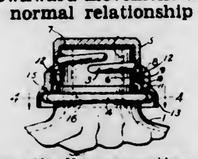
1. A sound translating system arranged to minimize relative motion between sound translating elements having two sound translating means for translating a sound track for sound reproduction and a reference track for registering momentary film irregularities in velocity of a frequency which causes noticeable sound pitch variation, and means for shifting the sound track translating means commensurate with the irregularities registered by said reference track.

2,000,199

METHOD OF SEALING BATTERY POSTS

Harold D. Stanley, Bloomfield, N. J., assignor, by mesne assignments, to Thomas A. Edison, Incorporated, West Orange, N. J., a corporation of New Jersey
Application February 26, 1931, Serial No. 518,327
1 Claim. (Cl. 136—176)

In a lead-sulphuric acid battery, the method of obtaining an acid-tight seal around a battery post where it comes through the cover, which consists in forming an undercured cover of rubberlike insulating material with a threaded hole therein, also forming a hollow threaded bushing of suitable metal with a flange, screwing the bushing into the cover hole from the top until the flange engages the outer surface of the cover, then placing the cover in position over the battery plates so the post passes through said bushing, then autogenously joining the end of the post with the bushing and to other added metal as desired utilizing the flange for assisting in adding said other metal, the action of the sulphuric acid acting on the threads of the cover to cure them, whereby the bushing is securely gripped.



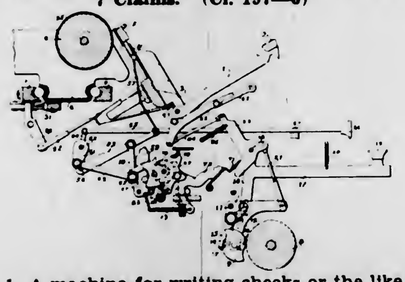
2,000,200

CONTAINER CLOSURE MEANS

Spencer Jay Teller, West Hartford, Conn., assignor to Colt's Patent Fire Arms Manufacturing Co., Hartford, Conn., a corporation of Connecticut
Application July 20, 1934, Serial No. 736,141
3 Claims. (Cl. 215—7)

1. The combination in a container closure means, of an internally threaded closure adapted to engage an external thread on a container and to close the container opening, a preformed readily breakable indicator member structurally separate from the closure and adapted to be put in place on the container after the closure is in

place, the said member being shaped to interengage with the closure to prevent substantial relative rotation, a normally concealed means permitting downward movement of the indicator member into normal relationship with the clo-



sure but automatically preventing upward movement out of such relationship, and means on the indicator member adapted to engage with the container and thereby break the said member when the closure and member are turned to unscrew the former.

2,000,201

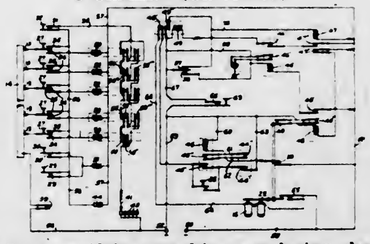
APPARATUS FOR WRITING CHECKS

Russell G. Thompson, Rochester, N. Y., assignor to Electromatic Typewriters, Inc., Rochester, N. Y., a corporation of New York
Application October 23, 1931, Serial No. 570,599
7 Claims. (Cl. 197—6)

1. A machine for writing checks or the like by ink-printing on both sides of the paper and impregnating the paper with the ink from both sides thereof comprising a frame, a platen thereon, an inking ribbon secured to the platen to move therewith and arranged to engage the reverse side of a work sheet thereon, a type bar movable to and from printing engagement with the platen or the work sheet thereon, a second inking ribbon positionable between the type bar and the work sheet, and perforating types on the type bar for perforating the work sheet and penetrating the ribbon on the platen and operative to carry ink from said ribbons to the work sheet when withdrawn therefrom.

2,000,202

PROCESS FOR THE RECOVERY OF SUGAR AND SALTS FROM SUGAR CANE MOLASSES



Eugenio Antonio Vazques, Habana, Cuba
No Drawing. Application October 25, 1932, Serial No. 639,486. In Cuba July 20, 1932
13 Claims. (Cl. 127—47)

1. A process for extracting organic acids from molasses, which comprises treating the molasses with sulphuric acid, alcohol and a non-solvent of sugars but solvent of such organic acids as have been liberated by the sulphuric acid; selected from the group consisting of, chlorinated hydrocarbons, aromatic hydrocarbons, aliphatic hydrocarbons, ethers, esters and aliphatic acids and separating the solution containing these organic acids from the mass containing the sugars and inorganic salts.

2,000,203

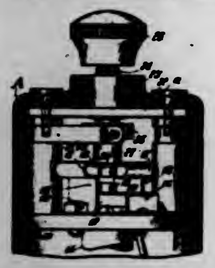
CARD VERIFIER

Hermann Adalbert Weinlich and Ulrich Kölm, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application June 5, 1930, Serial No. 459,401
In Germany December 24, 1929
8 Claims. (Cl. 73—51)

1. In a verifying machine, analyzing devices adapted to sense perforations in the columns of a record card, means for advancing a record card past said analyzing devices, keys, means jointly controlled by said analyzing devices and said keys for causing said advancing means to advance the record card column by column, a skip key adapted to cause said advancing means to uninterruptedly advance a plurality of card columns past said analyzing devices and means controlled by said analyzing devices upon sensing a perforation in any of said plurality of columns for suppressing further operation of said advancing means.

3. In a machine adapted to verify index points of a card column, a relay associated with a plurality of index points, means cooperating with a hole in the card to energize said relay, a plurality of keys one for each index point, means operative upon actuation of the key corresponding to the index point in which a hole occurs, to deenergize said relay and means controlled by the actuation of any other of said keys for preventing deenergization of said relay upon subsequent depression of the correct key.

8. In an electric verifying machine, means for sensing perforations in a plurality of index point positions of a column of a record card, circuits completed through said perforation by each sensing means, means including keys one for each perforation position adapted to open said circuits when depressed in accordance with the location of said perforations and means for preventing opening of all of said circuits until more than one of said keys are depressed.



2,000,204

VIBRATORY CURRENT INTERRUPTER

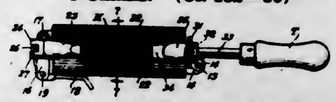
Willis A. Whipple, Chicago, Ill.
Application January 28, 1932, Serial No. 589,410
2 Claims. (Cl. 200—90)

1. In a device of the character described involving coils, a vibratory current interrupter comprising the combination of a pair of contact points; means whereby one of said points is yieldingly held in normal spaced relation with a terminal of one of the coils; means whereby the other contact point is yieldingly held spaced and in axial alignment with the first mentioned contact point and consisting of a leaf spring bent to provide a flat horizontally disposed portion, to the underside whereof and intermediate of opposite ends said contact point is affixed, the ends of said spring being curved back beneath and substantially parallel with the contact point car-

rying portion while the immediate ends are then bent downwardly into supporting legs disposed vertically between the vertical planes of the curved ends whereby the horizontally disposed contact holding portion is free to flex and move bodily; and a regulating member adjustably se-

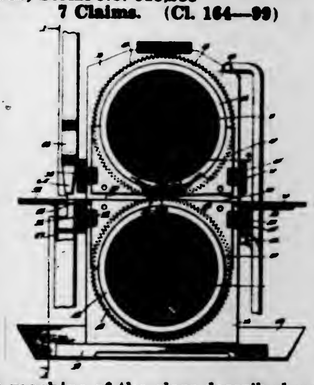
cured above said contact holding portion and provided at its lower end with a removable non-conducting stud adapted to engage the horizontally disposed portion of the leaf spring and thereby force said portion with its contact point toward the first mentioned contact point.

2,000,205
TENT CONSTRUCTION
Cecil M. Wickstrum, Omaha, Nebr.
Application May 16, 1934, Serial No. 725,969
13 Claims. (Cl. 135—4)



10. The combination with a tent frame having eaves bars, of an auxiliary supporting member, a clamp at one end of the auxiliary supporting member and adapted to clamp over an eaves bar, removably clamping the supporting member to the frame.

2,000,206
COMBINATION SINK PLUG AND VACUUM CUP
Joseph Yesowitch, Brooklyn, N. Y.
Application March 23, 1934, Serial No. 717,038
7 Claims. (Cl. 4—295)

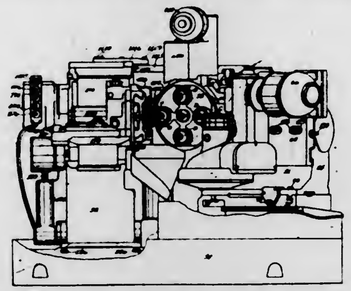


1. The combination with a sink plug or stopper having a chain extending therefrom; of a vacuum cup attached to the end of the chain and adapted to hold said chain.

2,000,207
PERMANENT WAVING APPLIANCE
Max Arnold, New York, N. Y.
Application October 29, 1934, Serial No. 750,485
8 Claims. (Cl. 132—36)

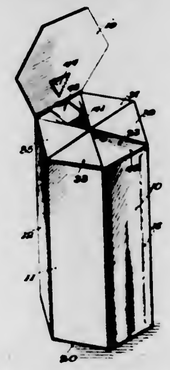
1. An appliance of the class described, for use in waving hair, comprising a pair of clamping elements connected together hingedly at one end to permit bodily divergent and convergent movements of said elements swingingly relatively to each other, said appliance being further characterised by having said elements so hinged as to permit an overlapping of adjacent marginal edges of said elements when closed together.

2,000,208
SHEET METAL PUNCH MACHINE
George T. Balfe, Detroit, Mich., assignor to Detroit Gasket & Manufacturing Company, Detroit, Mich., a corporation of Michigan
Original application December 11, 1931, Serial No. 580,415, which in turn is a division of Serial No. 479,734, September 4, 1930, now Patent No. 1,843,438. Divided and this application June 3, 1932, Serial No. 615,233
7 Claims. (Cl. 164—99)



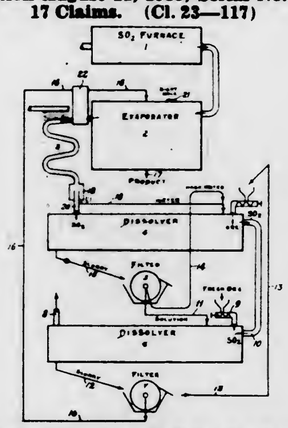
1. A machine of the class described comprising opposed die members, and a cleaning instrumentality comprising a blower and a grid disposed adjacent the die members for cleaning a sheet of material immediately it passes from the die members, said grid being substantially flush with the path of travel of the sheet from said die members.

2,000,209
MACHINE FOR PRODUCING GEARS
Oliver F. Bauer and William R. Carpenter, Rochester, N. Y., assignors to Gleason Works, Rochester, N. Y., a corporation of New York
Application August 9, 1932, Serial No. 628,069
23 Claims. (Cl. 90—9)



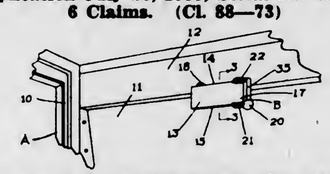
1. In a machine for producing taper gears, a work support, a plurality of work spindles mounted on a work support, a tool support, two separate tool mechanisms mounted on the tool support comprising, respectively, a rotary milling cutter and a pair of reciprocating planing tools, means for periodically indexing the movable support to cause the two tool mechanisms to be brought progressively into operative relation with the different blanks caried by the different

work spindles, means for producing relative feed movements between the two tool mechanisms and the work spindles with which they are, respectively, in operative relation after each periodic movement of the movable support, and means for



rotating each work spindle and simultaneously producing a relative translatory movement between said work spindle and the planing tools during the time each work spindle is in operative relation with the planing tools.

2,000,210
CARTON
John L. Bayless, Anchorage, Ky., assignor to Jefferson Island Salt Company, Louisville, Ky., a corporation of Kentucky
Application December 8, 1933, Serial No. 701,528
7 Claims. (Cl. 229—17)

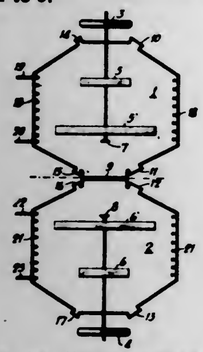


1. In a polygonal carton, an end closure comprising a polygonal flap of the same shape as but of size slightly smaller than the cross-section of said carton secured to one of the side panels of the carton and forming the innermost portion of said closure, said flap lying within the carton with its free edges and corners so disposed as to brace the carton from within, a second polygonal flap of similar shape secured to another of the side panels of the carton and forming the outermost portion of the end closure, and a plurality of relatively smaller polygonal flaps secured one to each of the remaining side panels and lying between said inner and outer polygonal flaps, said flaps thereby providing a continuous covering for every external edge of the end of the carton, said inner and outer polygonal flaps being provided with overlying cutaway and readily removable portions, respectively, constituting a means for dispensing the contents of the carton.

2,000,211
MAKING MANGANESE SULPHUR COMPOUND
Howard B. Bishop, Summit, N. J.
Application August 11, 1933, Serial No. 684,623
17 Claims. (Cl. 23—117)

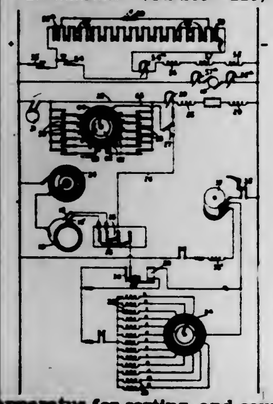
1. The improvement in the art of making manganese sulphur compounds which consists in passing relatively cool SO_2 into a slurry of manganese ore containing MnO_2, separating the resultant manganese sulphate solution as a relatively cool liquid and causing said cool solution to impart, in part at least, to the SO_2 used in the first step its relatively low temperature.

2,000,212
GUARD
Neil H. Bradley, Minneapolis, Minn.
Application July 26, 1933, Serial No. 682,227
6 Claims. (Cl. 88—73)



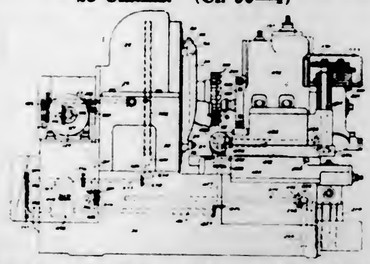
5. A guard for application to the rear vision mirror of a motor vehicle, said guard comprising two gripping members of channel shape having facing grooves for the reception of the upper and lower edges of the mirror, said members extending along the upper and lower edges of the mirror and terminating at their inner ends intermediate the lateral edges of the mirror, and a web extending between said members at their inner ends for connecting said members together, said guard being constructed of a resilient material.

2,000,213
PROCESS FOR THE MANUFACTURE OF HYDROXY CARBOXYLIC ACIDS
Gesa Braun, New York, N. Y., assignor to Standard Brands Incorporated, New York, N. Y., a corporation of Delaware
Application July 18, 1932, Serial No. 623,106
23 Claims. (Cl. 260—112)



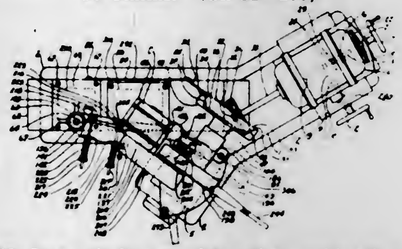
1. A process for the production of hydroxy carboxylic acids which comprises converting a dicarboxylic acid compound belonging to the group consisting of the acids and their salts and having an ethylene structure contiguous to the

carboxyl groups into a corresponding hydroxy acid compound by oxidation in a liquid medium in the presence of a catalyst belonging to the group consisting of osmium, ruthenium, vanadium, iron and manganese compounds, the ratio of the dicarboxylic acid compound having an ethylene structure to the liquid medium being initially greater than 1 to 5.



5. A process for the production of hydroxy carboxylic acids, which comprises converting fumaric acid into a tartaric acid by oxidation in an aqueous medium by means of a derivative of an oxide of chlorine in the presence of osmic acid, the ratio of fumaric acid to water being initially greater than 1 to 5.

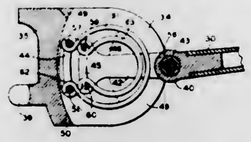
2,000,214
APPARATUS FOR SORTING AND COUNTING FROM STATISTICAL RECORD-CARDS
Charles Campbell, London, England, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application November 19, 1930, Serial No. 496,690
In Great Britain December 13, 1929
14 Claims. (Cl. 209—110)



1. In apparatus for sorting, and counting from, statistical record cards, the combination with a series of card receptacles, of sorting mechanism, a plurality of change-over devices each associated with a separate one of the receptacles for actuation as the result of the associated receptacle becoming fully loaded, and automatic mechanism operable by the actuation of one of the change-over devices to cause the sorting mechanism to pass the cards to the next receptacle in the series.

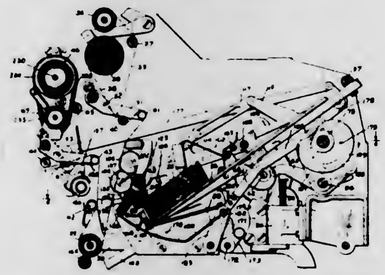
2,000,215
MACHINE FOR PRODUCING GEARS
Leonard O. Carlson, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a corporation of New York
Application February 27, 1932, Serial No. 595,558
25 Claims. (Cl. 90—4)

1. In a machine for producing gears, a frame, a work-spindle journaled in the frame, a full circular cradle rotatably mounted on the frame and adjustable thereon through an angle of 360°, a carriage adjustable radially on the cradle, a carrier adjustable angularly on the carriage about an axis parallel to the axis of the cradle, a swivel head adjustable angularly on the carrier about an axis perpendicular to the axis of the carrier, a tool support mounted on said carrier means for rotating the work-spindle and cradle on their respective axes, and a tool mounted on said tool support for movement in a longitudinally curved path across the face of a gear blank.



2,000,216
GRINDING MACHINE
Gustave A. Carlson, Detroit, Mich.
Application July 1, 1933, Serial No. 678,589
32 Claims. (Cl. 51—100)

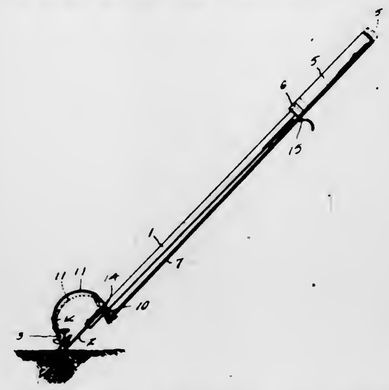
28. In a grinding machine, the combination of a member suitably mounted, a second member supported on and pivotally connected with said first mentioned member, means for locking said second member against pivotal movement, cam means suitably supported by said second member and providing a cam groove, a carriage reciprocatingly mounted, a guiding arm pivotally mounted on said carriage and engaging the cam groove of said cam means, resilient means suitably mounted to oppose the pivotal movement of said second member, and work holding means pivotally mounted on said guiding arm.



2,000,217
ELASTIC COUPLING
Daniel A. Carpenter, New York, N. Y.
Application February 23, 1933, Serial No. 594,761
Renewed October 11, 1934
16 Claims. (Cl. 267—58)

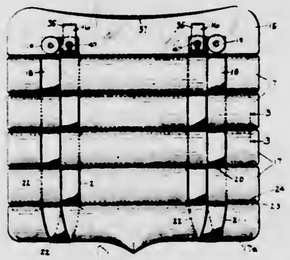
1. An elastic coupling embodying the combination of spring-holding and spring-flexing gear and a composite metal spring, which gear comprises a pair of relatively movable spring holders and devices that support the holders and spring and form holder-guides, the spring-holders having parallel longitudinal axes, and which spring is composed of bent components severally held at their ends on and suported by the spring-holders and arranged close together in a group that extends lengthwise of the spring-holders and

throughout its length is contiguous to each of them and projects from the plane that contains their said axes, and from the ends of which group the spring-holders project and extend to their supporting devices, and which spring exerts pressure that is transmitted to said devices by the spring-holders constantly acting on the guides, and acting on each guide at both ends unless spring-flexing force is applied to the coupling.



2,000,218
TABULATING MACHINE
Fred M. Carroll, Yonkers, N. Y., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application September 29, 1928, Serial No. 309,343
23 Claims. (Cl. 235—58)

1. In a machine of the class described, an item and total printing mechanism for effecting a series of printing impressions upon a record strip, means operable for each total printing impression for feeding an individual work sheet from a supply stack so that it is in superimposed relationship with the record strip to receive a series of item imprints and a total thereof, a transfer sheet between the strip and a sheet for effecting a duplicate impression on one of them, and ejecting means operable after the operation of the item and total printing mechanism for engaging only the work sheet to eject the same.

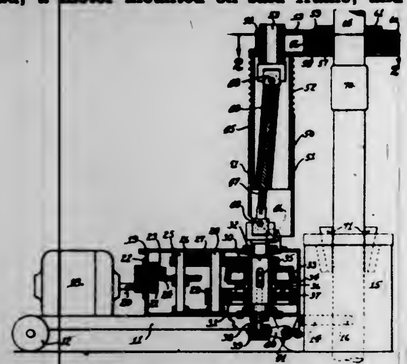


2,000,219
DANDELION PULLER
Frank J. Casey, Albion, Nebr.
Application July 10, 1934, Serial No. 734,551
4 Claims. (Cl. 55—148)

1. An implement of the character described, comprising a shaft, an elongated flat blade extending from one end of the shaft and having its free end edge sharpened, a handle designed to slidably receive the other end of the shaft, resilient means within the handle normally urging the latter away from the received end of the shaft, an arcuate arm having one end pivotally attached to the shaft and having its other end directed

toward one side of said blade, and a connection between the said pivoted end of the arm and said handle whereby the movement of the handle under the influence of said spring will effect the shifting of said arm to move the free end thereof toward said blade.

2,000,220
SPLASH GUARD FOR VEHICLE WHEEL FENDERS
Joseph H. Cohen, Bridgeport, Conn.
Application April 23, 1932, Serial No. 607,125
5 Claims. (Cl. 280—152)



3. A splash guard for a vehicle wheel comprising a sheet of flexible material; means for attaching the same to the end of a vehicle-wheel fender so as to hang therefrom; and stiffening bars on said sheet extending horizontally thereof and alternating with horizontal lines of flexibility so that the sheet may bend on said lines when meeting with an obstruction.

2,000,221
POWER WRENCH FOR WELL TUBING AND RODS
Carlton W. Dawson, Taft, Calif.
Application July 11, 1933, Serial No. 679,921
13 Claims. (Cl. 255—35)

1. A power wrench comprising a frame; a hollow arm connected therewith for movement into and out of operating position; a head mounted directly upon and wholly supported by said arm;

a work engaging chuck rotatably mounted in said head; a motor mounted on said frame; and a

shaft journaled within said arm for transmitting power from said motor to said chuck.

2,000,222

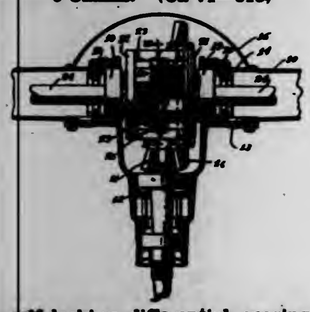
OXIDATION OF HYDROCARBON MATERIALS

Wilhelm Dietrich, Oppau, and Martin Luther, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany

No Drawing. Application February 20, 1932, Serial No. 594,191. In Germany February 27, 1931

6 Claims. (Cl. 260—116)

1. In the liquid-phase oxidation of aliphatic hydrocarbon material of high molecular weight by blowing the said materials with gases containing as the only oxidising agent oxygen while heating, the step which comprises carrying out the reaction in the presence of up to 3 per cent, by weight of said hydrocarbon materials, of a catalytic material consisting essentially of at least one compound each of an alkali metal and of aluminium, the said compounds being capable of dissolution in the reaction mass and selected from the group consisting of carboxylic acid salts, oxides, hydroxides and carbonates of the said metals and carbides thereof, capable of being decomposed with water.



2,000,223

SELF-LOCKING DIFFERENTIAL

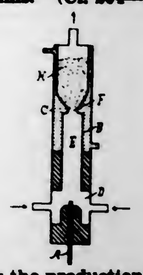
Louis Du Frau, Marquette, Mich.

Application July 9, 1934, Serial No. 734,243

6 Claims. (Cl. 74—313)

1. A self-locking differential gearing mechanism comprising a casing, a pair of independently mounted helical sun gears axially journaled relative to said casing, and a plurality of pairs of intermeshing helical satellite gears, said satellite gears being freely journaled in the casing in such a manner as to be permitted some longitudinal motion, one of each of said satellite gears intermeshing with one of each of said sun gears whereby to connect the sun gears through the intermeshing helical gears.

2,000,224



PRODUCTION OF GASEOUS MIXTURES CONTAINING HYDROGEN

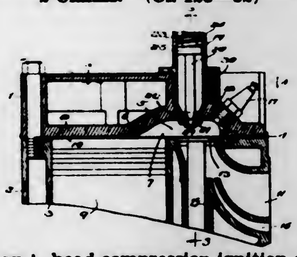
Otto Eisenhut, Heidelberg, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a corporation of Germany

Application November 1, 1929, Serial No. 404,681

In Germany November 26, 1928

4 Claims. (Cl. 204—31)

1. A process for the production of gas mixtures containing hydrogen which comprises exposing a mixture of carbonaceous material containing combined hydrogen and a gas containing oxygen selected from the class consisting of carbon dioxide and gases comprising free oxygen to the action of an electric arc while taking care that all parts of the gas mixture which is subjected to the treatment are exposed to a temperature of at least 1400° C. by impeding the exit of the reacting gases from the electric arc.



2,000,225

INJECTION ENGINE

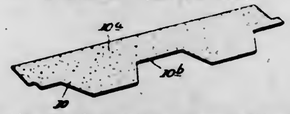
James B. Fisher and Max Hofmann, Waukesha, Wis., assignors to Waukesha Motor Company, Waukesha, Wis., a corporation of Wisconsin

Application December 11, 1929, Serial No. 413,303

2 Claims. (Cl. 123—32)

1. In an L-head compression ignition engine of the Diesel type, a cylinder, a piston operating in the cylinder, inlet and exhaust passages, valves for said passages, a head having a combustion chamber with a flat roof and overlying the valves and also overlying a portion of the cylinder area and communicating therewith through a restricted throat, the head having a wall overlying and closely adjacent the remainder of the cylinder area and forming with the piston a shielded

area, when said piston is in the position of greatest compression, the valves being disposed in close proximity to each other and the clearance space between the respective valves and the surrounding wall of the chamber at the outer side and end portions thereof being only that required for mechanical reasons, the chamber constituting substantially all of the effective combustion space when the piston is in said position of greatest compression and the volume of the chamber being so related to the volume of the cylinder that the heat due to compression as the piston approaches its position of greatest compression is sufficient to ignite fuel injected into the chamber, and means for injecting fuel into said chamber.



2,000,226

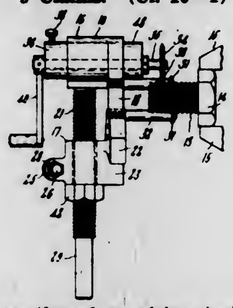
METHOD OF TREATING ASPHALT SHINGLES AND COMPOSITION THEREFOR

Lloyd A. Fry, Chicago, Ill., assignor of one-half to The Lehon Company, Chicago, Ill., a corporation of Illinois

Application February 29, 1932, Serial No. 595,719

1 Claim. (Cl. 91—68)

The method of treating composition shingles having protective coatings on their upper sides and having cut edges which are beveled inwardly from their upper sides, whereby the upper side of each shingle is of larger area than its under side, which consists in forming a pile of said shingles with their beveled edges in substantial alignment and then directing at an acute angle to the side of said pile and substantially normal to said cut beveled edges a spray of protective coating adapted to form a bond with certain ingredients of said shingles and the coatings thereon.



2,000,227

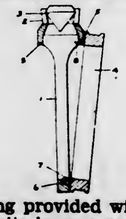
SCREW THREAD REPAIRING TOOL

Theron A. Grove, Revere, Mass.

Application October 4, 1934, Serial No. 746,823

9 Claims. (Cl. 10—1)

1. A screw thread repairing tool comprising a stock including an inner head having an elongated shank, and an outer head having shank-engaging means adjustable lengthwise of the shank to vary the distance between the heads and rotatively adjustable on the shank to locate the heads non-parallel with each other, said shank-engaging means being positively engageable with the shank to maintain any non-parallel location of the heads, the stock being manually rotatable relative to a screw threaded body, each head being provided with runner-locating means, and with runners formed to engage a screw thread and carried by studs engaged with said locating means, there being a pair of spaced apart runners on each head, the runners having a non-wobbling engagement with the studs, and a rotary cutter carried by the inner head and formed to rectify a mutilated screw thread engaged by the runners, the runners and cutter being moved in a helical path governed by the pitch of the screw thread when the stock is rotated, the rotating cutter having a planetary movement.



2,000,228

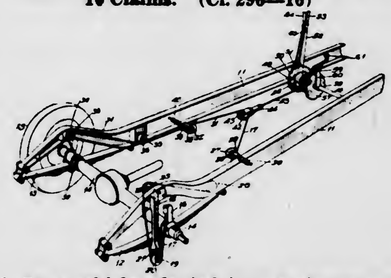
FINGER RING

Melvin N. Harris, Oakland, Calif.

Application February 11, 1935, Serial No. 5,936

6 Claims. (Cl. 63—15)

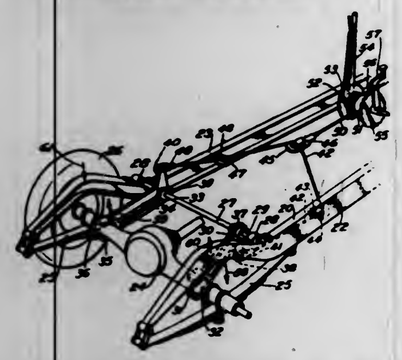
1. A finger ring provided with a groove in the inner surface of its bore, a second ring provided with a laterally projecting clip adapted to engage in said groove, one of said rings formed with a laterally projecting clip at a point remote on the diameter of the ring from said first-mentioned clip arranged to clip the adjacent ring in place.



2,000,229

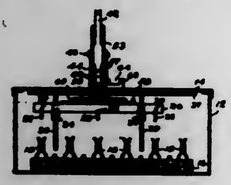
DEVICE TO LEVEL BODY OF A TILTED CHASSIS

William H. Heise, Los Angeles, Calif., assignor to Big Rock Ranch Company, Los Angeles, Calif., a corporation of California



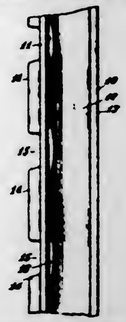
Application June 12, 1929, Serial No. 370,427

10 Claims. (Cl. 296—16)



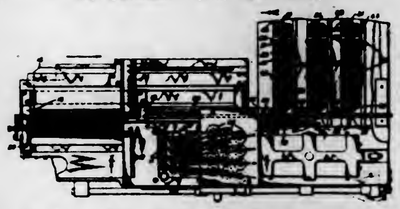
1. In a vehicle adapted to operate on a supporting surface, the combination of: a frame; a first resilient member secured to one side of said frame; an opposite resilient member secured to a second side of said frame; an arm secured at one end to said one side of said frame, an unattached end of said arm extending beyond said first resilient member; a first flexible connecting member connecting said first resilient member and said unattached end of said arm; a second flexible connecting member connecting said opposite side of said frame and said second resilient member; and operating means for producting a force in said first and second flexible connecting members whereby said first resilient member is expanded and said second resilient member is compressed.

2,000,230
LEVER MEANS FOR LEVELING HEARSE BODIES
William H. Heise, Los Angeles, Calif., assignor to Big Rock Ranch Company, Los Angeles, Calif., a corporation of California
Application June 12, 1929, Serial No. 370,430
6 Claims. (Cl. 296—16)



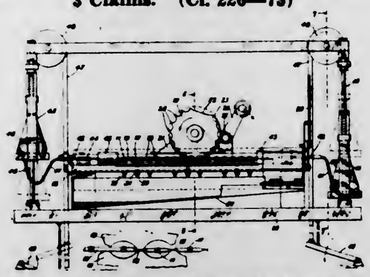
1. In a vehicle, the combination of: a wheeled structure; a frame; yielding suspension means supporting said frame on said wheeled structure so as to permit automatic movement of said frame relative to said wheeled structure under shocks, strains, and stresses incident to travel of said vehicle; a frame elevating lever operatively connecting one side of said frame and said wheeled structure; a frame depressing lever operatively connecting the opposite side of said frame and said wheeled structure, said elevating lever and said depressing lever being normally freely movable so as to permit said automatic movement of said frame; and operating means for simultaneously operating said elevating lever and said depressing lever in opposite directions to adjust the frame to a desired angle.

2,000,231
ELECTRIC SAFETY SWITCH
Carroll D. Hepler, Seattle, Wash., assignor to Transwall Electric Manufacturing Company, Pacific Division, Seattle, Wash., a corporation of Washington
Application June 21, 1933, Serial No. 676,907
10 Claims. (Cl. 200—16)



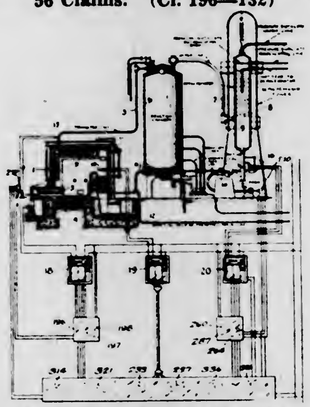
1. In electric switch mechanism of the class described, a housing, cover means for said housing, a sliding plate provided on said cover means, switch terminals within said housing, blade mechanism carried on said sliding plate and movable independently of said plate into open and closed circuit position relative to said switch terminals and operating means positioned on the outside of said sliding plate and connected with said blade mechanism.

2,000,232
FENCE POST
Walter L. Hyde, Maplewood, Mo.
Application December 29, 1932, Serial No. 649,366
10 Claims. (Cl. 189—29)



1. A metal fence post of T-shape cross-section having a flat front face and an interrupted reenforcing rib consisting of elongated uniform projections disposed longitudinally of the post at the median line thereof and spaced apart at distances less than the length of the projections and in a row lengthwise of the post, with the metal intermediate of the projections being disposed in the plane of the remainder of the front face of the post to provide smooth surfaces transversely of the post while the opposite face of the post at points coincident with the spaces between the projections is intermittently increased in thickness.

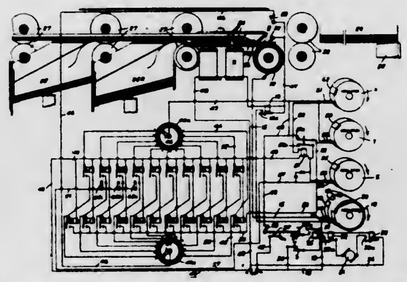
2,000,233
ACCOUNTING MACHINE
Einar Lawrence Kirkegaard, Detroit, Mich., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application December 18, 1931, Serial No. 581,822
22 Claims. (Cl. 164—113)



1. In a machine for producing accounting and statistical record sheets, perforating mechanism, a series of keys for directly controlling the perforating mechanism to record data; a plurality of auxiliary data retaining devices, each of said devices being a self-contained independent unit and adapted to be set up to represent pre-determined data which are to be ultimately automatically recorded each time such unit is selected for operation and which data bears a predetermined relation to data punched under direct control of the keys, each of said units being adapted when arbitrarily selected by the operator to automatically control the perforating mechanism in accordance with the data set up on the selected device; and selecting mechanism controlled by the keys and adapted when one or more keys are operated to arbitrarily select only one of the data retaining devices for automatic operation of the perforating mechanism.

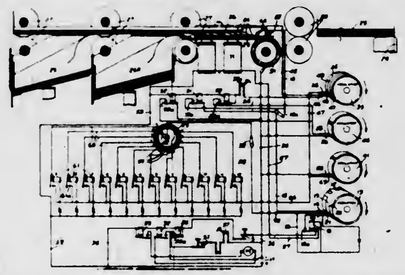
2,000,234
CAPSULE MAKING MACHINE
Fred F. Klett, Jersey City, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application March 22, 1934, Serial No. 716,838
3 Claims. (Cl. 226—73)

1. An apparatus for making sealed metal capsules containing fluid, and comprising means for holding a tube the length of a plurality of capsules, a fluid containing reservoir, means for connecting one end of the tube to said reservoir, means for raising the reservoir above the level of the tube for filling the tube with fluid from the reservoir, and means comprising a rack on which said tube is supported and a gear having registering teeth for progressively pinching the tube at predetermined places from one place on said tube toward the end of the tube connected to said reservoir to close the tube at the pinched places.



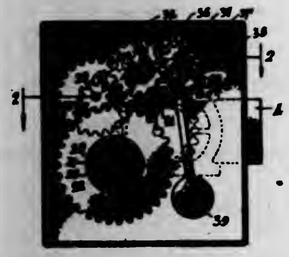
2,000,235
AUTOMATIC CONTROL
Anker E. Krogh, Philadelphia, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania
Application April 24, 1931, Serial No. 532,668
56 Claims. (Cl. 196—132)

1. An automatic control system for oil cracking units comprising a cracking still and dephlegmator from which oil is fed through the cracking still, having, in combination, a regulator for varying the supply of heat to the still, control means responsive to and operating in accordance with the trend of the oil level in the dephlegmator for actuating said regulator.



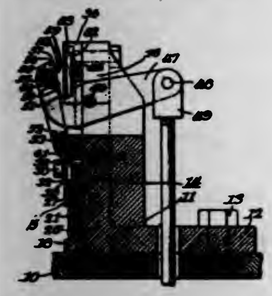
8. An automatic control system for oil cracking units comprising a cracking still and dephlegmator from which oil is fed through the cracking still, having, in combination, a regulator for varying the supply of heat to the still, control means responsive to and operating in accordance with the status of the oil level in the dephlegmator for actuating said regulator.

2,000,236
CARD FEEDING AND HANDLING DEVICE
Clair D. Lake, Binghamton, N. Y., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application June 29, 1932, Serial No. 619,903
9 Claims. (Cl. 209—110)



5. In a machine of the class described, means for feeding a plurality of groups of cards, each having a different number of cards, a plurality of sorting pockets, means for initiating a separate series of selecting operations for each group of cards fed through the machine to cause the selection of a separate pocket for each card of a group and means cooperating with said cards for limiting the number of operations in each series to the number of cards in the corresponding group.

2,000,237
SORTING MACHINE
Clair D. Lake, Binghamton, N. Y., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application December 19, 1932, Serial No. 647,915
5 Claims. (Cl. 209—110)

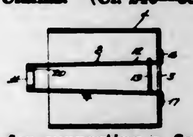


1. In a sorting machine having a plurality of sorting pockets, means for successively reading the cards of a group, means set in operation by the reading means upon reading the first card of the group, for selecting a pocket to receive said group, a device settable in accordance with the pocket selected, means for suppressing the reading of subsequent cards of the group and means controlled by said device for repeatedly selecting a pocket for each of the other cards of the group.

2,000,238
LOCK FOR SAFES
Wilfrid Lavallée, Longueuil, Quebec, Canada, assignor of one-half to Cyprien Ste.-Marie, Longueuil, Quebec, Canada
Application October 24, 1932, Serial No. 639,255
1 Claim. (Cl. 70—26)

In combination, a door, a slidable bolt adapted to lock said door, a rotary hub, a finger extending from said bolt towards said hub, a spring holding said finger against said hub, said hub having a recess adapted to interlock with said finger to prevent rotation of the hub and to obstruct movement of the bolt to release position, manually engageable means carried by said bolt for disengaging said finger from said recess, retarded means tending to rotate said hub and operative on disengagement of said hub and finger, said hub having a peripheral slot spaced from said recess and adapted to admit said finger, thereby permitting movement of said bolt to release position.

2,000,239
SLITTING FIXTURE FOR PISTON RINGS
Joseph C. Linn, Hagerstown, Ind., assignor to The Perfect Circle Company, Hagerstown, Ind., a corporation of Indiana
Application October 11, 1929, Serial No. 398,835
5 Claims. (Cl. 90—59)



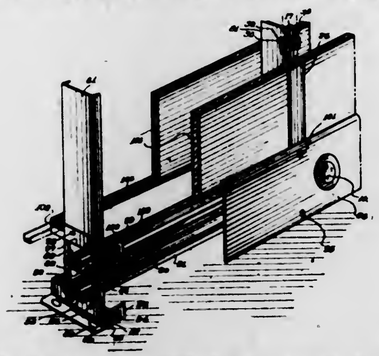
3. A slitting fixture for a piston ring comprising in combination, a holder for receiving the ring, a lever pivoted on said fixture, a clamping member loosely carried by said lever, the actuation of said lever in one direction serving to grip said member against the ring on opposite sides of a cutter during the slitting operation, and the actuation of said lever in the opposite direction permitting the retraction of said member under the action of gravity, and means for throwing the ring engaging end of said member away from the plane of the holder during the retracting movement of said member.

2,000,240
METHOD AND MEANS FOR SURFACING GLASS
Bernard Long, Paris, France, assignor to Societe Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France
No Drawing. Application December 16, 1933, Serial No. 702,723. In France December 17, 1932
2 Claims. (Cl. 51—278)

1. In a process of producing plate glass materials, the surfaces of which are first subjected to a coarse grinding process and finally subjected to a polishing process, the intermediate step of subjecting these surfaces to a smoothing process after coarse grinding and before polishing, which step includes applying to the surface a homogeneous mixture of grains of granulated glass, the grains of which are about the same average hardness and particle size, said particle size being in excess of 5 microns and substantially less than 50 microns.

2,000,241
ELECTRIC FIXTURE-SUPPORTING AND CONNECTING DEVICE
James Mangin, New Brunswick, N. J., assignor to New Brunswick Electric Supply Company, New Brunswick, N. J., a corporation of New Jersey
Application May 27, 1931, Serial No. 540,407
6 Claims. (Cl. 248—85)

4. A device for supporting a fixture from an outlet box, comprising a member having a pair of spaced coextensive resilient legs, which by virtue of their resiliency may be pressed toward each other for cooperative association with a wall of said box, and which spring outward under the influence of their resiliency when released to engage portions of said wall and a spreader arm struck-out from one of said legs and bendable to a position laterally between said legs to maintain them in outward positions.



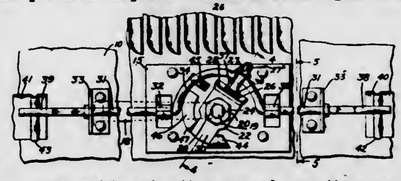
2,000,242
CONTAINER
Reginald W. Manning, Phoenix, Ariz.
Application October 3, 1933, Serial No. 691,943
3 Claims. (Cl. 2—173)

1. A container of pliant material having the caricature of a face imprinted mainly on one side with the details thereof extending around the adjacent sides and having the outlines of the features scored to break when pressed, whereby the outlines thereof may be accurately broken out.

2,000,243
WALL CONSTRUCTION
Fred A. Manske, Chicago, Ill., assignor to United States Gypsum Company, Chicago, Ill., a corporation of Illinois
Application June 20, 1932, Serial No. 618,149
27 Claims. (Cl. 72—46)

1. In a wall construction, a vertically extending metallic stud, wall boards, means for securing said wall boards to said stud, means adjacent the lower part of said stud for supporting said boards, a mop plate secured adjacent the bottom edge of said boards and serving as a

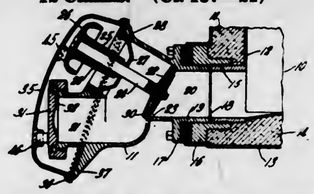
finishing trim, and means for forming a plurality of compartments at the bottom of the wall concealed by said plate for the reception of electric wires.



2,000,244
PROCESS FOR SEPARATION AND RECOVERY OF NAPHTHENIC ACIDS AND PHENOLS
David R. Merrill, Long Beach, and Arthur L. Blount, Wilmington, Calif., assignors to Union Oil Company of California, Los Angeles, Calif., a corporation of California
No Drawing. Application July 25, 1933, Serial No. 682,106
18 Claims. (Cl. 260—103)

1. A process for the recovery of naphthenates from a mixture comprising naphthenic and phenolic materials which comprises adding a neutralizing agent to said mixture to convert the naphthenic material into naphthenates without any substantial conversion of the phenolic materials into phenolates, distilling the mixture containing naphthenates and phenols and thereby separating the phenols from the naphthenates.

18. A method for separating phenolic materials from the naphthenic materials contained in petroleum fractions which comprises extracting the petroleum fractions with a selective solvent for naphthenic and phenolic materials, extracting the extract phase so obtained with alkali to produce naphthenates and phenolates, acidifying the resulting extract with a mineral acid, recovering the resultant oily layer with its contained naphthenic acids and phenols, neutralizing the oily layer to obtain naphthenates without neutralization of the phenols, recovering the resultant oily layer with its contained phenols and naphthenates and separating the phenols from the naphthenates.

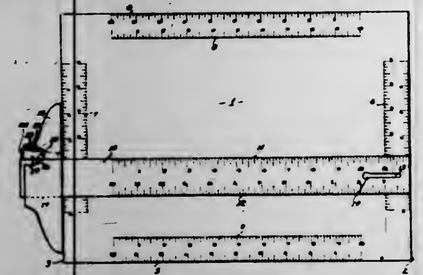


2,000,245
HOOD CATCH
Raymond G. Moore, Bridgeport, Conn., assignor to The Bassick Company, Bridgeport, Conn., a corporation of Connecticut
Application December 8, 1932, Serial No. 646,222
2 Claims. (Cl. 292—215)

1. A hood catch actuator for operating keeper engaging catch means, comprising rock shaft means having a catch portion adapted to be engaged with said keeper upon rotation of said rock-shaft means in one direction and an arcuate actuating crank portion for rotating said rock shaft means, a manually operable crank arm rotatable about an axis at right angles to the axis of said rock shaft means and including a rigid extension having its end extended beyond and being disposed at one side of said actuating crank portion adapted upon rotation of said crank arm to press said crank portion in one direction to rotate said rock shaft into operative position, and a member including a base portion disposed between said rigid exten-

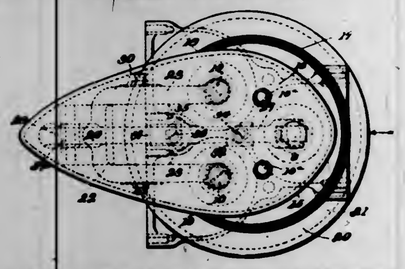
sion and said actuating crank portion, apertured portions at each end and at one side integral with said base portion and rotatably engaged with said rigid extension and a portion at the other side slidably and rotatably engaged with said actuating crank portion adapted upon rotation of said crank arm in the opposite direction to draw said actuating crank portion in the other direction to rotate said rock shaft to inoperative position, said rigid extension being at all times out of direct contact with said crank portion.

2,000,246
OUTLET FITTING FOR TANKS
Raymond J. Neely, Little Falls, N. Y., assignor to Cherry-Burrell Corporation, Wilmington, Del., a corporation of Delaware
Application October 15, 1934, Serial No. 748,339
12 Claims. (Cl. 137—21)



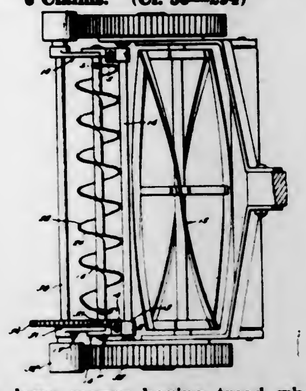
1. An outlet fitting for tanks comprising a valve body having a discharge passage extending therethrough, a movable valve member controlling said passage, an operating handle for said valve member extending out of the valve body and located outside of and adjacent said outlet end of the discharge passage, and a movable cover which in its closed position encloses both the outlet end of the discharge passage and said valve operating handle, said valve body having a portion which surrounds both said outlet end of the passage and the hole in the valve body through which said handle extends and with which the rim of the cover forms a tight joint uninterrupted throughout the peripheral extent of the cover rim.

2,000,247
COMBINATION DRAFTING TABLE AND INSTRUMENTS THEREFOR
William P. Niukkanen and Simo Mikkonen, Portland, Oreg.
Application February 19, 1934, Serial No. 711,878
3 Claims. (Cl. 33—75)



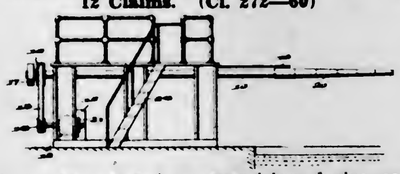
1. In combination, a drawing-surface having graduations adjacent its edges and a T-square having its head and straight-edge movable with

respect to each other, a wedging member adapted to be placed within a slot formed within the head to hold the straight-edge and the head in fixed relationship to each other, said straight-edge having graduations thereon capable of cooperative use with the graduations on the drawing-surface a slot formed in the straight-edge, a protracting member removably secured to said straight-edge and angularly ad-



justable relative to said straight-edge, a slot formed in the protracting member, and means for securing said protracting member to said straight-edge, said means consisting of a bolt and nut combination fitting within the slots incorporated within the straight-edge and the protracting member and when tightened adapted for holding the said straight-edge and said protracting member in fixed relationship to each other.

2,000,248
HOODED CYLINDER HEAD FOR GAS ENGINES
Robert S. Moore, Silver Spring, Md., assignor to General Airmotors Company, Scranton, Pa., a corporation of Pennsylvania
Application November 30, 1932, Serial No. 645,093
1 Claim. (Cl. 123—90)



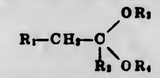
A gas engine including in combination, a cylinder, a head secured thereto, said cylinder head having two intake ports and one exhaust port disposed close to each other, a valve for controlling each port, said valves being movable in lines parallel with each other, a rocker mounted on the cylinder head for operating said intake valves, a rocker mounted on said cylinder head for operating said exhaust valve, a single hood formed integral with the cylinder head and covering and housing said rockers, said hood having a vertical wall extending from the cylinder head above the rockers and covering and enclosing said rockers, said vertical wall having integral fins projecting therefrom for dissipating the heat generated in the cylinder, said hood having a streamline shape and symmetrically disposed relative to the direction of the air currents contacting with the hood, said fins being disposed at the side thereof with which the air contacts and merging into said vertical wall at the opposite side of the cylinder.

2,000,249
LAWN MOWER ATTACHMENT
Victor G. Pew, Kitzmiller, Md.
Application August 8, 1934, Serial No. 739,027
6 Claims. (Cl. 56—294)

1. In a lawn mower having tread wheels, a reel, and a connecting bar forwardly of the reel, spaced brackets secured to the connecting bar, a screw member having a serrated continuous spiral edge rotatably supported between the brackets for engaging the tall grass and bending and guiding the same towards the reel to be cut thereby, a shaft extending between and rotatably supported by said brackets, rollers on the ends of the shaft having frictional engagement with the peripheries of the tread wheels, and gearing connecting said shaft with said screw member for driving the latter.

2,000,250
AMUSEMENT AND EXERCISING DEVICE
Andre Pitre, Brooklyn, N. Y.
Application April 18, 1933, Serial No. 666,743
12 Claims. (Cl. 272—60)

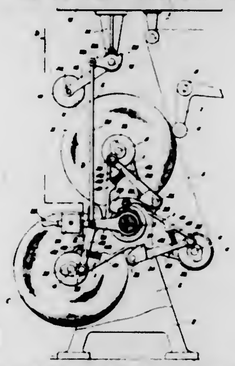
1. An amusement or exercising device comprising a rotatable member presenting a treading surface to the user, and means for rotating said member at a predetermined varying velocity.



2,000,251
PACKAGE
Julius Duncan Rankin, Yonkers, N. Y., assignor to Du Pont Cellophane Company, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application July 28, 1931, Serial No. 553,686
2 Claims. (Cl. 99—8)

2. A package comprising meat enveloped in a transparent flexible wrapper which does not stick to said meat and remains transparent under refrigerating condition, said wrapper comprising a sheet or film of regenerated cellulose coated with a non-moistureproofing lacquer.

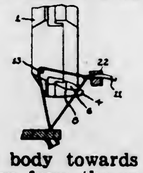
2,000,253
PRODUCTION OF ACETALS
Walter Reppe and Karl Baur, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
No Drawing. Application January 5, 1931, Serial No. 506,745. In Germany January 23, 1930
14 Claims. (Cl. 260—149)



1. The process for the production of acetals, which comprises reacting an alcohol, containing more than one carbon atom in the molecule and free from carboxyl groups, with a vinyl ether while excluding water as far as possible.

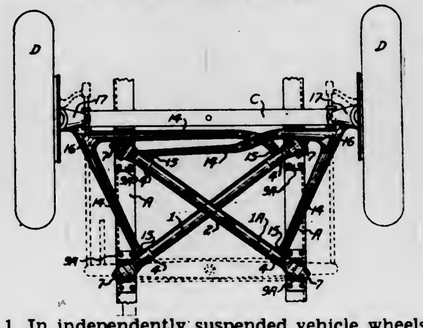
9. As new articles of manufacture ethylidine acetals corresponding to the general formula

in which R_1 and R_2 denote hydrogen or alkyl, aryl or aralkyl groups and R_3 and R_4 denote hydrocarbon radicles of the alkyl, aryl or aralkyl series different from each other and at least one of which contains more than 5 carbon atoms.



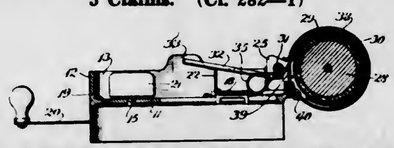
2,000,253
WEB RENEWING MECHANISM
Charles J. Richter, Berwyn, Ill., assignor to The Goss Printing Press Company, Chicago, Ill., a corporation of Illinois
Application October 30, 1931, Serial No. 572,064
26 Claims. (Cl. 242—58)

6. Web renewing mechanism including in combination a support for a plurality of web rolls, one an active web roll and another a reserve web roll, means for moving the running web into contact with the reserve web roll, an adhesive applying roller and weighted means for pressing the adhesive-applying roller against said reserve roll.



2,000,254
LOCKSTITCH SEWING MACHINE
Fred Ricks and Harold Ernest Elliott, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application January 5, 1934, Serial No. 705,408
In Great Britain April 12, 1933
4 Claims. (Cl. 112—38)

1. A lockstitch sewing machine having, in combination, stitch forming devices comprising a curved hooked needle, a loop lifter and a discoidal shuttle provided with a beak to enter the loop held by the needle and loop lifter and with a cam on the shuttle beak projecting be-



yond the shuttle body towards the needle to lift the needle loop from the needle barb.

2,000,255
INDEPENDENT VEHICLE WHEEL SUSPENSION
Lawrence B. Rivard, Dearborn, Mich.
Application February 7, 1934, Serial No. 710,041
6 Claims. (Cl. 267—19)

1. In independently suspended vehicle wheels, a pair of oppositely disposed triangular frames, means for pivotally securing each frame to both sides of the bottom of a chassis frame, said frames formed so that they may be positioned in diagonal crossed relation and operatively independent of each other, and means for permanently fixing said frames with the vehicle wheels respectively.

2,000,256
FOOT MEASURING AND IMPRESSION DEVICE
William M. Scholl, Chicago, Ill., assignor to The Scholl Mfg. Co., Inc., Chicago, Ill., a corporation of New York
Application August 26, 1933, Serial No. 686,864
5 Claims. (Cl. 282—1)

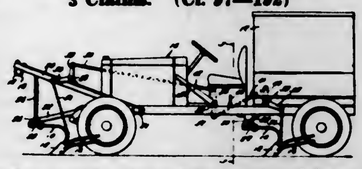
1. A foot impression device comprising a foot receiving receptacle having a base for supporting an impression receiving means, a rolled inking member offset from one side of the receptacle and adapted to be unwound for movement over the means, spring means for normally maintaining the member in wound position, a pivoted bail secured to the free end of the member, the bail pivots being located a sufficient distance above the base to permit the bail being swung below the pivots and to be held in operative position over the base by the pull of the spring means, and a guide roller under which the member is drawn for direct-

ing the same into substantially parallel relation to and at a relatively small distance above the impression means.

2,000,257
FOOT MEASURE AND SHOE SIZE INDICATOR
William M. Scholl, Chicago, Ill.
Application February 15, 1934, Serial No. 711,323
3 Claims. (Cl. 33—3)

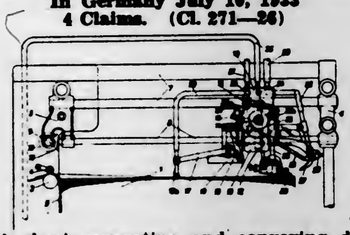
1. A foot measuring stick comprising a base member provided with indicia for determining foot sizes and including a pair of spaced grooves extending into and lengthwise of the upper surface thereof, the grooves being angularly disposed to the thickness of the member, a block fixed at one end of the member, a second block slidable along the member for cooperation with the fixed block to determine foot sizes, and guide members on the slidable block extending into the grooves.

2,000,258
HEADLIGHT SIGNAL
William H. Seymour, Los Angeles, Calif.
Application September 8, 1930, Serial No. 480,389
3 Claims. (Cl. 177—329)



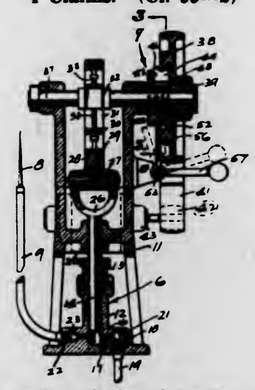
1. A signal for headlights including an elongated case with a direction signal opening resting against the inside of the lens of the headlight, a thin flat supporting strip thereon adapted to be held between the lamp body and the lens of the headlight by the pressure of the lens retaining rim, a lamp socket in the end of said case, and circuit means of flat insulated form adapted to enter the headlight body through the space provided between the body and said lens by said supporting strip, said circuit means being adapted to be connected with a lamp in said lamp socket.

2,000,259
HOLDER FOR STAIR CARPETS
Howard Frederick Smith, Birmingham, England
Application April 30, 1934, Serial No. 723,101
In Great Britain October 26, 1933
15 Claims. (Cl. 16—10)



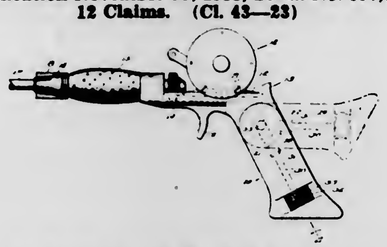
1. A stair carpet holder, comprising a holder arm adapted to engage an edge portion of the carpet, a slide arm, means for connecting the slide arm to one end of the holder arm and for maintaining the two arms in spaced superposed relationship, the slide arm having its longitudinal edge portions adapted for slidable engagement with an attachment bracket arranged for mounting on the stair, those parts of the said edge portions which are remote from the free end of the holder arm being adapted to be engaged with the attachment bracket on movement of the holder in a direction outwardly of the carpet, and stop means adapted to limit such outward movement.

2,000,260
VINE DIVIDER
Charles E. Snyder, Jordan, Pa.
Application September 15, 1934, Serial No. 744,202
3 Claims. (Cl. 97—192)



1. The combination with a motor driven vehicle having steering wheels, vine dividers mounted forwardly of said steering wheels, means pivotally supporting the vine dividers from the vehicle, each vine divider including a forwardly disposed spreader member and a rearwardly disposed ground bearing shoe, means connected with the vine dividers for raising and lowering them, and said means including means for releasably securing the vine dividers in elevated position and free of the steering wheels to permit the turning of the latter in either direction for changing the path of travel of the vehicle either to the right or to the left.

2,000,261
SHEET SEPARATING AND CONVEYING DEVICE
Georg Spiess, Leipzig, Germany
Application July 30, 1934, Serial No. 737,627
In Germany July 10, 1933
4 Claims. (Cl. 271—26)



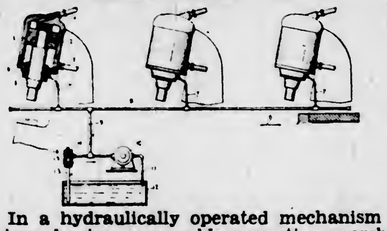
1. A sheet separating and conveying device, having, in combination, a suction member adjustable in feeding direction for separating the rear of the topmost sheet from the pile, additional suction members between the sheet separating means and the front end of the pile, said additional members being adjustable in feeding direction and oscillatable for engaging the sheet from above and displacing it in feeding direction, driving means for said additional suction members, a hollow pedestal body adjustable in feeding direction and carrying said additional suction members and their driving parts, sheet separating means and driving means therefor, said sheet separating and driving means being arranged in said hollow body and remaining in unchanged and uninterrupted driving connection with the stationary driving means.

2,000,262
HYPODERMIC INJECTOR
Frank C. Sutliffe, San Francisco, Calif., assignor to William Joyner, San Francisco, Calif.
Application November 9, 1931, Serial No. 573,768
4 Claims. (Cl. 99—2)

1. In a device of the character described a hypodermic needle, a flexible conduit connected thereto, reciprocating means to force a predetermined amount of liquid through said conduit and out through said needle, driving means and releasable means of connection between the driving means and the reciprocating means to transmit movement for one revolution when released, and to disconnect the driving means from the reciprocating means other times.

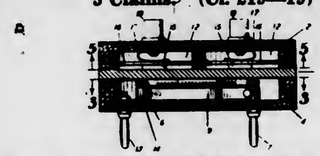
2,000,263
FISHING ROD HANDLE
Ralph R. Teetor, Hagerstown, Ind.
Application November 11, 1933, Serial No. 697,603
12 Claims. (Cl. 43—23)

1. A fishing rod handle arranged to conveniently position the hand for casting and trolling comprising in combination a part adapted for attachment to a fishing rod, a grip swiveled on the part between a position constituting generally an elongation of the part and a downwardly extending position below the part, and means for retaining the grip in either position.



2,000,264
LOCK
Chester L. Vaughn, Yorktown, Ind.
Application September 25, 1933, Serial No. 690,845
1 Claim. (Cl. 292—169)

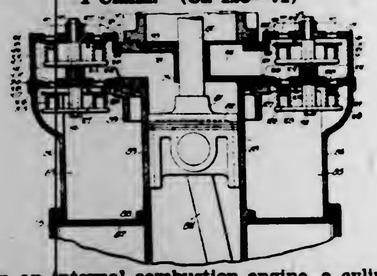
A latch device of the kind described, consisting of a casing assembly comprising a casing adapted to be inserted and secured in a bore therefor in the door, said casing being provided with opposed lateral openings, and having a latch bolt slidingly retained therein, there being a cam groove on each side thereof, said cam grooves being opposed in their angles of incline, a spring in the casing to urge the latch bolt to projected position, a pair of hand lever assemblies each comprising a head block and means to remov-



ably secure same to the sides of the casing at the lateral openings thereof, and a hand lever pivotally mounted in each head block the inner end of said lever being directly engaged in a cam groove of the latch bolt.

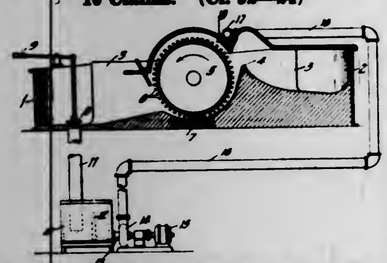
2,000,265
VACUUM SYSTEM FOR HYDRAULICALLY OPERATED MECHANISMS
Harry F. Vickers, Detroit, Mich.
Application March 30, 1931, Serial No. 526,192
2 Claims. (Cl. 137—78)

1. In a hydraulically operated mechanism of the type having a movable operating member, liquid supply means including a reservoir and a pump and liquid under pressure for operating said mechanism, a stuffing box, and a conduit leading from the interior of said stuffing box to a point between the reservoir and the pump, means for producing a positive suction in said stuffing box comprising a restrictive device positioned between the reservoir and the point of connection of said conduit whereby the pressure in the pipe leading into the pump is diminished relative to the pressure between the reservoir and said device.



2,000,266
CONSTANT TEMPERATURE OVEN
Charles L. Watson, San Francisco, Calif.
Application April 18, 1932, Serial No. 606,062
5 Claims. (Cl. 219—19)

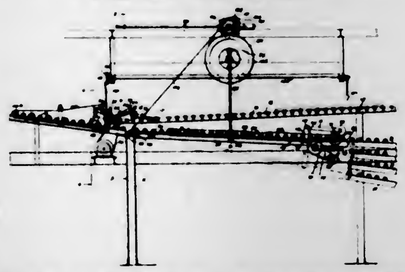
1. In combination, a plate of heat conducting material, a block of heat insulating material, having a recess therein, disposed on each side of said plate to provide a pair of opposed fluid tight chambers separated by said plate, a thermostat and a heater controlled thereby enclosed in one of said chambers, the other of said chambers adapted to contain an object to be heated, said plate having areas thereof exposed to the air in said chambers, an area exposed to ambient air,



and areas intermediate said exposed areas shielded from the air in said chambers and from ambient air.

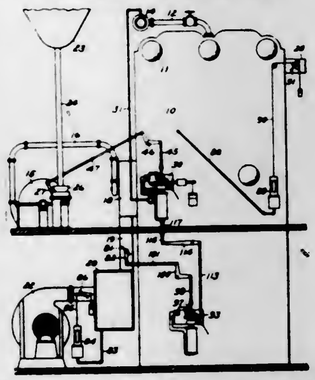
2,000,267
DIESEL ENGINE
Raymond E. White, Seattle, Wash.
Application March 7, 1932, Serial No. 597,110
1 Claim. (Cl. 123—71)

In an internal combustion engine, a cylinder, a piston reciprocatory therein, a second cylinder disposed in alignment with said first cylinder, a crosshead reciprocatory in said second cylinder and having conjoint movement with said piston, a pair of atmospheric ports, one of said ports communicating with the piston cylinder beneath the piston, and the other port communicating with said second cylinder above said crosshead, a receiving chamber disposed about said crosshead cylinder and communicating with said piston cylinder above said piston, port means for conducting air under pressure from the under side of said piston and from above said crosshead into said receiving chamber, and pressure actuated breather valve means for alternately opening and closing said ports.



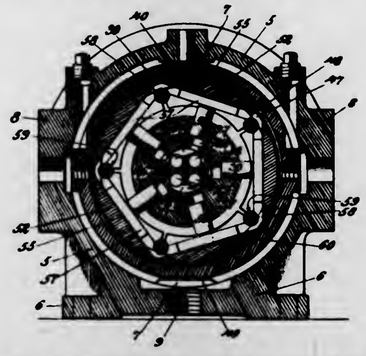
2,000,268
HYDRATION OF PULP
George S. Witham, Jr., Lincoln, N. H.
Application October 5, 1933, Serial No. 636,298
10 Claims. (Cl. 92—24)

2. In a device for treating paper stock, the combination with a beating engine of the Hollander type including a tub and a roll rotatively mounted therein, of a pump for withdrawing stock from said tub and discharging it against said roll at a velocity calculated to produce a substantial impact therewith and thereby break up bundles of fibres in said stock.



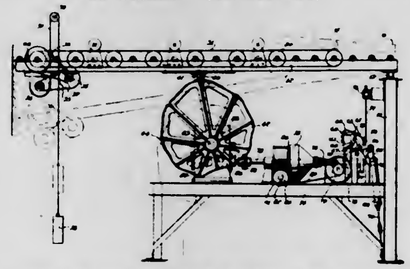
9. The method of treating paper stock which comprises circulating the stock in a suitable receptacle, subjecting the circulating stock to a brushing treatment whereby the ends of the individual fibres are frayed and combed out, concurrently withdrawing stock from the circulating mass undergoing the brushing treatment and projecting it against a suitable target at a velocity calculated to produce a substantial impact therewith whereby to break up bundles of fibres therein, and thereafter returning said stock to the circulating mass.

2,000,269
APPARATUS FOR FEEDING PLASTER BOARD INTO A DRYING KILN
Carl Abumeier, La Grange Park, Ill., assignor to United States Gypsum Company, Chicago, Ill., a corporation of Illinois
Application September 29, 1928, Serial No. 309,172
5 Claims. (Cl. 198—21)



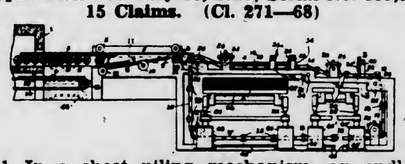
1. In a machine for the manufacture of plaster boards, a setting conveyor, a movable conveyor frame associated with said setting conveyor, crank means operatively connected to said frame, a drying kiln having a plurality of conveyor decks, and automatic means for actuating said crank means at predetermined intervals so as to cause said frame to deliver a plaster board to a predetermined deck of said drying kiln.

2,000,270
COMBUSTION CONTROL
L. V. Andrews, Worcester, Mass., and Charles M. Terry, Decatur, Ill., assignors to A. W. Cash Company, Decatur, Ill., a corporation of Delaware
Application November 10, 1931, Serial No. 574,156
16 Claims. (Cl. 236—26)



1. The method of controlling a pulverized fuel burning system comprising the steps of varying the feed of fuel in accordance with the demand for heat, initiating a change in air flow substantially simultaneously with the start of each change in fuel feed, and making all air flow changes more slowly than the corresponding changes in fuel feed.

2,000,271
VARIABLE DELIVERY PUMP OR MOTOR
Elek K. Benedek, Mount Gilead, Ohio, assignor to The Hydraulic Press Manufacturing Company, Mount Gilead, Ohio
Application April 25, 1932, Serial No. 607,409
6 Claims. (Cl. 103—161)



1. In a pump or motor, primary and secondary rotors rotatable about individual axes and movable relatively during rotation, and radial piston and cylinder assemblies connecting the rotors and including crossheads, said secondary rotor comprising half members having opposed grooves concentric with the axis of rotation of the secondary rotor, clamping means for clamping the halves together, and guide blocks clamped between the rotor halves and tangentially grooved to slidably receive the crossheads and having arcuate primary reaction shoulders engaging in the rotor half grooves, said clamping means comprising clamp screws positioned equidistantly about the secondary rotor axis one between each adjacent pair of blocks, and said blocks directly engaging said screws and being positively held against displacement by such engagement.

2,000,272
KILN FEED MECHANISM
Charles R. Birdsey, Pasadena, Calif., assignor to United States Gypsum Company, Chicago, Ill., a corporation of Illinois
Application November 30, 1928, Serial No. 322,610
18 Claims. (Cl. 198—21)

2. In a kiln feed mechanism, the multi-deck drying kiln, a pivotally mounted tilting frame associated with said drying kiln adapted to deliver sheets of material to the decks of said drying kiln, means for intermittently rocking said tilting frame about the pivot thereof, and electrical means controlled by the movement of said sheets of material for controlling the rocking of said tilting frame.

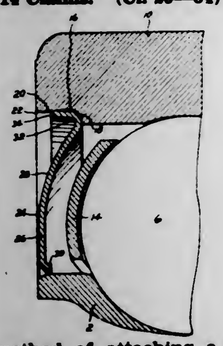
2,000,273
SHEET PILING MECHANISM
William F. Conklin, Tarentum, and Homer S. Hopkins and John M. Hover, Crafton, Pa.; Tarentum Savings and Trust Company, Mabel Conklin Voigt, and Catherine Conklin Cox administrators of said William F. Conklin, deceased
Application February 13, 1929, Serial No. 339,617
15 Claims. (Cl. 271—68)

1. In a sheet piling mechanism, an endless conveyor carrying horizontal sheet supports, means causing a portion of the top leg of the conveyor to travel at a lower level than at a preceding portion thereof, and means for stopping the travel of the sheets on the said leg of the conveyor at such a position that a support following the rear end of each sheet engages the upper surface thereof and depresses it into contact with a sheet-receiving surface before the front end of the sheet is released from the conveyor.

2,000,274
HONEYCOMB DIRECTIONAL GRILLE
Harold S. Covell and Conrad Lohman, Holland, Mich., assignors to Hart & Cooley Manufacturing Company, Holland, Mich., a corporation of Michigan
Application September 24, 1934, Serial No. 745,286
2 Claims. (Cl. 98—101)

2. A grille construction comprising, an open frame, a plurality of thin sheet metal strips formed with transverse alternate ribs and grooves therein located one over the other and resting one upon the other and extending between the ends of said frame, said grooves and ribs in the strips being positioned so as to direct air passing through the grille at an intermediate portion thereof forwardly in a path substantially at right angles to the face of the grille and at the ends of the grille forwardly and outwardly and at an angle different than a right angle to the plane of the face of the grille, and means for securing the ends of said strips against backward or forward movement with respect to the ends of the frame.

2,000,275
ASH RECEIVER
Rudolph F. De Boer, Grand Rapids, Mich.
Application June 11, 1934, Serial No. 729,979
11 Claims. (Cl. 206—19.5)



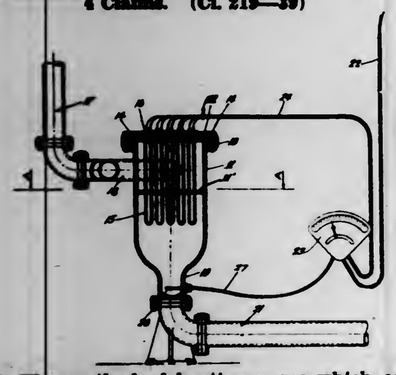
1. In an article of manufacture of the class described, a supporting plate having an opening

therethrough, an ash receiver shell extending bodily through said opening and attached to said supporting plate, an ash receiver pivoted to said shell, and frictional means for suppressing the free pivotal movement of the ash receiver.

2,000,276
BEARING AND GUARD THEREFOR

Thomas C. Delaval-Crow, Bristol, Conn., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a corporation of Delaware

Application February 4, 1932, Serial No. 590,846
14 Claims. (Cl. 29—84)

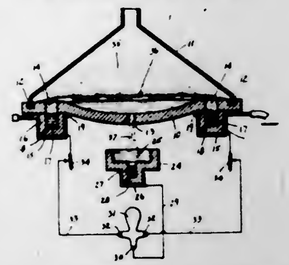


13. The method of attaching a guard plate having a side wall whose periphery is connected to an outwardly slanting resilient flange, to a race ring having a groove with a shoulder at its inner side and a slanting overhang at the outer side, which consists in pressing the guard plate towards the side of the race ring with the resilient flange slanting laterally and outwardly with respect to the race ring, camming the resilient flange towards the axis of the ring by reaction of its outwardly slanting surface with the material overhanging the groove, whereby the edge of the flange resiliently engages the slanting overhang and so resists removal while also urging the guard plate against the shoulder; substantially as described.

2,000,277
PROCESS AND APPARATUS FOR HEATING STEAM

Maurice M. Durkee, Decatur, Ill., assignor to A. E. Staley Manufacturing Company, Decatur, Ill., a corporation of Delaware

Application August 8, 1930, Serial No. 473,825
4 Claims. (Cl. 219—39)

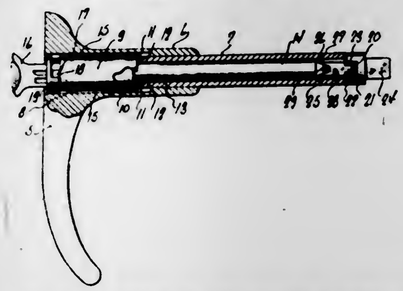


1. The method of heating a gas which comprises injecting a plurality of jets of gas from different directions into a zone so that the jets impinge each other and create a turbulence in the zone, simultaneously heating the gas at a plurality of points in the zone, causing the gas to flow in a direction at right angles to the plane of the jets and further heating the gas during its flow.

2,000,278
ELECTRIC FURNACE

John Ferguson, Indianapolis, Ind., assignor to Fairmount Glass Works, Inc., Indianapolis, Ind., a corporation

Application May 18, 1934, Serial No. 726,271
9 Claims. (Cl. 13—6)

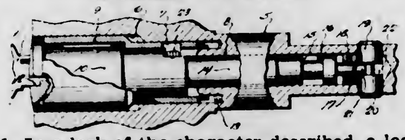


1. In an electric furnace, the combination of a hearth having a refractory lining, a refractory lined electrode box, and cooling means adjacent the junction of the said refractory linings for chilling glass which may seep through said junction.

2,000,279
LOCK

John W. Fitz Gerald, Milwaukee, Wis., assignor to Briggs and Stratton Corporation, Milwaukee, Wis., a corporation of Delaware

Application August 19, 1929, Serial No. 386,956
5 Claims. (Cl. 70—91)

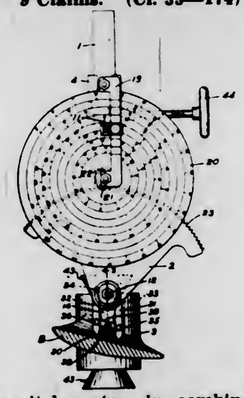


1. In a lock device of the character described, a mounting member having a bore opening to its front end, a lock cylinder inserted into the mounting member bore from its front end and movable therein in the performance of its locking functions, and cooperating means carried by the mounting member and the lock cylinder for normally retaining the lock cylinder assembled with the mounting member, one of said means being yieldably maintained in operative position and being movable to inactive position to enable withdrawal of the cylinder from the mounting member upon movement of the cylinder to a predetermined position relative to the mounting member and the application of an outward stress on the cylinder to disengage the cylinder.

2,000,280
LOCK

John W. Fitz Gerald, Milwaukee, Wis., assignor to Briggs & Stratton Corporation, Milwaukee, Wis., a corporation of Delaware

Application November 5, 1934, Serial No. 751,572
13 Claims. (Cl. 70—91)

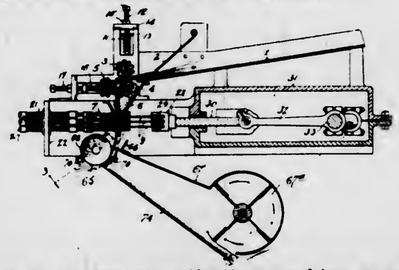


1. In a lock of the character described, a locking bolt, a key operable lock cylinder, and a driving connection between the cylinder and the locking bolt for translating rotation of the cylinder into linear movement on the part of the locking bolt, said connection including a frangible part adapted to give way under a percussive force applied to the cylinder so as to render the locking bolt inoperable by subsequent rotation of the cylinder.

2,000,281
TRAMMEL POINT FOR PITCHOMETERS

Bert O. Godfrey, Brooklyn, N. Y.

Application July 27, 1932, Serial No. 624,981
9 Claims. (Cl. 33—174)



1. In a pitchometer, in combination, a rod adapted to be disposed in definite relationship to the propeller axis, a pair of spaced trammel points adapted to contact with the propeller blade, an angle-measuring device separate from said trammel points and pivotally supported upon said rod, means operatively connecting said device and the trammel points to move the device relatively to the rod in accordance with the position assumed by the trammel points, and means automatically operable to maintain said trammel points, for all operative positions thereof, equidistant from and at opposite sides of a radial plane of the propeller through the pivot of the angle-measuring device.

2,000,282
THRESHING AND SCUTCHING MACHINE

Jim A. Grant, New York, N. Y.

Refiled for application Serial No. 185,975, April 23, 1927. This application August 18, 1930, Serial No. 476,087. Renewed February 16, 1934
12 Claims. (Cl. 19—21)

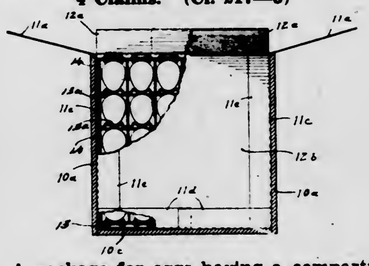
2. In a plant decorticating machine, means for loosening the seed and the waste material from the fibre and pneumatic means for separating the waste material and the seeds as they are removed from said fibre, including a rotary screen, means for blowing the waste material against said screen, and a concave baffle in said screen at the opposite side from said blowing means.

4. In a plant decorticating machine, a series of pairs of breaker blade sections spring-controlled as to edgewise movement and having opposed edges spaced apart to permit the passage of plants therethrough, and a series of loosely mounted pairs of breaker blade sections reciprocable between said spring controlled blade sections.

2,000,283
MOTOR FUEL

Chester W. Hannum, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application August 8, 1934, Serial No. 738,927
13 Claims. (Cl. 44—9)



1. A motor fuel comprising cracked hydrocarbon distillates normally tending to form gum on storage having incorporated therein, in an amount sufficient to inhibit gum formation, a hydroxy aromatic amine having one hydrogen of the amino group replaced by a cyclohexyl radical.

5. A motor fuel comprising cracked gasoline normally tending to deteriorate and develop gum on storage having incorporated therein, in an amount sufficient to inhibit such deterioration and gum formation, 4-cyclohexyl amino phenol.

2,000,284
EGG PACKAGE

Harry M. Hitchins, Minneapolis, Minn.

Application February 6, 1932, Serial No. 591,336
4 Claims. (Cl. 217—3)

1. A package for eggs having a compartment rectangular in horizontal and vertical cross section, comprising a lining formed of a pair of sheets of material impervious to air and moisture and having portions extending over and substantially fitting opposite vertical walls respectively of said compartment and portions extending across the bottom of said compartment between the walls thereof but shorter than the entire dimension across said bottom, a pair of

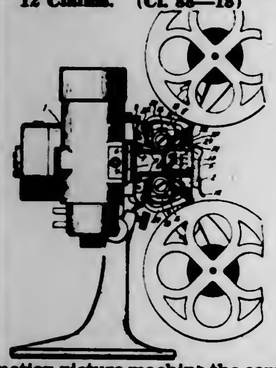
sheets of similar material having portions extending over and substantially fitting the other vertical walls respectively of said compartment, said latter portions having comparatively narrow flanges along the vertical sides thereof which overlap the first mentioned portions of said first mentioned sheets, said second pair of sheets also having portions extending over the bottom of said compartment between the walls thereof but shorter than the entire dimension across said bottom, said portions of said sheets extending over said bottom overlapping so as to completely cover said bottom and both pairs of sheets having top portions foldable over the top of said compartment so as to completely cover the same.

2,000,285

METHOD OF MAKING DENTAL PORCELAIN

Fred P. Hoffmann, Evanston, Ill., assignor, by mesne assignments, to American Porcelain Company, Chicago, Ill.

No Drawing. Application March 19, 1932, Serial No. 600,069
6 Claims. (Cl. 106—6)



1. A method of making dental porcelain which comprises fusing a preliminary mixture containing feldspar with silica, fusing the product from the first said fusion step with a coloring agent, and fusing the colored mixture with feldspar and kaolin.

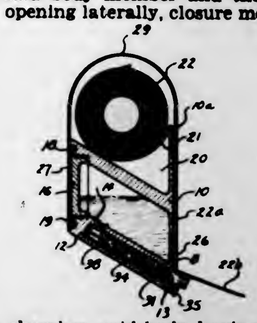
2,000,286

MOTION PICTURE MACHINE

Albert S. Howell, Chicago, Ill., assignor to The Bell & Howell Company, Chicago, Ill., a corporation of Illinois

Application February 12, 1931, Serial No. 515,246
12 Claims. (Cl. 88—18)

1. In a motion picture machine the combination with a film engaging member movable into position to form a compensating film loop and into another position to be engaged and moved by the film upon abnormal shortening of said loop, of means for predeterminately positioning said film engaging member in either of said positions, and means under the control of said film engaging member and adapted to stop operation of the machine upon movement of said film engaging member by said film from said second mentioned position.



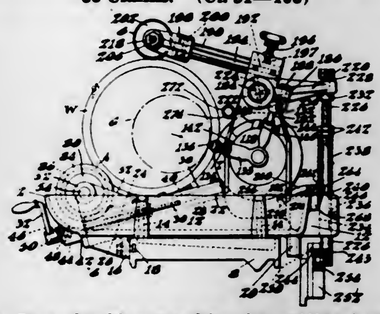
2,000,287

PORTABLE DEVICE FOR DISPENSING GUMMED TAPE

August C. Hummel, Cincinnati, Ohio

Application June 23, 1931, Serial No. 546,359
12 Claims. (Cl. 91—14.5)

2. In a hand device for dispensing gummed tape, a body member hollowed to form a reservoir chamber and a moistening chamber separated by a partition, said device being used with the moistening chamber lowermost, said chambers having openings respectively upon opposite sides of said body member and the moistening chamber opening laterally, closure means for said



reservoir chamber, said body having on the side opposite said closure means, a relatively flat surface extending down to the opening of said moistening chamber and means to guide tape therealong to said moistening chamber, a passageway between said chambers and through said partition.

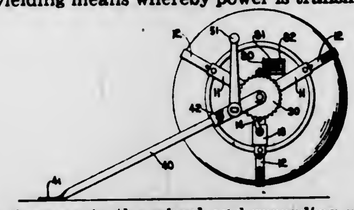
2,000,288

BORE CUTTING MACHINE

Philip H. Hutchinson, Montclair, N. J., assignor to General Motors Corporation, Detroit, Mich., a corporation of Delaware

Application January 15, 1929, Serial No. 332,627
33 Claims. (Cl. 51—103)

1. In a chuckless machine for cutting bores, a rotary cutting tool, a work head, a sliding table for one of said members to enable the tool to engage the bore of a hollow work-piece, a backing wheel and a supporting wheel rotatably mounted on the work head for rolling contact with the work-piece, an arm rockably mounted on an axis adjacent to one of the wheels, a pressure wheel carried by the arm for holding the work-piece against the other wheels, and means for regulating the length of the arm in accordance with the size of the work-piece; substantially as described.



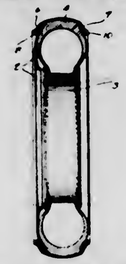
2,000,289

BRAKE TESTING DEVICE

Emil M. Kramer, Muskegon, Mich.

Application July 6, 1932, Serial No. 621,001
9 Claims. (Cl. 265—1)

6. In a brake testing device, a body member mounted in prolongation with the axis of the wheel, arms attached to the body member whereby the body member is attached to and carried by the wheel, a crank for manually operating the wheel, a gear associated with the crank and yielding means whereby power is transmitted



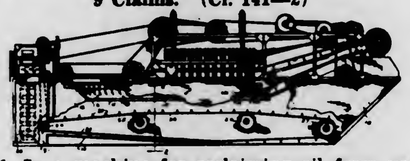
from the gear to the wheel and recording means for recording the force exerted to turn the wheel, said recording means being located upon and carried by the said body member.

2,000,290

COVER FOR SPARE TIRES OF AUTOMOBILES

George Albert Lyon, Allenhurst, N. J., assignor to Lyon Incorporated, Asbury Park, N. J., a corporation of Delaware

Application April 9, 1930, Serial No. 442,749
2 Claims. (Cl. 150—54)



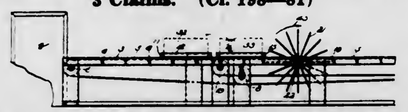
1. A tire cover for spare tires comprising a side part to substantially cover the outer side wall of the tire and sufficiently rigid to sustain itself against collapsing and a tread covering part made from relatively flexible sheet material such as fabric sheet extending from said side part across the tread of the tire and provided with expansible and contractible means whereby the inner circumferential side of said tread part is brought into holding engagement with the tire said tread covering part comprising an endless continuous ring of curved channeled cross-section which defines a shallow annular pocket open on the inner side of the ring to accommodate the tread of the tire after it is stretched over the outer periphery of the tire in cooperation with said side part and the inner side of the tire tread.

2,000,291

MEANS FOR RECLAIMING USED JOURNAL-BOX WASTE

Leo C. McNamara, Thomas W. Potter, and Irvin M. Conway, Indianapolis, Ind., assignors to Journal Box Servicing Corporation, Indianapolis, Ind., a corporation of Indiana

Application May 4, 1929, Serial No. 360,544
9 Claims. (Cl. 141—2)



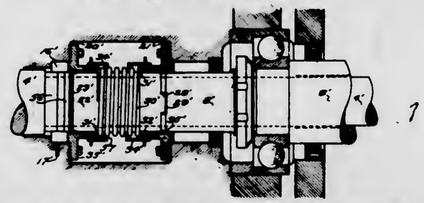
1. In a machine for reclaiming oil from used journal-box waste, a screen for waste formed of a plurality of longitudinal bars of comparatively narrow width, rods passed transversely through said bars, and spacer washers carried on said rods spacing apart said bars one from the other.

2,000,292

MATERIAL HANDLING APPARATUS

Frank S. Miller, Steubenville, Ohio

Application September 25, 1931, Serial No. 565,060
3 Claims. (Cl. 198—81)



1. In a material handling apparatus, a conveyor, a plurality of individually operative cross conveyors for receiving material therefrom, means for rendering said cross conveyors individually operative, a turn-over mechanism receiving material to be turned over immediately from said first mentioned conveyor, a second series of cross conveyors for receiving material from said turn-over mechanism, and means for rendering the conveyors of said second series operative at will.

2,000,293

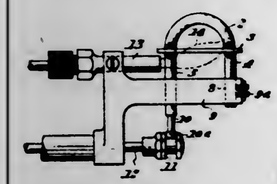
SEAL FOR CONVEYING APPARATUS

Joseph H. Morrow, Hokendauqua, Pa., assignor to Fuller Company, Catasauqua, Pa., a corporation of Delaware

Application August 15, 1933, Serial No. 685,167
5 Claims. (Cl. 286—9)

1. In an apparatus for conveying pulverized material which includes a casing having a wall provided with an opening and a shaft in the casing extending through the opening and supported for rotation in bearings outside said casing, means for preventing passage of said material through said opening which comprises a chamber surrounding the shaft between the opening and the bearings, a bushing surrounding and rotating with the shaft and lying wholly within said chamber, a fixed bearing surface on a wall of the chamber around said opening, a ring mounted removably on said bushing and having a bearing surface in the plane of rotation of said shaft and engaging said fixed surface, said ring also having a circumferential channel, compressible packing material lying within said channel in contact with the surface of said bushing, spring means surrounding said bushing and forcing said packing against said bushing and forcing said bearing surfaces into contact, and a port in said chamber through which said bushing, spring means, ring, and packing material can be removed.

2,000,294



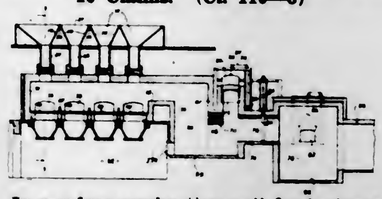
THERMOSTATIC STRUCTURE

Robert E. Newell, Irwin, Pa., assignor to Robertshaw Thermostat Company, Youngwood, Pa., a corporation of Pennsylvania

Application December 8, 1933, Serial No. 701,465
6 Claims. (Cl. 297—11)

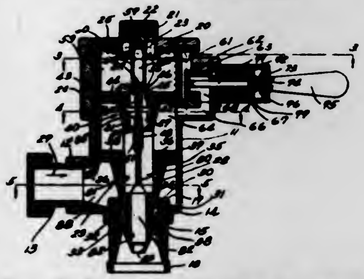
1. As a new article of manufacture, a thermostatic structure comprising a support, a curved

member having oppositely disposed arm portions, one of said arms being rigidly secured to said support, and a thermally responsive element



positioned within said curved member and extending between oppositely disposed arm portions thereof, and arranged to impart relative movement to said arms upon expansion of said element.

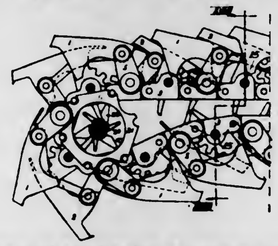
2,000,295
HANDGRIP FOR GOLF CLUBS AND THE LIKE
John M. Oldham, Detroit, Mich., assignor to Leonard A. Young, Detroit, Mich.
Application December 31, 1931, Serial No. 584,171
1 Claim. (Cl. 273—81)



A hand grip for golf club shafts comprising a continuous one piece sleeve formed of cork or other material of limited compressible, disintegratable, and non-slip characteristics in the hand of the player and telescoped over an end portion of the shaft, said sleeve being pre-formed with a spiral groove of extended width in the exterior surface thereof; and a flat strip of a width to fit closely within said groove and of inelastic material having a smooth wear resisting exterior surface, wound about said sleeve within said groove under tension to firmly clamp and hold said sleeve in firm contact with said club shaft and protect the exposed portions of said sleeve between the turns of said groove, said strip being of a thickness to fill said groove flush with the exterior surface of said sleeve between the turns of said strip and being cemented within said groove to firmly hold said strip throughout its entire length flat upon the bottom of said groove, said turns of said strip together providing a smooth wear resisting surface forming an extended portion of the hand grip surface with the non-slip surface of the sleeve exposed and slightly bulged between said turns by the compression of said sleeve by said strip.

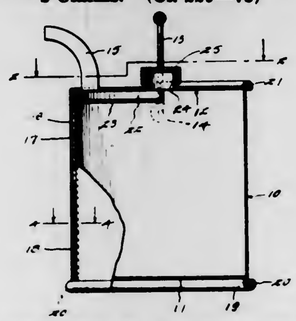
2,000,296
MEANS OF REFUSE INCINERATION
Irwin S. Osborn, Cleveland Heights, Ohio, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio, a corporation of Ohio
Application April 30, 1932, Serial No. 608,376
10 Claims. (Cl. 110—8)

1. In a refuse combustion unit for incinerating plants, a furnace for burning refuse including material having a light-weight combustion residue, and a combustion passageway, an expansion chamber, and a stack disposed in serial relation with the furnace, the expansion chamber having cross-sectional area at least three times as great as that of the combustion passageway and having volumetric capacity sufficiently large to cause the velocity of gases flowing from the furnace through the passageway to the stack to be reduced at the expansion chamber, after substantially complete combustion, sufficiently to cause residue of light weight carried from the furnace and through the passageway, by the flow of gases of combustion therethrough, to fall by gravity in the expansion chamber and collect therein and not be discharged into the stack.



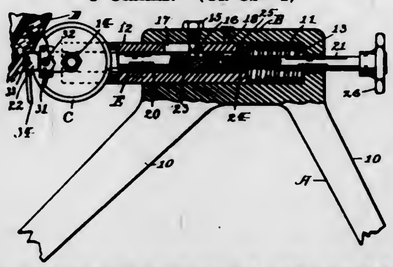
2,000,297
FLUSH VALVE
Walter Putnam, Pasadena, Calif.
Application October 25, 1932, Serial No. 639,429
13 Claims. (Cl. 137—93)

1. In a flush valve mechanism for controlling the flow of water from a supply pipe to a conduit leading to a toilet bowl, the combination of: a body having a bore with a discharge opening at the lower end thereof and a valve seat at the inner end of said discharge opening, and inlet means adapted to connect the lower end of said bore with said supply pipe; valve means in the lower part of said bore having a main valve element adapted to engage said valve seat and a projecting secondary valve element adapted to project into said opening, there being an annular wall at the upper end of said valve means forming a piston in said bore above said inlet means, said valve means having an axial opening from the top to the bottom thereof; an actuating piston in the upper part of said bore having a projection extending downwardly into engagement with said valve means, there being an air chamber formed between said actuating piston and the upper end



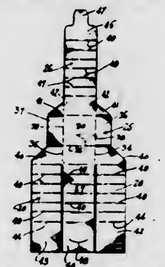
of said valve means and a fluid chamber above said actuating piston in said bore; walls forming a passage connecting the fluid chamber with said inlet means for introducing a flow of water into said fluid chamber; walls forming a releasing passage connecting said fluid chamber with said air chamber; and valve means in said releasing passage adapted to be opened to permit the discharge of water from said fluid chamber into said air chamber, said water flowing from said air chamber through said axial opening of said valve means.

2,000,298
TRAVELING CHAIN GRATE
Franz Emil Max Schenk, Altona, Germany, assignor to Frederick W. Buse, Pittsburgh, Pa.
Application April 2, 1931, Serial No. 527,310
In Germany April 12, 1930
16 Claims. (Cl. 110—40)



4. A grate chain having an upper run moving toward the front of the furnace and a lower run moving in a reverse direction, grate bars carried on said chain and movable relative thereto, and means for moving said bars while traversing the upper run of the chain to shift fuel thereacross in opposition to the movement of the chain in the upper run.

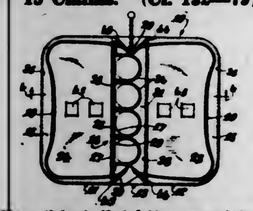
2,000,299
SAFETY OIL CAN
Joseph E. Schlorff, Pesotum, Ill.
Application February 8, 1934, Serial No. 710,342
3 Claims. (Cl. 220—75)



1. A container as set forth comprising a side wall structure constructed of a single sheet of material, separable means for securing the free edges of the material together to form a separable seam on the front side of the container, inseparable means engaging the separable means from the bottom of the container to a point spaced downwardly from the upper edge of the container to prevent separation of the lower portion of the seam, a top secured to the upper edges of the side wall structure, and a bottom secured to the lower edges of the side wall structure.

2,000,300
TIRE GROOVING MACHINE
Horace F. Scruby, Beverly Hills, Calif.
Application April 11, 1932, Serial No. 604,503
5 Claims. (Cl. 82—4)

1. A device for grooving the tread surface of a tire circumferentially, consisting of a knife supporting shaft in proximity to said tread surface having a slotted end, a groove cutting knife having substantially a semi-circular cutting edge and a shank inserted in the slot in the end of said shaft, a collar around the slotted end of and contacting said shaft to hold said shank, means for supporting said shaft and an antifriction guard cooperating with said knife to define the depth of cut imparted by the knife in said tread surface.

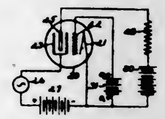


2,000,301
PROGRESSIVE CONTAINER
Edward Norman Snodgrass, Denver, Colo., and Mitchel E. Holy, Chicago, Ill., assignors to Norman Confections, Inc., Denver, Colo., a corporation of Colorado
Application April 2, 1932, Serial No. 602,712
8 Claims. (Cl. 206—56)

1. In a container of the character described, the combination with a tubular member open at an end to serve as a casing, of a collapsible casing liner comprising a plurality of walls, a flap conforming substantially in configuration with the cross-sectional interior of said tubular member to serve as the liner bottom for telescopic association with said casing through an open end thereof, one of said walls being in creased connection with an edge of said liner bottom for extension therefrom, another of said walls being in creased connection with the opposite edge of said liner bottom for confronting extension therefrom, another of said walls extending in a lateral direction from each side edge of said last named wall in creased connection therewith, confronting overlapping extensions in creased connection with said walls, inter-engaging means formed on certain of said wall extensions to serve as the top closure of said liner, and flaps in creased connection with the lateral edges of said liner bottom for extension therefrom for enabling

the complete folded association between said walls and bottom to completely confine contents therein, said liner being displaceable from said tubular member to expose the liner contents.

2,000,302
PORTABLE RECEPTACLE
Morris Solomon, Brooklyn, N. Y., assignor to Fiber Leather Products Co., Inc., New York, N. Y., a corporation of New York
Application February 25, 1935, Serial No. 7,951
15 Claims. (Cl. 132—79)

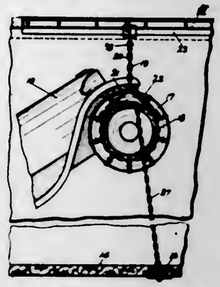


1. A collapsible toilet kit comprising a box-like element including a plurality of side walls and an edge wall having hinge connection with each of the side walls along spaced lines, whereby the box element can be fully opened up with said walls lying in a horizontal plane, a flap like alining member hingedly connected to the box element along one of the hinge lines, so as to be swingable with respect to said walls, and article holding members disposed side by side along the said edge walls and spaced above the same, said holder members being connected to the alining member along one side thereof so as to be maintained by the alining member in superposed relation to said edge wall; and the holder members being each open at the top and bottom thereof for the reception of articles to be downwardly inserted into the holder members with said articles resting directly upon said edge wall, said alining member and said holding members being maintained upright by the gravitational stability of said articles when the box element is fully opened up, and the alining member, holding members and articles being adapted to be housed in assembly relation as aforesaid in the closed position of the element.

2,000,303
REFLECTOR MOUNTING
George F. Tanchmann, Berkeley, Calif.
Application October 15, 1932, Serial No. 637,887
5 Claims. (Cl. 88—105)

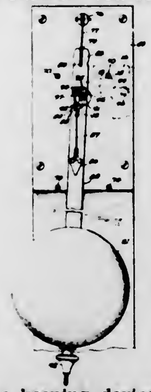
1. In a reflector mounting, a plate having a reflecting surface, a supporting plate, and means securing said plates together in spaced relation to each other comprising a plurality of apertured spacing elements in angularly abutting relation with each other and having their opposite sides secured to said plates by an adhesive substance.

2,000,304
THERMIONIC TUBE
Frederick E. Terman, Stanford University, Calif.
Application April 25, 1931, Serial No. 532,742
6 Claims. (Cl. 250—27)



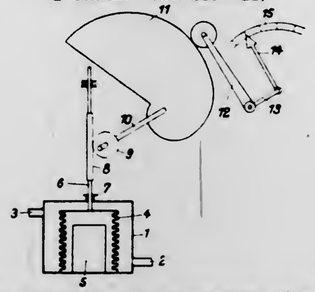
1. In a vacuum tube circuit, a tube having a control electrode capable of emitting secondary electrons, an anode, an output circuit for said tube connected to said anode, an input circuit for applying a variable potential to said control electrode and separate from said output circuit, and means for applying a positive biasing potential to said electrode such that the rate of change of current to said control electrode and the rate of change of secondary electron current drawn therefrom with changes of potential thereof are substantially equal.

2,000,305
DISTILLATION OF MINERAL OILS, TARS, AND STILL RESIDUES
Alfred M. Thomsen, San Francisco, Calif.
No Drawing. Application February 1, 1930, Serial No. 425,344
6 Claims. (Cl. 75—65)



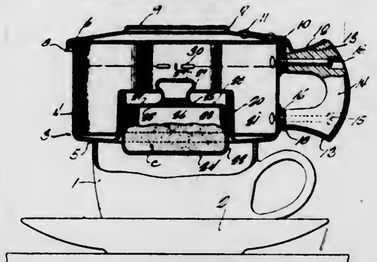
1. In the process of distilling mineral oils, tars, and still residues, the method of commingling same with a finely powdered, oxidized, complex zincy ore, and then distilling said mixture in two stages, to-wit: an agitation stage, and a quiescent stage.

2,000,306
HANGER FOR AUTOMOBILES
Kenneth J. Tobin, Chicago, Ill., assignor, by mesne assignments, to Evans Products Company, Detroit, Mich., a corporation of Delaware
Application February 15, 1932, Serial No. 593,037
9 Claims. (Cl. 105—368)



1. In combination, in a railway freight car, an automobile in said car and a sling engaging each wheel at one end of said automobile to secure said end in suspended position in said car, each of said slings comprising a member engaging the entire circumference of a wheel and a portion extending upwardly therefrom adapted to be secured to said car above said suspended end, means extending from said member adapted to be secured to said car above said suspended end, said portion and said means being fastened to said member above the axis of rotation of said wheel.

2,000,307
ALTERNATING CURRENT CLOCK
William J. Van Osdel, Chicago, Ill.
Application July 21, 1931, Serial No. 552,220
8 Claims. (Cl. 58—26)



8. In a time keeping device of the class described, a constantly rotatable element provided with one or more peripheral shoulders, and a member separate therefrom and mounted for free movement about a fixed pivot, adapted to engage and rest upon the periphery of said element and co-operating therewith to cause an audible signal simulating the ticking of a clock, said member adapted to be moved out of engagement with said element to eliminate at will the said audible signal, the said member and element also co-operating to maintain the said element against retrograde movement.

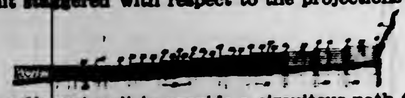
2,000,308
VOLUME METERING APPARATUS
Friedrich von Schütz, Berlin-Charlottenburg, Germany, assignors to N. V. Machinerieen-en Apparaten Fabrieken "Meaf", Utrecht, Netherlands
Application July 27, 1931, Serial No. 553,404
In Germany June 25, 1930
1 Claim. (Cl. 265—44)

In an apparatus for measuring the specific volume of gases, a casing having a gas inlet and a gas outlet, a closed cylindrical hollow vessel in said casing, this vessel being elastic in its axial direction and adapted to be filled with a gas, a solid body in said vessel for diminishing the volume of gas contained in the vessel, a shaft, means for converting the stroke of said vessel to a pivotal movement of said shaft, a cam connected rigidly to said shaft, a second shaft, and a rocking lever pivoting around said second-mentioned shaft and operatively connected to said cam and a pointer connected to the rocking lever, the said cam being so calibrated that the deflections of the rocking lever are proportional to the logarithms of the values of the specific volume of the gas contained in the vessel.

2,000,309
ONE CUP COFFEE MAKER
Robert H. Wentorf, West Bend, Wis., assignor to West Bend Aluminum Company, West Bend, Wis., a corporation of Wisconsin
Application March 1, 1933, Serial No. 659,150
6 Claims. (Cl. 53—3)

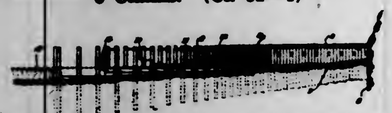
1. A coffee percolator comprising a container having a body portion and a bottom, means coacting with the bottom to define a coffee receiving chamber and also coacting with the body portion to define a chamber for preventing a portion of the liquid introduced into said container from entering said coffee receiving chamber, said bottom being perforated within the confines of said coffee receiving chamber, and a perforated separator between the upper part of the coffee receiving chamber and the interior of the container.

2,000,310
METHOD OF AND MEANS FOR MIRROR MAKING
Henry G. White and Francis Logan Porter, High Point, N. C.
Application February 19, 1934, Serial No. 712,077
9 Claims. (Cl. 41—29)



9. That method of ornamenting transparent sheets of material which comprises forming a design on one surface of the sheet with a soluble material then applying a silver film to said one surface, then subjecting the soluble material to a solvent to remove the same from the sheet to leave an ornamental unsilvered portion on said surface of said sheet.

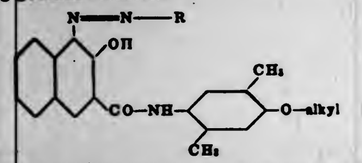
2,000,311
JETTY
Sydney M. Wood, Lake Bluff, Ill., and Harry A. Schmitt, Milwaukee, Wis.
Application January 6, 1934, Serial No. 705,494
12 Claims. (Cl. 61—4)



4. A jetty comprising an elongated wall extending outwardly at an angle to the shore, said wall being formed of superimposed layers of similar transversely laid units, each unit being formed with lateral projections, the units being laid in

spaced apart relation with the projections of one unit staggered with respect to the projections of

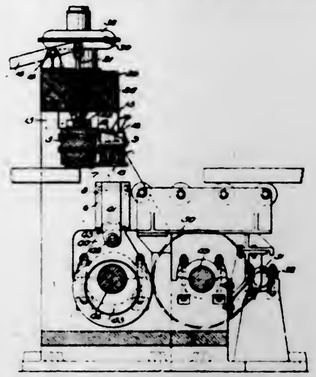
an adjacent unit to provide a circuitous path for water, upper layers being of less width than layers therebelow to provide tapered sides.



2,000,312
JETTY
Sydney M. Wood, Lake Bluff, Ill.
Application January 6, 1934, Serial No. 705,495
6 Claims. (Cl. 61—4)

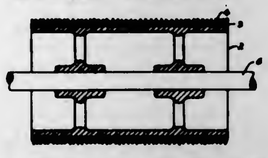
2. A jetty comprising an elongated wall extending outwardly at an angle to the shore, said wall being formed of parallel rows of spaced upright members, and other members laid horizontally between said rows, the spacing of the upright members increasing outwardly, and the height of the portion formed by said horizontally laid members decreasing outwardly thereby providing in combination with the upright members a jetty of outwardly increasing permeability to partially obstruct littoral currents and cause a gradual decrease in the velocity of said currents and the deposit of beach building material.

2,000,313
WATER-INSOLUBLE AZO-DYESTUFFS AND FIBER DYED THEREWITH
Arthur Zitscher, Offenbach-on-the-Main, and Wilhelm Lambert, Leverkusen-Wiesdorf, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application January 9, 1934, Serial No. 705,970. In France January 12, 1933
14 Claims. (Cl. 260—95)



2. The water-insoluble azo-dyestuffs of the following general formula:

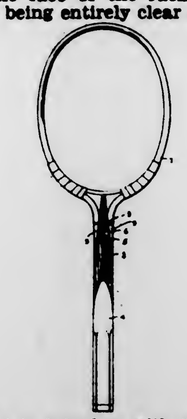
wherein R stands for a radical of the benzene, naphthalene, diphenyl, carbazole or anthraquinone series, yielding, when produced on the fiber, dyeings of various shades and very good fastness properties.



2,000,314
UP-CUT SHEAR
Floyd A. Beatty, Cerlisle Station, Pa., assignor to Lewis Foundry & Machine Company, Groveton, Pa., a corporation of Pennsylvania
Application January 21, 1931, Serial No. 510,217
2 Claims. (Cl. 164—47)

2. In shearing apparatus, the combination of an upper shear, a lower shear movable vertically relative to the upper shear to sever material, material supporting means for positioning a length of the material for severing into sections, the lower shear being engageable with the material so as to displace the end of the corresponding section relative to the remainder of said section and deform the section during the shearing oper-

ation, means for actuating said lower shear, and opposed straightening means engageable with said displaced end for pushing downwardly thereon and reshaping the section as the lower shear is lowered.

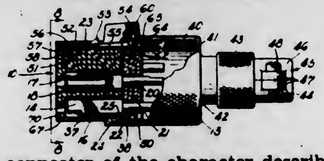


2,000,315
APPARATUS FOR TREATING FABRICS
Raymond C. Benner, Henry P. Kirchner, and Ronnie L. Melton, Niagara Falls, N. Y., assignors to The Carborundum Company, Niagara Falls, N. Y., a corporation of Pennsylvania
Application December 5, 1932, Serial No. 645,760
2 Claims. (Cl. 26—31)

1. Apparatus for treating cloth comprising a rotary support and a covering fastened thereto, said covering comprising a web coated with elongated abrasive particles the major proportion of which are separated from each other by a distance less than their major axes and attached endwise to the surface of the web.

2,000,316
RACKET
Cecil Bentley, Niagara Falls, Ontario, Canada
Application June 23, 1930, Serial No. 463,213
3 Claims. (Cl. 272—73)

1. In a racket, the combination with a bow portion, and a handle embraced by the terminal ends of said bow and extending therefrom, said handle having a reduced cane core portion subject to flexing stresses, of a thin flat flexure-control strip incorporated solely within the handle, said control strip being confined at one end in the base end of the handle and intersecting the plane of the racket face and extending longitudinally of the handle and bridging said reduced cane core portion and confined at its other end between the said terminal ends of the bow for the purpose of restricting flexture of said reduced cane core portion in a direction transversely of the face of the racket, said flexure control strip being entirely clear of the bow por-



tion so as not to interfere with the natural flexibility and desired lightness of the bow.

2,000,317
SOY BEAN FLOUR
William B. Bishop, Decatur, Ill., assignor to A. E. Staley Manufacturing Company, Decatur, Ill., a corporation of Delaware
No Drawing. Application March 2, 1933, Serial No. 659,347
3 Claims. (Cl. 99—11)

1. The process for preparing soy bean flour, which comprises increasing the normal moisture content of soy beans, subjecting the moist beans to a relatively high temperature for a short period of time, drying said beans at a reduced temperature, expelling oil from the dried beans at a relatively low temperature, and grinding the expelled beans into flour form.

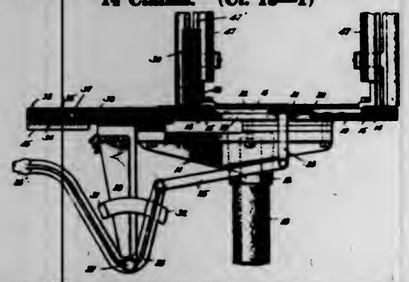
2,000,318
CORD CONNECTER
James H. Cannon, Los Angeles, Calif.
Application May 22, 1933, Serial No. 672,125
7 Claims. (Cl. 173—328)

1. A connecter of the character described, including: primary and secondary connecter members adapted for interengagement, said primary member comprising a body having a longitudinal groove along the outer face thereof, and said secondary member having a tubular wall to extend over said body of said primary member, there being a shoulder in the inner face of said tubular wall; a catch member lying in said groove of said body, said catch member having a catch dog on the outer face thereof to engage said shoulder in said tubular wall; a relatively thin metal wall on one end of said body forming a bridge across the forward part of said groove and over one end of said catch member for holding said end of said catch member in said groove; a wall on the opposite end of said body for limiting the outward movement of the opposite end of said catch member relative to said groove; a spring coextensive with said groove for yieldably moving said catch member outwardly a limited distance to keep said dog in engagement with said shoulder when said connecter members are in interengagement; a stop on said catch member adapted for engagement with said body to prevent endwise movement of said catch member and said spring in said groove; and a manually operable projection on said catch member for moving the latter inwardly so as to move said dog from engagement with said shoulder to permit separation of said connecter members.

2,000,319
AUTOMATIC MIXING VALVE
Frederic C. Chadbern, Newburgh, N. Y.
Application August 19, 1933, Serial No. 685,876
14 Claims. (Cl. 236—12)

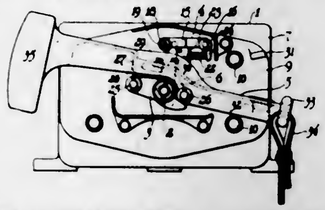
1. The combination with a valve having a rotatable gate, of a lever fast to the gate, a lead element pushing and pulling the lever, and varying in length sufficiently with changed temperature to operate the lever and alter the position of the gate to vary the flow of water through the valve, a water conduit leading from the valve so that the water bathes a face of the element to control its length, and a support of harder metal lying against the lead element throughout most of its length to support it.

2,000,320
HOUSE CAR
Frank Ditchfield, Cleveland, Ohio, assignor to The Youngstown Steel Door Company, Cleveland, Ohio, a corporation of Ohio
Application September 9, 1933, Serial No. 688,738
19 Claims. (Cl. 105—409)



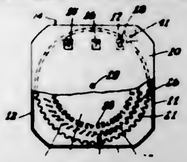
1. A converted house car including: a metal underframe including cross members and side sills, and sheet metal ends, the lengths of said cross members and the width of the sheet metal ends and location of the side sills with reference to the longitudinal center line of the car corresponding to those of a U. S. R. A. standard steel frame double sheathed box car having an inside width of 8', 6''; metal side plates; metal door and intermediate side posts disposed laterally outwardly of the outside plane of the side sills; sheet metal side wall sheathing attached to said intermediate posts on the outer side thereof, the upper edges of the sheathing being connected to the side plates and the lower edges being outwardly spaced from the side sills; means bridging the space between and connecting the lower edges of the sheathing and respective side sills; and

separate means providing a support for and a direct connection from each intermediate post to the side sill, said posts and the location thereof being such as to provide an inside width of the car in excess of 8', 6".



2. A house car including: a metal side sill; a metal side plate; a sheet metal end; metal side posts; sheet metal side wall sheathing the lower edge of which terminates in a plane outwardly spaced from the sill; means for attaching the upper edge of the sheathing to said side plate; means for attaching the sheathing to said side posts; means bridging the space between and connecting the lower edge of the sheathing to the side sill; and supporting and connecting members at the bottom of said posts, each member being directly secured both to a post and to the side sill.

2,000,321
MAGAZINE SHOE FILLER UNIT
Charles F. Eaton, West Newbury, Mass., assignor to North American Chemical Company, Cambridge, Mass., a corporation of Massachusetts
Application October 20, 1933, Serial No. 694,394
14 Claims. (Cl. 18—1)

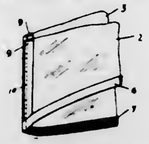


12. Apparatus for holding, delivering and heat-conditioning shoe-bottom filler units comprising, in combination, a rotatable support, a number of magazines carried by said support, each magazine adapted to hold a stack of filler units, the top side of the support constituting the bottom of each magazine, a heater adjacent the rotatable support having a top surface constituting substantially a continuation of the bottom of each magazine when the magazine is in delivery position, the support being rotatably adjustable to bring the magazines successively into delivery position opposite the heater, and a feed slide operable to shove the lowermost filler unit from that one of the magazines which is in delivery position onto the heater.

2,000,322
SNAP OPERATING MECHANISM
Clarence T. Evans, Wauwatosa, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a corporation of Delaware
Application May 1, 1933, Serial No. 668,781
6 Claims. (Cl. 74—100)

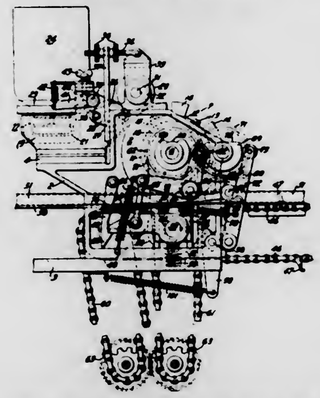
1. The combination with a control device having an operating shaft rotatable in opposite directions between given extreme positions, of a latching mechanism associated with said shaft for locking the same against movement out of either of said extreme positions and a weighted operating member arranged above said shaft and supported thereby, said member being movable in opposite directions with respect to said shaft and being adapted to act by gravity when moved in either direction with respect to said shaft to bias the same in a corresponding direction, and said latching mechanism being releasable by said operating member upon movement of the latter in opposite directions into given extreme positions.

2,000,323
COIN CONTROL REGISTER BANK
Jacob Farber, New York, N. Y., assignor to Lina Charnes Farber, New York, N. Y.
Application December 14, 1933, Serial No. 702,303
3 Claims. (Cl. 235—100)



1. In a register, a disk, an inner series of numbers on said disk arranged in circular formation, said inner series of numbers including a plurality of groups of numbers, the numbers of each group ranging from 0 to 9 consecutively, and an outer series of numbers on said disk arranged in circular formation, the numbers of the outer series being arranged along chords with respect to the circular arrangement of the numbers of the inner series, the outer series of numbers including groups of numbers, there being ten identical numbers in each group and the groups being arranged in numerical order.

2,000,324
PROTECTIVE COVER FOR GARMENTS
Nathan I. Fleischer, Cincinnati, Ohio, assignor to I. Fleischer & Sons, Cincinnati, Ohio, a firm composed of Nathan I. Fleischer and Jacob I. Fleischer
Application October 15, 1932, Serial No. 637,963
1 Claim. (Cl. 223—61)

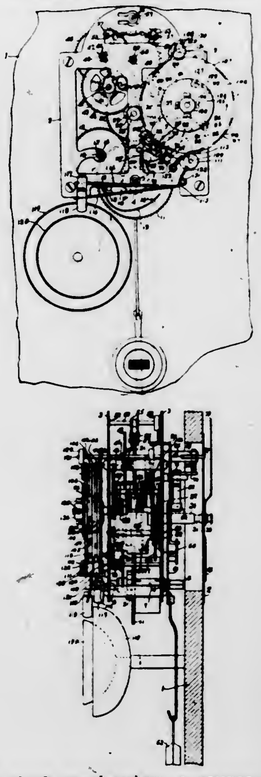


A device of the character mentioned comprising two sheets of transparent material shaped to register along their edges, separate adhesive tapes secured to and overlapping certain of the edges

of each of said sheets, and stitching through and uniting said tapes along said edges whereby said

sheets are assembled and exposure of the adhesive portions of said tapes inside said device is prevented.

2,000,325
GLUING MACHINE
George F. Ford, Los Angeles, and Walter F. Pittman, Huntington Park, Calif., assignors to Fibreboard Products Inc., San Francisco, Calif., a corporation of Delaware
Application July 15, 1932, Serial No. 622,670
8 Claims. (Cl. 91—50)



1. A machine for depositing glue on a blank of material, comprising a gluing roll, means for applying glue on the roll, means for feeding the blank past said roll, an impression roll having a normal position adjacent the gluing roll for supporting the blank and having a retracted position away from said roll, means mounting the impression roll for movement from one to the other of said positions, means urging the impression roll toward the retracted position, a latch engageable with said mounting means for holding the impression roll in its normal position adjacent the gluing roll, and means for releasing said latch to retract the impression roll.

2,000,326
FOOTWEAR
James B. Greider, Racine, Wis.
Application June 7, 1934, Serial No. 729,464
4 Claims. (Cl. 36—76)

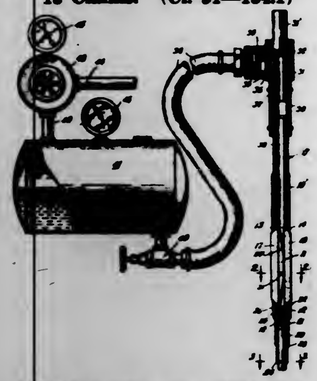
1. A shoe comprising an upper, an insole, and an outsole, a pad of cushioned material interposed between the insole and the outsole at the heel and arch of the shoe, the wear sole terminating in rear of the arch and in front of the heel, the cushion pad having its lower face offset at the heel, and a removable wear heel secured in said offset.

2,000,327
CLOCK
Julius W. Hansen, Princeton, Ind.
Application March 14, 1929, Serial No. 347,041
8 Claims. (Cl. 58—13)

1. In a clock mechanism, a source of power, a differential gear mechanism in operative relation with the source of power, said differential gear mechanism consisting of a main gear, an auxiliary gear adapted to operate a time indicating mechanism consisting of a visual time indicating means and part of a sound time indicating mechanism, a second auxiliary gear associated with the differential mechanism and adapted to intermittently operate another part of the sound time indicating mechanism, means for holding said second auxiliary gear against operation, and means for releasing said last-named means to permit the operation of the sound time indicating mechanism through the second auxiliary gear.

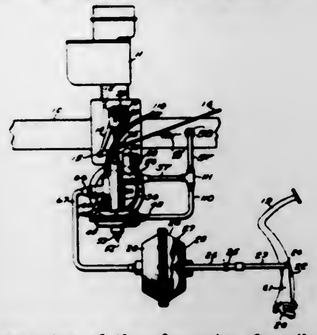
4. In a clock mechanism, a power means, a rotatably mounted strike operating mechanism connected to the power means and adapted to be operated thereby at a uniform speed, a second means associated with the power means and engaging the strike operating mechanism adapted periodically to operate the strike operating mechanism at an increased speed.

2,000,328
MATCH
William Harris, Newark, N. J.
Application June 26, 1933, Serial No. 678,082
1 Claim. (Cl. 44—42)



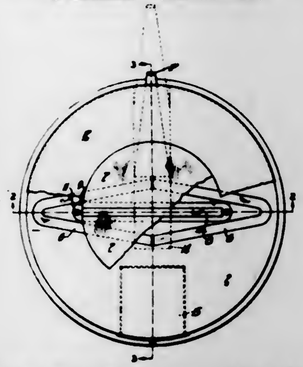
A match comprising a flexible stem, a fulminating head at the outer end thereof and a second fulminating head on the stem laterally thereof and contacting the stem with the outer end of the second head terminating in proximity of the inner end of the outer head whereby the second head will be ignited when the outer head is substantially consumed.

2,000,329
PROCESS OF PREPARING ALKALI METAL ALCOHOLATES
Paul Heisel and Edmund Berghelmer, Gersthofen, near Augsburg, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
No Drawing. Application September 1, 1933, Serial No. 687,906. In Germany September 27, 1932
10 Claims. (Cl. 260—156)



1. The process which comprises causing a vaporous alcohol to act upon a liquid amalgam of an alkali metal.

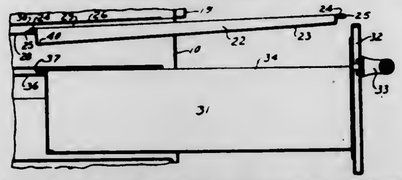
2,000,330
HONING TOOL
Carl F. High, Flint, Mich.
Application November 27, 1933, Serial No. 699,843
13 Claims. (Cl. 51—104.1)



1. A rotary honing tool comprising, in combination, a supporting member having a cylindrical portion of a diameter providing a running fit in the hole to be finished, and having a diametrically extending recess provided with parallel side walls, a pair of stones positioned in said recess for movement radially therein, said member having a passage for supplying fluid under pressure to said recess between said stones so as to urge the stones outwardly into engagement with the work, and a port leading to the periphery of the member discharging the fluid under pressure to the bore being finished.

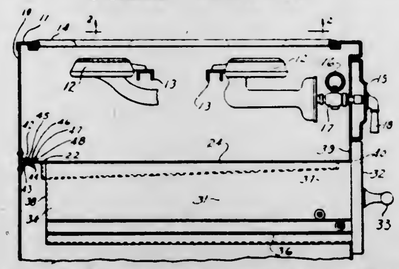
2,000,331
MOTOR VEHICLE CLUTCH CONTROL MECHANISM
Edward G. Hill, Richmond, Va., assignor to Hill Engineering Corporation, Richmond, Va., a corporation of Virginia
Application February 3, 1934, Serial No. 709,650
19 Claims. (Cl. 192—.01)

1. Apparatus of the character described comprising a power device connected to a motor vehicle clutch, means for rendering said power device operative for disengaging the clutch elements and for releasing the clutch elements for movement to operative engagement, means automatically operative for checking the movement of the clutch elements prior to operative engagement thereof when said first named means releases the clutch elements for relatively rapid movement faster than a predetermined rate, and means operative when said first named means releases the clutch elements for movement toward engaged position at a rate slower than said predetermined rate and faster than a predetermined slower rate for checking the movement of the clutch elements prior to operative engagement thereof to an extent less than the checking effected by said second named means.



2,000,332
TOY
Otto T. Jensen, Fresno, Calif.
Application October 8, 1934, Serial No. 747,365
3 Claims. (Cl. 46—49)

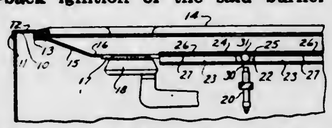
1. A toy comprising a base, a plate of magnetic material on the base to provide a playing surface,



a playing object of magnetic material overlying said surface, means comprising a permanent magnet in the base for magnetizing said plate to hold the object in a predetermined position relative to the playing surface, and means comprising a bar of magnetic material for bridging the poles of said magnet for controlling the magnetization of said plate.

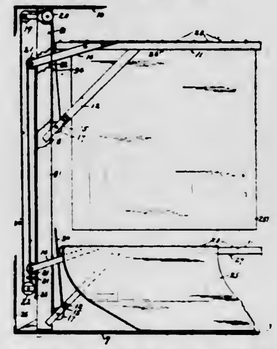
2,000,333
STOVE
Bertrand B. Kahn, Cincinnati, and William T. Bradbury, Hamilton, Ohio, assignors to The Estate Stove Company, Hamilton, Ohio, a corporation of Ohio
Application August 17, 1931, Serial No. 557,500
5 Claims. (Cl. 126—39)

1. In a stove, a drawer compartment, a drawer within said compartment, said drawer having a vertically extending front portion providing a closure for said compartment, drip pan supports in said compartment, a drip pan slidably mounted on said supports, said pan supports being inclined upwardly toward the front of the compartment for withdrawal of the pan thereon upon opening the drawer to a clearance position with respect to the plane of movement of the pan on the supports, in which position the drawer is partially withdrawn from said compartment.



2,000,334
STOVE
Bertrand B. Kahn, Cincinnati, Ohio, assignor to The Estate Stove Company, Hamilton, Ohio, a corporation of Ohio
Application August 24, 1931, Serial No. 559,046
6 Claims. (Cl. 126—39)

2. In a stove, a drawer compartment, a drawer within said compartment, a drip pan slidably carried by said drawer, and means engageable with the pan upon movement to the position of use by closure of the drawer to retain the pan in retracted position for movement of the drawer relatively to the pan.

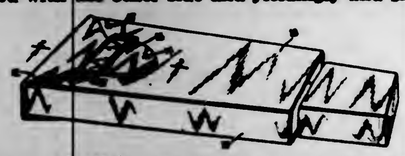


2,000,335
STOVE
Bertrand B. Kahn, Cincinnati, Ohio, assignor to The Estate Stove Company, Hamilton, Ohio, a corporation of Ohio
Application August 24, 1931, Serial No. 559,047
7 Claims. (Cl. 158—115)

2. In a stove, a plurality of burners, a pilot light, a plate extending between said burners, said plate having a depressed fuel conducting groove formed therein between the pilot light and a burner for flash-back ignition of the said burner and a

readily removable cover overlying the groove and cooperating therewith to form a fuel conducting passage.

2,000,336
RACK FOR DISPLAYING RUGS
Ford F. Kerr, Fresno, Calif.
Application December 26, 1933, Serial No. 703,891
2 Claims. (Cl. 211—47)

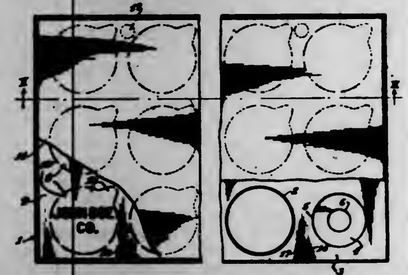


1. In a device of the character described comprising an upright support having slideways on opposite sides of said support, an arm assembly adapted to be moved up and down on said support and on said slideways, said arm assembly having an upper and a lower brace, a roller attached to the lower brace adapted to bear against the side of the upright support nearest to the arm assembly, a roller attached to the upper brace and adapted to bear against the side of the upright support opposite to the arm assembly, each of said rollers having a groove around the periphery thereof adapting said rollers as pulleys, pulleys positioned adjacent to the bottom of the upright support and also adjacent to the top of said support; and a belt anchored at one end to the upright post adjacent to the lower end thereof, thence passing around the groove in the roller attached to the upper brace, thence down and around the pulley adjacent to the lower end of the post, thence around the pulley at the top of said post, thence around the groove in the roller on said lower brace and thence to the top of said post where said belt is anchored, said rollers being adapted as both rollers and pulleys.

2,000,337
SLIDE RULE CASE
Adolf W. Keuffel, Montclair, N. J., assignor to Keuffel & Esser Company, Hoboken, N. J., a corporation of New Jersey
Application November 1, 1932, Serial No. 640,592
8 Claims. (Cl. 150—52)

1. In a slide rule case or the like having a cover with a tongue thereon, the combination with a side of the case, of a strap secured at its ends thereto to form a passage for the tongue, said passage having spaced substantially parallel sides, a flat substantially rigid surface carried

with one side, at least one resilient tongue carried with the other side and yieldingly and slid-



ably contacting with the tongue on the cover when inserted in the passage.

2,000,238
METHOD OF INDURATING CLAY AND PRODUCT FORMED THEREFROM
Max H. Eliefeth, Madison, Wis., assignor to C. F. Burgess Laboratories, Inc., Madison, Wis., a corporation of Delaware
No Drawing. Application July 28, 1932, Serial No. 625,525
24 Claims. (Cl. 25—156)

1. The method for indurating clay or clay-like materials which comprises disseminating a small amount of caustic alkali throughout said clay or clay-like material, and heating said mixture at a temperature substantially above 110° C. but not above 500° C. to produce a non-vitrified product having hardness approximating that of clay fired at a temperature near its fusion point.

2,000,239
PROCESS FOR MAKING CONFECTION PACKAGES
Frederick Thomas Krein, Park Ridge, Ill., assignor to Vortex Cup Company, Chicago, Ill., a corporation of Delaware
Application December 30, 1932, Serial No. 649,576
6 Claims. (Cl. 62—173)

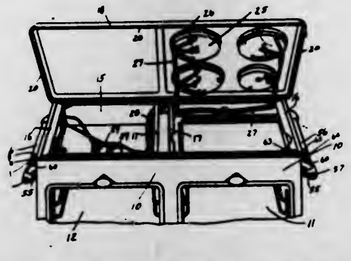
1. The process of making a package of confection, comprising the steps of placing a quantity of semi-liquid confection in a container, placing a cap over the mouth of the container, inverting the container, confection and cap while the cap closes the mouth of the container so that the container and confection are supported by the cap and the confection intimately contacts the cap, and subjecting the container, cap and confection to a sub-freezing temperature for the confection until the latter is solid and firmly adheres to the container and cap.

2,000,240
SHOE STRETCHING LAST
Patsy La Marca, Ceresopolis, and Quirino D. Remito, Charleroi, Pa.
Application October 20, 1933, Serial No. 695,764
11 Claims. (Cl. 12—138.3)

1. A combination adjustable shoe tree and shoe-stretching last, comprising a supporting frame, a pair of uniformly laterally expansible side sections adjustably mounted on opposite sides of said frame to form the instep and forward joint portions of the last, a detachable toe section secured to the front end of said frame, a tongue-shaped instep cover plate pivotally connected at

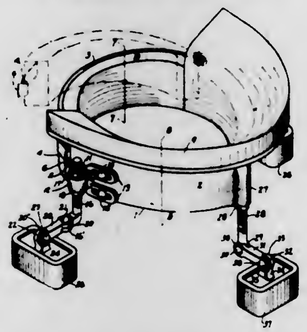
one end to said frame at its forward end, a cross wall secured to the rear end of said frame, an axially adjustable heel section pivotally secured to said cross wall and individual means for adjusting said heel section, said oppositely disposed instep sections, said oppositely disposed joint sections, and the upper end of said instep cover plate.

2,000,241
GREASE SEAL FOR BEARINGS
Everett P. Larsh, Vandalia, Ohio, assignor to The Master Electric Company, Dayton, Ohio, a corporation of Ohio
Application June 8, 1932, Serial No. 616,050
1 Claim. (Cl. 286—11)



A sealing unit assembly for shaft bearings including an annular diaphragm, the annular medial portion of which is laterally offset into a plane substantially parallel to the marginal portions thereof and interconnected therewith by oppositely inclined beveled portions, a sealing ring of antifriction material fixed thereto coincident with one margin thereof, a pair of annular clamping members having flanges abutting the other margin of said diaphragm and a resilient member interposed intermediate one of said annular members and the sealing ring.

2,000,242
CONFECTION AND METHOD OF MAKING SAME
George E. Lathrop, Louisville, Ky., assignor, by mesne assignments, to The Popsicle Corporation of the United States, New York, N. Y., a corporation of Delaware
Application June 25, 1931, Serial No. 546,901
5 Claims. (Cl. 206—56)

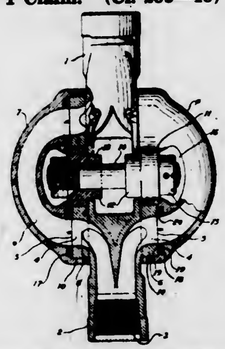


2. A handle for confections, cut, bent, and formed from a single piece of material comprising receptacle body and a bottom therefor, said bottom being formed by inwardly folded extensions of the body, said handle including gripping members formed by extensions of the side walls of the body.

2,000,243
TABLE TOP ELECTRIC RANGE
Francis A. Lasher, Marion, Ind., assignor to Rutenber Electric Co., Marion, Ind., a corporation
Application May 31, 1933, Serial No. 673,675
5 Claims. (Cl. 219—37)

3. An electric range having an open top frame, a cover of substantially equal length and width with the frame hingedly connected thereto and normally closing the top thereof, a plurality of independent electric heating elements arranged in spaced relation on said cover and extending through the top of the same, the bottoms of the several elements exposed to full view beneath said cover, each of said elements capable of being detached from said cover without disturbing the remaining elements, independent electric conductors for each of said elements, and a substantial part of said cover free of heating elements and constituting a table top.

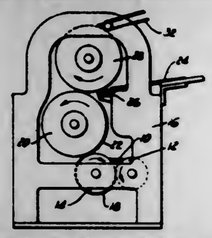
2,000,244
SUPPORT FOR THE HEAD WHILE SLEEPING OR RESTING IN A SITTING POSITION
Garriott Lloyd McClellan, Cincinnati, Ohio
Application January 8, 1934, Serial No. 705,748
4 Claims. (Cl. 155—175)



1. A support for the head of a person while sleeping or resting in a sitting position comprising a collar including two segments hinged at their adjacent ends to each other, means for detachably connecting said segments at their other ends whereby said collar can be opened by the wearer for placing it upon or removing it from his neck, the front and side portions of said collar having an upwardly and outwardly flaring flange, padding inside the collar and flange, and adjustable legs and feet attached to said collar to support it in proper position upon the wearer.

2,000,245
BAG
Walter K. Miller, La Grange, Ill., assignor to Shellmar Products Company, Chicago, Ill., a corporation of Delaware
Application October 15, 1932, Serial No. 637,871
6 Claims. (Cl. 229—53)

1. A bag made from non-fibrous cellulose sheeting having smooth-cut lips and being creased at its edge portions into flattened condition, said edge portions terminating in tangential, upwardly extending portions.



2,000,246
METALLIC SWING JOINT FOR PIPES
Demery A. Murphy, Torrance, Calif., assignor, by mesne assignments, to The National Superior Company, Toledo, Ohio, a corporation of Delaware
Application June 13, 1933, Serial No. 675,576
1 Claim. (Cl. 285—18)

In a metallic swing joint connection, the combination of a pair of similar swivel members, each having a swivel head at one end formed with outwardly projecting and axially aligned trunnions and having a fluid passage extending therethrough and terminating in a pair of diverging branches opening laterally outward through the faces of the trunnions, a pair of connecting members having bearing sockets fitting over the trunnions and being provided with passages communicating with and connecting the fluid passages in the swivel members, packing means provided between the parallel trunnion faces and the complementary mating face of

each bearing socket, said packing means including a packing ring positioned in an annular radially confined groove in one of said faces, said packing ring having radially inward extending lip portions engaging the faces of the trunnion and the bearing socket respectively, means to convey fluid to said groove to expand the packing against said faces and adjustable means securing the connecting members in position on the swivel members.

2,000,247
COATING OF PAPER
John D. Murray, Chicago, Ill., assignor to The Murray Lignafilm Corporation, Chicago, Ill., a corporation of Illinois
Application July 24, 1933, Serial No. 681,838
16 Claims. (Cl. 91—67.9)

1. That method of providing a transparent protective coating for a sheet of ink printed paper or the like, without sufficient penetration of the paper substantially to affect the ink, which comprises forming a film of transparent coating material and solvent as a viscous liquid, evaporating part of the solvent from the film to give a partially self-sustaining film still containing a considerable proportion of solvent, affixing said partly-dried film under heavy pressure to the printed surface of the paper, and drying by evaporating substantially the remainder of the solvent.

2,000,248
VAT DYESTUFF OF THE ANTHRAQUINONE SERIES
Heinrich Neresheimer, Wilhelm Ruppel, and Anton Wimmer, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application June 20, 1932, Serial No. 618,242. In Germany June 25, 1931
7 Claims. (Cl. 260—60)

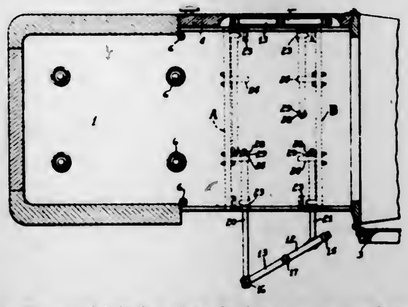
1. Vat dyestuffs of the anthraquinone series corresponding to the general formula

R—CO—NH—R'

in which R' stands for an anthraquinone radicle which may be substituted by a benzoylamino group and R for a 1,2-benzanthraquinone radicle in which the linkage to the —CO— group indicated in the formula is fixed to the Bz-nucleus, the remaining positions of the said benzanthraquinone radicle bearing atoms selected from the group consisting of hydrogen and halogen.

2,000,249
SEAL
John C. Olsen, Chicago, Ill., assignor to Flexible Steel Lacing Company, Chicago, Ill., a corporation of Illinois
Application October 28, 1932, Serial No. 640,185
9 Claims. (Cl. 286—1)

1. A seal of the character described, comprising: a casing having axially apertured side walls to accommodate a shaft therethrough; a flexible packing within the casing having an axial sleeve section; and means for yieldingly constricting said sleeve section including; a plurality of separate, pressure elements circumferentially arranged around the sleeve section and independent spring devices associated with each of said elements nor-



mally urging the same radially inward, said pressure elements together constituting an approximately continuous ring around the sleeve section, said ring and sleeve section having a substantially continuous band of contact of appreciable area.

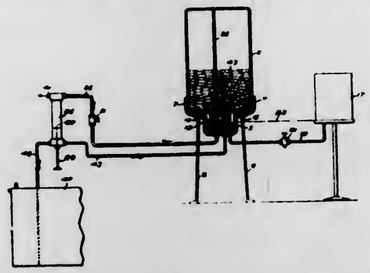
2,000,250
FROTH FLOTATION PROCESS FOR OXIDE ORES
John Mark Paick, Milwaukee, Wis.
No Drawing. Application July 16, 1934, Serial No. 735,424
6 Claims. (Cl. 209—166)

1. The process of separating the mineral constituents of an ore containing a heavy mineral metal oxide which consists in mixing the ore in a finely divided state with water so as to form a pulp, agitating the pulp in the presence of an active acid, a water-insoluble liquid ketone and a saponifiable substance, supplying the pulp with air to produce a froth containing a concentrate, and removing the froth.

2,000,251
VEHICLE LOADING DEVICE
Sydney Paul, Lima, Ohio, assignor to Superior Body Company, Lima, Ohio, a corporation of Ohio
Application December 5, 1934, Serial No. 756,134
8 Claims. (Cl. 193—42)

1. In a vehicle loading device, two spaced supporting rods mounted for predetermined reciprocating movements relative to said vehicle, and a cross frame carried by said supporting rods and having a pivotal connection with one of said rods and a pivotal and sliding connection with the other.

2,000,252
GATE VALVE CONSTRUCTION
William T. Pease, Huntington Park, Calif., assignor to Snow Manufacturing Co., Los Angeles, Calif., a corporation of California
Application December 26, 1933, Serial No. 703,893
4 Claims. (Cl. 251—155)

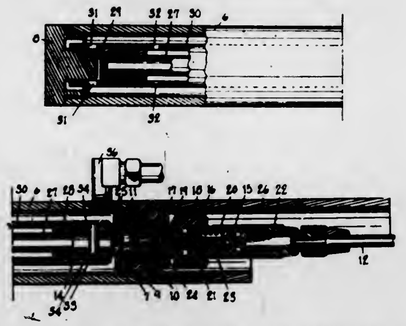


1. A gate valve comprising a pipe member of a lower melting point than zinc metal having a seat on one end thereof and a gate supporting member of galvanized iron secured to said pipe member back of said one end of said pipe member, said gate supporting member being adapted to retain a gate in sliding engagement against the seat on the end of said tubular member, said pipe member being joined to said supporting member during the casting operation.

2,000,253
PROCESS OF TREATING PHOTOGRAPHIC LAYERS IN A BATH CONTAINING A WETTING AGENT AND NEW PREPARATIONS INTENDED FOR ACTING ON PHOTOGRAPHIC LAYERS
Albert Schaeffer, Marxheim in Taunus, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y., a corporation of New York
No Drawing. Application January 5, 1931, Serial No. 506,838. In Germany January 12, 1930
8 Claims. (Cl. 95—88)

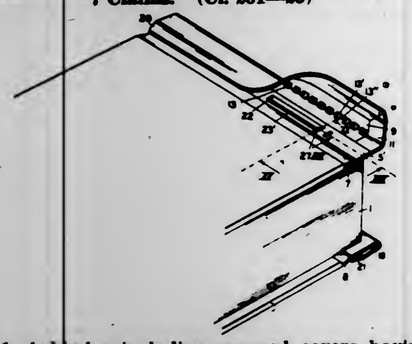
2. Photographic developers for silver-halide emulsions containing a sulfonic acid of an alkylated aromatic hydrocarbon.

2,000,254
METHOD OF AND MEANS FOR CHARGING BAROMETRIC FEED DEVICES
Ralston M. Sherman, Glastonbury, Conn., assignor to The Silent Glow Oil Burner Corporation, Hartford, Conn., a corporation of Connecticut
Application April 20, 1932, Serial No. 606,509
12 Claims. (Cl. 158—40)



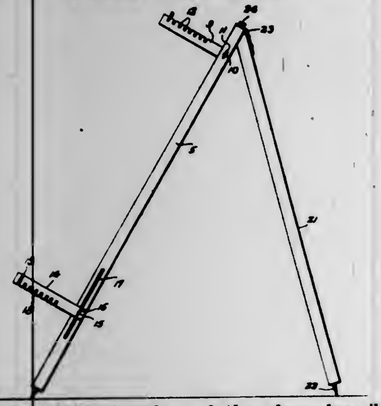
1. The combination with a constant level barometric liquid feed device, which body of liquid is sustained by the maintenance of a sub-atmospheric pressure space, of replenishing means comprising a main liquid supply tank, a liquid pump, an intake connection between the pump and said supply tank, a discharge connection from the liquid pump to said barometric feed device, an air pump having an intake connection opening into said sub-atmospheric pressure space, a discharge connection opening into the atmosphere, and means for operating said liquid and said air pumps simultaneously to supply liquid to the device, and simultaneously withdraw air therefrom in such relative volume and for such relative time as to insure against rise of the constant level maintained thereby.

2,000,255
DEEP-SEA ELECTRIC TELEPHONE CABLE
Eugen Sichtermann, Bodenkirchen, near Cologne, Germany
Application April 15, 1933, Serial No. 666,861
3 Claims. (Cl. 173—265)



1. A deep-sea electric telephone cable consisting of a plurality of conductors wrapped in paper and of three strands consisting of an insulating material offering great resistance to a reduction in volume by pressure on all sides, two of said strands being T-shaped and the third strand being double-T-shaped, such strands being shaped and arranged one to another to leave four channels between them holding the conductors and leaving moreover sufficient free airspace.

2,000,256
HUMIDIFIER
Ferris N. Smith, Grand Rapids, Mich.
Application April 2, 1934, Serial No. 718,690
28 Claims. (Cl. 122—451.1)



16. In a structure of the class described, the combination of a boiler, an inlet valve, a thermostatic element adjustably associated with said inlet valve, and a second thermostatic element mounted at the inner end thereof with respect to said inlet valve, said thermostatic elements having a connection at their outer ends, the second thermostatic element having a relatively low coefficient of expansion and being subject to the incoming water whereby it contracts in advance of the contraction of the coacting thermostatic element.

2,000,357
PERMANENT BINDER FOR LOOSE LEAVES
William H. Smith, San Francisco, Calif.
Application October 7, 1933, Serial No. 692,563
7 Claims. (Cl. 281—25)

1. A binder including opposed covers having binding heads with substantially rigid ends foldable back upon themselves; binding means extending through said heads beneath said ends.

2,000,358
CURTAIN STRETCHER
August Stalzer, Toledo, Ohio
Application July 16, 1934, Serial No. 735,471
2 Claims. (Cl. 45—24)

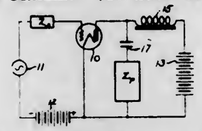
1. A curtain stretcher of the class described comprising a pair of parallel legs, a cross bar connecting the upper ends of the legs together, a prop connected with the cross bar, an arm having one end fastened to the upper part of each leg and extending outwardly at right angles therefrom, said arms having notches in their upper edges, a lower arm for each leg, the lower part of each leg having longitudinally extending slots therein and a bolt and nut for connecting one end of each lower arm to a leg with the bolt passing through the slot, each lower arm having a longitudinally extending row of notches in its lower edge, flat bars adapted to be passed through the hems in the ends of the curtains, the upper bars being adapted to be placed in the notches of the upper arms and the lower bars in the notches of the lower arms, one bar having a notch adjacent each end thereof passing through the upper edge of the bar, the notches in said bar being adapted to interfit with the outermost notches in the lower arms.

2,000,359
MERCHANDISING DISPLAY FIXTURE FOR SUCKERS AND OTHER MERCHANDISE
Emerson W. Stein, Sea Breeze, N. Y., assignor of one-half to Elmer E. Sharp, Fishers, N. Y.
Application October 23, 1933, Serial No. 694,790
2 Claims. (Cl. 211—60)

1. A merchandising display fixture for suckers consisting of a structure having two concentric mesh wire cylinders erected vertically upon a suitable horizontal block base.

2,000,360
AUTOMOBILE
William B. Stout, Detroit, Mich.
Application April 27, 1932, Serial No. 607,811
3 Claims. (Cl. 180—54)

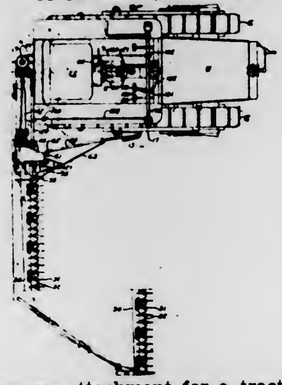
1. In a motor vehicle, in combination, a body having an engine compartment in the rear end thereof, an engine in said compartment, a seat in said body having a back spaced forwardly of the forward wall of said compartment, said wall having an opening therein, means for introducing air into the space between said back and said wall, said compartment being provided with means for the egress of air therefrom introduced thereto from said space through said opening, a radiator positioned in the path of flow of air between said space and said compartment, and connections between said radiator and said engine.



2,000,361
PROCESS OF PREPARING DIHYDROXY-BENZENEARSONIC ACIDS
Karl Streitwolf, Frankfort-on-the-Main, and Alfred Fehrle, Bad Soden-on-the-Taunus, and Hans Hilmer, Frankfort-on-the-Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y., a corporation of New York
No Drawing. Application May 8, 1931, Serial No. 536,078. In Germany May 26, 1930
7 Claims. (Cl. 260—14)

1. The process which comprises treating a compound of the following general formula

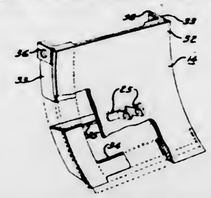
$$(OH)_2Ar—As=As—Ar(OH)_2$$



wherein Ar stands for a benzene nucleus which may be further substituted by a nitro group with a mild oxidizing agent in an amount sufficient to oxidize the arsenic atoms to arsonic acid groups.

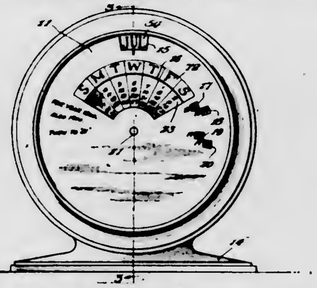
2,000,362
FREQUENCY MULTIPLIER
Frederick E. Terman, Stanford University, Calif.
Application May 31, 1930, Serial No. 458,008
8 Claims. (Cl. 250—36)

1. A frequency multiplier comprising the combination of an amplifying device the input impedance whereof varies with voltage and which supplies an output current substantially proportional to input potential, a source of alternating current at a potential sufficient to cause changes in said input impedance, and an input circuit for said amplifying device comprising a network the impedance whereof varies with frequency connected in series with said source.



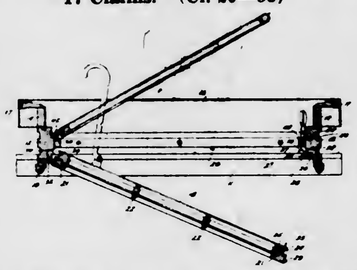
2,000,363
MOWER
Lowell H. Thoen, Stockton, Calif., assignor to Caterpillar Tractor Co., San Leandro, Calif., a corporation of California
Application January 7, 1933, Serial No. 650,692
38 Claims. (Cl. 56—25)

1. A mower attachment for a tractor having an endless track, rollers running on said track, and a frame resting on said rollers, comprising cutting means, a connection from said cutting means to the rear end of said tractor, said connection permitting said cutting means to have a swinging movement about a vertical axis and over the ground, and a releasably secured draft connection from said cutting means to said track roller frame operable to prevent said swinging movement unless a predetermined tension is exceeded in said draft connection.



2,000,364
LAND VEHICLE CONSTRUCTION
Lowell H. Thoen, Stockton, Calif., assignor to Caterpillar Tractor Co., San Leandro, Calif., a corporation of California
Application August 25, 1933, Serial No. 686,806
2 Claims. (Cl. 280—160)

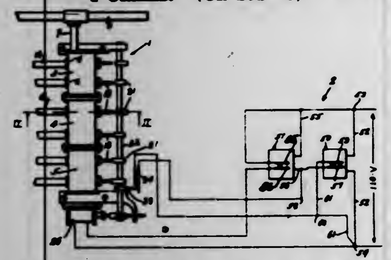
1. A check breaker adapted for positioning in front of a ground contacting member of a land vehicle comprising a plate, a reinforcing angle secured to the back of said plate adjacent each of the vertical edges of said plate, another reinforcing angle secured to the back of said plate



adjacent the cutting edge thereof, said first-mentioned angles having pivot providing means for pivotally attaching said check breaker to said vehicle.

2,000,365
DUAL CENTURY CALENDAR
Elbert L. Turnbaugh, Reno, Nev., assignor to Eternal Calendar Corporation, San Francisco, Calif., a corporation of California
Application April 4, 1933, Serial No. 664,396
10 Claims. (Cl. 40—115)

1. In a mechanical calendar, concentric dials bearing respectively the months, the years and the week days for a plurality of years, gear mechanism for actuating the dials, certain of the gears being adapted to have one tooth play, and means embodied in certain others of the gears for retarding one of the loose play gears to compensate for the extra day in each leap year.



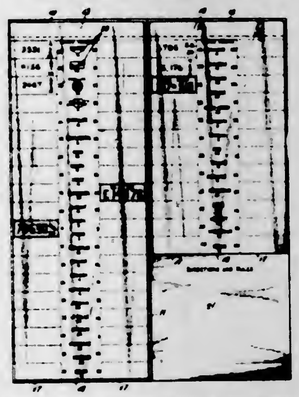
2,000,366
WINDOW CONSTRUCTION
Joseph N. Victor, Allentown, Pa.
Application December 15, 1933, Serial No. 702,624
17 Claims. (Cl. 20—53)

1. A casement window comprising a frame and sash, the sash being mounted for bodily movement laterally of the sash, said frame comprising top, bottom, and side members and there being a continuous shoulder formed thereon fac-

ing laterally, and a stop member for the sash secured to said frame, said stop member extending continuously around the frame, having the same cross-section at all points, and having a shoulder abutting the aforementioned shoulder on the frame.

2,000,367
AUTOMATIC VALVE CONTROL SYSTEM
Colonel J. Williamson and Herbert F. Suverkrup, San Bernardino, Calif.
Application July 2, 1933, Serial No. 678,856
4 Claims. (Cl. 161—7)

1. In a fluid flow control system, a plurality of valves for supplying fluid to different lines, a shaft mounted for rotation and having means associated therewith for opening different valves in different positions of rotation of the shaft, said shaft having at least one predetermined position in which all of said valves are closed, a first pair of normally open contacts, means associated with said shaft for closing said contacts when said shaft is in all positions except said predetermined position in which all of said valves are closed, electrically actuated means for rotating said shaft from one of said positions to the next succeeding position in response to application of an electrical impulse thereto, an operating circuit for said electrically actuated means, an electrically operated timing device having a pair of normally open contacts in the operating circuit of said electrically actuated means, said device when it is running periodically momentarily closing its contacts to deliver, on each closure, a single operating impulse to said electrically actuated means at predetermined relatively short time intervals, auxiliary switch means, and circuit means for energizing said timing device including said first pair of contacts and said auxiliary switch means in parallel, whereby said timing device may be started by closure of said auxiliary switch means and thereafter maintained in operation by current received over said first pair of contacts until said shaft reaches said predetermined position and opens said first pair of contacts.



2,000,368
TARGET
William F. Winning and Carl Keyser, Braddock, Pa.
Application July 19, 1934, Serial No. 736,114
4 Claims. (Cl. 124—15.5)

1. A target having an aperture, and an indicator, said indicator having a bull's-eye portion and a caricature portion, the bull's-eye portion normally being disposed in alignment with the aperture, a shaft pivotally mounted to the target, said shaft having a crank portion swingably connected with the indicator means, detent means for releasably holding the indicator in operative position, and spring means associated with the shaft for rocking the crank portion to project the caricature portion of the indicator beyond the outer edge of the target, said shaft having

means for limiting movement of the indicator in either direction.

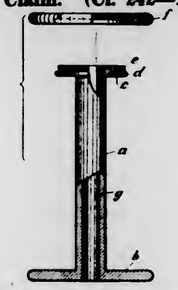
2,000,369
GAME
Carl H. Zeiss, Winnetka, Ill.
Application January 8, 1934, Serial No. 705,768
12 Claims. (Cl. 273—1)

1. A game board comprising a sheet of relatively stiff material divided into columns bearing the names of certain localities with blank spaces for scoring purposes, and a superimposed sticker sheet of relatively thinner paper divided into a body portion and a plurality of coupons corresponding in size to the location area in the base board, each of the coupons being detachable from the body portion of the sheet and provided with adhesive whereby it may be secured to a location area on the base board without otherwise disturbing the sticker sheet, the body portion of said sticker sheet bearing in a second column indicia of various makes of cars, score values adjacent the location area, and score values adjacent the car name, the sum of the location value and car name value indicating the total to be placed in the score space on the base board.

2,000,370
MILK PASTEURIZER
Leo A. Babcock, Cattaraugus, N. Y., assignor to Oakes & Burger Co., a corporation of New York
Application March 2, 1933, Serial No. 659,429
1 Claim. (Cl. 259—107)

A milk pasteurizer tank provided with a vertical rotatable shaft to which is fixed, about midway of the length thereof, an agitating propeller consisting solely of a single set of twisted blades arranged at an angle of about 45 degrees to said vertical shaft, one of said blades extending down to a point near the bottom of said tank and the

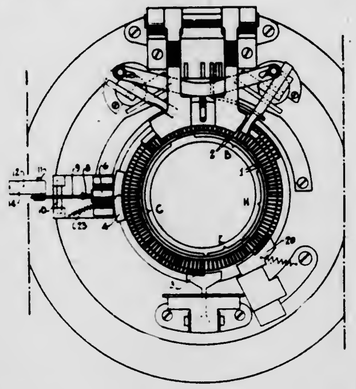
other of said blades extending upward to a point near the top of said tank; whereby the agitation



of the milk being pasteurized will be in proportion to the depth of the milk in the tank.

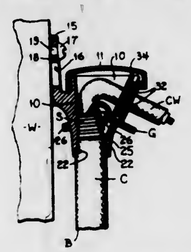
2,000,371
CEMENT PLASTER
Fred Bauer, Redlands, Calif.
No Drawing. Application May 20, 1933, Serial No. 672,043
2 Claims. (Cl. 106—24)

2. A plaster which comprises white limestone rock sand, hydrated lime, a cement selected from the group consisting of Keene's cement and Portland cement, and a small quantity of dried cactus plant in powdered form.



2,000,372
SPINNING BOBBIN
Ernst Beck, Bitterfeld, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
Application October 21, 1931, Serial No. 570,211
In Germany December 1, 1930
1 Claim. (Cl. 242—118)

A flanged bobbin, at least one flange of said bobbin comprising at least two rings having polished outer peripheries and fitted within one another, the outer rings being detachable from the inner ring, for the purpose described.

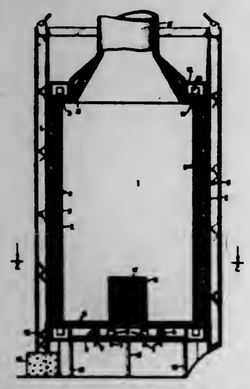


2,000,373
KNITTING MACHINE AND PROCESS FOR KNITTING BÉRET CAPS AND THE LIKE
Louis Borsook, Toronto, Ontario, Canada
Application December 1, 1933, Serial No. 700,518
7 Claims. (Cl. 66—48)

1. In combination with a circular reciprocatory knitting machine adapted to knit integrally a plurality of shaped segments to form a béret cap, a needle cylinder having a series of independent needles arranged in adjacent groups of varying butt lengths; a widening picker with a needle engaging wing on each side of its operative end designed to co-act with a plurality of needles composing certain groups and bring same into knitting relation at opposing ends of the series

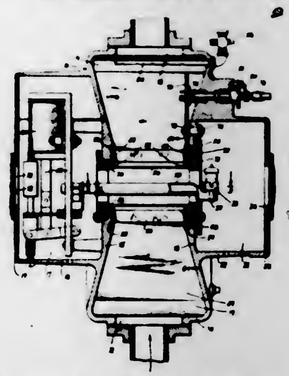
of needles in active position at each oscillation until such needles are exhausted; cam means for lowering into action all needles of a certain other group as a unit at a predetermined point intermediate in said segment to knit an integral hat-band or fold over; cam means for raising all but ever-active needles out of action at the completion of each segment.

2,000,374
ENTRANCE FITTING
Stephen N. Buchanan, Elizabeth, N. J., assignor to The Thomas & Betts Co., Elizabeth, N. J., a corporation of New Jersey
Application September 13, 1933, Serial No. 689,181
12 Claims. (Cl. 247—6)



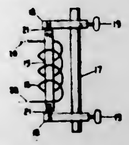
1. An entrance fitting comprising, a housing having an open top, means for securing the housing to a supporting structure with the open top facing upwardly, a cable receiving passage leading into the bottom of the housing and directed towards the open top thereby rendering it easy to pull a wire or cable through the cable receiving passage, the housing having an opening in one side thereof, a removable member covering the opening, a wire passage leading out through the removable member, a cable clamp, operating means therefor within the housing and being operable through the side opening, and a cap fitted over the open top.

2,000,375
TURPENTINE-FACE SCRIBE
Thomas N. Busch, Lake City, Fla., dedicated to the free use of the Public
Application February 9, 1935, Serial No. 5,800
1 Claim. (Cl. 33—41)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



In a turpentine-face scribe, of the character described, comprising a frame, having obliquely disposed end portions; a flattened portion on each end portion and a series of equally disposed indentures formed on the edges of said flattened portions; sockets carried by said frame; means on said sockets for engaging and disengaging the indentures on said frame; guides mounted on said sockets; cutting blades secured to said guides, and handles secured to said sockets.

2,000,376
HEATING APPARATUS
Eugene L. Cargill and John A. Bastien, Dallas, Tex., assignors to The Texas Company, New York, N. Y., a corporation of Delaware
Application May 10, 1933, Serial No. 670,230
4 Claims. (Cl. 122—338)

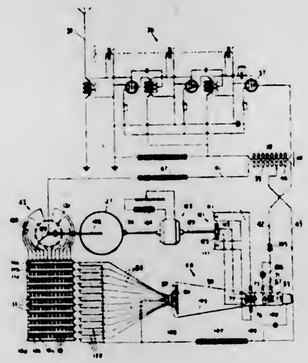


1. In a furnace, a vertical combustion chamber, a plurality of burners positioned at the bottom of said combustion chamber for producing hot products of combustion and directing them upwardly through the combustion chamber, a plurality of vertical heat absorbing tubes extending from top to bottom of said combustion chamber and adapted to be heated throughout their length preponderantly by radiant heat from said combustion products, means in the lower portion of said combustion chamber surrounded by the lower portion of said vertical tubes directly exposed to the hot products of combustion from each burner to absorb heat therefrom and radiate absorbed heat to said lower portion of the vertical tubes to increase the total heat input thereto, said means being free from direct association with fluid containing sources which would normally absorb heat therefrom and decrease the temperature thereof and extending within the combustion chamber for less than about half of the height thereof to thereby permit the combustion gases from each burner after being exposed thereto to be substantially completely combined thereabove to pass through the remainder of the combustion chamber in an unobstructed path to thereby heat the remaining portion of the vertical tubes preponderantly by radiant heat.

2,000,377
ACTIVE RAY TREATING DEVICE
Harry M. Creighton, East Norwalk, Conn., assignor, by mesne assignments, to The R. U. V. Engineering Corporation, South Norwalk, Conn., a corporation of Delaware
Application February 1, 1929, Serial No. 336,807
Renewed October 9, 1934
13 Claims. (Cl. 99—2)

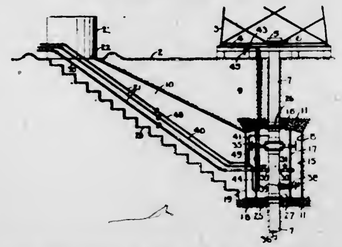
1. In a device of the character described, in combination, a transparent enclosure for a source of active rays, baffles to direct substance proximate the enclosure, movable baffles in register therewith and means to clean the surface of said enclosure carried with said movable baffles.

2,000,378
ADJUSTING EFFECTIVE INCREMENTAL PERMEABILITY OF MAGNETIC CIRCUITS
Noel Deisch, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y.
Application July 15, 1929, Serial No. 378,515
4 Claims. (Cl. 171—242)



1. In electromagnetic apparatus to function with composite current including constant and alternating components; a ferromagnetic core, an exciting winding, and means including a permanent magnet to superpose a permanent magnetomotive bias on said core of opposite polarity to the magnetomotive force generated by the constant component of said composite current, whereby the undesired flux caused by said constant component is at least partially canceled.

2,000,379
METHOD OF AND APPARATUS FOR THE FORMATION OF IMAGES
Noel Deisch, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y.
Application July 22, 1930, Serial No. 469,855
19 Claims. (Cl. 178—6)



6. In apparatus for converting an electric analogue of an image into a real image, an electro-optic cell comprising a composite electrode including a plurality of spaced elements, a second and reflecting electrode adapted to co-act with said first electrode and to reflect light back through the interspaces of said first electrode, a birefringent member between said electrodes for rotating the plane of polarized light, and means to pass a beam of polarized light through the interspaces of said first electrode at an angle to the plane of said first electrode, said angle being substantially equal to the complement of half the included angle defined by said interspaces of said first electrode as measured from a point located on said reflecting electrode midway between said interspaces, whereby light entering through each interspace is reflected back through an adjacent interspace.

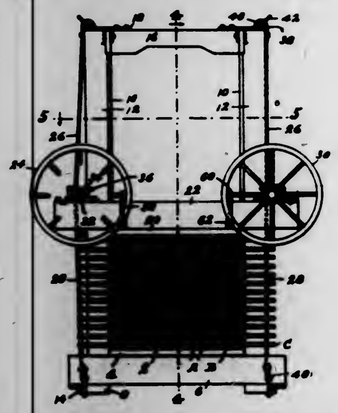
2,000,380
APPARATUS FOR THE FORMATION OF IMAGES
Noel Deisch, Washington, D. C., assignor of one-half to Thos. E. Stone, Jr., New York, N. Y.
Application September 24, 1930, Serial No. 484,149
Renewed October 1, 1934
10 Claims. (Cl. 178—6)

8. An apparatus for converting the electric current analogue of an image into a real image, including a translating device involving a light valve having a plurality of electrodes at right angles to one another, a birefringent member between said electrodes, means including a cathode ray commutator to repeatedly charge said Kerr cell to degrees corresponding to succeeding portions of said analogue, and means including an impedance to drain away each of said charges before the succeeding charge is brought to act.

2,000,381
MEANS FOR EXTINGUISHING OIL WELL FIRES
Peter J. Duffy, Houston, Tex.
Application July 28, 1931, Serial No. 553,559
16 Claims. (Cl. 169—4)

1. In combination with a well, a cage disposed below the earth's surface and about the casing of the well, a pipe line leading to said cage and connected to the casing to inject fire extinguishing material into the casing below the point of ignition of the oil, and an additional connection on said pipe line leading from said cage to the surface constructed and arranged to direct fire extinguishing material from said line directly into the casing head.

10. In combination with a well casing, a subterranean cage, means in said cage to control the flow of fluid through the casing, means to withdraw fluid from the casing, means to pierce a pipe within said casing and to then feed fire-extinguishing material into the casing through said piercing means.



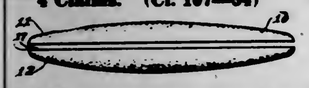
12. In a well casing protective device to extinguish fires, a blowout preventer on the casing to close about a pipe therein, a flow line leading from the casing below said closure, and a pipe line connected to the casing above said closure to inject fire extinguishing material into the casing above the closure.

16. An apparatus for use in extinguishing well fires including a cage disposed about the well casing and insulated from the well head, and means in said cage to feed fire extinguishing material into the well casing, said means including a connection to the casing in the cage, and means adjustable from within the cage, adapted to be positioned to discharge into the top of the casing.

2,000,382
TOBACCO PRESS
Job McGee Evans and Orville R. Yerington, North Kansas City, Mo.
Application December 18, 1933, Serial No. 702,974
3 Claims. (Cl. 100—12)

1. A baling press of the character described comprising a platform at the lower end of the baling chamber of the press, two pairs of standards adjacent to the ends of said platform and forming the corners of the baling chamber, a wall secured to each pair of standards for closing the ends of the baling chamber, a horizontal beam connecting the upper portions of the closed ends of the baling chamber, a plunger recipro-

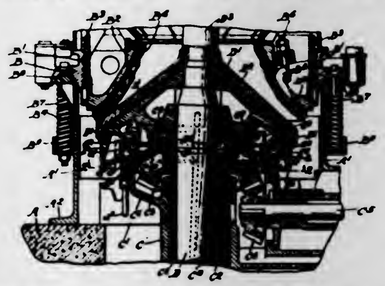
cably mounted in the baling chamber and including a pair of horizontal beams slidably en-



gaging the standards, and manually actuated means for operating said plunger.

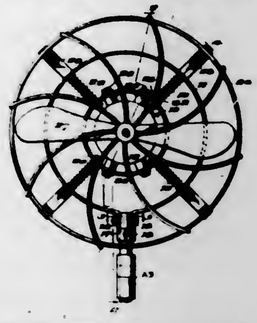
2,000,283
COMPOSITE ARTICLE AND PROCESS OF MAKING THE SAME
Harvey R. Fife, Pittsburgh, Pa., assignor to Carbide and Carbon Chemicals Corporation, a corporation of New York
No Drawing. Application March 25, 1931, Serial No. 525,244
2 Claims. (Cl. 154—2)

1. A process for making composite articles from a plurality of laminae of wood having a greater moisture content than seasoned wood, which comprises applying a vinyl resin to adjacent faces of said laminae, assembling the laminae, subjecting the assembly to sufficient heat and pressure to cause the vinyl resin to flow and cooling the assembly under pressure.



2,000,284
METHOD OF BAKING BREAD
Charles C. Francis, Pittsburgh, Pa.
Application August 13, 1934, Serial No. 739,676
4 Claims. (Cl. 107—54)

4. A method of preparing a bread loaf which consists of cutting a mass of dough into two portions, pressing the freshly cut surfaces together, twisting the two portions and baking the twisted mass.

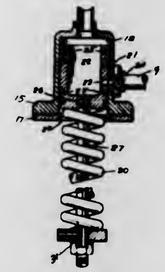


2,000,285
BEARING PROTECTION DEVICE
Oscar C. Gruender, Milwaukee, Wis., assignor to Nordberg Manufacturing Co., Milwaukee, Wis., a corporation of Wisconsin
Application May 27, 1932, Serial No. 613,872
2 Claims. (Cl. 83—10)

1. In a gyratory crusher including a supporting frame having a bearing surface, a head supported on said bearing for gyratory movement, means for gyrating the head, and a bowl opposed to said head; means for preventing the penetration of foreign material into said bearing including a depending apron carried by the head surrounding the bearing and terminating below the plane thereof in all positions of the head, an upwardly extending apron carried by the frame surrounding the bearing and terminating above the lower end of the head-carried apron in all positions of the head, said aprons being spaced from each other in all positions of the head, a circumferential air chamber carried by the frame sur-

rounding the frame-carried apron and having an upwardly directed annular air discharge orifice providing an upwardly directed circumferential curtain of air, and a downwardly and inwardly inclined annular apron carried by the head overlying said air discharge orifice in all positions of the head for directing the circumferential curtain of air under pressure in a direction upwardly and outwardly away from said bearing.

2,000,286
ELECTRIC FAN
Charles F. Haynes, Weatherford, Tex., assignor of one-half to E. M. Schenecker, Fort Worth, Tex.
Application July 28, 1934, Serial No. 737,450
10 Claims. (Cl. 230—273)



1. In a motor driven fan, a motor casing, and supporting means for said casing comprising concentrically arranged inner and outer ring members encircling said casing, said inner ring being spaced from said casing and resilient connections between said inner ring and both the outer ring and motor casing.

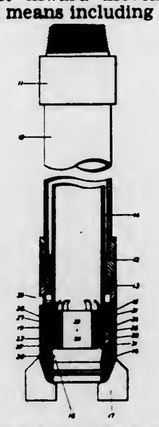
2,000,287
PRESSURE CONTROLLED THROTTLE VALVE
William A. Henry, Littleton, Colo.
Application June 25, 1934, Serial No. 732,269
7 Claims. (Cl. 236—26)

1. A pressure controlled throttle valve, comprising, in combination, a body member having

a cylindrical opening, one end of the opening being closed, a piston mounted for reciprocation in the opening and resilient means comprising a spring for urging the piston towards the closed end of the cylindrical opening, the space between the piston and the closed end of the cylindrical opening forming a pressure chamber, the piston

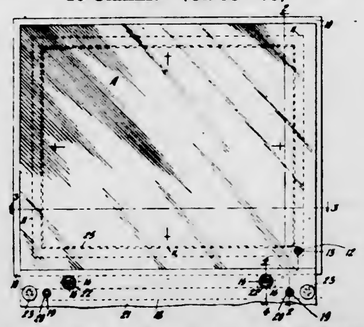
having an opening extending thereinto from the pressure chamber, and an opening extending through the wall of the piston and forming a port, the wall of the body member having a discharge port so located that it will be brought into register with the port in the piston at one position of its travel.

2,000,388
MANUFACTURE OF RIBBONS
Richard Hofstadt, Wolfen, near Bitterfeld, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
Application February 27, 1932, Serial No. 595,639
In Germany March 4, 1931
7 Claims. (Cl. 18—15)



1. A nozzle for the manufacture of ribbons provided with patterns which has an opening forming a main slot of 13 mm. length and 0.1 mm. breath from which 6 lateral slots of 2 mm. length and 0.1 mm. breadth branch off at an angle of 60°, 3 of the lateral slots being arranged on each side at equal distances in such manner that the slots positioned at the end of the main slot are inclined towards each other.

7. A ribbon consisting of cellulose hydrate provided with patterns having a stripe-like appearance, said patterns constituting a superimposed portion of the material of the ribbon integral therewith.



2,000,389
CORE CATCHER
John H. Howard, Huntington Park, Calif., assignor to Globe Oil Tools Company, Los Nietos, Calif., a corporation of California
Application May 19, 1933, Serial No. 671,889
3 Claims. (Cl. 255—72)

1. A core catcher for use in a core drill including, a body adapted to be arranged in the drill, a plurality of core engaging members carried by the body operable inwardly into engagement with the core, and means for holding the members against inward movement releasable by the core, said means including an element en-

gaging said members and releasably rigidly connected with the body.

2,000,390
PHOTOGRAPHIC VACUUM SQUEEGEE AND NEGATIVE HOLDER
William C. Huebner, New York, N. Y.
Application December 23, 1933, Serial No. 703,741
10 Claims. (Cl. 95—76)

1. A vacuum device of the character described comprising: a relatively heavy and semi-flexible film of sufficient rigidity, per se, to maintain a planar condition; an air sealing gasket permanently affixed to one face thereof and extending therearound, the gasket and film thereby constituting a unitary member; and means for placing the space within the sealing gasket on the same side of the film in connection with a source of suction.

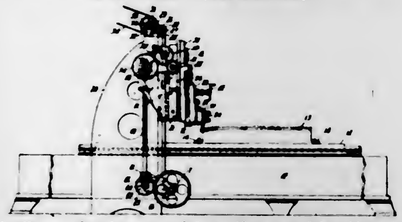
2,000,391
MANUFACTURE OF BARREL STAVES
Edward W. Hutchings, Perry, Fla.
Original application September 25, 1933, Serial No. 690,886. Divided and this application January 22, 1934, Serial No. 707,828
3 Claims. (Cl. 144—309)

1. The method of producing a barrel stave which consists of forming a laminated block of strips having their side faces secured in flat contacting engagement with each other, shaping the block from the edge faces of the strips to form a stave having a convexed outer face curved longitudinally for the full length of the block and

a concaved inner face curved longitudinally with its ends terminating in spaced relation to the ends of the block to provide end portions of the stave with flat inner faces, shaping the side faces of the block to form straight longitudinally extend-

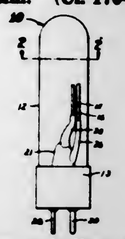
ing ribs and grooves having their ends intersecting the ends of the convexed outer face and their intermediate portions intercepted by the concaved inner face, and cutting the flat inner face of the end portions of the block to form transversely extending croses.

2,000,392
ROOFING AND LIKE TILES
John Henry Hutchinson, Portslade-by-Sea, England, assignor to Pipes, Limited, London, England, a corporation of Great Britain
Application January 29, 1934, Serial No. 708,862
In Great Britain September 27, 1932
2 Claims. (Cl. 106—10)



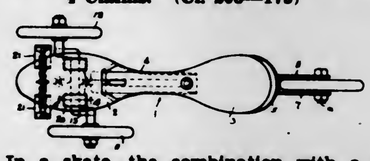
1. Roofing tile of the double-lap type constructed with a hanging projection on its under surface, distinguished by the formation in the upper surface of the tile of a drainage depression comprising a transverse groove at the top of the tile and a plurality of relatively wide parallel longitudinal grooves of gradually diminishing depth extending from said transverse groove down the tile between plain side marginal portions and situated so as to leave a central surface part between such grooves, the length of these longitudinal grooves being such that they terminate short of the point where the covering tile would end and the said grooves being of such width that a substantially wide ungrooved portion is provided by said central surface part in the center of the tile, with large drainage areas on each side thereof, and an upward drift guard comprising an obstructing wall immediately above said transverse groove.

2,000,393
METHOD OF DYEING NITROCELLULOSE LACQUERS
Wolfgang Jacek, Basel, Switzerland, assignor to the firm of Society of Chemical Industry in Basle, Basel, Switzerland
No Drawing. Application May 12, 1932, Serial No. 610,921. In Switzerland May 28, 1931
3 Claims. (Cl. 134—79)



1. The method of dyeing a nitrocellulose lacquer which consists in admixing a dyestuff suitable for dyeing such lacquer with a color adjusting agent consisting of an aryl-sulfamide, and then dissolving the resultant admixture by means of heat in the nitrocellulose lacquer.

2,000,394
PLANING MACHINE
Frank H. Jennings, Akron, Ohio, assignor to National Rubber Machinery Company, Akron, Ohio, a corporation of Ohio
Application May 5, 1933, Serial No. 669,468
5 Claims. (Cl. 90—31)



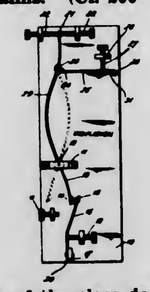
1. In a planing machine, the combination of a reciprocable table for the work, a cutting tool for operating upon the work, a movable support for said tool, a reversible rotatable shaft driven in timed relation to the operation of the table, respective cam means controlled by said shaft for concurrently effecting non-uniform vertical and lateral movements of the tool support during a cutting operation, and means for indexing the tool support laterally between successive cutting operations whereby each cutting operation is begun at a position laterally of the preceding cut.

2,000,395
GLOWLAMP
Harry C. Jones, Los Angeles, Calif., assignor to Ned Herbert Mann, Hollywood, Calif.
Application December 22, 1931, Serial No. 582,524
1 Claim. (Cl. 176—122)

In a glow lamp a hollow closed transparent member, a cathode in said member, said cathode comprising a flat strip of material bent to U-shape to provide two spaced leg portions, and an anode, said anode comprising a straight elongated member cylindrical in cross-section and arranged parallel to and equidistant from the leg portions of the cathode member.

2,000,396
SKATE
John M. Keller, Cleveland, Ohio
Application March 25, 1932, Serial No. 601,206
4 Claims. (Cl. 280—173)

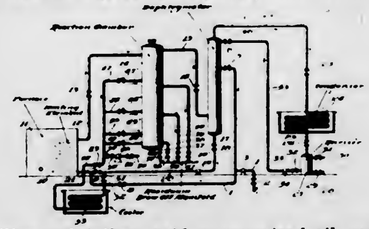
1. In a skate, the combination with a foot platform, of supporting means therefor, including a ground-wheel in substantial alignment with



the longitudinal median line thereof and a spindle therefor to the rear of said platform in fixed relation therewith, a pair of ground-wheels supporting the front or toe portion of said platform, one on either side thereof, and one wheel of said pair being mounted rearwardly of the other, and spindles for said pair of wheels which spindles are positioned above the plane of said platform.

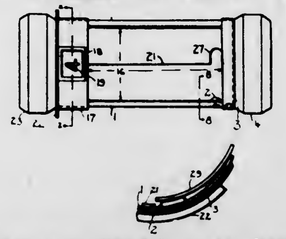
2,000,397
QUILT AND RUG FRAME
Alfred W. Knutson, Geneseo, Ill.
Application May 21, 1934, Serial No. 726,836
1 Claim. (Cl. 45—24)

A device of the character set forth comprising trestles each including a bar having beveled ends and an upper supporting edge, pairs of pole mountings engageable with the supporting edges and the beveled ends of the bars, detachable securing means for securing the mountings to the bars and for permitting said mountings to be adjusted endwise of the bars, fabric supporting poles journaled in said mountings, and locking means for one mounting of each pair of mountings whereby the poles may be secured against rotation and freed to rotate in either direction.



2,000,398
THERMOSTATIC SWITCH
Clarence R. Laubenfels, Burlington, Iowa
Application July 5, 1932, Serial No. 620,849
9 Claims. (Cl. 200—138)

1. In a device of the class described, a base, a thermostatic strip supported thereon, yieldable means for applying longitudinal pressure to said strip to normally retain the strip in either of two oppositely arched conditions and to permit the ends of the strip to separate as it moves from one of its arched conditions to the other due to temperature changes, and adjustable means for imparting a transverse bending strain to a portion of said strip to change the tendency of said strip to assume one of said curved conditions.

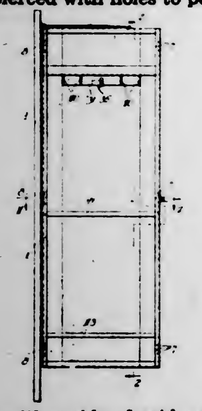


2,000,399
HYDROCARBON OIL CONVERSION
Clarence W. Luton and John Beddow, Toledo Ohio, assignors to Universal Oil Products Company, Chicago, Ill., a corporation of South Dakota
Application August 7, 1930, Serial No. 473,547
2 Claims. (Cl. 196—48)

1. A hydrocarbon oil cracking process which comprises passing the oil in a restricted stream through a heating zone and heating the same therein to cracking temperature under pressure, discharging the heated oil into a vapor separating zone above the liquid level therein and separating the same therein into vapors and unvaporized oil, maintaining the latter zone under cracking conditions of temperature and pressure, introducing into said separating zone adjacent the contact surface between vapors and unvaporized oil therein a relatively cool oil of lower

boiling point than said unvaporized oil, said relatively cool oil being introduced at a temperature and in amount such as will substantially reduce coke and sludge formation in the unvaporized oil, and during the operation of the process varying the point of introduction of said relatively cool oil to the separating zone in accordance with variations in the liquid level of unvaporized oil therein.

2,000,400
PNEUMATIC DISPATCH CARRIER
James G. Maclaren, San Francisco, Calif.
Application November 11, 1931, Serial No. 574,299
10 Claims. (Cl. 243—34)

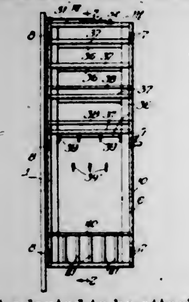


1. A pneumatic dispatch carrier having telescoping shells free to rotate one within the other, a stop member on one shell and engaging with the other to prevent relative endwise movement of the shells and limit the relative rotation of the shells, one of the shells being of changeable diameter to permit disengagement from the stop and separation of the shells.

2,000,401
CABINET
Frank J. Matchette, New York, N. Y., assignor to The Servidor Company, New York, N. Y., a corporation of Delaware
Application August 12, 1932, Serial No. 628,514
3 Claims. (Cl. 312—152)

1. A cabinet adapted to be attached to one side of a bedroom or closet door having stiles and top and bottom rails connecting said stiles, comprising, a pair of angle members adapted to engage the stiles of the door, integral side pieces extending from said angles at an acute angle thereto, a front panel formed integrally with said side pieces and disposed substantially parallel to the stile engaging faces of said angles, bottom plates fixed to said angles, side pieces and panel and having flanges adapted to register with the top and bot-

tom rails of the door respectively, the stile engaging legs of said angles being pierced with a plurality of holes to permit mounting hinges on either side of the cabinet, the other legs of said angles being pierced with holes to permit mount-



ing a latch on either side of said cabinet, an extensible hanger fixed in said cabinet near the top thereof, a bar pivotally connected to one of said angles, and means on the other one of said angles for engaging the free end of said bar to hold the bar across the open face of said cabinet.

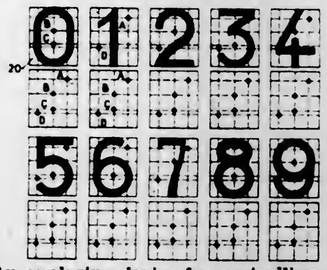
2,000,402
CABINET

Frank J. Matchette, New York, N. Y., assignor to The Servidor Company, New York, N. Y., a corporation of Delaware

Application August 12, 1932, Serial No. 628,515

3 Claims. (Cl. 312—152)

1. A cabinet adapted to be attached to one side of a bathroom door, comprising a pair of angle members adapted to engage the stiles of the door, integral side pieces extending from said angles at an acute angle to the door, a front panel formed integrally with said side pieces and disposed parallel to the door, top and bottom plates fixed to said angles, side pieces, and panel, and having flanges adapted to engage the top and bottom rails of the door, respectively, a plurality of Z-shaped shelves fixed in said cabinet near the top thereof, each shelf having one leg extending downwardly against said panel and having another leg extending upwardly from the shelf and against said angles, a plurality of hooks fixed to the downwardly extending leg of the lower one of said shelves, a horizontal bar fixed to said angles near said bottom plate, and a plurality of vertical bars fixed to said horizontal bar and to the flange of said bottom plate to form a hamper at the bottom of said cabinet.



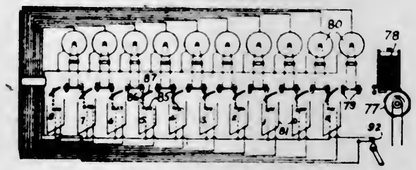
2,000,403
METHOD OF AND MEANS FOR ANALYZING RECORD CARDS

Michael Maul, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York

Application July 1, 1927, Serial No. 202,805

In Germany April 7, 1927

7 Claims. (Cl. 235—92)



1. An analyzing device for controlling statistical mechanism from records bearing character designations, said device comprising a single light sensitive element, means including a source of light for examining a character designating field on the records and cooperating with the records to subject the single light sensitive element to different amounts of light according to designations of different characters on the record field, and selective means controlled by the light sensitive element according to the different amounts of light to which it is subjected.

2,000,404
SORTING MACHINE

Michael Maul, Berlin, Germany, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York

Original application July 1, 1927, Serial No. 202,805. Divided and this application January 16, 1932, Serial No. 587,046

2 Claims. (Cl. 209—111)

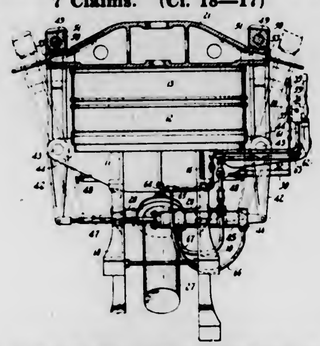
1. In a record sorting machine, a plurality of control devices, said devices including light sensitive elements, the different elements being operable in response to different amounts of light and record sorting means controlled by said devices.

2,000,405
THREAD GUIDE

Michael J. McHale, Scranton, Pa.

Application July 20, 1934, Serial No. 736,247

9 Claims. (Cl. 242—157)



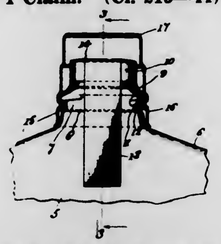
1. In a thread guiding device for winding machines, the combination of a guide support having an opening formed therein, a guide eye attached to the support comprising a body portion having a thread receiving opening, a recess longitudinal of the body forming a seat for one end of the guide support, a second recess extending through the body of the guide and means to lock the guide to the support, comprising a looped member, one end of which is threaded through the opening formed in the support, the other end being seated in said second recess formed in the body portion of the guide.

2,000,406
VULCANIZER

Albert S. Michelson, Akron, Ohio, assignor to National Rubber Machinery Company, Akron, Ohio, a corporation of Ohio

Application August 2, 1933, Serial No. 683,241

7 Claims. (Cl. 18—17)



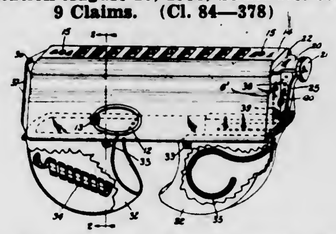
6. In a vulcanizer, the combination of a pair of relatively movable vulcanizer sections, means for relatively moving said sections to open and close the vulcanizer, and means for locking the vulcanizer in closed position, said means comprising a locking arm pivotally mounted on one of the sections, a pivot pin carried by the free end of said arm, a wedge-block of polygonal cross section eccentrically journaled on said pivot pin, said block being adapted to engage an inclined surface on the other vulcanizer section alternatively with its several faces, and means for limiting the angular movement of the wedge-block on its pivot pin during the locking of the vulcanizer.

2,000,407
BOTTLE AND CLOSURE THEREFOR

Samuel C. Miller, Louisville, Ky., assignor to Frankfort Distilleries Incorporated, Louisville, Ky., a corporation of West Virginia

Application June 29, 1933, Serial No. 678,289

1 Claim. (Cl. 215—44)



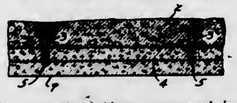
A bottle having a neck, a closure for the neck, spaced locking ribs on said neck, a revenue stamp over the top of said closure and extending down between the locking ribs, an envelope covering the neck and extending below said locking ribs adapted to crimp the revenue stamp against the neck and to provide a bearing surface on the undersides of said ribs, a dose cup provided with lugs corresponding to and adapted to cooperate with said locking ribs through the bearing surface of the envelope, and a shoulder on the bottle at the base of the neck comprising the breast of the bottle and adapted to engage the rim of the cup.

2,000,408
CHROMATIC HARMONICA WITH TONE CONTROLS

Borrah Minevitch, New York, N. Y.

Application August 10, 1933, Serial No. 684,571

9 Claims. (Cl. 84—378)



1. In a harmonica, a body formed with air passages, reeds mounted in operative relation to said passages, casing plates carried by said body at opposite sides thereof and having their rear edges spaced from the body, cups at the rear of said body engaged with rear edge portions of said plates and slidable longitudinally of the body, said cups being open along their inner sides and having open ends facing each other, and means in said cups for imparting tremor to notes as air passes through the cups during playing of the harmonica.

2,000,409
WALL CONSTRUCTION

Andrea Minutoli, San Francisco, Calif.

Application May 16, 1933, Serial No. 671,320

2 Claims. (Cl. 72—17)

1. A wall construction comprising an inner backing layer, a plurality of anchor means embedded in the backing layer and each extending outwardly therefrom to provide an eye, lock rods extending through a series of eyes, a reenforcing fabric between the lock rods and the face of the backing layer, and a monolithic mass embedding the lock rods and fabric and contiguous to the backing layer.

2,000,410
TREATMENT OF HYDROCARBON OILS

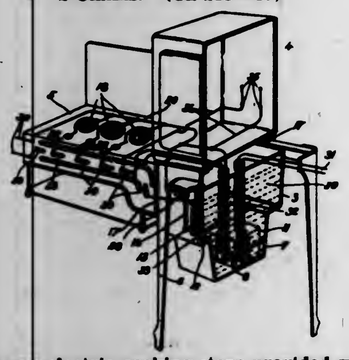
Jacque C. Morrell and Gustav Egloff, Chicago, Ill., assignors to Universal Oil Products Company, Chicago, Ill., a corporation of South Dakota

No Drawing. Application December 28, 1931, Serial No. 583,602

12 Claims. (Cl. 44—9)

1. In a process for the improvement of the antiknock properties of the distillate resulting from the conversion of higher boiling hydrocarbons into lower boiling hydrocarbons, the improve-

ment which comprises introducing into the cracked vapors a phenol and ammonia and reacting the same in the presence of the vapors at a temperature sufficient to cause the formation of an amine of such characteristics that it is recovered in the overhead distillate product of the process.



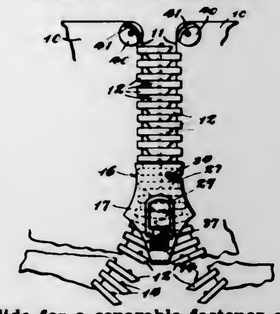
2,000,411
TREATMENT OF HYDROCARBON OILS
Jacque C. Morrell and Gustav Egloff, Chicago, Ill., assignors to Universal Oil Products Company, Chicago, Ill., a corporation of South Dakota
No Drawing. Application December 30, 1931, Serial No. 583,916
4 Claims. (Cl. 44—9)

1. The method of improving the overhead product of a distillatory gasoline-producing system, which comprises introducing a sulphonating agent to a vapor zone of said system to form a sulphonated hydrocarbon derivative, contacting the vapors containing said derivative with sodamide, and condensing the thus treated vapors.

2,000,412
TREATMENT OF HYDROCARBON OILS
Jacque C. Morrell and Gustav Egloff, Chicago, Ill., assignors to Universal Oil Products Company, Chicago, Ill., a corporation of South Dakota
No Drawing. Application December 30, 1931, Serial No. 583,917. Renewed October 16, 1933
6 Claims. (Cl. 44—9)

1. In a process for improving the anti-knock characteristics of the overhead distillate product resulting from the conversion of higher boiling into lower boiling hydrocarbons by the cracking process, the improvement which comprises introducing a halogen in the presence of a catalyst in the vapor zones of the said cracking process and subjecting the mixture containing hydrocarbons and the resulting halogen derivatives of hydrocarbons to treatment with sodamide, and condensing the thus treated vapors.

2,000,413
ELECTRIC COOKING STOVE AND THE LIKE
Walter Harold Myers, Wellsteincraft, New South Wales, Australia
Application February 19, 1931, Serial No. 517,055
In Australia June 2, 1930
2 Claims. (Cl. 219—47)



1. In an electric cooking stove provided with a heating device and having a supply circuit therefor, a transformer in the circuit, a water chamber forming part of the stove, and the transformer being located in the chamber below the normal water level for utilising the heat of the transformer for heating the water a separate heating unit in said circuit and located in said chamber to heat the water to a higher temperature.

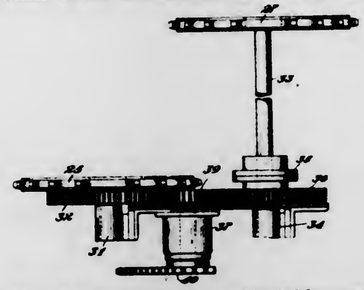
2,000,414
EXPLOSIVE COMPOSITION
Eberhard Neukirch, Bitterfeld, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
No Drawing. Application July 14, 1933, Serial No. 680,505. In Germany August 10, 1932
3 Claims. (Cl. 52—16)

1. An explosive compound comprising mixed crystals consisting of a solid solution of sodium chlorate in sodium nitrate.

2,000,415
SEPARABLE FASTENER
Antonio D. Pannutti, Jr., Falling Waters, W. Va.
Application September 8, 1933, Serial No. 688,653
5 Claims. (Cl. 24—205)

5. A slide for a separable fastener comprising a pair of interleaved body members having parallel abutting side walls, said walls having complementary grooves and ribs for aligning and frictionally holding the body members in interleaved position, and manually operable means for positively locking the interleaved body members.

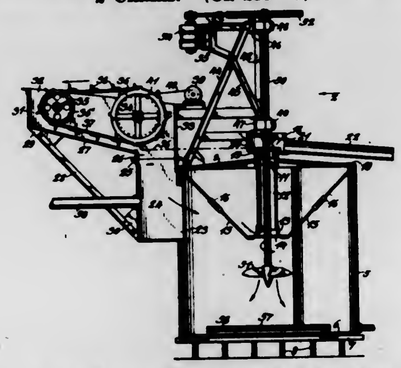
2,000,416
FELTED ASBESTOS PRODUCT
William D. Pardee, Lawrenceville, N. J., assignor to Thermoid Rubber Company, Trenton, N. J., a corporation of New Jersey
Application January 11, 1933, Serial No. 651,679
8 Claims. (Cl. 154—49)



[redacted]

1. As a new article of manufacture, a felted asbestos product consisting of a base fabric and fibres of asbestos coated with a plastic binder and mechanically interlocked with and overlying a face of said fabric.

2,000,417
CONVEYER
Harold R. Perry, Swarthmore, Pa., and Chester S. Jennings, Syracuse, N. Y., assignors to The Lamson Company, Syracuse, N. Y., a corporation of Massachusetts
Application June 7, 1933, Serial No. 674,624
5 Claims. (Cl. 198—138)



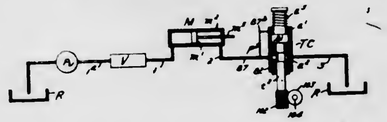
1. A conveyer comprising in combination a pair of parallel traveling chains, a frame, head and foot sprockets over which said chains travel, and means for causing said chains to move in

unison, which means comprise a stub shaft on which the head sprocket of one chain is mounted, a shaft extending transversely across the frame on one end of which the head sprocket of the other chain is mounted, said shaft being of

two sections joined by an adjustable coupling, aligned gears mounted upon said shafts of the same diameter and having the same number of teeth, and an intermediate gear in engagement with both said gears.

2,000,418
ORE CONDITIONING DEVICE
Joseph P. Ruth, Jr., Denver, Colo.
Application February 6, 1933, Serial No. 655,390
2 Claims. (Cl. 259—7)

1. A device for conditioning and agitating deaerated ore pulp in the absence of air comprising, in combination, a closed tank, the top of the tank having a discharge opening, a pipe extending downwardly from the discharge opening to a point above the bottom of the tank, a baffle plate located below the lower end of the pipe and secured to the latter by spacers, the plate having an opening, a shaft extending through the discharge opening, the pipe and the opening in the plate, a propeller agitator secured to the lower end of the shaft, means for rotating the shaft and the agitator, the side of the tank having an inlet opening below the top, and means for introducing deaerated pulp into the tank through the inlet opening.



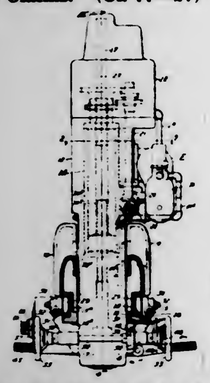
2,000,419
ADVERTISING CONDIMENT SHAKER
Emery N. Sarber, Vancouver, British Columbia, Canada
Application January 18, 1934, Serial No. 707,194
1 Claim. (Cl. 40—19)

In a salt or pepper shaker adapted for displaying advertising copy comprising in combination with such advertising copy, an inner and outer container of transparent material, said inner container having an open top for receiving therein salt or pepper and a concentric flange formed around said open top and extending to and overlying the mouth of the outer container for supporting and securing said inner container within the outer, parallel side walls on said inner container adapted for receiving thereupon said advertising copy, said advertising copy having a

series of perforations therein whereby the contents of said inner container may be observed when said advertising copy is secured around the body of said inner container, a perforated cover fitting said outer container and over the concentric flange of said inner container whereby said cover secures said inner container within the outer one by compression upon said concentric flange when said cover is secured upon said outer container, and means for securing said cover upon said outer container.

2,000,420
HYDRAULIC TRANSMISSION SYSTEM
Lawrence L. Schauer, Augustus M. Sosa, and John H. McKewen, Cincinnati, Ohio, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a corporation of Ohio
Application April 30, 1931, Serial No. 534,032
12 Claims. (Cl. 60—52)

1. In an hydraulic transmission system of the discharge regulated type for propelling an element against a variable resistance, the combination of an hydraulic motor, a source of pressure fluid supply; a conduit system between said motor and said supply, one of the conduits of said system being the motor intake conduit and another conduit of the system being the motor discharge conduit; a valve in said discharge conduit for controlling the flow therethrough and thereby rate of movement of said motor, means for adjusting the setting of said valve comprising a hand controlled means for setting the valve to cause a predetermined flow therethrough under a given pressure condition, thereby a preselected rate of movement of said motor; and means connected with said valve and responsive to changes in the pressure in the said discharge conduit automatically to change the said setting of the valve inversely proportionately to the said changes in pressure to maintain said preselected rate of movement constant despite the variation in pressure caused by the variations in resistance to motor movement.



2,000,421

DUPLEX CONTROL FOR RADIAL DRILLS

Lawrence L. Schaner, Augustus M. Sosa, and John H. McKewen, Cincinnati, Ohio, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio, a corporation of Ohio

Original application April 30, 1931, Serial No. 534,832. Divided and this application August 5, 1932, Serial No. 627,620

18 Claims. (Cl. 77—27)

1. A radial drill combining an arm member, said arm being divided longitudinally and provided with L-shaped flanges along the lower outer edges thereof; a tool carrier disposed between the sides of said divided arm; means mounting said carrier on said flanges comprising bracket members secured to said carrier at the lower portions thereof and adapted to project outwardly and upwardly therefrom into engagement with the under and side faces of said L-shaped flanges; anti-friction rollers journaled in and adjacent the ends of said bracket members for engagement with the upper surfaces of the flanges; and compensating means including eccentrically formed journal bearings for said rollers and means for actuating each of said journals independently to move said rollers toward or away from said flanges.

17. A radial drill combining an arm member divided longitudinally and provided with opposed L-shaped relatively narrow guideways depending from the lower edges thereof said guideways forming front and rear guides each having relatively narrow upper and lower bearing surfaces; a tool head translatably mounted upon said arm and disposed between the sides thereof; means mounting said head upon said depending guideways comprising bracket members projecting outwardly from each side of said head at the lower portion thereof and under said arm and adapted to engage the lower and upper horizontal bearing surfaces of both of said L-shaped guideways for transmitting thereto the entire vertical thrusts of the tool head, one of said depending L-shaped guideways being also provided with opposed vertically disposed bearing surfaces adapted to receive the entire lateral thrusts of the tool head; means for translating said head along said guideways comprising a pinion journaled in said tool head and a cooperating rack bar embedded in one of the bearing surfaces of said last mentioned L-shaped guideway; and means for actuating said pinion, the parts being so constructed and arranged that the tangential force of said pinion acts within the plane of the bearing surface thereby to minimize the tendency to kant said tool head during translation thereof.

2,000,422

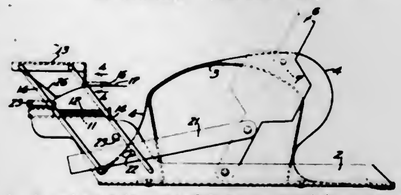
ELECTRIC SWITCH

Frederick W. Side, Philadelphia, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania

Application February 6, 1932, Serial No. 591,298

15 Claims. (Cl. 200—33)

2. A switch comprising a container movable to and from and partially filled with mercury and formed with a chamber into which mercury is caused to accumulate by movement of the container in either direction and from which the accumulated mercury drains when said container remains stationary for a predetermined time interval and contacts connected by mercury accumulating in said chamber.



2,000,423

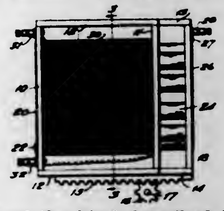
CIGARETTE MAKING APPARATUS

Wendelin D. Starrett, Alameda, Calif., assignor to Charles S. Evans, San Francisco, Calif.

Application February 25, 1933, Serial No. 658,522

14 Claims. (Cl. 131—42)

1. A cigarette machine comprising a web adapted to receive a quantity of tobacco, means engaging said web for rolling the tobacco into a cylindrically-shaped charge, means for holding a supply of cigarette papers, means for removing a paper from the supply and depositing it on the web in the path of movement of the rolling charge of tobacco, and means for retracting the paper depositing means after the paper is caught between the rolling charge and said web.



2,000,424

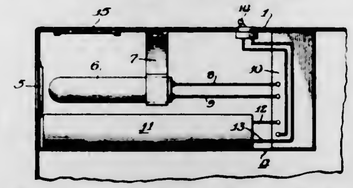
AUDIO AMPLIFYING TRANSFORMER AND STATIC ELIMINATOR

Anton Straka, Chicago, Ill.

Application November 11, 1931, Serial No. 574,399

5 Claims. (Cl. 250—20)

1. A device of the kind described including a plurality of pairs of tubes, one tube of each pair being telescopically mounted within the other tube of said pair but concentrically spaced therefrom, means to move the inner and outer tubes telescopically with reference to each other, means to connect all of the outer tubes in multiple to a circuit terminal, other means to connect all of the inner tubes in multiple to a second circuit terminal, and a secondary winding of fine wire surrounding the outer tubes.



2,000,425

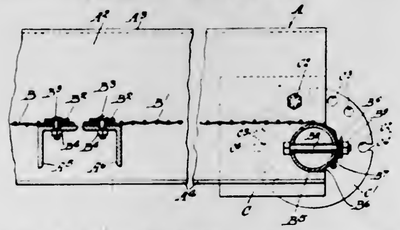
APPARATUS FOR TAKING PHOTOGRAPHS

Joseph B. Strauss, Chicago, Ill.

Application June 18, 1931, Serial No. 545,266

5 Claims. (Cl. 88—23)

1. The combination with a photographic apparatus, of a lens through which light is admitted to the film, an adjustable diaphragm at a point at one side of said lens and separate therefrom adapted to regulate the amount of light entering said apparatus through said diaphragm, and a photo-electric device of a type that produces a luminous discharge when affected by light actuted by the light passing through said diaphragm, adapted to indicate when a given degree of light from said diaphragm impinges upon it.



2,000,426

WIRE CLOTH TIGHTENER

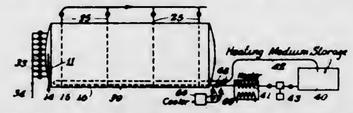
Loren G. Symons, Hollywood, Calif., assignor to Symons Brothers Development Company, Hollywood, Calif., a corporation of Delaware

Application June 11, 1931, Serial No. 543,572

3 Claims. (Cl. 209—403)

1. In a screen, a screen frame, longitudinal members therefor, transverse members connecting the longitudinal members intermediate their ends, a plurality of screen members, each removably secured to a transverse member intermediate the ends of the frame, a rotary member mounted upon each end of the screen frame, to which one of said screen members is secured, and means for rotating said rotary member and for thereby maintaining said screen member under tension, said means including helical springs generally concentric with the axis of rotation of said rotary member, one end of each such spring being secured in relation to the screen frame, the other being secured in relation to the rotary member.

2,000,427



HIGH MELTING POINT WAX AND PRODUCTION OF SAME

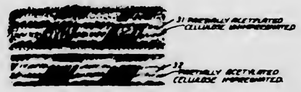
Claude F. Tears, Mountain Lakes, N. J., assignor to The Petroleum Processes Corporation, Wichita, Kans., a corporation of Kansas

Application November 16, 1933, Serial No. 698,283

5 Claims. (Cl. 196—20)

2. The herein disclosed process of producing a high melting point wax which comprises dissolving petrolatum stock in a normally gaseous liquefied hydrocarbon solvent, chilling and cold settling under pressure in a closed vessel to precipitate the wax content, withdrawing the oily content from the wax layer in the bottom of the vessel, heating the wax-solvent layer in the closed vessel to melt the wax and generate sufficient pressure by vaporization of the solvent to force

the melted wax and the remaining solvent from the vessel, distilling said wax-solvent mixture under pressure and regulating the pressure generated in the closed vessel to overcome the pressure of distillation to cause discharge of the wax-solvent layer from the closed vessel to said distillation unit.



2,000,428

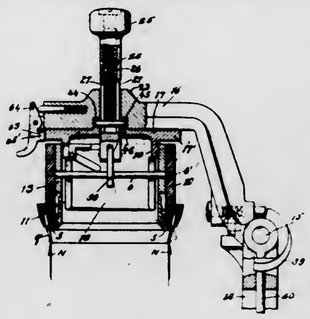
ELECTRICAL CONDUCTOR

Albert C. Walker, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application January 9, 1932, Serial No. 585,759

7 Claims. (Cl. 173—264)

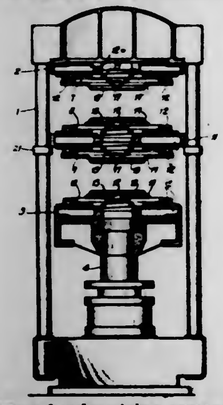
1. An electrical conductor comprising a conducting core, an insulated coating of partially acetylated cellulose having an acetyl value not greater than 35% surrounding said core and an outer coating of cellulose acetate having an acetyl value not less than 37% in intimate contact with and bonded to said inner coating.



2,000,429

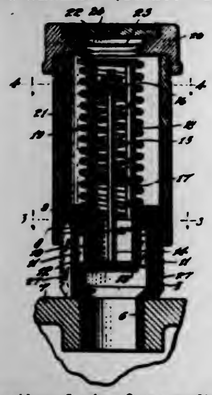
TRANSFER MECHANISM FOR CIRCULAR KNITTING MACHINES

Louis N. D. Williams, Ogontz, Pa., assignor to Scott and Williams, Incorporated, New York, N. Y., a corporation of Massachusetts



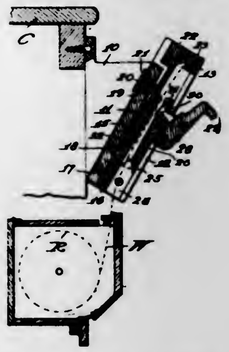
Application July 29, 1929, Serial No. 381,791

12 Claims. (Cl. 66—148)



1. Stitch transfer mechanism for a circular knitting machine, comprising a transfer ring adapted to cooperate with the needle cylinder of the knitting machine, a movable arm upon which said ring is rotatably mounted while in retracted position, and releasable means locking said ring against rotation about its own axis during the transfer of the stitches to the needles.

2,000,430
APPARATUS FOR MOLDING AND VULCANIZING PNEUMATIC TIRE COVERS AND THE LIKE
Harry Willshaw, Sutton Coldfield, and Thomas Norcross and Frederick George Broadbent, Erdington, Birmingham, England, assignors to Dunlop Tire and Rubber Corporation, Buffalo, N. Y., a corporation of New York
Application October 11, 1934, Serial No. 747,834
In Great Britain September 12, 1933
5 Claims. (Cl. 18—17)



1. Molding and vulcanizing apparatus comprising a pair of steam chests, a pair of mold halves, one for each steam chest, and arranged in complementary positions, clip rings, one for each mold half, and resilient means for mounting said clip rings on said steam chests to separate said clip rings from their respective mold halves when said mold halves and steam chests are in separated positions.

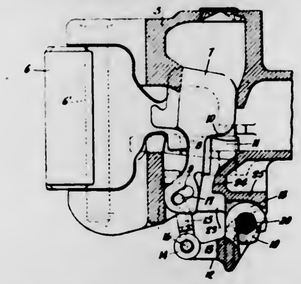
2,000,431
VENTING DEVICE FOR GASOLINE TANKS
Raymond L. Ammack, Cranford, N. J.
Application May 7, 1934, Serial No. 724,371
6 Claims. (Cl. 277—45)

1. In a venting device for gasoline tanks, a tubular member having a reduced portion externally threaded to enable it to be screwed into a tank, the upper edge of the inner wall of said member being bevelled to provide a valve seat, a first valve resting on said seat and having a downwardly extending portion provided with a plurality of spaced ribs, resilient means for maintaining said first valve on its seat, said ribs slidably engaging the inner wall of said member, the lower edge of said downwardly extending portion being bevelled to provide a valve seat, a second valve engaging said last mentioned valve seat, a valve stem connected to said second valve and extending upwardly through the downwardly extending portion, resilient means for maintaining said second valve on its seat, and a casing threadedly engaging the external wall of said member, said casing enclosing the resilient means of said valves, and the external wall of said member having a plurality of vertical recesses communicating with the interior of the casing.

2,000,432
ROLL PAPER CUTTER
William J. Andersen, Los Angeles, Calif., assignor of three-fourths to James W. McClintock, Los Angeles, Calif.
Application December 3, 1934, Serial No. 755,743
8 Claims. (Cl. 242—55.5)

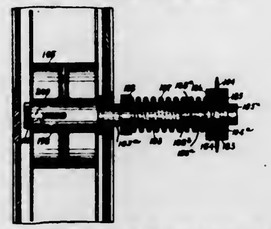
6. In a roll paper cutter, a frame, a transversely disposed rail in the upper portion of said frame, a member mounted in the upper portion of the frame to move toward and away from said rail, a tearing strip carried by said member, a spring for yieldingly resisting the movement of said tearing strip carrying member away from said rail and manually operable means arranged for sliding movement in the frame below said rail for gripping a web of paper and moving same upwardly between said rail and tearing strip.

2,000,433
PUSH-PULL AMPLIFIER CONTROL
William Stoddard Barden, Stapleton, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application February 12, 1932, Serial No. 592,460
12 Claims. (Cl. 179—171)



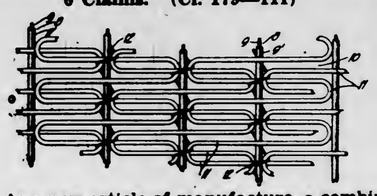
1. In a radio receiver including a detector, a push-pull amplifier having its common input circuit coupled to the detector output, the common output circuit of the push-pull amplifier including coupling means, said push-pull amplifier comprising a pair of tubes, a resistor in said common input circuit having one of its terminals fixedly connected to the grid of one of the push-pull tubes, and a manual volume control means for the receiver comprising means for adjustably connecting the grid of the other push-pull tube to said resistor, and a resistive path, having its midpoint grounded, in shunt with said resistor between said control means and said fixed terminal.

2,000,434
AMPULLA SYRINGE
Charles Baudouin and Karl Pietsch, Herafeld, Germany
Application September 14, 1932, Serial No. 633,136
In Germany September 17, 1931
5 Claims. (Cl. 128—220)



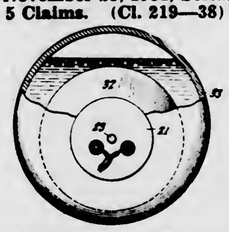
4. In an ampulla-syringe, wherein medicinal liquor is permanently stored, a cylindrical barrel closed at its front end by a wall member and its rear end by a frangible tip portion adapted to be broken before use, a plunger, slidably fitted in said barrel and adapted to enclose medicinal liquor between the front end of the barrel and the front end of the plunger, a tubular hypodermic needle substantially longer than said barrel, secured to said plunger and forming an operating means therefor, said needle being slidably fitted in an opening in the front wall of the barrel, and an aperture in said needle communicating with the space in the front end of the barrel and allowing said liquor to enter the needle, the said needle being adapted as to its length to be grasped by the operator and to serve on injecting the liquid as a retaining member, said barrel being adapted to be rearwardly withdrawn relatively to the plunger and the patient.

2,000,435
COUPLER MECHANISM
Arthur J. Baseley, Cleveland, Ohio, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio, a corporation of Ohio
Application September 27, 1929, Serial No. 395,531
6 Claims. (Cl. 213—166)



6. In a car coupler comprising a head, a knuckle and a lock for said knuckle, said lock having a leg extending into an opening in the bottom of the coupler head, a pair of projections extending downwardly from said head to the rear of said opening, said projections comprising parallel walls at least portions of which are in the planes of the respective side walls of said opening, and an integral trunnion connecting said projections and adapted to support a lock operating element.

2,000,436
FLEXIBLE DRIVE CONNECTION FOR WEB REELING APPARATUS
Per Johan Berggren, Chicago, Ill.
Original application December 20, 1928, Serial No. 327,200. Divided and this application May 5, 1933, Serial No. 669,520
5 Claims. (Cl. 242—55)



1. In a motion picture apparatus, a film reel, a shaft upon which the reel is mounted, a long bearing member in which the shaft is journaled, a sleeve secured to said shaft and telescoped with said bearing member, a sprocket wheel journaled on said shaft, friction discs engaging both sides of said sprocket, a clamping disc secured to said shaft and engaging one of said friction discs, a second clamping disc having an extended hub on said shaft and engaging the other friction disc, an adjustable nut on said sleeve, and a compression spring lying between said nut and said second clamping disc.

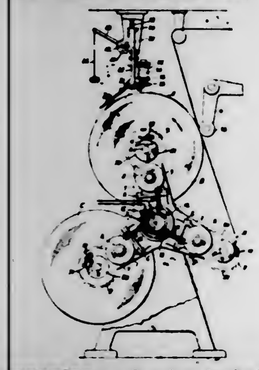
2,000,437
ELECTRICAL CONDENSER
William Colvin, Jr., Troy, N. Y.
Application February 19, 1931, Serial No. 517,006
6 Claims. (Cl. 179—111)

1. As a new article of manufacture, a combined plate element and dielectric for an electrical condenser comprising closely-spaced, separately insulated conductors interwoven with textile threads and forming a fabricated plate element.

2,000,438
ELECTRIC HEATING
James G. Dougherty, New York, N. Y.
Application November 28, 1931, Serial No. 577,779
5 Claims. (Cl. 219—38)

1. An electrical heating unit comprising a hermetically sealed tube, a body of heat conducting liquid substantially filling said tube, an electri-

cal heating element in said tube and electrical terminal means for said heating element sealed through the wall of the tube, said heating element being disposed eccentrically within the tube and adjustable means for securing and supporting said tube substantially horizontally with said eccentrically related heating element in the lower portion of the tube and consequently in the deepest part of the liquid substantially filling the tube.



2,000,439

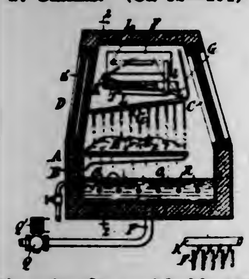
WEB RENEWING MECHANISM

Harland Fankhouser, Chicago, Ill., assignor to The Goss Printing Press Company, Chicago, Ill., a corporation of Illinois

Application October 15, 1931, Serial No. 569,002

22 Claims. (Cl. 242—58)

2. Web renewing mechanism including in combination a support for an active and a reserve web roll, means for moving the reserve web roll from pasting to running position, means for contacting the running web with the reserve web roll, and means for applying an adhesive coated sheet to one of the moving webs to joint it to the other.



2,000,440

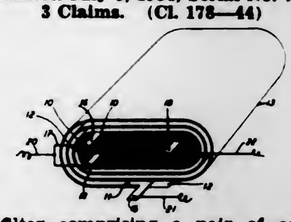
REFRIGERATING APPARATUS

Howard L. Ferman, Kitchawan, N. Y.

Application December 23, 1933, Serial No. 703,714

17 Claims. (Cl. 62—104)

1. A refrigerator for perishable products having refrigerating means for cooling and circulating the air within it, means for admitting liquid, sprinkling means for discharging such liquid in a shower over such products, and means associated with said refrigerating means for cooling such liquid in transit and before it reaches the showering means to a temperature slightly above the freezing point, whereby to avoid freezing such products.



2,000,441

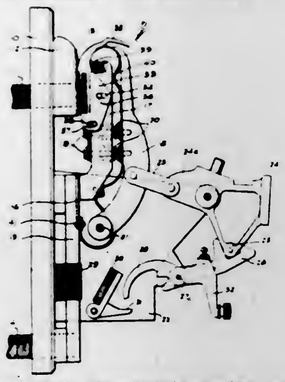
FILTER

Frederick J. Given, East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application July 6, 1934, Serial No. 733,978

3 Claims. (Cl. 178—44)

1. A filter comprising a pair of conducting sheets insulated from each other and wound in parallel to form a capacity element, one of said sheets having an extended portion wound on itself to form an inductance element and having a portion of its turns short-circuited to produce an effective resistance in shunt with the inductive element.



2,000,442

ELECTRIC CIRCUIT INTERRUPTER

George A. Healis, Philadelphia, Pa., assignor to I-T-E Circuit Breaker Company, Philadelphia, Pa., a corporation of New Jersey

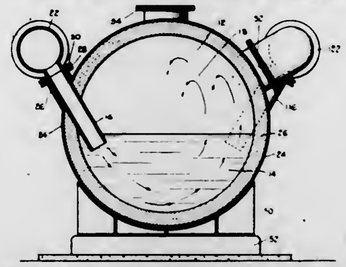
Application May 15, 1934, Serial No. 725,676

17 Claims. (Cl. 200—146)

1. In an electric circuit interrupter, cooperating relatively movable contact structures having opposed substantially plane contact surfaces at an angle to the plane of relative motion, and a plurality of conducting elements disposed individually to engage both of said contact surfaces and to form a bridging connection therebetween in circuit-closing position of said interrupter.

2,000,443

APPARATUS FOR THE TREATMENT OF A GAS BY A LIQUID



Ingenuin Hechenbleikner, Charlotte, N. C., assignor to Chemical Construction Corporation, Charlotte, N. C., a corporation of Delaware

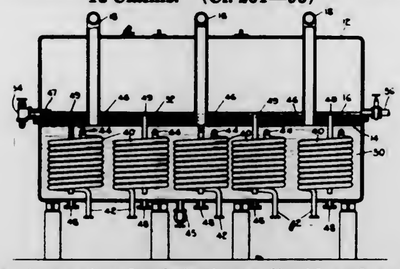
Application February 3, 1931, Serial No. 513,091

6 Claims. (Cl. 261—121)

1. Apparatus for bringing a gas and a liquid into intimate contact, comprising a vessel partially filled with the liquid and having an arcuate bottom, a gas inlet including a downwardly directed nozzle the lower end of which

is fully open and submerged in the liquid very close to one side of the vessel, and a gas outlet

above the liquid, whereby the gas and with it the liquid are circulated downwardly and then upwardly around the aforesaid arcuate bottom.



2,000,444

METHOD OF AND APPARATUS FOR BRINGING A LIQUID AND A GAS INTO INTIMATE CONTACT OR MIXTURE

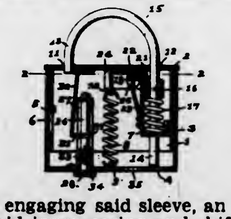
Ingenuin Hechenbleikner, Charlotte, N. C., assignor to Chemical Construction Corporation, Charlotte, N. C., a corporation of Delaware

Application June 24, 1932, Serial No. 619,054

13 Claims. (Cl. 261—96)

1. Apparatus for bringing a liquid and a gas into intimate contact or mixture, as for absorption, scrubbing, or condensation, comprising an enclosed chamber having a perforated diaphragm intermediate the top and bottom of the chamber, a bed thereon of gravel or pebbles of quartz rock or other material not attacked by the gas and liquid, a body of the liquid partially filling the chamber and covering at least a portion of the bed of gravel, a gas inlet arranged to feed the gas into the chamber at a point below the aforesaid diaphragm, and means to adjust the liquid level in the chamber relative to the bed of gravel; the factors of specific gravity of the liquid, specific gravity of the pebbles, the gas velocity, and the liquid level being so interrelated and controlled as to cause a breaking up of the gas into a fine state of subdivision and an agitation or seething of the gravel or pebbles, but without causing turbulence or spray of liquid upwardly into the gas space in the chamber.

2,000,445



PADLOCK

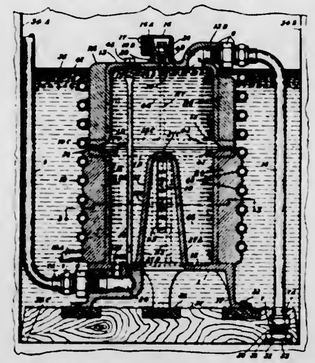
Yustina Husarik, Russelton, Pa., assignor of one-half to C. A. Filkorn, Springdale, Pa.

Application May 4, 1934, Serial No. 723,839½

4 Claims. (Cl. 70—108)

1. In combination, a padlock comprising, an inner casing, a top plate fixed to the upper end of said inner casing and provided with a pair of spaced apertures, a shackle including a pair of arms normally extending through said apertures into said inner casing, a sleeve fixed on one of said arms, a locking element mounted in said inner

casing and engaging said sleeve, an outer casing inclosing said inner casing and shiftable on the latter to permit access to said locking element, and means for securing said outer casing against movement on said inner casing.



2,000,446

LIQUID CHILLING APPARATUS

Thomas Alfred Jenkins, Roselle, N. J.

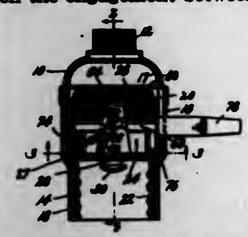
Application October 24, 1933, Serial No. 694,954

3 Claims. (Cl. 62—141)

1. In an apparatus of the type described, a liquid chilling tank, composed of a bottom unit, having formed integral thereto, at the base, a hollow protuberant structure, with a plurality of hollow ribs, connecting said hollow protuberant structure, to adjoining wall of chilling tank, to increase heat conducting surface and effect rapid transfer of heat from liquids in chilling tank, to a liquid refrigerant, in contact with exterior surfaces of chilling tank, a top unit, forming a component part of chilling tank.

2,000,447

ELECTRIC SWITCH



Arthur A. Johnson, New Bedford, Mass., assignor to John I. Paulding, Inc., New Bedford, Mass., a corporation of Massachusetts

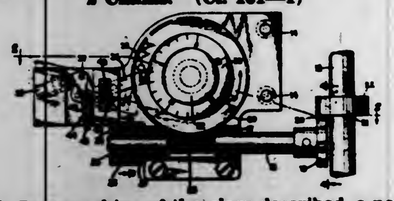
Application December 19, 1929, Serial No. 415,342

2 Claims. (Cl. 173—346)

1. An electric switch comprising a recessed insulating body, a pair of fixed contacts mounted in separated relation in said recess, a rotary spindle having an inclined cam portion adapted to be reversed in inclination by the rotation of said spindle, a U-shaped rocker member loosely mounted on and straddling the cam portion of said rotary spindle, an actuating spring for holding said rocker member in engagement with said rotary spindle, said spring having closed ends, one abutting said rocker member and the other the bottom of said recess and said bottom being in a plane perpendicular to the plane of the con-

tacting surfaces of said fixed contacts to prevent arcing when the engagement between the rocker

member and said contacts is broken by the operation of the rotary spindle.



2,000,448

TIMING DEVICE FOR WASHING MACHINES

Gustav E. Keil, St. Joseph, Mich., assignor to Nineteen Hundred Corporation, Binghamton, N. Y., a corporation of New York

Application January 17, 1931, Serial No. 509,395

2 Claims. (Cl. 161—1)

1. In a machine of the class described, a power driven shaft, means for setting the machine into operation, means for controlling said first mentioned means to stop the machine, reduction gearing between said shaft and said controlling means for driving the latter at a reduced speed, means for disconnecting said controlling means from said shaft to permit adjustment of said means to determine the period of operation of the machine, and means manually operable at will for controlling the operation of said first mentioned means independently of said adjustable means.

2,000,449

APPARATUS FOR PRODUCING HOLLOW ALUMINUM BOOT-TREES BY TIP CASTING

Emil Kleinger, Trier-an-the-Mosel, Germany

Application September 15, 1932, Serial No. 633,292

In Germany September 16, 1931

11 Claims. (Cl. 22—75)

1. Apparatus for producing hollow boot-trees, especially of aluminum, by means of tip casting comprising, in combination, a longitudinally divided mold having a ventilation hole at the extreme toe portion of the mold, means whereby the mold may be tilted to a position such that the extreme toe portion is at the highest point of the mold, said mold having a single funnel serving for filling the mold with molten metal and for pouring off the excess molten metal, a removable insert body in said ventilation hole, means in the path of tilting movement of the mold for rotating the insert body, and means for thereupon moving the insert body longitudinally.

2,000,450

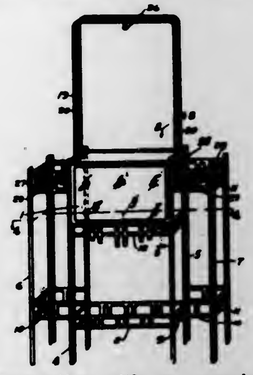
PROCESS OF MAKING CEREAL COFFEE

Athniel Kleas, Scobey, Mont.

No Drawing. Application December 19, 1930, Serial No. 503,490

3 Claims. (Cl. 99—11)

1. The process of making a cereal coffee consisting in cleaning separately each of a variety of kernels of grain by removing foul seeds, straw and chaff, then cleaning the kernels to the point of polishing, then steel cutting the kernels to the size and shape desired, then taking 90% of a mixture formed of 33⅓% of the cut kernals of one kind of grain and adding it to 66⅔% of cut kernels of another kind of grain and adding to this mixture 9% of granulated sugar and 1% of salt and then thoroughly mixing in a dry state, after which steam is applied while the mixing process continues and then drying the same after which toasting to the desired color.



2,000,451

COMBINATION AQUARIUM

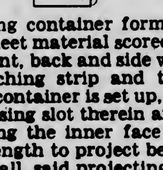
Adolf W. Krieger, Brooklyn, N. Y.

Application November 4, 1932, Serial No. 641,208

1 Claim. (Cl. 119—5)

The combination with an aquarium stand of the type having adjoining plant stands; of an adjustable aquarium supporting platform in said aquarium stand and an adjustable inverted U shaped bracket extending upward above said aquarium stand and adjustably mounted thereon in which the bracket may be lowered to form a handle and raised to support a plant, bird cage or the like.

2,000,452



INFLATED ARTICLE AND METHOD OF MAKING THE SAME

Cuyler S. McChesney, Kenmore, N. Y., assignor to Dunlop Tire and Rubber Corporation, Buffalo, N. Y., a corporation of New York

Original application December 29, 1931, Serial No. 583,640. Divided and this application February 16, 1934, Serial No. 711,453

5 Claims. (Cl. 18—55)

1. A hollow resilient wall article formed of two halves joined on a seam, the edge of said seam being inclined to the plane of juncture of said halves so that the edge of one half overlaps the edge of the other, the angle of the overlapped

part of the seam being more acute than that of the overlapping edge and being depressed inwardly by the latter.

2,000,453

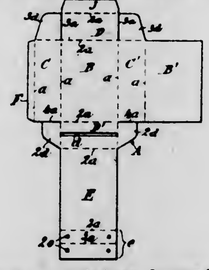
ENAMEL AND PROCESS OF MAKING SAME

John J. Murray, Arlington, and Louis A. White, Medford, Mass.; said White assignor to Rogers Isinglass & Glue Company, Gloucester, Mass.

No Drawing. Application February 21, 1933, Serial No. 657,840

11 Claims. (Cl. 95—7)

1. A composition enamel including to each gallon, about twenty ounces of glue, about two ounces of ammonium hydroxide, about sixty-four ounces of alcohol and about one and a half ounces of chromic acid.



2,000,454

TOILET PAPER CONTAINER AND DISPENSER

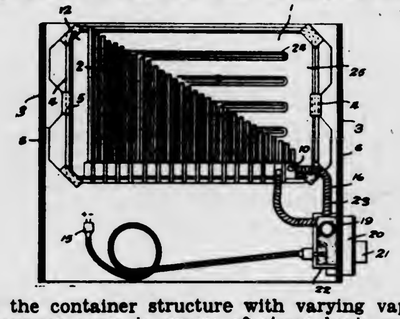
William H. Peters, Castleton-on-Hudson, N. Y., assignor to Wheeler Paper Corporation, Albany, N. Y., a corporation of New York

Application March 24, 1934, Serial No. 717,150

4 Claims. (Cl. 206—57)

1. A dispensing container formed from a unitary blank of sheet material scored to define areas constituting front, back and side walls with a supplemental attaching strip and top and bottom walls when the container is set up, the bottom wall having a dispensing slot therein and an extension portion overlying the inner face of an adjacent wall and of a length to project beyond the top of said adjacent wall, said projecting portion of said extension being bent back upon itself and having its free edge extending into the container to provide a supporting tab therefor.

2,000,455



ELECTRICAL HEATING DEVICE

Louis T. M. Ralston and Edward D. Bottaford, New York, N. Y., assignors to Chelva Heat Inc., Newark, N. J., a corporation of Delaware

Application April 27, 1931, Serial No. 533,126

6 Claims. (Cl. 219—38)

1. An electrical heating device comprising a metallic closed container structure, an electrical heating element external to said container but in contacting relationship therewith, diphenyl within said container under partial vacuum, the heat conducted from said element vaporizing said chemical, said vapor heating the body

of the container structure with varying vapor pressures never in excess of atmospheric pressure within a temperature range up to 500 degrees Fahrenheit.

2,000,456

DYEING SWAB

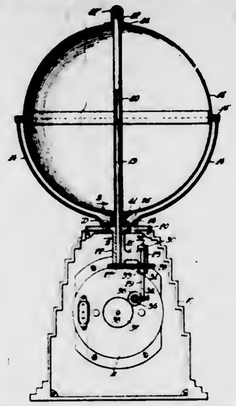
John Schifter, New York, N. Y.

Application June 9, 1932, Serial No. 616,205

9 Claims. (Cl. 132—12)

1. A dyeing device for hair and beards comprising in combination, a pointed handle, a clamp integral with but longitudinally offset from said handle, a detachable clamp parallel with the integral clamp, a swab intermediate said clamps to retain and extrude pigment, and means to lock and release said swab relative to said clamps.

2,000,457

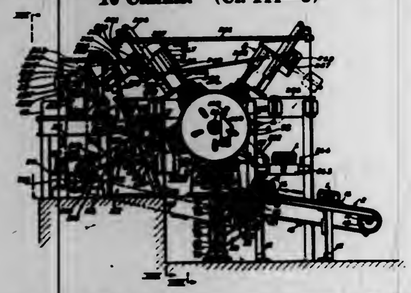


CHRONOLOGICAL INSTRUMENT

Herman E. Schulse, East Orange, N. J., assignor to Uniclox Corporation, a corporation of Delaware

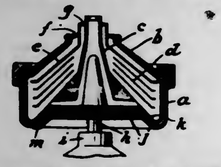
Application July 16, 1929, Serial No. 378,615

Renewed September 7, 1934



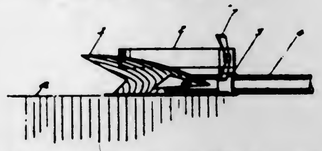
4 Claims. (Cl. 58—44)

2. A chronological instrument including a clock and a terrestrial globe, means for driving



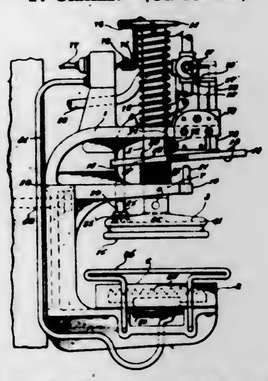
the globe from the clock including a friction clutch, the driving element of said clutch constituting a support for the globe, a hollow shaft rigidly connecting the polar axes of the globe and affixed with respect to the driven element of the friction clutch and a shaft affixed with respect to the driving element of the clutch and over which said hollow shaft is adapted to telescope.

2,000,458
ADZING AND BORING MACHINE
Grant B. Shipley, Pittsburgh, Pa., assignor to The Wood Preserving Corporation, Pittsburgh, Pa., a corporation of Delaware
Application May 17, 1934, Serial No. 726,017
10 Claims. (Cl. 144—3)



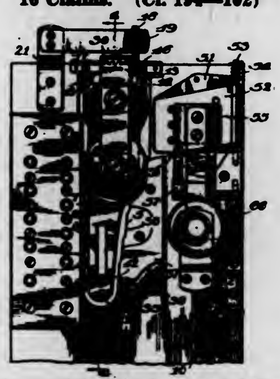
1. A combined adzing and boring machine, comprising a tie carriage rotatable on a horizontal axis and provided with means for gripping ties, elevating means for supplying ties to said gripping means, means for automatically actuating the elevating means in synchronism with the movements of the carriage for supplying ties to the gripping means at regular predetermined intervals, power-actuated adzing and boring tools disposed adjacent the path of movement of said gripped ties and arranged to act successively on each tie, means for successively moving said tools into operating relation with each tie, and means for disengaging the gripping means from each tie after it has been adzed and bored.

2,000,459
SELF-DRAINING CENTRIFUGAL BOWL
George J. Streznaski, Poughkeepsie, N. Y., assignor to The De Laval Separator Company, New York, N. Y., a corporation of New Jersey
Application March 29, 1933, Serial No. 663,295
10 Claims. (Cl. 233—46)



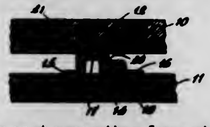
1. The combination, with a centrifugal bowl provided with a regular discharge outlet adapted to function during centrifugation, a bowl driving spindle extending downward from the bowl and a spindle bearing beneath the bowl, of a drain channel rotatable with the bowl extending from the bottom peripheral portion of the bowl to a point nearer its axis of rotation than said outlet and thence extending away from said axis and terminating a substantial distance therefrom.

2,000,460
LAWN EDGER AND WEEDER
Jacob Apfel, George Ling, and Richard S. Jarrett, Hamilton, Ohio
Application May 9, 1933, Serial No. 670,074
1 Claim. (Cl. 97—227)



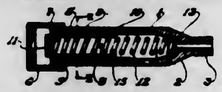
An adjustable guiding runner attachment for a lawn edger, said runner comprising a long flat narrow strip of metal or the like curved at one end to present a leading edge and having means for adjustable attachment to the handle of a lawn edger at the other end, said means including a holder a wing nut and a bolt, whereby the guiding runner is susceptible of vertical horizontal and revolving adjustment relative to the associated lawn edger to regulate the width and depth of groove cut by the said associated lawn edger.

2,000,461
VULCANIZER FOR REPAIR OF INNER TUBES
John J. Batterman, Cleveland, Ohio, assignor to Gabriel Pneumatic Vulcanizer, Incorporated, Cleveland, Ohio, a corporation of Ohio
Application November 11, 1932, Serial No. 642,189
17 Claims. (Cl. 18—18)



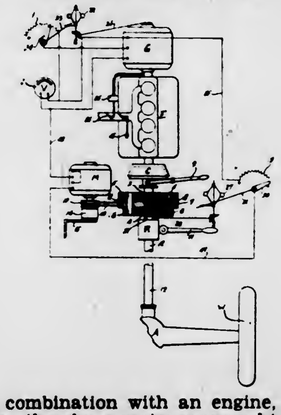
4. In a vulcanizer for the repair of inner tubes and casings of pneumatic tires, the combination with a hot plate of a pressure member, a yielding pad carried thereby a plunger carrying the pressure member and mounted to be freely moved towards and from the hot plate in a direction normal thereto of a one way clamp adapted to lock the plunger against retraction from the work in each and every position which it assumes in advancing, and means for releasing said locking means permitting the plunger and pressure member to be retracted, said locking means consisting of a rigid member arranged transversely to the plunger and provided with means for engaging the opposite lateral sides of the plunger, means for holding one end of said transverse member substantially stationary, said means having a gripping action whereby it locks the plunger as the rigid member is rocked, the releasing means serving to rock the rigid member oppositely to the direction in which it moves in locking.

2,000,462
COIN SELECTOR
George S. Bredd, Chicago, Ill.
Application March 28, 1932, Serial No. 601,478
16 Claims. (Cl. 194—102)



1. A coin receiving device comprising in combination a coin receiver adapted to be moved in two directions from a normal position, separate moving means to move said receiver in said directions, and a selective actuating means for said moving means, said actuating means being selectively sensitive and responsive to coin-like inserts received by said receiver in normal postion of the latter.

2,000,463
SLIDING SEAT MOUNTING FOR VEHICLES
Montague P. Browne, Buffalo, N. Y., assignor to Mechanical Devices Corporation of America, Buffalo, N. Y., a corporation of New York
Application March 3, 1932, Serial No. 596,499
6 Claims. (Cl. 155—14)



1. A sliding seat mounting for automobiles and the like, comprising a member adapted for attachment to the floor and having a guide-head rising therefrom and a guide-groove arranged parallel thereto and opening laterally toward said head, and a second member adapted for attachment to the seat and having a guideway engaging said guide-head and a laterally projecting guide-tongue engaging said guide-groove.

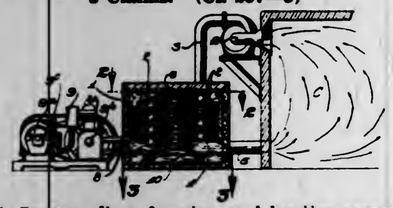
2,000,464
AIR MIXING DEVICE FOR GASEOUS FUELS
Joseph A. Hempstead, Pittsburgh, Pa.
Application March 1, 1933, Serial No. 659,152
2 Claims. (Cl. 251—144)

1. A device for diluting gaseous fuels as they are drawn into the combustion chambers of internal combustion engines, comprising a valve sleeve open at one end and capped at its other end and adapted to be placed in the fuel intake line between the throttle valve and the combustion chambers with its interior chamber in communication with the fuel intake passage, a hollow plunger operatively disposed within said valve chamber, a spring disposed within said plunger abutting at one end against a shoulder provided in the valve sleeve, said sleeve having a plurality of angularly and axially spaced ports, and said plunger having angularly and axially spaced ports the spacing of which is such that different ports of the sleeve and plunger will be in register singly and in multiples for different axial positions of the plunger, and means for maintaining the ports of the plunger and valve sleeve in cooperative alinement for any movement of said plunger in the valve sleeve.

2,000,465
VEHICLE DRIVE
Frank R. Higley, Cleveland Heights, Ohio
Application January 20, 1933, Serial No. 652,669
17 Claims. (Cl. 172—239)

1. In combination with an engine, a generator driven thereby, a motor arranged to be driven by the generator, means for controlling the drive of said motor from said generator, differential means having an output element and a pair of input elements arranged for differential drive thereof, means for driving one of said input elements from said engine, a driving connection from said motor to the other of said input elements, and means independent of the motor driving connections, for automatically opposing drive of said motor-driven input element by either of the other differential elements.

2,000,466
UPHOLSTERY FINISHING STRIP
Albert L. Howard, Brockton, Mass., assignor to Hamilton-Wade Company, Brockton, Mass., a corporation of Massachusetts
Application May 21, 1930, Serial No. 454,328
3 Claims. (Cl. 155—184)

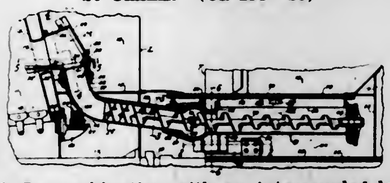


1. Molding strip for upholstery, comprising a non-metallic bottom strip adapted to be nailed in place, a plurality of metallic fastener elements carried by the bottom strip and extending upwardly from its top face, an independent top strip including a core of plastic composition covered with a fabric and having a flat bottom face adapted to fit onto the top face of the bottom strip, the top strip being relatively thick and its top face being convex, and metallic means imbedded into the central portion only of the core of the top strip in a manner completely housed within the top face thereof and cooperating

with the fastener elements to secure the top and bottom strips together, the top strip being open through the fabric covering at its bottom face in

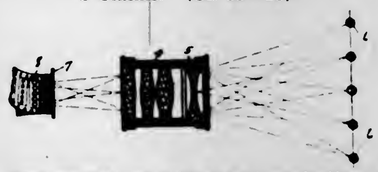
alignment with said metallic means whereby to receive the metallic fastener elements therethrough.

2,000,467
COOLING, FREEZING AND HEATING APPARATUS
Theodore Lindseth, Coronado, Calif.
Application September 9, 1931, Serial No. 561,841
3 Claims. (Cl. 257—8)



1. In a cooling, freezing and heating apparatus, an air circulating system including a chamber, an air conduit connected therewith, and fan means for maintaining circulation of air through said conduit and chamber, a portion of said conduit arranged in a coil, a tank for receiving said coil, a temperature transmitting medium contained in said tank in direct contact with said coil and immersing the same, freezing coils positioned and arranged both inside and outside of the coil in said conduit and immersed in said temperature transmitting medium, a heating medium positioned in alignment with and below the coil in said conduit immersed in and in direct contact with the temperature transmitting medium in said tank, said freezing coils forming guide means for directing the temperature transmitting mediums as heated around said conduit coil.

2,000,468
LOCOMOTIVE FUEL CONVEYER
Henry E. Lippert, Pittsburgh, Pa.
Application March 26, 1934, Serial No. 717,295
20 Claims. (Cl. 198—15)

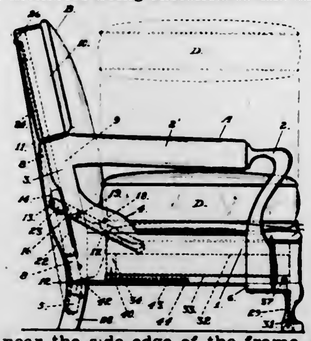


1. In an intercoupled locomotive and tender, a conveyer comprising a conduit section mounted on one of said vehicles and arranged to swing laterally with respect thereto when the vehicles operate around a curve, a conduit section flexibly jointed at one end to the first-named section and supported at its other end on the other vehicle, the second-named section extending from the locomotive to the tender and arranged to swing laterally with respect to both vehicles when the vehicles operate around a curve, one of said conduit sections being arranged to facilitate maximum lateral displacement between the adjacent ends of the vehicles, the other conduit section being arranged to facilitate only a portion of said displacement, and transfer means in the conduit system.

2,000,469
LOCOMOTIVE FUEL CONVEYER
Henry E. Lippert, Pittsburgh, Pa.
Application May 5, 1934, Serial No. 724,140
20 Claims. (Cl. 198—15)

1. In combination with an intercoupled locomotive and tender, a conduit section mounted on one of said vehicles to swing laterally with respect thereto, means tending to prevent such movement of said conduit section, a conduit section flexibly jointed at one end to the first-named section and supported at its other end on the other vehicle, and a stop element on one of said conduit sections arranged to contact the other section for limiting angular movement between the conduit sections.

2,000,470
PHOTOGRAPHY
Max O. Miller, Los Angeles, Calif.
Application February 16, 1931, Serial No. 516,029
2 Claims. (Cl. 88—16)

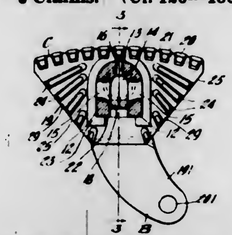


1. The process of taking and projecting pictures which consists in photographing an object through a conventional camera lens with a concaved spherical lens in front of the camera lens to increase the field thereof without increasing the object distance, using an aperture plate having an aperture reduced vertically to prevent exposure of a portion of the standard film frame area, and then projecting said picture through a double convexed spherical lens having a focal length less than that of the lens usually used at the same screen distance and through an aperture plate having the same size of aperture as that in the aperture plate through which the picture was taken.

2,000,471
CHAIR BED
Fred E. Moore, Alhambra, Calif.
Application April 2, 1928, Serial No. 266,662
1 Claim. (Cl. 155—45)

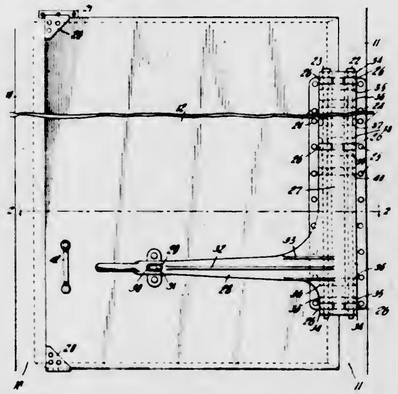
In a chair, a main seat frame, said seat frame forming a seat support, an auxiliary frame arranged to be disposed over the seat support, as well as to form an extension to the main seat

frame for a leg rest, said auxiliary frame having front supporting legs, and a pair of flexible fabric members for limiting the extension movement of the auxiliary frame, one end of each of said members being fastened to the main seat



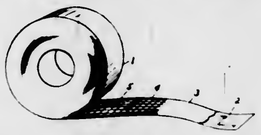
frame near the side edge of the frame, and the other end being fastened near the rear edge of the auxiliary frame to the under side thereof, whereby when the auxiliary frame is disposed in the seat frame, said flexible members are in doubled relation between the two frames.

2,000,472
EGG SEPARATOR
James A. Muzzio, Madison, Ohio
Application February 23, 1934, Serial No. 712,465
6 Claims. (Cl. 146—2)



1. An egg separator comprising a support having an annular body portion and a downwardly-extended diametrically-connected strap, a basket rotatable in and on the body portion and centered in the strap, the basket being formed with a plurality of slots, the strap having a series of teeth projecting oppositely to the direction of basket rotation, said teeth being formed with outwardly-projecting lips.

2,000,473
GRATE
John F. O'Connor, Chicago, Ill.
Application February 10, 1933, Serial No. 656,076
6 Claims. (Cl. 126—180)

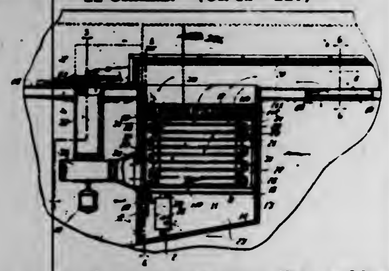


1. A fuel supporting unit for a grate and adapted to be detachably mounted on a carrier bar, said unit comprising: a vertical web arranged to extend transversely of the carrier bar; a series of fingers along the top of the web extending transversely of the latter and to opposite sides thereof; and a plurality of heat radiating flanges on the sides of the web, said flanges extending from the side edges of the web inwardly and upwardly and terminating below the fingers and defining air preheating passages for the air of combustion.

2,000,474
DOOR MOUNTING AND OPERATING MECHANISM
John F. O'Connor, Chicago, Ill.
Application May 5, 1933, Serial No. 669,466
10 Claims. (Cl. 20—16)

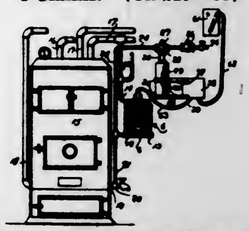
1. In a structure having a frame defining a door opening and a pivoted door therefor and wherein the pivoted edge of the door engages the adjacent edge of the door frame when in closed position, the combination with two relatively elongated hinge members secured respectively to the pivoted edge of the door and adjacent door frame structure; of a combined operating arm and integrally formed correspondingly elongated link pivotally connected to both of said hinge members and bridging the joint between the door and door frame, the arm being extended so as to overlie the door when the latter is in closed position.

2,000,475
ADHESIVE MATERIAL
Philip L. O'Donnell, Cincinnati, Ohio
Application February 11, 1932, Serial No. 592,303
5 Claims. (Cl. 154—43)



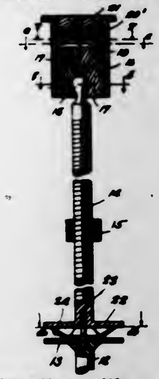
1. In an adhesive sheeting for masking and the like the combination of an impervious thin flexible backing material that has a low coefficient of adhesion to non-drying adhesive, a reticulated reinforcement for said backing, a flexible drying adhesive for attaching the reticulated material to the backing and a film of non-drying adhesive covering said reticulated material and said drying adhesive and conforming superficially to the mesh of the reticulated reinforcement.

2,000,476
TOOL SETTING GAUGE
William D. Schmidt, Worcester, Mass., assignor to The Heald Machine Company, Worcester, Mass., a corporation of Massachusetts
Application December 14, 1931, Serial No. 580,878
12 Claims. (Cl. 33—185)



1. In a device for adjusting a cutting tool in a supporting bar, a frame, means on said frame for clamping said device to said bar, means on said frame in a predetermined relation to the clamping means and engageable with one end of said cutting tool for indicating the extent of projection of the cutting edge of said cutting tool radially beyond the axis of said bar, means on said frame in predetermined relation to said indicating means and engageable with the other end of said cutting tool for adjusting said cutting tool radially in said bar, and means on said frame for adjusting the angularity of the cutting edge of said tool relative to the axis of said supporting bar.

2,000,477
COOLING AND VENTILATING SYSTEM
Edward F. Carry, Chicago, Ill.; Mabel D. Carry, executrix of the estate of said Edward F. Carry, deceased, assignor to Pullman-Standard Car Manufacturing Company, a corporation of Delaware
Application November 14, 1927, Serial No. 233,161
11 Claims. (Cl. 62—117)



1. In a railway passenger car, the combination with upper deck framing including transverse and connecting longitudinal members, of ceiling, wall, and removable floor panels suspended from certain of said longitudinals and defining an air chamber above the space normally devoted to service and accommodation requirements and divided into compartments, a cooling coil in one of said compartments supported independently of adjacent floor panels, a mechanical refrigerating apparatus suspended beneath the car and having fluid connection with said cooling coil, and valve means in another of said compartments controlling the supply of refrigerant from said apparatus to the cooling coil.

ELECTRIC WATER HEATER
Sebastiano Conte, Princeton, N. J.
Application March 22, 1933, Serial No. 662,161
4 Claims. (Cl. 219—38)

1. An electric water heating system comprising an electric heating unit placed in close relation to the water carrier and including a normally closed switch element, and an operating lever for the switch element including a disk plate upon which water of condensation is adapted to fall for pivotally moving the lever and opening the switch and said lever being automatically returnable to switch closing position in the absence of flow of water of condensation.
